#	Article	lF	CITATIONS
1	Effective treatment of dye polluted wastewater using nanoporous CaCl2 modified polyethersulfone membrane. Chemical Engineering Research and Design, 2019, 124, 266-278.	2.7	77
2	Improved hydrophilic property of PES/PEG/MnCO ₃ blended membranes for synthetic dye separation. International Journal of Environmental Studies, 2018, 75, 592-604.	0.7	13
3	Recent progress in the hydrophilic modification of alumina membranes for protein separation and purification. Ceramics International, 2017, 43, 915-925.	2.3	52
4	Treatment of oil-in-water emulsion using tubular ceramic membrane acquired from locally available low-cost inorganic precursors. Desalination and Water Treatment, 2016, 57, 28056-28070.	1.0	16
5	Effect of microwave frequency on dielectric properties of oil palm shell (OPS) and OPS char synthesized by microwave pyrolysis of OPS. Journal of Analytical and Applied Pyrolysis, 2015, 112, 306-312.	2.6	40
6	Solar photocatalytic activity of anatase TiO2 nanocrystals synthesized by non-hydrolitic sol–gel method. Solar Energy, 2014, 101, 321-332.	2.9	109
7	Utilization of calcined Niâ€Al layered double hydroxide (LDH) as an Adsorbent for removal of methyl orange dye from aqueous solution. Environmental Progress and Sustainable Energy, 2014, 33, 154-159.	1.3	50
8	Adsorption isotherm, kinetic and thermodynamic studies of activated carbon prepared from <scp><i>Garcinia mangostana</i></scp> shell. Asia-Pacific Journal of Chemical Engineering, 2013, 8, 811-818.	0.8	17
9	Surface chemistry and adsorption mechanism of cadmium ion on activated carbon derived from Garcinia mangostana shell. Korean Journal of Chemical Engineering, 2013, 30, 1904-1910.	1.2	14
10	Various fabrication methods of porous ceramic supports for membrane applications. Reviews in Chemical Engineering, 2013, 29, .	2.3	33
11	Development of Ceramic Supports Derived from Low-Cost Raw Materials for Membrane Applications and its Optimization Based on Sintering Temperature. International Journal of Applied Ceramic Technology, 2011, 8, 227-238.	1.1	71
12	Effect of TiO2 addition on the fabrication of ceramic membrane supports: A study on the separation of oil droplets and bovine serum albumin (BSA) from its solution. Desalination, 2011, 279, 104-114.	4.0	85
13	Utilization of ball clay adsorbents for the removal of crystal violet dye from aqueous solution. Clean Technologies and Environmental Policy, 2011, 13, 141-151.	2.1	33
14	Investigation of equilibrium and kinetic parameters of methylene blue adsorption onto MCM-41. Korean Journal of Chemical Engineering, 2010, 27, 1184-1191.	1.2	56
15	Adsorption of crystal violet dye from aqueous solution using mesoporous materials synthesized at room temperature. Adsorption, 2009, 15, 390-405.	1.4	137
16	Fabrication and characterization of γ-Al2O3–clay composite ultrafiltration membrane for the separation of electrolytes from its aqueous solution. Journal of Membrane Science, 2009, 340, 181-191.	4.1	41
