#	ARTICLE	IF	CITATIONS
1	On the Radiative Impact of Biomass-Burning Aerosols in the Arctic: The August 2017 Case Study. Remote Sensing, 2022, 14, 313.	1.8	10
2	Aerosol optical characteristics in the urban area of Rome, Italy, and their impact on the UV index. Atmospheric Measurement Techniques, 2022, 15, 1171-1183.	1.2	5
3	Factors controlling atmospheric DMS and its oxidation products (MSA and) Tj ETQq1 1 0.784314 rgBT /Overlock 10 Tf 50 667 Td (nss Chemistry and Physics, 2022, 22, 9245-9263.	1.9	6
4	Does solar ultraviolet radiation play a role in COVID-19 infection and deaths? An environmental ecological study in Italy. Science of the Total Environment, 2021, 757, 143757.	3.9	44
5	Application of a Common Methodology to Select in Situ CO2 Observations Representative of the Atmospheric Background to an Italian Collaborative Network. Atmosphere, 2021, 12, 246.	1.0	2
6	Air-Sea Interaction in the Central Mediterranean Sea: Assessment of Reanalysis and Satellite Observations. Remote Sensing, 2021, 13, 2188.	1.8	5
7	A wide-ranging investigation of the COVID-19 lockdown effects on the atmospheric composition in various Italian urban sites (AER - LOCUS). Urban Climate, 2021, 39, 100954.	2.4	18
8	Variability and trends in surface solar spectral ultraviolet irradiance in Italy: on the influence of geopotential height and lower-stratospheric ozone. Atmospheric Chemistry and Physics, 2021, 21, 18689-18705.	1.9	9
9	Satellite Multi/Hyper Spectral HR Sensors for Mapping the Posidonia oceanica in South Mediterranean Islands. Sustainability, 2021, 13, 13715.	1.6	3
10	Atmospheric deposition of organic matter at a remote site in the central Mediterranean Sea: implications for the marine ecosystem. Biogeosciences, 2020, 17, 3669-3684.	1.3	24
11	New insights on metals in the Arctic aerosol in a climate changing world. Science of the Total Environment, 2020, 741, 140511.	3.9	10
12	The fingerprint of the summer 2018 drought in Europe on ground-based atmospheric CO ₂ measurements. Philosophical Transactions of the Royal Society B: Biological Sciences, 2020, 375, 20190513.	1.8	31
13	European Radiometry Buoy and Infrastructure (EURYBIA): A Contribution to the Design of the European Copernicus Infrastructure for Ocean Colour System Vicarious Calibration. Remote Sensing, 2020, 12, 1178.	1.8	9
14	Carbon Dioxide Time Series Analysis: A New Methodological Approach for Event Screening Categorisation. Springer INdAM Series, 2020, , 201-209.	0.4	0
15	Biogenic Aerosol in the Arctic from Eight Years of MSA Data from Ny Å...lesund (Svalbard Islands) and Thule (Greenland). Atmosphere, 2019, 10, 349.	1.0	17
16	Summertime surface PM ₁₀ ; aerosol composition and size by source region at the Lampedusa island in the central Mediterranean Sea. Atmospheric Chemistry and Physics, 2019, 19, 11123-11142.	1.9	22
17	Assessing the Quality of Shortwave and Longwave Irradiance Observations over the Ocean: One Year of High-Time-Resolution Measurements at the Lampedusa Oceanographic Observatory. Journal of Atmospheric and Oceanic Technology, 2019, 36, 2383-2400.	0.5	7
18	Determining the infrared radiative effects of Saharan dust: a radiative transfer modelling study based on vertically resolved measurements at Lampedusa. Atmospheric Chemistry and Physics, 2018, 18, 4377-4401.	1.9	25

#	ARTICLE	IF	CITATIONS
19	The GLAM Airborne Campaign across the Mediterranean Basin. <i>Bulletin of the American Meteorological Society</i> , 2018, 99, 361-380.	1.7	15
20	A long-term time series of global and diffuse photosynthetically active radiation in the Mediterranean: interannual variability and cloud effects. <i>Atmospheric Chemistry and Physics</i> , 2018, 18, 7985-8000.	1.9	14
21	Determination of Photosynthetically Active Radiation from multi-filter rotating shadowband measurements: Method and validation based on observations at Lampedusa (35.5°N, 12.6°E). <i>AIP Conference Proceedings</i> , 2017, , .	0.3	1
22	UV Index monitoring in Europe. <i>Photochemical and Photobiological Sciences</i> , 2017, 16, 1349-1370.	1.6	52
23	The impact of Mount Etna sulfur emissions on the atmospheric composition and aerosol properties in the central Mediterranean: A statistical analysis over the period 2000–2013 based on observations and Lagrangian modelling. <i>Atmospheric Environment</i> , 2017, 148, 77-88.	1.9	35
24	Determination of stratospheric temperature and density by GOMOS: Verification with respect to high latitude LIDAR profiles from Thule, Greenland. <i>AIP Conference Proceedings</i> , 2017, , .	0.3	0
25	Constraining the ship contribution to the aerosol of the central Mediterranean. <i>Atmospheric Chemistry and Physics</i> , 2017, 17, 2067-2084.	1.9	59
26	Determination of global and diffuse photosynthetically active radiation from a multfilter shadowband radiometer. <i>Applied Optics</i> , 2016, 55, 8280.	2.1	6
27	Relationships linking primary production, sea ice melting, and biogenic aerosol in the Arctic. <i>Atmospheric Environment</i> , 2016, 136, 1-15.	1.9	66
28	On the radiative impact of aerosols on photolysis rates: comparison of simulations and observations in the Lampedusa island during the ChArMEx/ADRIMED campaign. <i>Atmospheric Chemistry and Physics</i> , 2016, 16, 1219-1244.	1.9	34
29	Variability of mineral dust deposition in the western Mediterranean basin and south-east of France. <i>Atmospheric Chemistry and Physics</i> , 2016, 16, 8749-8766.	1.9	51
30	Overview of the Chemistry-Aerosol Mediterranean Experiment/Aerosol Direct Radiative Forcing on the Mediterranean Climate (ChArMEx/ADRIMED) summer 2013 campaign. <i>Atmospheric Chemistry and Physics</i> , 2016, 16, 455-504.	1.9	110
31	Synergistic use of Lagrangian dispersion and radiative transfer modelling with satellite and surface remote sensing measurements for the investigation of volcanic plumes: the Mount Etna eruption of 25–27 October 2013. <i>Atmospheric Chemistry and Physics</i> , 2016, 16, 6841-6861.	1.9	31
32	The RITMARE Italian Fixed-Point Observatory Network (IFON) for marine environmental monitoring: a case study. <i>Journal of Operational Oceanography</i> , 2016, 9, s202-s214.	0.6	14
33	Global and Mediterranean climate change: a short summary. <i>Annali Dell'Istituto Superiore Di Sanita</i> , 2016, 52, 325-337.	0.2	10
34	Altitude-resolved shortwave and longwave radiative effects of desert dust in the Mediterranean during the GAMARF campaign: Indications of a net daily cooling in the dust layer. <i>Journal of Geophysical Research D: Atmospheres</i> , 2015, 120, 3386-3407.	1.2	41
35	Dust aerosol radiative effects during summer 2012 simulated with a coupled regional aerosol–atmosphere–ocean model over the Mediterranean. <i>Atmospheric Chemistry and Physics</i> , 2015, 15, 3303-3326.	1.9	93
36	Characterization of PM ₁₀ sources in the central Mediterranean. <i>Atmospheric Chemistry and Physics</i> , 2015, 15, 13939-13955.	1.9	47

#	ARTICLE	IF	CITATIONS
37	Spectral attenuation of global and diffuse UV irradiance and actinic flux by clouds. Quarterly Journal of the Royal Meteorological Society, 2015, 141, 109-113.	1.0	8
38	On the complexity of the boundary layer structure and aerosol vertical distribution in the coastal Mediterranean regions: a case study. Tellus, Series B: Chemical and Physical Meteorology, 2015, 67, 27721.	0.8	13
39	Seasonal Variations of the Relative Optical Air Mass Function for Background Aerosol and Thin Cirrus Clouds at Arctic and Antarctic Sites. Remote Sensing, 2015, 7, 7157-7180.	1.8	7
40	Empirical correction of multifilter rotating shadowband radiometer (MFRSR) aerosol optical depths for the aerosol forward scattering and development of a long-term integrated MFRSR-Cimel dataset at Lampedusa. Applied Optics, 2015, 54, 2725.	0.9	23
41	Observed influence of liquid cloud microphysical properties on ultraviolet surface radiation. Journal of Geophysical Research D: Atmospheres, 2014, 119, 2429-2440.	1.2	12
42	Sensitivity of the atmospheric temperature profile to the aerosol absorption in the presence of dust. Atmospheric Environment, 2014, 98, 331-336.	1.9	14
43	Saharan dust aerosol over the central Mediterranean Sea: PM ₁₀ ; chemical composition and concentration versus optical columnar measurements. Atmospheric Chemistry and Physics, 2014, 14, 2039-2054.	1.9	85
44	Sea-Salt Aerosol Forecasts Over the Mediterranean Sea Evaluated by Daily Measurements in Lampedusa from 2006 to 2010. NATO Science for Peace and Security Series C: Environmental Security, 2014, , 321-325.	0.1	0
45	Observations of surface radiation and stratospheric processes at Thule Air Base, Greenland, during the IPY. Annals of Geophysics, 2014, 57, .	0.5	6
46	A comparison of Microtops II and satellite ozone measurements in the period 2001–2011. Journal of Atmospheric and Solar-Terrestrial Physics, 2013, 94, 5-12.	0.6	9
47	Validation of OMI satellite erythemal daily dose retrievals using ground-based measurements from fourteen stations. Remote Sensing of Environment, 2013, 128, 1-10.	4.6	23
48	Relationship between methanesulfonate (MS ⁻) in atmospheric particulate and remotely sensed phytoplankton activity in oligo-mesotrophic central Mediterranean Sea. Atmospheric Environment, 2013, 79, 681-688.	1.9	29
49	Vertical resolved aerosol characterization during the GAMARF campaign: Aerosol size distribution and radiative properties. , 2013, , .		1
50	Vertical profiles of shortwave and longwave aerosol direct radiative forcing during the GAMARF campaign at Lampedusa Island. , 2013, , .		1
51	Estimate of surface direct radiative forcing of desert dust from atmospheric modulation of the aerosol optical depth. Atmospheric Chemistry and Physics, 2013, 13, 5647-5654.	1.9	16
52	Operational considerations to improve total ozone measurements with a Microtops II ozone monitor. Atmospheric Measurement Techniques, 2012, 5, 759-769.	1.2	13
53	Accounting for the Solar Radiation Influence on Downward Longwave Irradiance Measurements by Pyrgometers. Journal of Atmospheric and Oceanic Technology, 2012, 29, 1629-1643.	0.5	22
54	Evidence for heavy fuel oil combustion aerosols from chemical analyses at the island of Lampedusa: a possible large role of ships emissions in the Mediterranean. Atmospheric Chemistry and Physics, 2012, 12, 3479-3492.	1.9	135

#	ARTICLE	IF	CITATIONS
55	Effect of surface albedo, water vapour, and atmospheric aerosols on the cloud-free shortwave radiative budget in the Arctic. <i>Climate Dynamics</i> , 2012, 39, 953-969.	1.7	20
56	Seasonal variability of tropospheric aerosols in Rome. <i>Atmospheric Research</i> , 2012, 118, 205-214.	1.8	18
57	Sea-salt aerosol forecasts compared with daily measurements at the island of Lampedusa (Central Tyrrhenian Sea). <i>Journal of Geophysical Research</i> , 2011, 116, n/a-n/a.	1.8	19
58	Shortwave and longwave radiative effects of the intense Saharan dust event of 25-26 March 2010 at Lampedusa (Mediterranean Sea). <i>Journal of Geophysical Research</i> , 2011, 116, n/a-n/a.	3.3	69
59	Experimental determination of cloud influence on the spectral UV irradiance and implications for biological effects. <i>Journal of Atmospheric and Solar-Terrestrial Physics</i> , 2011, 73, 1739-1746.	0.6	32
60	Large aerosol effects on ozone photolysis in the Mediterranean. <i>Atmospheric Environment</i> , 2011, 45, 3937-3943.	1.9	36
61	The June 2007 Saharan dust event in the central Mediterranean: Observations and radiative effects in marine, urban, and sub-urban environments. <i>Atmospheric Environment</i> , 2011, 45, 5385-5393.	1.9	38
62	First national intercomparison of solar ultraviolet radiometers in Italy. <i>Atmospheric Measurement Techniques</i> , 2011, 4, 1689-1703.	1.2	24
63	Atmospheric Brown Clouds in the Himalayas: first two years of continuous observations at the Nepal Climate Observatory-Pyramid (5079 m). <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 7515-7531.	1.9	252
64	Sensitivity of shortwave radiative fluxes to the vertical distribution of aerosol single scattering albedo in the presence of a desert dust layer. <i>Atmospheric Environment</i> , 2010, 44, 2787-2791.	1.9	15
65	Quantification of Saharan dust contribution to PM10 concentrations over Italy during 2003-2005. <i>Atmospheric Environment</i> , 2010, 44, 4181-4190.	1.9	52
66	Tropospheric halocompounds and nitrous oxide monitored at a remote site in the Mediterranean. <i>Atmospheric Environment</i> , 2010, 44, 4944-4953.	1.9	20
67	Seven years of recent European net terrestrial carbon dioxide exchange constrained by atmospheric observations. <i>Global Change Biology</i> , 2010, 16, 1317-1337.	4.2	223
68	Large atmospheric shortwave radiative forcing by Mediterranean aerosols derived from simultaneous ground-based and spaceborne observations and dependence on the aerosol type and single scattering albedo. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	81
69	Evolution of temperature, O_3 , CO_2 , and NO_2 profiles during the exceptional 2009 Arctic major stratospheric warming as observed by lidar and millimeter-wave spectroscopy at Thule (76.5°N, 68.8°W), Greenland. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	19
70	Ground-based observations of solar radiation at three Italian sites, during the eclipse of 29 March, 2006: Signs of the environment impact on incoming global irradiance. <i>Atmospheric Research</i> , 2010, 96, 131-140.	1.8	7
71	Influence of transport and trends in atmospheric CO_2 at Lampedusa. <i>Atmospheric Environment</i> , 2009, 43, 3044-3051.	1.9	84
72	A new approach to correct for absorbing aerosols in OMI UV. <i>Geophysical Research Letters</i> , 2009, 36, .	1.5	71

#	ARTICLE	IF	CITATIONS
73	Seasonal evolution of the tropospheric aerosol vertical profile in the central Mediterranean and role of desert dust. <i>Journal of Geophysical Research</i> , 2009, 114, .	3.3	66
74	Measurements of Mediterranean aerosol radiative forcing and influence of the single scattering albedo. <i>Journal of Geophysical Research</i> , 2009, 114, .	3.3	72
75	Ozone monitoring instrument satellite UV irradiance product correction using a global aerosol climatology. , 2009, , .		0
76	Spectrally resolved observations of atmospheric emitted radiance in the H ₂ O rotation band. <i>Geophysical Research Letters</i> , 2008, 35, .	1.5	42
77	Surface shortwave radiative forcing of different aerosol types in the central Mediterranean. <i>Geophysical Research Letters</i> , 2008, 35, .	1.5	72
78	Seasonal transport patterns of intense Saharan dust events at the Mediterranean island of Lampedusa. <i>Atmospheric Research</i> , 2008, 88, 134-148.	1.8	92
79	Determination of ultraviolet cosine-corrected irradiances and aerosol optical thickness by combined measurements with a Brewer spectrophotometer and a multifilter rotating shadowband radiometer. <i>Applied Optics</i> , 2008, 47, 6142.	2.1	13
80	Middle atmospheric O ₃ , CO, N ₂ O, HNO ₃ , and temperature profiles during the warm Arctic winter 2001-2002. <i>Journal of Geophysical Research</i> , 2007, 112, .	3.3	19
81	Seasonal behavior of Saharan dust events at the Mediterranean island of Lampedusa in the period 1999-2005. <i>Atmospheric Environment</i> , 2007, 41, 3041-3056.	1.9	129
82	Atmospheric methane in the Mediterranean: Analysis of measurements at the island of Lampedusa during 1995-2005. <i>Atmospheric Environment</i> , 2007, 41, 3877-3888.	1.9	20
83	Aerosol optical properties at Lampedusa (Central Mediterranean). 1. Influence of transport and identification of different aerosol types. <i>Atmospheric Chemistry and Physics</i> , 2006, 6, 697-713.	1.9	246
84	Aerosol optical properties at Lampedusa (Central Mediterranean). 2. Determination of single scattering albedo at two wavelengths for different aerosol types. <i>Atmospheric Chemistry and Physics</i> , 2006, 6, 715-727.	1.9	119
85	An improved algorithm for the determination of aerosol optical depth in the ultraviolet spectral range from Brewer spectrophotometer observations. <i>Journal of Optics</i> , 2006, 8, 849-855.	1.5	18
86	Influence of the vertical profile of Saharan dust on the visible direct radiative forcing. <i>Journal of Quantitative Spectroscopy and Radiative Transfer</i> , 2005, 93, 397-413.	1.1	119
87	Satellite on-board temperatures: Proxy measurements of Earth's climate changes?. <i>Geophysical Research Letters</i> , 2005, 32, .	1.5	6
88	Comparison of ground-based and Total Ozone Mapping Spectrometer erythemal UV doses at the island of Lampedusa in the period 1998-2003: Role of tropospheric aerosols. <i>Journal of Geophysical Research</i> , 2005, 110, .	3.3	38
89	Forest fire aerosol over the Mediterranean basin during summer 2003. <i>Journal of Geophysical Research</i> , 2005, 110, .	3.3	95
90	Effects of atmospheric scattering and extinction on the retrieval of fluorescence and Cherenkov signals produced by extreme energy cosmic rays and neutrinos from space: role of lidar for their assessment and correction. <i>Astroparticle Physics</i> , 2004, 21, 337-357.	1.9	2

#	ARTICLE	IF	CITATIONS
91	Review of ozone and temperature lidar validations performed within the framework of the Network for the Detection of Stratospheric Change. <i>Journal of Environmental Monitoring</i> , 2004, 6, 721.	2.1	80
92	Direct radiative forcing of Saharan dust in the Mediterranean from measurements at Lampedusa Island and MISR space-borne observations. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	45
93	Lidar observations of equatorial cirrus clouds at MahÃ© Seychelles. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	20
94	Tropospheric aerosols in the Mediterranean: 2. Radiative effects through model simulations and measurements. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	63
95	Tropospheric aerosols in the Mediterranean: 1. Microphysical and optical properties. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	44
96	Tropospheric aerosols in the Mediterranean: 3. Measurements and modeling of actinic radiation profiles. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	16
97	Observation of polar stratospheric clouds with the ABLE LIDAR during the APE-POLECAT flight of January 9, 1997. <i>Journal of Aerosol Science</i> , 2003, 34, 801-814.	1.8	5
98	Interannual variability of atmospheric CO ₂ in the Mediterranean: measurements at the island of Lampedusa. <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2003, 55, 83-93.	0.8	20
99	On the Importance of Spectral Responsivity of Robertson-Bergerâ€™type Ultraviolet Radiometers for Long-term Observations. <i>Photochemistry and Photobiology</i> , 2002, 76, 64.	1.3	7
100	Methodology for determining aerosol optical depth from brewer 300â€™320-nm ozone measurements. <i>Applied Optics</i> , 2002, 41, 1805.	2.1	50
101	Lidar observations of polar stratospheric clouds over northern Greenland in the period 1990â€™1997. <i>Journal of Geophysical Research</i> , 2002, 107, AAC 6-1.	3.3	14
102	Effects of desert dust and ozone on the ultraviolet irradiance at the Mediterranean island of Lampedusa during PAUR II. <i>Journal of Geophysical Research</i> , 2002, 107, PAU 2-1.	3.3	80
103	Estimation Of Atmospheric Water Vapour Flux Profiles In The Nocturnal Unstable Urban Boundary Layer With Doppler Sodar And Raman Lidar. <i>Boundary-Layer Meteorology</i> , 2002, 102, 39-62.	1.2	9
104	Stratospheric aerosols observed by lidar over northern Greenland in the aftermath of the Pinatubo eruption. <i>Journal of Geophysical Research</i> , 1998, 103, 13873-13891.	3.3	7
105	Lidar observations of polar stratospheric clouds at the South Pole: 1. Stratospheric unperturbed conditions, 1990. <i>Journal of Geophysical Research</i> , 1997, 102, 12937-12943.	3.3	13
106	Lidar observations of polar stratospheric clouds at the South Pole: 2. Stratospheric perturbed conditions, 1992 and 1993. <i>Journal of Geophysical Research</i> , 1997, 102, 12945-12955.	3.3	10
107	Optical properties of tropospheric aerosols determined by lidar and spectrophotometric measurements (Photochemical Activity and Solar Ultraviolet Radiation campaign). <i>Applied Optics</i> , 1997, 36, 6875.	2.1	112
108	Thermal structure of the winter middle atmosphere observed by lidar at Thule, Greenland, during 1993â€™1994. <i>Journal of Atmospheric and Solar-Terrestrial Physics</i> , 1997, 59, 151-158.	0.6	13

#	ARTICLE	IF	CITATIONS
109	Convective characteristics of the nocturnal urban boundary layer as observed with Doppler sodar and Raman lidar. <i>Boundary-Layer Meteorology</i> , 1996, 79, 375-391.	1.2	23
110	Observation of lump structures in the nocturnal atmospheric boundary layer with Doppler sonar and Raman lidar. <i>Geophysical Research Letters</i> , 1995, 22, 2505-2508.	1.5	7
111	Ozone and aerosol correlated observations at Thule, Greenland, in the period 1991-1994. <i>Journal of Geophysical Research</i> , 1995, 100, 25965.	3.3	7
112	Latitudinal distribution of stratospheric aerosols during the EASOE winter 1991/92. <i>Geophysical Research Letters</i> , 1994, 21, 1283-1286.	1.5	22
113	Lidar observations of the Pinatubo aerosol layer at Thule, Greenland. <i>Geophysical Research Letters</i> , 1994, 21, 1295-1298.	1.5	29
114	Backscatter measurements of stratospheric aerosols at Thule during January-February 1992. <i>Geophysical Research Letters</i> , 1994, 21, 1303-1306.	1.5	15
115	Volcanic aerosol layers observed by lidar at South Pole, September 1991-June 1992. <i>Geophysical Research Letters</i> , 1993, 20, 807-810.	1.5	31
116	Stratospheric clouds at South Pole during 1988 2. Their evolution in relation to atmospheric structure and composition. <i>Journal of Geophysical Research</i> , 1992, 97, 5947-5952.	3.3	12
117	Observations of correlated behavior of stratospheric ozone and aerosol at Thule during winter 1991-1992. <i>Geophysical Research Letters</i> , 1992, 19, 1823-1826.	1.5	18
118	Computerized System for Nuclear Emergency Response in the Enea Nuclear Research Center of Frascati. <i>Health Physics</i> , 1991, 60, 763-771.	0.3	0
119	Absorption cross sections of ozone in the 590-610 nm region at $T = 230$ K and $T = 299$ K. <i>Journal of Geophysical Research</i> , 1990, 95, 20565-20568.	3.3	18
120	Absolute determination of the cross sections of ozone in the wavelength region 339-355 nm at temperatures 220-293 K. <i>Journal of Geophysical Research</i> , 1989, 94, 8485-8490.	3.3	36
