

Elisabeth B Marsh

List of Publications by Citations

Source: <https://exaly.com/author-pdf/3537607/elisabeth-b-marsh-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

53

#	Paper	IF	Citations
53	Neural regions essential for reading and spelling of words and pseudowords. <i>Annals of Neurology</i> , 2007 , 62, 481-92	9.4	86
52	Dissociation between egocentric and allocentric visuospatial and tactile neglect in acute stroke. <i>Cortex</i> , 2008 , 44, 1215-20	3.8	64
51	The outcome of children with intractable seizures: a 3- to 6-year follow-up of 67 children who remained on the ketogenic diet less than one year. <i>Epilepsia</i> , 2006 , 47, 425-30	6.4	43
50	Recovery from aphasia following brain injury: the role of reorganization. <i>Progress in Brain Research</i> , 2006 , 157, 143-56	2.9	42
49	Cognitive and neural mechanisms underlying reading and naming: evidence from letter-by-letter reading and optic aphasia. <i>Neurocase</i> , 2005 , 11, 325-37	0.8	40
48	Hemorrhagic transformation in patients with acute ischaemic stroke and an indication for anticoagulation. <i>European Journal of Neurology</i> , 2013 , 20, 962-7	6	33
47	Predictors of critical care needs after IV thrombolysis for acute ischemic stroke. <i>PLoS ONE</i> , 2014 , 9, e88657	5.7	29
46	Chronic post-stroke fatigue: It may no longer be about the stroke itself. <i>Clinical Neurology and Neurosurgery</i> , 2018 , 174, 192-197	2	29
45	Predicting Hemorrhagic Transformation of Acute Ischemic Stroke: Prospective Validation of the HeRS Score. <i>Medicine (United States)</i> , 2016 , 95, e2430	1.8	27
44	Novel score predicting gastrostomy tube placement in intracerebral hemorrhage. <i>Stroke</i> , 2015 , 46, 31-6	6.7	25
43	Serum creatinine may indicate risk of symptomatic intracranial hemorrhage after intravenous tissue plasminogen activator (IV tPA). <i>Medicine (United States)</i> , 2013 , 92, 317-323	1.8	18
42	The NIH Stroke Scale Has Limited Utility in Accurate Daily Monitoring of Neurologic Status. <i>Neurohospitalist, The</i> , 2016 , 6, 97-101	1.1	16
41	Diagnosing CNS vasculitis: the case against empiric treatment. <i>Neurologist</i> , 2012 , 18, 233-8	1.6	15
40	Safety of intravenous alteplase within 4.5 hours for patients awakening with stroke symptoms. <i>PLoS ONE</i> , 2018 , 13, e0197714	3.7	14
39	Predicting symptomatic intracerebral hemorrhage versus lacunar disease in patients with longstanding hypertension. <i>Stroke</i> , 2014 , 45, 1679-83	6.7	13
38	Hemispherectomy sustained before adulthood does not cause persistent hemispatial neglect. <i>Cortex</i> , 2009 , 45, 677-85	3.8	13
37	The Need for a Rational Approach to Vasoconstrictive Syndromes: Transcranial Doppler and Calcium Channel Blockade in Reversible Cerebral Vasoconstriction Syndrome. <i>Case Reports in Neurology</i> , 2016 , 8, 161-171	1	12

36	Race-Specific Predictors of Mortality in Intracerebral Hemorrhage: Differential Impacts of Intraventricular Hemorrhage and Age Among Blacks and Whites. <i>Journal of the American Heart Association</i> , 2016 , 5,	6	12
35	Pre-stroke employment results in better patient-reported outcomes after minor stroke: Short title: Functional outcomes after minor stroke. <i>Clinical Neurology and Neurosurgery</i> , 2018 , 165, 38-42	2	11
34	ICAT: a simple score predicting critical care needs after thrombolysis in stroke patients. <i>Critical Care</i> , 2016 , 20, 26	10.8	11
33	Shorter Intensive Care Unit Stays? The Majority of Post-Intravenous tPA (Tissue-Type Plasminogen Activator) Symptomatic Hemorrhages Occur Within 12 Hours of Treatment. <i>Stroke</i> , 2018 , 49, 1521-1524	6.7	10
32	Cerebral microbleeds shouldn't dictate treatment of acute stroke: a retrospective cohort study evaluating risk of intracerebral hemorrhage. <i>BMC Neurology</i> , 2018 , 18, 33	3.1	10
31	The Association between Specific Substances of Abuse and Subcortical Intracerebral Hemorrhage Versus Ischemic Lacunar Infarction. <i>Frontiers in Neurology</i> , 2014 , 5, 174	4.1	10
30	Infarct volume predicts critical care needs in stroke patients treated with intravenous thrombolysis. <i>Neuroradiology</i> , 2015 , 57, 171-8	3.2	9
29	Comparison of Traumatic Intracranial Hemorrhage Expansion and Outcomes Among Patients on Direct Oral Anticoagulants Versus Vitamin k Antagonists. <i>Neurocritical Care</i> , 2020 , 32, 407-418	3.3	9
28	Collaterals Predict Outcome Regardless of Time Last Known Normal. <i>Journal of Stroke and Cerebrovascular Diseases</i> , 2018 , 27, 971-977	2.8	9
27	Isolated aphasia in the emergency department: The likelihood of ischemia is low. <i>Clinical Neurology and Neurosurgery</i> , 2017 , 163, 24-26	2	8
26	Keep it simple: vascular risk factors and focal exam findings correctly identify posterior circulation ischemia in "dizzy" patients. <i>BMC Emergency Medicine</i> , 2016 , 16, 37	2.4	7
25	Racial phenotypes in moyamoya disease: a comparative analysis of clinical presentation and natural history in a single multiethnic cohort of 250 hemispheres. <i>Journal of Neurosurgery</i> , 2019 , 1-7	3.2	7
24	Residency Training: Enhancing resiliency in our residents: Combining the principles of business and neurobiology. <i>Neurology</i> , 2018 , 91, e1721-e1723	6.5	7
23	Intravenous Tissue Plasminogen Activator in Combination With Mechanical Thrombectomy: Clot Migration, Intracranial Bleeding, and the Impact of "Drip and Ship" on Effectiveness and Outcomes. <i>Frontiers in Neurology</i> , 2020 , 11, 585929	4.1	6
22	COVID-19 and Vaccination in the Setting of Neurologic Disease: An Emerging Issue in Neurology. <i>Neurology</i> , 2021 ,	6.5	6
21	Early Post-stroke Cognition: In-hospital Predictors and the Association With Functional Outcome. <i>Frontiers in Neurology</i> , 2020 , 11, 613607	4.1	4
20	Poststroke acute dysexecutive syndrome, a disorder resulting from minor stroke due to disruption of network dynamics. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020 , 117, 33578-33585	11.5	4
19	Troponin elevation predicts critical care needs and in-hospital mortality after thrombolysis in white but not black stroke patients. <i>Journal of Critical Care</i> , 2016 , 32, 3-8	4	4

18	Resource Allocation: Stable Patients Remain Stable 12-24h Post-tPA. <i>Neurocritical Care</i> , 2020 , 33, 582-586	5.6	4
17	Novel Score for Stratifying Risk of Critical Care Needs in Patients With Intracerebral Hemorrhage. <i>Neurology</i> , 2021 , 96, e2458-e2468	6.5	4
16	Identifying Delirium Early after Stroke: A New Prediction Tool for the Intensive Care Unit. <i>Journal of Stroke and Cerebrovascular Diseases</i> , 2020 , 29, 105219	2.8	3
15	Streamlining the Process for Intravenous Tissue Plasminogen Activator. <i>Journal of Neuroscience Nursing</i> , 2018 , 50, 37-41	1.5	3
14	A cut above. <i>American Journal of Medicine</i> , 2007 , 120, 1031-3	2.4	3
13	Critical Care Needs in Patients with Diffusion-Weighted Imaging Negative MRI after tPA--Does One Size Fit All?. <i>PLoS ONE</i> , 2015 , 10, e0141204	3.7	3
12	Bilaterally Reduced Rolandic Beta Band Activity in Minor Stroke Patients		3
11	Differing Surgical Outcomes in a Multiethnic Cohort Suggest Racial Phenotypes in Moyamoya Disease. <i>World Neurosurgery</i> , 2019 , 128, e865-e872	2.1	2
10	In Potential Stroke Patients on Warfarin, the International Normalized Ratio Predicts Ischemia. <i>Cerebrovascular Diseases Extra</i> , 2017 , 7, 111-119	2.1	2
9	A Therapeutic International Normalized Ratio Results in Smaller Infarcts and Better Outcomes for Patients with Ischemic Stroke. <i>Journal of Stroke and Cerebrovascular Diseases</i> , 2019 , 28, 104278	2.8	1
8	Aphasia and stroke184-194		1
7	The Maryland Acute Stroke Emergency Medical Services Routing Pilot: Expediting Access to Thrombectomy for Stroke. <i>Frontiers in Neurology</i> , 2021 , 12, 663472	4.1	1
6	Multidomain cognitive dysfunction after minor stroke suggests generalized disruption of cognitive networks.. <i>Brain and Behavior</i> , 2022 , e2571	3.4	1
5	The Routine Follow-up Head CT: Is it Still a Necessary Step in the Thrombolysis Pathway?. <i>Neurocritical Care</i> , 2021 , 1	3.3	0
4	Bilaterally Reduced Rolandic Beta Band Activity in Minor Stroke Patients.. <i>Frontiers in Neurology</i> , 2022 , 13, 819603	4.1	0
3	The telemedicine experience: using principles of clinical excellence to identify disparities and optimize care.. <i>Medicine (United States)</i> , 2022 , 101, e29017	1.8	0
2	The Post-Pipeline Headache: New Headaches Following Flow Diversion for Intracranial Aneurysm. <i>Journal of Vascular and Interventional Neurology</i> , 2020 , 11, 34-39	1.3	
1	When less is more: Non-contrast head CT alone to work-up hypertensive intracerebral hemorrhage.. <i>Journal of Clinical Neuroscience</i> , 2022 , 100, 108-112	2.2
