

Judith Brands

List of Publications by Citations

Source: <https://exaly.com/author-pdf/3497850/judith-brands-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
19	PINK1 deficiency impairs mitochondrial homeostasis and promotes lung fibrosis. <i>Journal of Clinical Investigation</i> , 2015 , 125, 521-38	15.9	303
18	Endothelial glycocalyx: sweet shield of blood vessels. <i>Trends in Cardiovascular Medicine</i> , 2007 , 17, 101-5	6.9	138
17	Heparin impairs glycocalyx barrier properties and attenuates shear dependent vasodilation in mice. <i>Hypertension</i> , 2007 , 50, 261-7	8.5	60
16	ATF3 represses PINK1 gene transcription in lung epithelial cells to control mitochondrial homeostasis. <i>Aging Cell</i> , 2018 , 17, e12720	9.9	55
15	Agonist-induced impairment of glycocalyx exclusion properties: contribution to coronary effects of adenosine. <i>Cardiovascular Research</i> , 2010 , 87, 311-9	9.9	33
14	Treatment of microvascular micro-embolization using microbubbles and long-tone-burst ultrasound: an in vivo study. <i>Ultrasound in Medicine and Biology</i> , 2015 , 41, 456-64	3.5	24
13	Bradykinin- and sodium nitroprusside-induced increases in capillary tube haematocrit in mouse cremaster muscle are associated with impaired glycocalyx barrier properties. <i>Journal of Physiology</i> , 2008 , 586, 3207-18	3.9	22
12	New insights into the microvascular mechanisms of drag reducing polymers: effect on the cell-free layer. <i>PLoS ONE</i> , 2013 , 8, e77252	3.7	15
11	Effect of acute hyaluronidase treatment of the glycocalyx on tracer-based whole body vascular volume estimates in mice. <i>Journal of Applied Physiology</i> , 2013 , 114, 1132-40	3.7	14
10	Acute attenuation of glycocalyx barrier properties increases coronary blood volume independently of coronary flow reserve. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2010 , 298, H515-23	5.2	14
9	Noninvasive sublingual microvascular imaging reveals sex-specific reduction in glycocalyx barrier properties in patients with coronary artery disease. <i>Physiological Reports</i> , 2020 , 8, e14351	2.6	9
8	Modulation of pre-capillary arteriolar pressure with drag-reducing polymers: a novel method for enhancing microvascular perfusion. <i>Microcirculation</i> , 2012 , 19, 580-5	2.9	9
7	Paternal deficiency of complement component C1q leads to a preeclampsia-like pregnancy in wild-type female mice and vascular adaptations postpartum. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2020 , 318, R1047-R1057	3.2	8
6	Comparison of four mathematical models to analyze indicator-dilution curves in the coronary circulation. <i>Medical and Biological Engineering and Computing</i> , 2011 , 49, 1471-9	3.1	8
5	Whole-body recruitment of glycocalyx volume during intravenous adenosine infusion. <i>Physiological Reports</i> , 2013 , 1, e00102	2.6	6
4	Role for glycocalyx perturbation in atherosclerosis development and associated microvascular dysfunction. <i>Future Lipidology</i> , 2007 , 2, 527-534		6
3	Maternal Vascular Lesions in the Placenta Predict Vascular Impairments a Decade After Delivery. <i>Hypertension</i> , 2021 , HYPERTENSIONAHA12118394	8.5	1
