#	ARTICLE	IF	CITATIONS
1	Semantic memory and creativity: the costs and benefits of semantic memory structure in generating original ideas. <i>Thinking and Reasoning</i> , 2023, 29, 305-339.	2.1	14
2	The seven sins of memory: an update. <i>Memory</i> , 2022, 30, 37-42.	0.9	24
3	Decoding the emotional valence of future thoughts. <i>Cognitive Neuroscience</i> , 2022, 13, 10-14.	0.6	2
4	On the evolution of a functional approach to memory. <i>Learning and Behavior</i> , 2022, 50, 11-19.	0.5	5
5	Media, technology, and the sins of memory. <i>Memory, Mind & Media</i> , 2022, 1, .	0.6	17
6	Does Episodic Retrieval Contribute to Creative Writing? An Exploratory Study. <i>Creativity Research Journal</i> , 2022, 34, 145-158.	1.7	8
7	Examining multiple features of episodic future thinking and episodic memory among suicidal adults. <i>Suicide and Life-Threatening Behavior</i> , 2022, 52, 356-372.	0.9	5
8	The influence of shifting perspective on episodic and semantic details during autobiographical memory recall. <i>Memory</i> , 2022, 30, 942-954.	0.9	10
9	Schema-related eye movements support episodic simulation. <i>Consciousness and Cognition</i> , 2022, 100, 103302.	0.8	3
10	Remembering a Virtual Museum Tour: Viewing Time, Memory Reactivation, and Memory Distortion. <i>Frontiers in Psychology</i> , 2022, 13, 869336.	1.1	1
11	Individuals with highly superior autobiographical memory do not show enhanced creative thinking. <i>Memory</i> , 2022, 30, 1148-1157.	0.9	3
12	A Role for the Anterior Hippocampus in Autobiographical Memory Construction Regardless of Temporal Distance. <i>Journal of Neuroscience</i> , 2022, 42, 6445-6452.	1.7	9
13	Cognitive mechanisms of episodic simulation in psychiatric populations. <i>Behaviour Research and Therapy</i> , 2021, 136, 103778.	1.6	10
14	Increasing resolution in the mechanisms of resolve. <i>Behavioral and Brain Sciences</i> , 2021, 44, e34.	0.4	0
15	Constructive Episodic Simulation: Cognitive and Neural Processes. , 2021, , 449-466.		2
16	Evidence supporting a time-limited hippocampal role in retrieving autobiographical memories. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2021, 118, .	3.3	33
17	Divergent thinking and constructing future events: dissociating old from new ideas. <i>Memory</i> , 2021, 29, 729-743.	0.9	13
18	Reinstatement of item-specific contextual details during retrieval supports recombination-related false memories. <i>NeuroImage</i> , 2021, 236, 118033.	2.1	16

#	ARTICLE	IF	CITATIONS
19	Risks, real and imagined. <i>Nature Aging</i> , 2021, 1, 628-630.	5.3	1
20	Improving autobiographical memory in Alzheimer's disease by transcranial alternating current stimulation. <i>Current Opinion in Behavioral Sciences</i> , 2021, 40, 64-71.	2.0	15
21	Linking creativity and false memory: Common consequences of a flexible memory system. <i>Cognition</i> , 2021, 217, 104905.	1.1	8
22	Dynamic Content Reactivation Supports Naturalistic Autobiographical Recall in Humans. <i>Journal of Neuroscience</i> , 2021, 41, 153-166.	1.7	22
23	A long time ago in a galaxy far, far away: How temporal are episodic contents?. <i>Consciousness and Cognition</i> , 2021, 96, 103224.	0.8	9
24	Looking on the Bright Side: Aging and the Impact of Emotional Future Simulation on Subsequent Memory. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2020, 75, 1831-1840.	2.4	9
25	Default network contributions to episodic and semantic processing during divergent creative thinking: A representational similarity analysis. <i>NeuroImage</i> , 2020, 209, 116499.	2.1	56
26	The core episodic simulation network dissociates as a function of subjective experience and objective content. <i>Neuropsychologia</i> , 2020, 136, 107263.	0.7	32
27	How Older Adults Remember the World Depends On How They See It. <i>Trends in Cognitive Sciences</i> , 2020, 24, 858-861.	4.0	8
28	Research priorities for the COVID-19 pandemic and beyond: A call to action for psychological science. <i>British Journal of Psychology</i> , 2020, 111, 603-629.	1.2	146
29	The role of neuronal excitability, allocation to an engram and memory linking in the behavioral generation of a false memory in mice. <i>Neurobiology of Learning and Memory</i> , 2020, 174, 107284.	1.0	21
30	Aging in an Era of Fake News. <i>Current Directions in Psychological Science</i> , 2020, 29, 316-323.	2.8	157
31	Memory and Imagination: Perspectives on Constructive Episodic Simulation. , 2020, , 111-131.		30
32	Modulation of hippocampal brain networks produces changes in episodic simulation and divergent thinking. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 12729-12740.	3.3	50
33	Deliberating trade-offs with the future. <i>Nature Human Behaviour</i> , 2020, 4, 238-247.	6.2	36
34	Age-related changes in repetition suppression of neural activity during emotional future simulation. <i>Neurobiology of Aging</i> , 2020, 94, 287-297.	1.5	8
35	Mind-Wandering Across the Age Gap: Age-Related Differences in Mind-Wandering Are Partially Attributable to Age-Related Differences in Motivation. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2020, 76, 1264-1271.	2.4	15
36	Reinstatement of Event Details during Episodic Simulation in the Hippocampus. <i>Cerebral Cortex</i> , 2020, 30, 2321-2337.	1.6	25

#	ARTICLE	IF	CITATIONS
37	Not to worry: Episodic retrieval impacts emotion regulation in older adults.. <i>Emotion</i> , 2020, 20, 590-604.	1.5	7
38	How thinking about what could have been affects how we feel about what was. <i>Cognition and Emotion</i> , 2019, 33, 646-659.	1.2	15
39	Thinking about the past and future in daily life: an experience sampling study of individual differences in mental time travel. <i>Psychological Research</i> , 2019, 83, 805-816.	1.0	35
40	Selective effects of specificity inductions on episodic details: evidence for an event construction account. <i>Memory</i> , 2019, 27, 250-260.	0.9	37
41	Forming attitudes via neural activity supporting affective episodic simulations. <i>Nature Communications</i> , 2019, 10, 2215.	5.8	28
42	Large-scale network interactions involved in dividing attention between the external environment and internal thoughts to pursue two distinct goals. <i>NeuroImage</i> , 2019, 197, 49-59.	2.1	18
43	Self-Agency and Self-Ownership in Cognitive Mapping. <i>Trends in Cognitive Sciences</i> , 2019, 23, 476-487.	4.0	35
44	Constructing autobiographical events within a spatial or temporal context: a comparison of two targeted episodic induction techniques. <i>Memory</i> , 2019, 27, 881-893.	0.9	15
45	Content-specific phenomenological similarity between episodic memory and simulation. <i>Memory</i> , 2019, 27, 417-422.	0.9	7
46	Network neuroscience of creative cognition: mapping cognitive mechanisms and individual differences in the creative brain. <i>Current Opinion in Behavioral Sciences</i> , 2019, 27, 22-30.	2.0	172
47	Episodic specificity induction and scene construction: Evidence for an event construction account. <i>Consciousness and Cognition</i> , 2019, 68, 1-11.	0.8	18
48	Implicit Memory, Constructive Memory, and Imagining the Future: A Career Perspective. <i>Perspectives on Psychological Science</i> , 2019, 14, 256-272.	5.2	22
49	Increasing participant motivation reduces rates of intentional and unintentional mind wandering. <i>Psychological Research</i> , 2019, 83, 1057-1069.	1.0	49
50	Neural Mechanisms of Episodic Retrieval Support Divergent Creative Thinking. <i>Cerebral Cortex</i> , 2019, 29, 150-166.	1.6	83
51	Adaptive constructive processes: An episodic specificity induction impacts false recall in the Deese-Roediger-McDermott paradigm.. <i>Journal of Experimental Psychology: General</i> , 2019, 148, 1480-1493.	1.5	14
52	An Optimistic Outlook Creates a Rosy Past: The Impact of Episodic Simulation on Subsequent Memory. <i>Psychological Science</i> , 2018, 29, 936-946.	1.8	19
53	Remembering the past and imagining the future: attachment effects on production of episodic details in close relationships. <i>Memory</i> , 2018, 26, 1140-1150.	0.9	10
54	Constructive episodic simulation, flexible recombination, and memory errors. <i>Behavioral and Brain Sciences</i> , 2018, 41, e32.	0.4	5

#	ARTICLE	IF	CITATIONS
55	On the Clock: Evidence for the Rapid and Strategic Modulation of Mind Wandering. <i>Psychological Science</i> , 2018, 29, 1247-1256.	1.8	37
56	Better imagined: Neural correlates of the episodic simulation boost to prospective memory performance. <i>Neuropsychologia</i> , 2018, 113, 22-28.	0.7	14
57	Scene Construction and Relational Processing: Separable Constructs?. <i>Cerebral Cortex</i> , 2018, 28, 1729-1732.	1.6	26
58	Remembering and imagining alternative versions of the personal past. <i>Neuropsychologia</i> , 2018, 110, 170-179.	0.7	44
59	Increased hippocampus to ventromedial prefrontal connectivity during the construction of episodic future events. <i>Hippocampus</i> , 2018, 28, 76-80.	0.9	69
60	Brain networks of the imaginative mind: Dynamic functional connectivity of default and cognitive control networks relates to openness to experience. <i>Human Brain Mapping</i> , 2018, 39, 811-821.	1.9	127
61	How pervasive is mind wandering, really?.. <i>Consciousness and Cognition</i> , 2018, 66, 74-78.	0.8	67
62	The Family-Resemblances Framework for Mind-Wandering Remains Well Clad. <i>Trends in Cognitive Sciences</i> , 2018, 22, 959-961.	4.0	40
63	Mind-Wandering as a Natural Kind: A Family-Resemblances View. <i>Trends in Cognitive Sciences</i> , 2018, 22, 479-490.	4.0	233
64	Core Network Contributions to Remembering the Past, Imagining the Future, and Thinking Creatively. <i>Journal of Cognitive Neuroscience</i> , 2018, 30, 1939-1951.	1.1	54
65	Flexible retrieval mechanisms supporting successful inference produce false memories in younger but not older adults.. <i>Psychology and Aging</i> , 2018, 33, 134-143.	1.4	13
66	The awakening of the attention: Evidence for a link between the monitoring of mind wandering and prospective goals.. <i>Journal of Experimental Psychology: General</i> , 2018, 147, 431-443.	1.5	22
67	False memories, false preferences: Flexible retrieval mechanisms supporting successful inference bias novel decisions.. <i>Journal of Experimental Psychology: General</i> , 2018, 147, 988-1004.	1.5	27
68	The degree of disparateness of event details modulates future simulation construction, plausibility, and recall. , 2018, , 26-34.		0
69	Creative constraints: Brain activity and network dynamics underlying semantic interference during idea production. <i>NeuroImage</i> , 2017, 148, 189-196.	2.1	136
70	Imagining the future: The core episodic simulation network dissociates as a function of timecourse and the amount of simulated information. <i>Cortex</i> , 2017, 90, 12-30.	1.1	33
71	Effects of aging on the relation between episodic simulation and prosocial intentions. <i>Memory</i> , 2017, 25, 1272-1278.	0.9	24
72	Intentionality and meta-awareness of mind wandering: Are they one and the same, or distinct dimensions?. <i>Psychonomic Bulletin and Review</i> , 2017, 24, 1808-1818.	1.4	44

#	ARTICLE	IF	CITATIONS
73	Priming, not inhibition, of related concepts during future imagining. <i>Memory</i> , 2017, 25, 1235-1245.	0.9	6
74	Cognitive aging and the distinction between intentional and unintentional mind wandering. <i>Psychology and Aging</i> , 2017, 32, 315-324.	1.4	45
75	Mind-wandering and task stimuli: Stimulus-dependent thoughts influence performance on memory tasks and are more often past- versus future-oriented. <i>Consciousness and Cognition</i> , 2017, 52, 55-67.	0.8	30
76	Episodic future thinking: mechanisms and functions. <i>Current Opinion in Behavioral Sciences</i> , 2017, 17, 41-50.	2.0	484
77	What did you have in mind? Examining the content of intentional and unintentional types of mind wandering. <i>Consciousness and Cognition</i> , 2017, 51, 149-156.	0.8	46
78	Shifting visual perspective during retrieval shapes autobiographical memories. <i>NeuroImage</i> , 2017, 148, 103-114.	2.1	75
79	Aging and the resting state: cognition is not obsolete. <i>Language, Cognition and Neuroscience</i> , 2017, 32, 692-694.	0.7	7
80	Neural activity associated with repetitive simulation of episodic counterfactual thoughts. <i>Neuropsychologia</i> , 2017, 106, 123-132.	0.7	12
81	Characterizing the role of the hippocampus during episodic simulation and encoding. <i>Hippocampus</i> , 2017, 27, 1275-1284.	0.9	20
82	Preparing for what might happen: An episodic specificity induction impacts the generation of alternative future events. <i>Cognition</i> , 2017, 169, 118-128.	1.1	50
83	A Role for the Left Angular Gyus in Episodic Simulation and Memory. <i>Journal of Neuroscience</i> , 2017, 37, 8142-8149.	1.7	138
84	Episodic and semantic content of memory and imagination: A multilevel analysis. <i>Memory and Cognition</i> , 2017, 45, 1078-1094.	0.9	55
85	Tracking the emergence of memories: A category-learning paradigm to explore schema-driven recognition. <i>Memory and Cognition</i> , 2017, 45, 105-120.	0.9	15
86	Ageing and the resting state: is cognition obsolete?. <i>Language, Cognition and Neuroscience</i> , 2017, 32, 661-668.	0.7	46
87	Flexible retrieval: When true inferences produce false memories. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2017, 43, 335-349.	0.7	89
88	Creativity, Self-Generated Thought, and the Brain's Default Network. , 2017, , 171-183.		11
89	Escaping the Past: Contributions of the Hippocampus to Future Thinking and Imagination. , 2017, , 439-465.		32
90	Remembering the past and imagining the future: Identifying and enhancing the contribution of episodic memory. <i>Memory Studies</i> , 2016, 9, 245-255.	0.8	170

#	ARTICLE	IF	CITATIONS
91	Age differences in hippocampal activation during gist-based false recognition. <i>Neurobiology of Aging</i> , 2016, 46, 76-83.	1.5	18
92	Interpolated testing influences focused attention and improves integration of information during a video-recorded lecture.. <i>Journal of Experimental Psychology: Applied</i> , 2016, 22, 305-318.	0.9	49
93	Autobiographical memory conjunction errors in younger and older adults: Evidence for a role of inhibitory ability.. <i>Psychology and Aging</i> , 2016, 31, 927-942.	1.4	12
94	Divergent creative thinking in young and older adults: Extending the effects of an episodic specificity induction. <i>Memory and Cognition</i> , 2016, 44, 974-988.	0.9	90
95	Memory and connection: Remembering the past and imagining the future in individuals, groups, and cultures. <i>Memory Studies</i> , 2016, 9, 241-244.	0.8	10
96	False memories with age: Neural and cognitive underpinnings. <i>Neuropsychologia</i> , 2016, 91, 346-359.	0.7	135
97	Episodic specificity induction impacts activity in a core brain network during construction of imagined future experiences. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 10696-10701.	3.3	69
98	Attenuated anticorrelation between the default and dorsal attention networks with aging: evidence from task and rest. <i>Neurobiology of Aging</i> , 2016, 45, 149-160.	1.5	202
99	Semantic representations in the temporal pole predict false memories. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 10180-10185.	3.3	80
100	Worrying about the future: An episodic specificity induction impacts problem solving, reappraisal, and well-being.. <i>Journal of Experimental Psychology: General</i> , 2016, 145, 402-418.	1.5	135
101	When the mind wanders: Distinguishing stimulus-dependent from stimulus-independent thoughts during incidental encoding in young and older adults.. <i>Psychology and Aging</i> , 2016, 31, 370-379.	1.4	31
102	Default Network and Aging: Beyond the Task-Negative Perspective. <i>Trends in Cognitive Sciences</i> , 2016, 20, 646-648.	4.0	13
103	Mind-Wandering With and Without Intention. <i>Trends in Cognitive Sciences</i> , 2016, 20, 605-617.	4.0	282
104	Divergent thinking and constructing episodic simulations. <i>Memory</i> , 2016, 24, 89-97.	0.9	107
105	Remembering the past and imagining the future: Selective effects of an episodic specificity induction on detail generation. <i>Quarterly Journal of Experimental Psychology</i> , 2016, 69, 285-298.	0.6	69
106	Factors that influence the generation of autobiographical memory conjunction errors. <i>Memory</i> , 2016, 24, 204-222.	0.9	51
107	From mind wandering to involuntary retrieval: Age-related differences in spontaneous cognitive processes. <i>Neuropsychologia</i> , 2016, 80, 142-156.	0.7	88
108	Creative Cognition and Brain Network Dynamics. <i>Trends in Cognitive Sciences</i> , 2016, 20, 87-95.	4.0	680

#	ARTICLE	IF	CITATIONS
109	The degree of disparateness of event details modulates future simulation construction, plausibility, and recall. <i>Quarterly Journal of Experimental Psychology</i> , 2016, 69, 234-242.	0.6	12
110	Enhancing attention and memory during video-recorded lectures.. <i>Scholarship of Teaching and Learning in Psychology</i> , 2015, 1, 60-71.	0.9	71
111	Napping and the selective consolidation of negative aspects of scenes.. <i>Emotion</i> , 2015, 15, 176-186.	1.5	106
112	Repetition-Related Reductions in Neural Activity during Emotional Simulations of Future Events. <i>PLoS ONE</i> , 2015, 10, e0138354.	1.1	12
113	Neural activity associated with self, other, and object-based counterfactual thinking. <i>NeuroImage</i> , 2015, 109, 12-26.	2.1	52
114	A ten-year follow-up of a study of memory for the attack of September 11, 2001: Flashbulb memories and memories for flashbulb events.. <i>Journal of Experimental Psychology: General</i> , 2015, 144, 604-623.	1.5	133
115	Creativity and Memory. <i>Psychological Science</i> , 2015, 26, 1461-1468.	1.8	199
116	Specifying the core network supporting episodic simulation and episodic memory by activation likelihood estimation. <i>Neuropsychologia</i> , 2015, 75, 450-457.	0.7	311
117	Modifying memory for a museum tour in older adults: Reactivation-related updating that enhances and distorts memory is reduced in ageing. <i>Memory</i> , 2015, 23, 876-887.	0.9	38
118	Autobiographical Planning and the Brain: Activation and Its Modulation by Qualitative Features. <i>Journal of Cognitive Neuroscience</i> , 2015, 27, 2147-2157.	1.1	42
119	Making the future memorable: The phenomenology of remembered future events. <i>Memory</i> , 2015, 23, 1255-1263.	0.9	28
120	Episodic future thinking in generalized anxiety disorder. <i>Journal of Anxiety Disorders</i> , 2015, 36, 1-8.	1.5	56
121	Episodic future thinking and episodic counterfactual thinking: Intersections between memory and decisions. <i>Neurobiology of Learning and Memory</i> , 2015, 117, 14-21.	1.0	164
122	Adaptive constructive processes and memory accuracy: Consequences of counterfactual simulations in young and older adults. <i>Memory</i> , 2014, 22, 145-162.	0.9	26
123	An episodic specificity induction enhances means-end problem solving in young and older adults.. <i>Psychology and Aging</i> , 2014, 29, 913-924.	1.4	109
124	Constructive episodic simulation: Dissociable effects of a specificity induction on remembering, imagining, and describing in young and older adults.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2014, 40, 609-622.	0.7	140
125	A taxonomy of prospection: Introducing an organizational framework for future-oriented cognition. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 18414-18421.	3.3	361
126	Episodic and semantic components of autobiographical memories and imagined future events in post-traumatic stress disorder. <i>Memory</i> , 2014, 22, 595-604.	0.9	89
