#	ARTICLE	IF	CITATIONS
1	Infectivity of seropositive dogs, showing different clinical forms of leishmaniasis, to <i>Lutzomyia longipalpis</i> phlebotomine sand flies. <i>Veterinary Parasitology</i> , 2007, 147, 67-76.	1.8	134
2	Epidemiology of visceral leishmaniasis through spatial analysis, in Belo Horizonte municipality, state of Minas Gerais, Brazil. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2006, 101, 31-38.	1.6	86
3	Study on phlebotomine sand fly (Diptera: Psychodidae) fauna in Belo Horizonte, state of Minas Gerais, Brazil. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2004, 99, 795-803.	1.6	77
4	Phlebotomine sand flies in Porteirinha, an area of American visceral leishmaniasis transmission in the State of Minas Gerais, Brazil. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2004, 99, 481-487.	1.6	64
5	Eco-epidemiology of visceral leishmaniasis in the urban area of Paracatu, state of Minas Gerais, Brazil. <i>Veterinary Parasitology</i> , 2011, 176, 101-111.	1.8	49
6	Phlebotominae distribution in Janaúba, an area of transmission for visceral leishmaniasis in Brazil. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2009, 104, 56-61.	1.6	47
7	Importance of <i>Lutzomyia longipalpis</i> in the dynamics of transmission of canine visceral leishmaniasis in the endemic area of Porteirinha Municipality, Minas Gerais, Brazil. <i>Veterinary Parasitology</i> , 2005, 131, 213-220.	1.8	42
8	Epidemiology of Visceral Leishmaniasis in a Reemerging Focus of Intense Transmission in Minas Gerais State, Brazil. <i>BioMed Research International</i> , 2013, 2013, 1-6.	1.9	42
9	Phlebotomine sand flies (Diptera: Psychodidae) in the municipality of Várzea Grande: an area of transmission of visceral leishmaniasis in the state of Mato Grosso, Brazil. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2007, 102, 913-918.	1.6	33
10	Epidemiological aspects of vector, parasite, and domestic reservoir in areas of recent transmission and no reported human cases of visceral leishmaniasis in Brazil. <i>Acta Tropica</i> , 2015, 148, 128-136.	2.0	32
11	Phlebotomine Sand Fly Fauna and <i>Leishmania</i> Infection in the Vicinity of the Serra do Cipó National Park, a Natural Brazilian Heritage Site. <i>BioMed Research International</i> , 2015, 2015, 1-9.	1.9	29
12	Evaluation of the vectorial capacity of <i>Rhipicephalus sanguineus</i> (Acari: Ixodidae) in the transmission of canine visceral leishmaniasis. <i>Parasitology Research</i> , 2010, 106, 523-8.	1.6	24
13	Association of <i>Lutzomyia longipalpis</i> (Diptera: Psychodidae) population density with climate variables in Montes Claros, an area of American visceral leishmaniasis transmission in the state of Minas Gerais, Brazil. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2009, 104, 1191-1193.	1.6	22
14	Phlebotomine sandflies (Diptera: Psychodidae) in Governador Valadares, a transmission area for American tegumentary leishmaniasis in State of Minas Gerais, Brazil. <i>Revista Da Sociedade Brasileira De Medicina Tropical</i> , 2011, 44, 136-139.	0.9	19
15	Abundance of <i>Lutzomyia longipalpis</i> in urban households as risk factor of transmission of visceral leishmaniasis. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2016, 111, 302-310.	1.6	18
16	Detection of <i>Leishmania infantum</i> , the etiological agent of visceral leishmaniasis, in <i>Lutzomyia neivai</i> , a putative vector of cutaneous leishmaniasis. <i>Journal of Vector Ecology</i> , 2013, 38, 193-196.	1.0	16
17	Entomological Studies in Itapóna, Brazil, an Area With Visceral Leishmaniasis Transmission: Fauna Survey, Natural Leishmania Infection, and Molecular Characterization of the Species Circulating in Phlebotomine Sand Flies (Diptera: Psychodidae). <i>Journal of Medical Entomology</i> , 2019, 56, 1368-1376.	1.8	16
18	<i>Lutzomyia longipalpis</i> naturally infected by <i>Leishmania (L.) chagasi</i> in Várzea Grande, Mato Grosso State, Brazil, an area of intense transmission of visceral leishmaniasis. <i>Cadernos De Saude Publica</i> , 2010, 26, 2414-2419.	1.0	14

#	ARTICLE	IF	CITATIONS
19	Competence of non-human primates to transmit <i>Leishmania infantum</i> to the invertebrate vector <i>Lutzomyia longipalpis</i> . PLoS Neglected Tropical Diseases, 2019, 13, e0007313.	3.0	14
20	Dogs with divergent serology for visceral leishmaniasis as sources of <i>Leishmania</i> infection for <i>Lutzomyia longipalpis</i> phlebotomine sand flies – an observational study in an endemic area in Brazil. PLoS Neglected Tropical Diseases, 2020, 14, e0008079.	3.0	12
21	Evaluation of parasitological examination, kDNA polymerase chain reaction and rK39-based immunochromatography for the diagnosis of visceral leishmaniasis in seropositive dogs from the screening-culling program in Brazil. Revista Da Sociedade Brasileira De Medicina Tropical, 2014, 47, 462-468.	0.9	11
22	<i>Rattus norvegicus</i> (Rodentia: Muridae) Infected by <i>Leishmania</i> (<i>Leishmania</i>) <i>infantum</i> (syn. <i>Le. chagasi</i>) in Brazil. BioMed Research International, 2014, 2014, 1-7.	1.9	10
23	Baseline susceptibility to alpha-cypermethrin in <i>Lutzomyia longipalpis</i> (Lutz & Neiva, 1912) from Lapinha Cave (Brazil). Parasites and Vectors, 2015, 8, 469.	2.5	10
24	Evaluation of chemical spraying and environmental management efficacy in areas with minor previous application of integrated control actions for visceral leishmaniasis in Brazil. Acta Tropica, 2017, 176, 109-113.	2.0	10
25	Ecoepidemiological aspects of visceral leishmaniasis in an endemic area in the Steel Valley in Brazil: An ecological approach with spatial analysis. PLoS ONE, 2018, 13, e0206452.	2.5	10
26	Ecology of phlebotomine sand flies in a Brazilian area with recent leishmaniasis transmission (Itaúna,) Tj ETQq0 0 0 rgBT /Overlock 10 T	0.5	10
27	Aspects on the ecology of phlebotomine sand flies and natural infection by <i>Leishmania hertigi</i> in the Southeastern Amazon Basin of Brazil. Acta Tropica, 2018, 177, 37-43.	2.0	9
28	Canine visceral leishmaniasis in area with recent <i>Leishmania</i> transmission: prevalence, diagnosis, and molecular identification of the infecting species. Revista Da Sociedade Brasileira De Medicina Tropical, 2020, 53, e20200141.	0.9	6
29	Seroprevalence and molecular characterization of <i>Leishmania</i> in dogs from an endemic area of zoonotic visceral leishmaniasis in Brazil. International Journal of Veterinary Science and Medicine, 2017, 5, 70-74.	2.2	3
30	Impact of vector control actions in the abundance of <i>Lutzomyia longipalpis</i> in Montes Claros, Brazil. Acta Tropica, 2022, 228, 106305.	2.0	1
31	Eco-epidemiological study on sandflies and environmental aspects related to the transmission of leishmaniasis in a municipality of Minas Gerais, Brazil, 2015-2016. Arquivo Brasileiro De Medicina Veterinaria E Zootecnia, 2019, 71, 1805-1814.	0.4	0
