#	ARTICLE	IF	CITATIONS
1	Increasing Contrast Improves Object Perception in Parkinson's Disease with Visual Hallucinations. <i>Movement Disorders Clinical Practice</i> , 2021, 8, 51-59.	1.5	3
2	American Geriatrics Society and National Institute on Aging Benchâ€”Bedside Conference: Sensory Impairment and Cognitive Decline in Older Adults. <i>Journal of the American Geriatrics Society</i> , 2018, 66, 2052-2058.	2.6	146
3	Investing in the Child Welfare Workforce. <i>Research on Social Work Practice</i> , 2016, 26, 484-488.	1.9	2
4	At the interface of sensory and motor dysfunctions and Alzheimer's disease. <i>Alzheimer's and Dementia</i> , 2015, 11, 70-98.	0.8	420
5	The American Academy of Social Work and Social Welfare. <i>Research on Social Work Practice</i> , 2014, 24, 495-500.	1.9	17
6	Joseph F. Fagan III (1941â€”2013). <i>Intelligence</i> , 2014, 46, 345-346.	3.0	0
7	Luminance affects age-related deficits in object detection: Implications for computerized psychological assessments.. <i>Psychology and Aging</i> , 2012, 27, 522-528.	1.6	6
8	Vision-fair neuropsychological assessment in normal aging, Parkinson's disease and Alzheimer's disease.. <i>Psychology and Aging</i> , 2012, 27, 785-790.	1.6	31
9	Bingo! Externally supported performance intervention for deficient visual search in normal aging, Parkinson's disease, and Alzheimer's disease. <i>Aging, Neuropsychology, and Cognition</i> , 2012, 19, 102-121.	1.3	15
10	Relation of Parkinson's Disease Subtypes to Visual Activities of Daily Living. <i>Journal of the International Neuropsychological Society</i> , 2011, 17, 841-852.	1.8	29
11	Inappropriate use of covariate analysis renders meaningless results. <i>Journal of the International Neuropsychological Society</i> , 2007, 13, 370; author reply 371.	1.8	6
12	Enhanced Stimulus Strength Improves Visual Cognition in Aging and Alzheimer's Disease. <i>Cortex</i> , 2007, 43, 952-966.	2.4	84
13	Age effects in coding tasks: Componential analysis and test of the sensory deficit hypothesis.. <i>Psychology and Aging</i> , 2006, 21, 7-18.	1.6	26
14	Stimulus Contrast and Word Reading Speed in Alzheimer's Disease. <i>Experimental Aging Research</i> , 2005, 31, 15-33.	1.2	33
15	Enhanced stimulus contrast normalizes visual processing of rapidly presented letters in Alzheimerâ€™s disease. <i>Vision Research</i> , 2005, 45, 1013-1020.	1.4	42
16	Symbolâ€”digit substitution and individual differences in visual search ability. <i>Intelligence</i> , 2004, 32, 47-64.	3.0	16
17	Visual processing of rapidly presented stimuli is normalized in Parkinsonâ€™s disease when proximal stimulus strength is enhanced. <i>Vision Research</i> , 2003, 43, 2827-2835.	1.4	43
18	Impact of Stimulus Integrity on Age Differences in Letter Matching. <i>Experimental Aging Research</i> , 2003, 29, 155-172.	1.2	3

#	ARTICLE	IF	CITATIONS
19	An adaptive reference/test paradigm: Application to pulsed fluoroscopy perception. Behavior Research Methods, 1998, 30, 332-348.	1.3	30
20	Hallucinations. International Psychogeriatrics, 1997, 8, 387-392.	1.0	4
21	Stimulus encoding in Alzheimer's disease: A multichannel view. Advances in Psychology, 1995, 110, 199-219.	0.1	6
22	Contrast Sensitivity in Alzheimer's Disease: A 1-Year Longitudinal Analysis. Optometry and Vision Science, 1995, 72, 83-91.	1.2	65
23	Perceptual comparison of pulsed and continuous fluoroscopy. Medical Physics, 1994, 21, 245-256.	3.0	116
24	Motion perception and aging.. Psychology and Aging, 1992, 7, 654-660.	1.6	123
25	Visual information decoding deficits in schizophrenia. Psychiatry Research, 1992, 44, 203-216.	3.3	18
26	Spatial Contrast Sensitivity in Alzheimer's Disease: A Comparison of Two Methods. Optometry and Vision Science, 1991, 68, 790-794.	1.2	47
27	Balint's Syndrome in Alzheimer's Disease: Visuospatial Functions. International Journal of Neuroscience, 1990, 54, 339-346.	1.6	59
28	Age and Functions of the Transient Component of on and off Responses in Visual Processes. Quarterly Journal of Experimental Psychology Section A: Human Experimental Psychology, 1985, 37, 147-170.	2.3	5
29	Letters are visual stimuli: A comment on the use of confusion matrices. Perception & Psychophysics, 1985, 37, 389-390.	2.3	5
30	Spatiotemporal factors and developmental changes in visual processes. Bulletin of the Psychonomic Society, 1985, 23, 404-406.	0.2	6
31	Age differences in symbol-digit substitution task performance. Journal of Clinical Psychology, 1983, 39, 114-124.	1.9	32
32	Normative data for the symbol digit substitution task. Journal of Clinical Psychology, 1981, 37, 608-614.	1.9	28
33	Letter Interactions in Brief Visual Displays. The Quarterly Journal of Experimental Psychology, 1980, 32, 649-668.	1.2	9
34	Perceptual organization in schizophrenia.. Journal of Abnormal Psychology, 1980, 89, 409-418.	1.9	305
35	Multidimensional letter similarity: A reply to Mewhort and Dow. Perception & Psychophysics, 1979, 26, 501-502.	2.3	4
36	When are nonwords easy to see?. Memory and Cognition, 1976, 4, 519-524.	1.6	8
