#	ARTICLE	IF	CITATIONS
1	Revisiting the effectiveness of repetitive transcranial magnetic stimulation treatment in depression, again. Australian and New Zealand Journal of Psychiatry, 2022, 56, 905-909.	2.3	3
2	Does switching between high frequency rTMS and theta burst stimulation improve depression outcomes?. Brain Stimulation, 2022, 15, 889-891.	1.6	2
3	Burnout and psychological distress amongst Australian healthcare workers during the COVID-19 pandemic. Australasian Psychiatry, 2021, 29, 26-30.	0.7	145
4	Accelerated theta burst stimulation for the treatment of depression: A randomised controlled trial. Brain Stimulation, 2021, 14, 1095-1105.	1.6	36
5	Reply to Hudaib. Brain Stimulation, 2021, 14, 1587-1588.	1.6	0
6	A pilot investigation of an intensive theta burst stimulation protocol for patients with treatment resistant depression. Brain Stimulation, 2020, 13, 137-144.	1.6	48
7	Efficacy, efficiency and safety of high-frequency repetitive transcranial magnetic stimulation applied more than once a day in depression: A systematic review. Journal of Affective Disorders, 2020, 277, 986-996.	4.1	18
8	Depressive symptom trajectories associated with standard and accelerated rTMS. Brain Stimulation, 2020, 13, 850-857.	1.6	17
9	Safe and successful treatment of depression with electroconvulsive therapy in a patient with implanted spinal cord stimulators. Brain Stimulation, 2020, 13, 955-956.	1.6	2
10	Is theta burst stimulation ready as a clinical treatment for depression?. Expert Review of Neurotherapeutics, 2019, 19, 1089-1102.	2.8	17
11	Is rTMS effective for anxiety symptoms in major depressive disorder? An efficacy analysis comparing left-sided high-frequency, right-sided low-frequency, and sequential bilateral rTMS protocols. Depression and Anxiety, 2019, 36, 723-731.	4.1	35
12	First episode psychosis in an adult patient with tuberous sclerosis. Australian and New Zealand Journal of Psychiatry, 2016, 50, 292-293.	2.3	1
