

Ulrich Ansorge

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3555198/ulrich-ansorge-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

157
papers

2,834
citations

#	Paper	IF	Citations
157	Speed versus accuracy instructions in the response time concealed information test.. <i>Cognitive Research: Principles and Implications</i> , 2022 , 7, 3	2.7	
156	Cyclic reactivation of distinct feature dimensions in human visual working memory.. <i>Acta Psychologica</i> , 2022 , 226, 103561	1.7	0
155	Do Subliminal Fearful Facial Expressions Capture Attention?. <i>Frontiers in Psychology</i> , 2022 , 13, 840746	3.4	0
154	Lexical expressions and grammatical markers for source of information: A contrast between German and Korean. <i>Language Sciences</i> , 2022 , 92, 101475	0.8	
153	Simple shapes guide visual attention based on their global outline or global orientation contingent on search goals. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2021 , 47, 1493-1515	2.6	0
152	Investigating Object Files in Spatial Cueing. <i>Experimental Psychology</i> , 2021 , 68, 67-80	1.5	1
151	A new type of pictorial database: The Bicolor Affective Silhouettes and Shapes (BASS). <i>Behavior Research Methods</i> , 2021 , 53, 2558-2575	6.1	1
150	Procedural Control Versus Resources as Potential Origins of Human Hyper Selectivity. <i>Frontiers in Psychology</i> , 2021 , 12, 718141	3.4	1
149	Automatic capture of attention by flicker. <i>Attention, Perception, and Psychophysics</i> , 2021 , 83, 1407-1415	2	2
148	Psychophysical dual-task setups do not measure pre-saccadic attention but saccade-related strengthening of sensory representations. <i>Psychophysiology</i> , 2021 , 58, e13787	4.1	3
147	Theta-Rhythmic Oscillation of Working Memory Performance. <i>Psychological Science</i> , 2021 , 32, 1801-1810	7.9	3
146	Detecting concealed language knowledge via response times. <i>Applied Linguistics Review</i> , 2021 ,	1.2	1
145	The mechanism of filler items in the response time concealed information test. <i>Psychological Research</i> , 2021 , 85, 2808-2828	2.5	4
144	Continuous, Lateralized Auditory Stimulation Biases Visual Spatial Processing. <i>Frontiers in Psychology</i> , 2020 , 11, 1183	3.4	
143	The influence of display-to-display feature changes on net cueing effects: Evidence for a contribution of object-file updating. <i>Quarterly Journal of Experimental Psychology</i> , 2020 , 73, 908-919	1.8	2
142	Can subliminal spatial words trigger an attention shift? Evidence from event-related-potentials in visual cueing** The data that support the findings of this study are available from the corresponding author, D.B., upon request.View all notes. <i>Visual Cognition</i> , 2020 , 28, 10-32	1.8	1
141	Attentional capture by flicker frequency. <i>Journal of Vision</i> , 2020 , 20, 1743	0.4	

140	Tu felix Austria?. <i>Psychologische Rundschau</i> , 2020 , 71, 341-342	0.6	
139	Sense and Sensitivity - Using Spatial Response-Compatibility Effects to Investigate Ambiguous Word Meaning. <i>Experimental Psychology</i> , 2020 , 67, 327-334	1.5	
138	Rhythmic fluctuations of internal visual search templates. <i>Journal of Vision</i> , 2020 , 20, 1372	0.4	
137	Awareness and Stimulus-Driven Spatial Attention as Independent Processes. <i>Frontiers in Human Neuroscience</i> , 2020 , 14, 352	3.3	1
136	Response Time Concealed Information Test on Smartphones. <i>Collabra: Psychology</i> , 2020 , 6,	2.8	3
135	Polarities influence implicit associations between colour and emotion. <i>Acta Psychologica</i> , 2020 , 209, 1031-1043	4.3	4
134	Testing the top-down contingent capture of attention for abrupt-onset cues: Evidence from cue-elicited N2pc. <i>Psychophysiology</i> , 2020 , 57, e13655	4.1	4
133	A meta-analysis of contingent-capture effects. <i>Psychological Research</i> , 2020 , 84, 784-809	2.5	19
132	Do left-handers outperform right-handers in paper-and-pencil tests of attention?. <i>Psychological Research</i> , 2020 , 84, 2262-2272	2.5	3
131	Whereof one cannot speak: How language and capture of visual attention interact. <i>Cognition</i> , 2020 , 194, 104023	3.5	3
130	Methodological improvements of the association-based concealed information test. <i>Acta Psychologica</i> , 2019 , 194, 7-16	1.7	5
129	Item Roles Explored in a Modified P300-Based CTP Concealed Information Test. <i>Applied Psychophysiology Biofeedback</i> , 2019 , 44, 195-209	3.4	5
128	Contingent capture during search for alphanumeric characters: A case of feature-based capture or of conceptual category membership?. <i>Vision Research</i> , 2019 , 160, 43-51	2.1	2
127	Information leakage in the Response Time-Based Concealed Information Test. <i>Applied Cognitive Psychology</i> , 2019 , 33, 1178-1196	2.1	10
126	A Novel Test of Pure Irrelevance-Induced Blindness. <i>Frontiers in Psychology</i> , 2019 , 10, 375	3.4	1
125	Testing a priming account of the contingent-capture effect. <i>Attention, Perception, and Psychophysics</i> , 2019 , 81, 1262-1282	2	5
124	Investigating the role of verbal templates in contingent capture by color. <i>Attention, Perception, and Psychophysics</i> , 2019 , 81, 1846-1879	2	7
123	Contralateral delay activity during temporal order memory. <i>Neuropsychologia</i> , 2019 , 129, 104-116	3.2	2

122	Altered Processing of Visual Food Stimuli in Adolescents with Loss of Control Eating. <i>Nutrients</i> , 2019 , 11,	6.7	2
121	Top-down matching singleton cues have no edge over top-down matching nonsingletons in spatial cueing. <i>Psychonomic Bulletin and Review</i> , 2019 , 26, 241-249	4.1	7
120	The impact of temporal contingencies between cue and target onset on spatial attentional capture by subliminal onset cues. <i>Psychological Research</i> , 2019 , 83, 1416-1425	2.5	3
119	Investigating the contribution of task and response repetitions to the sequential modulations of attentional cueing effects. <i>Psychological Research</i> , 2019 , 83, 1251-1268	2.5	7
118	Testing a Priming Account of the Contingent-Capture Effect. <i>Journal of Vision</i> , 2019 , 19, 139b	0.4	
117	Kommentare zu Okulicz-Kozaryn, M., Schmidt, A.F. & Banse, R. (2019). Worin besteht die Expertise von forensischen Sachverständigen, und ist die Approbation gem. Psychotherapeutengesetz dafür erforderlich?. <i>Psychologische Rundschau</i> , 2019 , 70, 259-278	0.6	
116	Conflict-Elicited Negative Evaluations of Neutral Stimuli: Testing Overt Responses and Stimulus-Frequency Differences as Critical Side Conditions. <i>Frontiers in Psychology</i> , 2019 , 10, 2204	3.4	4
115	Capture of attention by target-similar cues during dual-color search reflects reactive control among top-down selected attentional control settings. <i>Psychonomic Bulletin and Review</i> , 2019 , 26, 531-537	4.1	8
114	Improving Methodological Standards in Behavioral Interventions for Cognitive Enhancement. <i>Journal of Cognitive Enhancement: Towards the Integration of Theory and Practice</i> , 2019 , 3, 2-29	2.4	91
113	Attention capture is temporally stable: Evidence from mixed-model correlations. <i>Cognition</i> , 2018 , 180, 206-224	3.5	2
112	Implicit and Explicit Evaluation of Visual Symmetry as a Function of Art Expertise. <i>I-Perception</i> , 2018 , 9, 2041669518761464	1.2	14
111	An Investigation of Spatial Stimulus-Response Compatibility Effects Based on German Particles. <i>Experimental Psychology</i> , 2018 , 65, 201-209	1.5	1
110	Whereof one cannot speak: How language and capture of visual attention interact. <i>Journal of Vision</i> , 2018 , 18, 472	0.4	
109	Peripheral Cueing of Attention: No Selective Attention Capture by Top-Down Matching Singleton Cues in the Presence of Top-down Matching Non-Singletons. <i>Journal of Vision</i> , 2018 , 18, 461	0.4	
108	Do Top-Down Search Templates for Color Depend on Language?. <i>Journal of Vision</i> , 2018 , 18, 463	0.4	
107	No suppression of stimulus-driven capture with distractor and target singletons of the same (color) dimension. <i>Journal of Vision</i> , 2018 , 18, 457	0.4	1
106	Unconscious conflict adaptation without feature-repetitions and response time carry-over. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2018 , 44, 169-175	2.6	5
105	Same-location costs in peripheral cueing: The role of cue awareness and feature changes. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2018 , 44, 433-451	2.6	15

104	Figure and Ground in spatial language: evidence from German and Korean. <i>Language and Cognition</i> , 2018 , 10, 665-700	2.2	1
103	Bottom-up attention capture with distractor and target singletons defined in the same (color) dimension is not a matter of feature uncertainty. <i>Attention, Perception, and Psychophysics</i> , 2018 , 80, 1350-1361 ⁵		
102	Measuring the emotion-specificity of rapid stimulus-driven attraction of attention to fearful faces: evidence from emotion categorization and a comparison with disgusted faces. <i>Psychological Research</i> , 2017 , 81, 508-523	2.5	7
101	Memory-guided attention during active viewing of edited dynamic scenes. <i>Journal of Vision</i> , 2017 , 17, 12	0.4	6
100	Dissociating the capture of attention from saccade activation by subliminal abrupt onsets. <i>Experimental Brain Research</i> , 2017 , 235, 3175-3191	2.3	1
99	Human Eye Movements After Viewpoint Shifts in Edited Dynamic Scenes are Under Cognitive Control. <i>Advances in Cognitive Psychology</i> , 2017 , 13, 128-139	1	1
98	A Double Dissociation between Conscious and Non-conscious Priming of Responses and Affect: Evidence for a Contribution of Misattributions to the Priming of Affect. <i>Frontiers in Psychology</i> , 2017 , 8, 453	3.4	10
97	Subliminal Face Emotion Processing: A Comparison of Fearful and Disgusted Faces. <i>Frontiers in Psychology</i> , 2017 , 8, 1028	3.4	5
96	Effects of Language Background on Gaze Behavior: A Crosslinguistic Comparison Between Korean and German Speakers. <i>Advances in Cognitive Psychology</i> , 2017 , 13, 267-279	1	3
95	The role of RT carry-over for congruence sequence effects in masked priming. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2017 , 43, 757-780	2.2	3
94	Attention and Suppression: Awareness-Independent Same-Location Costs in Relational and Feature Search for Spatial Frequency Targets. <i>Journal of Vision</i> , 2017 , 17, 943	0.4	
93	The contra-lateral delay activity is reversed during the retention of episodic information. <i>Journal of Vision</i> , 2017 , 17, 677	0.4	
92	The contribution of color to attention capture effects during search for onset targets. <i>Attention, Perception, and Psychophysics</i> , 2016 , 78, 789-807	2	10
91	Exploring the Subjective Feeling of Fluency. <i>Experimental Psychology</i> , 2016 , 63, 45-58	1.5	13
90	Unconscious cross-modal priming of auditory sound localization by visual words. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2016 , 42, 925-37	2.2	5
89	Action selection as a guide for visual attention. <i>Visual Cognition</i> , 2016 , 24, 38-50	1.8	11
88	Using temporally aligned event-related potentials for the investigation of attention shifts prior to and during saccades. <i>Neuropsychologia</i> , 2016 , 92, 129-141	3.2	11
87	Surprise capture and inattention blindness. <i>Cognition</i> , 2016 , 157, 237-249	3.5	20

86	Stimulus-driven attentional capture by subliminal onset cues. <i>Attention, Perception, and Psychophysics</i> , 2015 , 77, 737-48	2	19
85	Using eye tracking to test for individual differences in attention to attractive faces. <i>Frontiers in Psychology</i> , 2015 , 6, 42	3.4	29
84	There is more to trial history than priming in attentional capture experiments. <i>Attention, Perception, and Psychophysics</i> , 2015 , 77, 1574-84	2	12
83	Nasotemporal ERP differences: evidence for increased inhibition of temporal distractors. <i>Journal of Neurophysiology</i> , 2015 , 113, 2210-9	3.2	6
82	The influence of color during continuity cuts in edited movies: an eye-tracking study. <i>Multimedia Tools and Applications</i> , 2015 , 74, 10161-10176	2.5	5
81	S-ketamine influences strategic allocation of attention but not exogenous capture of attention. <i>Consciousness and Cognition</i> , 2015 , 35, 282-94	2.6	14
80	Zentrale Entwicklungen in der Theoriebildung und Forschung zur Aufmerksamkeit in der Psychologie 2015 , 349-369		
79	Oculomotor capture by supraliminal and subliminal onset singletons: the role of contrast polarity. <i>Vision Research</i> , 2014 , 100, 1-7	2.1	5
78	Unconscious vision and executive control: how unconscious processing and conscious action control interact. <i>Consciousness and Cognition</i> , 2014 , 27, 268-87	2.6	64
77	Attentional capture and inhibition of saccades after irrelevant and relevant cues. <i>Journal of Ophthalmology</i> , 2014 , 2014, 585921	2	2
76	Color priming in pop-out search depends on the relative color of the target. <i>Frontiers in Psychology</i> , 2014 , 5, 289	3.4	4
75	The roles of scene priming and location priming in object-scene consistency effects. <i>Frontiers in Psychology</i> , 2014 , 5, 520	3.4	2
74	Colour and contrast of female faces: attraction of attention and its dependence on male hormone status in <i>Macaca fuscata</i> . <i>Animal Behaviour</i> , 2014 , 94, 61-71	2.8	15
73	Contingent capture in cueing: the role of color search templates and cue-target color relations. <i>Psychological Research</i> , 2014 , 78, 209-21	2.5	14
72	Conditional automaticity in subliminal morphosyntactic priming. <i>Psychological Research</i> , 2013 , 77, 399-421	5	5
71	Effects of relevant and irrelevant color singletons on inhibition of return and attentional capture. <i>Attention, Perception, and Psychophysics</i> , 2013 , 75, 1687-702	2	7
70	Higher set sizes in pop-out search displays do not eliminate priming or enhance target selection. <i>Vision Research</i> , 2013 , 81, 18-28	2.1	36
69	The Simon effect of spatial words in eye movements: comparison of vertical and horizontal effects and of eye and finger responses. <i>Vision Research</i> , 2013 , 86, 6-14	2.1	15

68	Predictability of spatial and non-spatial target properties improves perception in the pre-saccadic interval. <i>Vision Research</i> , 2013 , 91, 93-101	2.1	15
67	Exogenous attentional capture by subliminal abrupt-onset cues: evidence from contrast-polarity independent cueing effects. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2013 , 39, 974-88	2.6	16
66	Subcortical human face processing? Evidence from masked priming. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2013 , 39, 989-1002	2.6	20
65	It felt fluent, and I liked it: subjective feeling of fluency rather than objective fluency determines liking. <i>Emotion</i> , 2013 , 13, 280-9	4.1	70
64	Priming of fixations during recognition of natural scenes. <i>Journal of Vision</i> , 2013 , 13,	0.4	10
63	Space-valence priming with subliminal and supraliminal words. <i>Frontiers in Psychology</i> , 2013 , 4, 81	3.4	21
62	Investigating the association between Valence and Elevation with an implicit association task that requires upward and downward responding. <i>Universitas Psychologica</i> , 2013 , 12,	0.5	6
61	Spatial mislocalization as a consequence of sequential coding of stimuli. <i>Attention, Perception, and Psychophysics</i> , 2012 , 74, 365-78	2	2
60	Unconscious Cueing via the Superior Colliculi: Evidence from Searching for Onset and Color Targets. <i>Brain Sciences</i> , 2012 , 2, 33-60	3.4	7
59	Inhibition of return is no hallmark of exogenous capture by unconscious cues. <i>Frontiers in Human Neuroscience</i> , 2012 , 6, 30	3.3	13
58	Feature-based effects in the coupling between attention and saccades. <i>Journal of Vision</i> , 2012 , 12,	0.4	15
57	Automatic priming of attentional control by relevant colors. <i>Attention, Perception, and Psychophysics</i> , 2012 , 74, 83-104	2	12
56	Top-down search for color prevents voluntary directing of attention to informative singleton cues. <i>Experimental Psychology</i> , 2012 , 59, 153-62	1.5	10
55	Sensitivity of different measures of the visibility of masked primes: influences of prime-response and prime-target relations. <i>Consciousness and Cognition</i> , 2011 , 20, 1473-88	2.6	3
54	Compatibility between tones, head movements, and facial expressions. <i>Emotion</i> , 2011 , 11, 975-80	4.1	21
53	The initial stage of visual selection is controlled by top-down task set: new ERP evidence. <i>Attention, Perception, and Psychophysics</i> , 2011 , 73, 113-22	2	33
52	No conflict control in the absence of awareness. <i>Psychological Research</i> , 2011 , 75, 351-65	2.5	48
51	Salience in Paintings: Bottom-Up Influences on Eye Fixations. <i>Cognitive Computation</i> , 2011 , 3, 25-36	4.4	24

50	Controlling the unconscious: attentional task sets modulate subliminal semantic and visuomotor processes differentially. <i>Psychological Science</i> , 2011 , 22, 282-91	7.9	82
49	The undue influence of shape and weight on self-evaluation in anorexia nervosa, bulimia nervosa and restrained eaters: a combined ERP and behavioral study. <i>Psychological Medicine</i> , 2011 , 41, 185-94	6.9	31
48	Top-down contingent feature-specific orienting with and without awareness of the visual input. <i>Advances in Cognitive Psychology</i> , 2011 , 7, 108-19	1	18
47	Neuro-cognitive mechanisms of conscious and unconscious visual perception: From a plethora of phenomena to general principles. <i>Advances in Cognitive Psychology</i> , 2011 , 7, 55-67	1	29
46	Wahrnehmung und Aufmerksamkeit 2011 ,		9
45	Attentional capture by motion onsets is spatially imprecise. <i>European Journal of Cognitive Psychology</i> , 2010 , 22, 62-105		3
44	A body-related dot-probe task reveals distinct attentional patterns for bulimia nervosa and anorexia nervosa. <i>Journal of Abnormal Psychology</i> , 2010 , 119, 575-85	7	73
43	Masked singleton effects. <i>Attention, Perception, and Psychophysics</i> , 2010 , 72, 2069-86	2	11
42	Top-down contingent attentional capture during feed-forward visual processing. <i>Acta Psychologica</i> , 2010 , 135, 123-6; discussion 133-9	1.7	18
41	Testing the theory of embodied cognition with subliminal words. <i>Cognition</i> , 2010 , 116, 303-20	3.5	42
40	Attentional capture by masked colour singletons. <i>Vision Research</i> , 2010 , 50, 2015-27	2.1	32
39	Masked singleton effects 2010 , 72, 2069		2
38	Can intertrial priming account for the similarity effect in visual search?. <i>Vision Research</i> , 2009 , 49, 1738-56.1	5.1	62
37	Saccades reveal that allocentric coding of the moving object causes mislocalization in the flash-lag effect. <i>Attention, Perception, and Psychophysics</i> , 2009 , 71, 1313-24	2	8
36	Goal-driven attentional capture by invisible colors: evidence from event-related potentials. <i>Psychonomic Bulletin and Review</i> , 2009 , 16, 648-53	4.1	85
35	Revisiting the metacontrast dissociation: comparing sensitivity across different measures and tasks. <i>Quarterly Journal of Experimental Psychology</i> , 2009 , 62, 286-309	1.8	20
34	Transfer of response codes from choice-response to go/no-go tasks. <i>Quarterly Journal of Experimental Psychology</i> , 2009 , 62, 1216-35	1.8	22
33	Visual search for facial expressions of emotions: a comparison of dynamic and static faces. <i>Emotion</i> , 2009 , 9, 29-38	4.1	26

32	The impact of stimulus and response variability on S-R correspondence effects. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2008 , 34, 533-45	2.2	14
31	Visual masking and the dynamics of human perception, cognition, and consciousness A century of progress, a contemporary synthesis, and future directions. <i>Advances in Cognitive Psychology</i> , 2008 , 3, 1-8	1	11
30	Investigating the contribution of metacontrast to the Frölich effect for size. <i>Acta Psychologica</i> , 2008 , 128, 361-7	1.7	6
29	Electrophysiological activation by masked primes: Independence of prime-related and target-related activities. <i>Advances in Cognitive Psychology</i> , 2008 , 3, 449-65	1	11
28	Sensorimotor supremacy: Investigating conscious and unconscious vision by masked priming. <i>Advances in Cognitive Psychology</i> , 2008 , 3, 257-74	1	7
27	Comparing sensitivity across different processing measures under metacontrast masking conditions. <i>Vision Research</i> , 2007 , 47, 3335-49	2.1	18
26	A Simon effect in memory retrieval: evidence for the response-discrimination account. <i>Psychonomic Bulletin and Review</i> , 2007 , 14, 984-8	4.1	24
25	Preceding stimulus awareness augments offset-evoked potentials: evidence from motion-induced blindness. <i>Psychological Research</i> , 2007 , 71, 694-702	2.5	6
24	Preemptive control of attentional capture by colour: evidence from trial-by-trial analyses and orderings of onsets of capture effects in reaction time distributions. <i>Quarterly Journal of Experimental Psychology</i> , 2007 , 60, 952-75	1.8	48
23	Attentional shifts to rare singletons. <i>Visual Cognition</i> , 2006 , 14, 295-325	1.8	23
22	More efficient rejection of happy than of angry face distractors in visual search. <i>Psychonomic Bulletin and Review</i> , 2006 , 13, 1067-73	4.1	45
21	Latency facilitation in temporal-order judgments: time course of facilitation as a function of judgment type. <i>Acta Psychologica</i> , 2006 , 122, 129-59	1.7	34
20	Visual search for a motion singleton among coherently moving distractors. <i>Psychological Research</i> , 2006 , 70, 103-16	2.5	6
19	Trends and styles in visual masking. <i>Advances in Cognitive Psychology</i> , 2006 , 2, 1-5	1	3
18	Shifts of visuospatial attention to invisible (metacontrast-masked) singletons: Clues from reaction times and event-related potential. <i>Advances in Cognitive Psychology</i> , 2006 , 2, 61-76	1	32
17	Die Rolle von Absichten bei der automatischen Verarbeitung visuell-räumlicher Reizinformation. <i>Psychologische Rundschau</i> , 2006 , 57, 2-12	0.6	3
16	Top-down contingent capture by color: evidence from RT distribution analyses in a manual choice reaction task. <i>Acta Psychologica</i> , 2005 , 120, 243-66	1.7	37
15	Intentions determine the effect of invisible metacontrast-masked primes: evidence for top-down contingencies in a peripheral cuing task. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2005 , 31, 762-77	2.6	104

14	Exploring trial-by-trial modulations of the Simon effect. <i>Quarterly Journal of Experimental Psychology Section A: Human Experimental Psychology</i> , 2005 , 58, 705-31		103
13	Top-down contingencies of nonconscious priming revealed by dual-task interference. <i>Quarterly Journal of Experimental Psychology Section A: Human Experimental Psychology</i> , 2004 , 57, 1123-48		28
12	A response-discrimination account of the Simon effect. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2004 , 30, 365-77	2.6	151
11	Peripheral cuing by abrupt-onset cues: the influence of color in S-R corresponding conditions. <i>Acta Psychologica</i> , 2004 , 116, 115-43	1.7	31
10	Top-down contingencies in peripheral cuing: The roles of color and location. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2003 , 29, 937-48	2.6	93
9	Influences of response-activating stimuli and passage of time on the Simon effect. <i>Psychological Research</i> , 2003 , 67, 174-83	2.5	18
