## Thomas J Larocca

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/3541567/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Nontransgenic Guinea Pig Strains Exhibit Hallmarks of Human Brain Aging and Alzheimer's Disease. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2022, 77, 1766-1774.	3.6	4
2	Healthy Aging Interventions Reduce Repetitive Element Transcripts. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2021, 76, 805-810.	3.6	10
3	The gut microbiome–derived metabolite trimethylamine N-oxide modulates neuroinflammation and cognitive function with aging. GeroScience, 2021, 43, 377-394.	4.6	85
4	Novel Strategies for Healthy Brain Aging. Exercise and Sport Sciences Reviews, 2021, 49, 115-125.	3.0	14
5	Transcriptomic Effects of Healthspan-Promoting Dietary Interventions: Current Evidence and Future Directions. Frontiers in Nutrition, 2021, 8, 712129.	3.7	7
6	Accelerated aging of the brain transcriptome by the common chemotherapeutic doxorubicin. Experimental Gerontology, 2021, 152, 111451.	2.8	9
7	Response. Exercise and Sport Sciences Reviews, 2021, 49, 293-293.	3.0	0
8	Amyloid beta acts synergistically as a pro-inflammatory cytokine. Neurobiology of Disease, 2021, 159, 105493.	4.4	29
9	Repetitive elements as a transcriptomic marker of aging: Evidence in multiple datasets and models. Aging Cell, 2020, 19, e13167.	6.7	39
10	Pharmacological Silencing of MicroRNA-152 Prevents Pressure Overload–Induced Heart Failure. Circulation: Heart Failure, 2020, 13, e006298.	3.9	15
11	TDP-43 knockdown causes innate immune activation via protein kinase R in astrocytes. Neurobiology of Disease, 2019, 132, 104514.	4.4	37
12	Neurodegeneration, Heterochromatin, and Double-Stranded RNA. Journal of Experimental Neuroscience, 2019, 13, 117906951983069.	2.3	17
13	Healthy lifestyle-based approaches for successful vascular aging. Journal of Applied Physiology, 2018, 125, 1888-1900.	2.5	58
14	Trehalose supplementation reduces hepatic endoplasmic reticulum stress and inflammatory signaling in old mice. Journal of Nutritional Biochemistry, 2017, 45, 15-23.	4.2	45
15	Dietary rapamycin supplementation reverses ageâ€related vascular dysfunction and oxidative stress, while modulating nutrientâ€sensing, cell cycle, and senescence pathways. Aging Cell, 2017, 16, 17-26.	6.7	123
16	Nutrition and other lifestyle influences on arterial aging. Ageing Research Reviews, 2017, 39, 106-119.	10.9	68
17	Adding value to a graduate physiology seminar by focusing on public communication skills. American Journal of Physiology - Advances in Physiology Education, 2016, 40, 365-369.	1.6	3
18	Physiological geroscience: targeting function to increase healthspan and achieve optimal longevity. Journal of Physiology, 2016, 594, 2001-2024.	2.9	206

THOMAS J LAROCCA

#	Article	IF	CITATIONS
19	Oral trehalose supplementation improves resistance artery endothelial function in healthy middle-aged and older adults. Aging, 2016, 8, 1167-1183.	3.1	64
20	Aerobic exercise and other healthy lifestyle factors that influence vascular aging. American Journal of Physiology - Advances in Physiology Education, 2014, 38, 296-307.	1.6	100
21	Mitochondriaâ€ŧargeted antioxidant (MitoQ) ameliorates ageâ€related arterial endothelial dysfunction in mice. Journal of Physiology, 2014, 592, 2549-2561.	2.9	185
22	You're Only as Old as Your Arteries: Translational Strategies for Preserving Vascular Endothelial Function with Aging. Physiology, 2014, 29, 250-264.	3.1	113
23	Mitochondrial quality control and age-associated arterial stiffening. Experimental Gerontology, 2014, 58, 78-82.	2.8	55
24	Translational physiology in practice. , 2014, , 38-42.		1
25	The autophagy enhancer spermidine reverses arterial aging. Mechanisms of Ageing and Development, 2013, 134, 314-320.	4.6	164
26	Dietary rapamycin selectively improves arterial function in old mice. FASEB Journal, 2013, 27, 1194.17.	0.5	2
27	Mitochondriaâ€ŧargeted antioxidant therapy with MitoQ ameliorates ageâ€related vascular endothelial dysfunction. FASEB Journal, 2013, 27, 1125.10.	0.5	1
28	MicroRNA changes in human arterial endothelial cells with senescence: Relation to apoptosis, eNOS and inflammation. Experimental Gerontology, 2012, 47, 45-51.	2.8	153
29	Translational evidence that impaired autophagy contributes to arterial ageing. Journal of Physiology, 2012, 590, 3305-3316.	2.9	193
30	Polyamine supplementation reduces oxidative stress and reverses vascular endothelial dysfunction with aging. FASEB Journal, 2012, 26, 865.4.	0.5	0
31	Endotheliumâ€dependent dilation is inversely related to hematocrit among healthy young and older adults. FASEB Journal, 2012, 26, 865.13.	0.5	0
32	Polyamine supplementation enhances autophagy and reverses ageâ€related arterial stiffening. FASEB Journal, 2012, 26, 865.9.	0.5	0
33	Mitochondriaâ€ŧargeted antioxidant therapy reverses ageâ€related arterial stiffening. FASEB Journal, 2012, 26, lb641.	0.5	0
34	Habitually exercising older men do not demonstrate ageâ€∎ssociated vascular endothelial oxidative stress. Aging Cell, 2011, 10, 1032-1037.	6.7	104
35	Autophagyâ€enhancing therapy reduces oxidative stress and restores vascular endothelial function in old mice. FASEB Journal, 2011, 25, lb452.	0.5	0
36	Autophagyâ€enhancing treatment reverses ageâ€associated large elastic artery stiffening and modulates arterial superoxide production, inflammation and collagen I. FASEB Journal, 2011, 25, .	0.5	0

#	Article	IF	CITATIONS
37	Leukocyte telomere length is preserved with aging in endurance exercise-trained adults and related to maximal aerobic capacity. Mechanisms of Ageing and Development, 2010, 131, 165-167.	4.6	138
38	Shortâ€ŧerm calorie restriction reverses vascular endothelial dysfunction in old mice by increasing nitric oxide and reducing oxidative stress. Aging Cell, 2010, 9, 304-312.	6.7	131
39	Extracellular Superoxide Dismutase Activity is Reduced with Aging in Humans: Relation to Impaired Vascular Endothelial Function and Exercise Capacity. FASEB Journal, 2009, 23, 777.8.	0.5	Ο
40	Tetrahydrobiopterinâ€mediated nitric oxide bioavailability contributes to the variability in vascular endothelial function in healthy middleâ€aged/older sedentary adults. FASEB Journal, 2008, 22, 52-52.	0.5	0
