#	ARTICLE	IF	CITATIONS
1	The spatiotemporal transmission dynamics of COVID-19 among multiple regions: a modeling study in Chinese provinces. <i>Nonlinear Dynamics</i> , 2022, 107, 1313-1327.	5.2	7
2	Short-term exposure to ambient air pollution and risk of daily hospital admissions for anxiety in China: A multicity study. <i>Journal of Hazardous Materials</i> , 2022, 424, 127535.	12.4	11
3	Prenatal exposure to air pollution and neurodevelopmental delay in children: A birth cohort study in Foshan, China. <i>Science of the Total Environment</i> , 2022, 816, 151658.	8.0	16
4	The association between ozone and ischemic stroke morbidity among patients with type 2 diabetes in Beijing, China. <i>Science of the Total Environment</i> , 2022, 818, 151733.	8.0	8
5	Interactive effects of cold spell and air pollution on outpatient visits for anxiety in three subtropical Chinese cities. <i>Science of the Total Environment</i> , 2022, 817, 152789.	8.0	16
6	Residential green and blue space associated with lower risk of adult-onset inflammatory bowel disease: Findings from a large prospective cohort study. <i>Environment International</i> , 2022, 160, 107084.	10.0	17
7	Disease Burden and Attributable Risk Factors of Alzheimer's Disease and Dementia in China from 1990 to 2019. <i>Journal of prevention of Alzheimer's disease</i> , The, 2022, 9, 306-314.	2.7	5
8	Ambient sulfur dioxide and hospital expenditures and length of hospital stay for respiratory diseases: A multicity study in China. <i>Ecotoxicology and Environmental Safety</i> , 2022, 229, 113082.	6.0	8
9	Ambient gaseous pollutants and emergency ambulance calls for all-cause and cause-specific diseases in China: a multicity time-series study. <i>Environmental Science and Pollution Research</i> , 2022, 29, 28527-28537.	5.3	4
10	Global burden of chronic obstructive pulmonary disease attributable to ambient particulate matter pollution and household air pollution from solid fuels from 1990 to 2019. <i>Environmental Science and Pollution Research</i> , 2022, 29, 32788-32799.	5.3	11
11	Frailty Risk in Older Adults Associated With Long-Term Exposure to Ambient PM <sub>2.5</sub> in 6 Middle-Income Countries. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2022, 77, 970-976.	3.6	7
12	Risk/benefit tradeoff of habitual physical activity and air pollution on chronic pulmonary obstructive disease: findings from a large prospective cohort study. <i>BMC Medicine</i> , 2022, 20, 70.	5.5	38
13	Comparison of 19 major infectious diseases during COVID-19 epidemic and previous years in Zhejiang, implications for prevention measures. <i>BMC Infectious Diseases</i> , 2022, 22, 296.	2.9	15
14	Prevalence and Associated Factors for Elevated Depressive Symptoms in 386,924 Primary Students during the COVID-19 Pandemic Normalization in China. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 3406.	2.6	2
15	Effect and attributable burden of hot extremes on bacillary dysentery in 31 Chinese provincial capital cities. <i>Science of the Total Environment</i> , 2022, 832, 155028.	8.0	4
16	Differentiating the effects of air pollution on daily mortality counts and years of life lost in six Chinese megacities. <i>Science of the Total Environment</i> , 2022, 827, 154037.	8.0	5
17	Contribution of heavy metals in PM <sub>2.5</sub> to cardiovascular disease mortality risk, a case study in Guangzhou, China. <i>Chemosphere</i> , 2022, 297, 134102.	8.2	27
18	Constituents of fine particulate matter and asthma in 6 low- and middle-income countries. <i>Journal of Allergy and Clinical Immunology</i> , 2022, 150, 214-222.e5.	2.9	25

#	ARTICLE	IF	CITATIONS
19	Empirical dynamic modeling of the association between ambient PM <sub>2.5</sub> and under-five mortality across 2851 counties in Mainland China, 1999–2012. <i>Ecotoxicology and Environmental Safety</i> , 2022, 237, 113513.	6.0	3
20	Prevalence of stroke in China: overestimated? – Authors' reply. <i>Lancet Public Health</i> , The, 2022, 7, e405.	10.0	1
21	Population attributable fraction of lung cancer due to genetic variants, modifiable risk factors, and their interactions: a nationwide prospective cohort study. <i>Chemosphere</i> , 2022, 301, 134773.	8.2	8
22	Association between ambient air pollution and hospital admissions, length of hospital stay and hospital cost for patients with cardiovascular diseases and comorbid diabetes mellitus: Base on 1,969,755 cases in Beijing, China, 2014–2019. <i>Environment International</i> , 2022, 165, 107301.	10.0	11
23	High-Temperature Soup Foods in Plastic Packaging Are Associated with Phthalate Body Burden and Expression of Inflammatory mRNAs: A Dietary Intervention Study. <i>Environmental Science &amp; Technology</i> , 2022, 56, 8416-8427.	10.0	2
24	Ambient Air Pollution Associated with Body Fat Percentages at Different Body Compartments: A Cohort Study of UK Biobank Participants. <i>Environmental Health Perspectives</i> , 2022, 130, .	6.0	10
25	Improvement in life expectancy for ischemic heart diseases by achieving daily ambient PM <sub>2.5</sub> standards in China. <i>Environmental Research</i> , 2021, 193, 110512.	7.5	7
26	The 2020 China report of the Lancet Countdown on health and climate change. <i>Lancet Public Health</i> , The, 2021, 6, e64-e81.	10.0	106
27	Community evidence of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) transmission through air. <i>Atmospheric Environment</i> , 2021, 246, 118083.	4.1	27
28	Hypertension and Comorbidities in Rural and Urban Chinese Older People: An Epidemiological Subanalysis From the SAGE Study. <i>American Journal of Hypertension</i> , 2021, 34, 183-189.	2.0	7
29	Association Between Ambient Temperature and Years of Life Lost from Stroke – 30 PLADs, China, 2013–2016. <i>China CDC Weekly</i> , 2021, 3, 485-489.	2.3	7
30	Short-term exposure to nitrogen dioxide and outpatient visits for cause-specific conjunctivitis: A time-series study in Jinan, China. <i>Atmospheric Environment</i> , 2021, 247, 118211.	4.1	5
31	Acute effects of particulate matter with different sizes on respiratory mortality in Shenzhen, China. <i>Environmental Science and Pollution Research</i> , 2021, 28, 37195-37203.	5.3	8
32	Association between maternal outdoor physical exercise and the risk of preterm birth: a case-control study in Wuhan, China. <i>BMC Pregnancy and Childbirth</i> , 2021, 21, 206.	2.4	7
33	Prevalence and Factors for Anxiety during the COVID-19 Pandemic among College Students in China. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 4974.	2.6	20
34	Years of life lost and life expectancy attributable to ambient temperature: a time series study in 93 Chinese cities. <i>Environmental Research Letters</i> , 2021, 16, 064015.	5.2	5
35	Disease burden and attributable risk factors of respiratory infections in China from 1990 to 2019. <i>The Lancet Regional Health - Western Pacific</i> , 2021, 11, 100153.	2.9	11
36	Ambient PM <sub>2.5</sub> exposure and hospital cost and length of hospital stay for respiratory diseases in 11 cities in Shanxi Province, China. <i>Thorax</i> , 2021, 76, 815-820.	5.6	20

#	ARTICLE	IF	CITATIONS
37	Maternal PM2.5 exposure associated with stillbirth: A large birth cohort study in seven Chinese cities. International Journal of Hygiene and Environmental Health, 2021, 236, 113795.	4.3	16
38	Associations of heat and cold with hospitalizations and post-discharge deaths due to acute myocardial infarction: what is the role of pre-existing diabetes?. International Journal of Epidemiology, 2021, , .	1.9	2
39	Different sized particles associated with all-cause and cause-specific emergency ambulance calls: A multicity time-series analysis in China. Science of the Total Environment, 2021, 783, 147060.	8.0	18
40	Ambient air pollution and low temperature associated with case fatality of COVID-19: A nationwide retrospective cohort study in China. Innovation(China), 2021, 2, 100139.	9.1	20
41	Modeling coupling dynamics between the transmission, intervention of COVID-19 and economic development. Results in Physics, 2021, 28, 104632.	4.1	2
42	Association between particulate matter air pollution and risk of depression and suicide: a systematic review and meta-analysis. Environmental Science and Pollution Research, 2021, 28, 9029-9049.	5.3	51
43	Prevalence and associated factors of anxiety among 538,500 Chinese students during the outbreak of COVID-19: A web-based cross-sectional study. Psychiatry Research, 2021, 305, 114251.	3.3	4
44	The 2021 China report of the Lancet Countdown on health and climate change: seizing the window of opportunity. Lancet Public Health, The, 2021, 6, e932-e947.	10.0	41
45	Short-term mortality risks of daily PM2.5-bound metals in urban region of Guangzhou, China, an indication of health risks of PM2.5 exposure. Ecotoxicology and Environmental Safety, 2021, 228, 113049.	6.0	3
46	Temporal trend and attributable risk factors of stroke burden in China, 1990â€“2019: an analysis for the Global Burden of Disease Study 2019. Lancet Public Health, The, 2021, 6, e897-e906.	10.0	257
47	The Trends of Psychological Status of People Entering from High-Risk Areas of COVID-19 Coronavirus During the Quarantine in Dedicated Hotels: A Longitudinal Survey Study from Guangzhou, China. Risk Management and Healthcare Policy, 2021, Volume 14, 5005-5014.	2.5	1
48	Association of Indoor and Outdoor Air Pollution With Hand-Grip Strength Among Adults in Six Low- and Middle-Income Countries. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2020, 75, 340-347.	3.6	10
49	Ambient air pollution exposure and gestational diabetes mellitus in Guangzhou, China: A prospective cohort study. Science of the Total Environment, 2020, 699, 134390.	8.0	67
50	Benefits of physical activity not affected by air pollution: a prospective cohort study. International Journal of Epidemiology, 2020, 49, 142-152.	1.9	63
51	Maternal air pollution exposure associated with risk of congenital heart defect in pre-pregnancy overweighted women. Science of the Total Environment, 2020, 712, 136470.	8.0	23
52	Hourly associations between ambient temperature and emergency ambulance calls in one central Chinese city: Call for an immediate emergency plan. Science of the Total Environment, 2020, 711, 135046.	8.0	19
53	Estimating the attributable burden of preterm birth and low birth weight due to maternal ozone exposure in nine Chinese cities. Atmospheric Environment, 2020, 222, 117169.	4.1	11
54	Neighborhood greenness associated with chronic obstructive pulmonary disease: A nationwide cross-sectional study in China. Environment International, 2020, 144, 106042.	10.0	29

#	ARTICLE	IF	CITATIONS
55	Short-term effects of air pollution on cause-specific mental disorders in three subtropical Chinese cities. <i>Environmental Research</i> , 2020, 191, 110214.	7.5	33
56	Differentiating the effects of ambient fine and coarse particles on mortality from cardiopulmonary diseases: A nationwide multicity study. <i>Environment International</i> , 2020, 145, 106096.	10.0	43
57	The effect of temperature on cause-specific mental disorders in three subtropical cities: A case-crossover study in China. <i>Environment International</i> , 2020, 143, 105938.	10.0	48
58	Ambient air pollution exposure associated with glucose homeostasis during pregnancy and gestational diabetes mellitus. <i>Environmental Research</i> , 2020, 190, 109990.	7.5	30
59	Prolonged Life Expectancy for Those Dying of Stroke by Achieving the Daily PM 2.5 Targets. <i>Global Challenges</i> , 2020, 4, 2000048.	3.6	3
60	Changes in Life Expectancy of Respiratory Diseases from Attaining Daily PM2.5 Standard in China: A Nationwide Observational Study. <i>Innovation(China)</i> , 2020, 1, 100064.	9.1	30
61	Modification by seasonal influenza and season on the association between ambient air pollution and child respiratory diseases in Shenzhen, China. <i>Atmospheric Environment</i> , 2020, 234, 117621.	4.1	12
62	The mediation effect of maternal glucose on the association between ambient air pollution and birth weight in Foshan, China. <i>Environmental Pollution</i> , 2020, 266, 115128.	7.5	8
63	Potential gains in life expectancy by attaining daily ambient fine particulate matter pollution standards in mainland China: A modeling study based on nationwide data. <i>PLoS Medicine</i> , 2020, 17, e1003027.	8.4	94
64	Environmental contamination of SARS-CoV-2 in healthcare premises. <i>Journal of Infection</i> , 2020, 81, e1-e5.	3.3	234
65	How longer can people live by achieving the daily ambient fine particulate pollution standards in the Pearl River Delta region, China?. <i>Chemosphere</i> , 2020, 254, 126853.	8.2	5
66	Population Movement, City Closure in Wuhan, and Geographical Expansion of the COVID-19 Infection in China in January 2020. <i>Clinical Infectious Diseases</i> , 2020, 71, 2045-2051.	5.8	56
67	Transmission of pathogen-laden expiratory droplets in a coach bus. <i>Journal of Hazardous Materials</i> , 2020, 397, 122609.	12.4	131
68	Predictive Model and Risk Factors for Case Fatality of COVID-19: A Cohort of 21,392 Cases in Hubei, China. <i>Innovation(China)</i> , 2020, 1, 100022.	9.1	16
69	Empirical dynamic modeling reveals climatic drivers in dynamics of bacillary dysentery epidemics in China. <i>Environmental Research Letters</i> , 2020, 15, 124054.	5.2	3
70	Title is missing!. , 2020, 17, e1003027.		0
71	Title is missing!. , 2020, 17, e1003027.		0
72	Title is missing!. , 2020, 17, e1003027.		0

#	ARTICLE	IF	CITATIONS
73	Title is missing!. , 2020, 17, e1003027.		0
74	Title is missing!. , 2020, 17, e1003027.		0
75	Title is missing!. , 2020, 17, e1003027.		0
76	Ambient fine particulate matter and ozone higher than certain thresholds associated with myopia in the elderly aged 50 years and above. Environmental Research, 2019, 177, 108581.	7.5	28
77	Migrant population is more vulnerable to the effect of air pollution on preterm birth: Results from a birth cohort study in seven Chinese cities. International Journal of Hygiene and Environmental Health, 2019, 222, 1047-1053.	4.3	19
78	The association between ambient air pollution control and stroke mortality during the 2010 Asian Games in Guangzhou, China. Atmospheric Environment, 2019, 217, 116965.	4.1	10
79	Hourly associations between ambient air pollution and emergency ambulance calls in one central Chinese city: Implications for hourly air quality standards. Science of the Total Environment, 2019, 696, 133956.	8.0	35
80	Applying the concept of "number needed to treat" to the formulation of daily ambient air quality standards. Chemosphere, 2019, 222, 665-670.	8.2	6
81	Short-term and long-term effects of PM2.5 on acute nasopharyngitis in 10 communities of Guangdong, China. Science of the Total Environment, 2019, 688, 136-142.	8.0	33
82	The effects of excess degree-hours on mortality in Guangzhou, China. Environmental Research, 2019, 176, 108510.	7.5	5
83	The associations of air pollution exposure during pregnancy with fetal growth and anthropometric measurements at birth: a systematic review and meta-analysis. Environmental Science and Pollution Research, 2019, 26, 20137-20147.	5.3	25
84	Five-year lung cancer mortality risk analysis and topography in Xuan Wei: a spatiotemporal correlation analysis. BMC Public Health, 2019, 19, 173.	2.9	15
85	Ambient PM2.5 and birth outcomes: Estimating the association and attributable risk using a birth cohort study in nine Chinese cities. Environment International, 2019, 126, 329-335.	10.0	53
86	Modification Effects of Population Expansion, Ageing, and Adaptation on Heat-Related Mortality Risks Under Different Climate Change Scenarios in Guangzhou, China. International Journal of Environmental Research and Public Health, 2019, 16, 376.	2.6	19
87	Increased susceptibility to heat for respiratory hospitalizations in Hong Kong. Science of the Total Environment, 2019, 666, 197-204.	8.0	30
88	Association between particulate matter air pollution and risk of depression and suicide: systematic review and meta-analysis " RETRACTED. British Journal of Psychiatry, 2019, 215, 456-467.	2.8	58
89	Mapping Environmental Suitability of Scrub Typhus in Nepal Using MaxEnt and Random Forest Models. International Journal of Environmental Research and Public Health, 2019, 16, 4845.	2.6	16
90	Short-term and long-term exposures to fine particulate matter constituents and health: A systematic review and meta-analysis. Environmental Pollution, 2019, 247, 874-882.	7.5	245

#	ARTICLE	IF	CITATIONS
91	Ambient PM <sub>2.5</sub> and O <sub>3</sub> and their combined effects on prevalence of presbyopia among the elderly: A cross-sectional study in six low- and middle-income countries. <i>Science of the Total Environment</i> , 2019, 655, 168-173.	8.0	42
92	Long-term exposure to ambient fine particles associated with asthma: A cross-sectional study among older adults in six low- and middle-income countries. <i>Environmental Research</i> , 2019, 168, 141-145.	7.5	27
93	Non-linear effects of mean temperature and relative humidity on dengue incidence in Guangzhou, China. <i>Science of the Total Environment</i> , 2018, 628-629, 766-771.	8.0	58
94	Ambient coarse particulate pollution and mortality in three Chinese cities: Association and attributable mortality burden. <i>Science of the Total Environment</i> , 2018, 628-629, 1037-1042.	8.0	31
95	Age-dependent effect of ambient ozone on emergency asthma hospitalizations in Hong Kong. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 141, 1532-1534.e5.	2.9	20
96	The attributable risk of chronic obstructive pulmonary disease due to ambient fine particulate pollution among older adults. <i>Environment International</i> , 2018, 113, 143-148.	10.0	54
97	Weather variables and the El Niño Southern Oscillation may drive the epidemics of dengue in Guangdong Province, China. <i>Science of the Total Environment</i> , 2018, 624, 926-934.	8.0	35
98	Exposure to ambient PM <sub>2.5</sub> concentrations and cognitive function among older Mexican adults. <i>Environment International</i> , 2018, 117, 1-9.	10.0	41
99	Ambient particulate matter air pollution associated with acute respiratory distress syndrome in Guangzhou, China. <i>Journal of Exposure Science and Environmental Epidemiology</i> , 2018, 28, 392-399.	3.9	53
100	Long-term mortality benefits of air quality improvement during the twelfth five-year-plan period in 31 provincial capital cities of China. <i>Atmospheric Environment</i> , 2018, 173, 53-61.	4.1	48
101	Consumption of fruit and vegetables might mitigate the adverse effects of ambient PM <sub>2.5</sub> on lung function among adults. <i>Environmental Research</i> , 2018, 160, 77-82.	7.5	19
102	Daily exceedance concentration hours: A novel indicator to measure acute cardiovascular effects of PM <sub>2.5</sub> in six Chinese subtropical cities. <i>Environment International</i> , 2018, 111, 117-123.	10.0	43
103	Long-term exposure to ambient PM <sub>2.5</sub> associated with fall-related injury in six low- and middle-income countries. <i>Environmental Pollution</i> , 2018, 237, 961-967.	7.5	15
104	Ambient fine particulate pollution associated with diabetes mellitus among the elderly aged 50 years and older in China. <i>Environmental Pollution</i> , 2018, 243, 815-823.	7.5	62
105	Estimating the Excess Mortality Risk during Two Red Alert Periods in Beijing, China. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 50.	2.6	3
106	Estimating the acute effects of fine and coarse particle pollution on stroke mortality of in six Chinese subtropical cities. <i>Environmental Pollution</i> , 2018, 239, 812-817.	7.5	36
107	Effect of the 2008 cold spell on preterm births in two subtropical cities of Guangdong Province, Southern China. <i>Science of the Total Environment</i> , 2018, 642, 307-313.	8.0	26
108	Shipping pollution emission associated with increased cardiovascular mortality: A time series study in Guangzhou, China. <i>Environmental Pollution</i> , 2018, 241, 862-868.	7.5	46

#	ARTICLE	IF	CITATIONS
109	Ambient fine and coarse particulate matter pollution and respiratory morbidity in Dongguan, China. <i>Environmental Pollution</i> , 2017, 222, 126-131.	7.5	91
110	Hourly peak concentration measuring the PM 2.5 -mortality association: Results from six cities in the Pearl River Delta study. <i>Atmospheric Environment</i> , 2017, 161, 27-33.	4.1	43
111	Hypertension modifies the short-term effects of temperature on morbidity of hemorrhagic stroke. <i>Science of the Total Environment</i> , 2017, 598, 198-203.	8.0	14
112	Exposure to ambient PM 2.5 associated with overall and domain-specific disability among adults in six low- and middle-income countries. <i>Environment International</i> , 2017, 104, 69-75.	10.0	40
113	Ambient PM <sub>2.5</sub> and Stroke. <i>Stroke</i> , 2017, 48, 1191-1197.	2.0	95
114	Long-Term Effects of Ambient PM <sub>2.5</sub> on Hypertension and Blood Pressure and Attributable Risk Among Older Chinese Adults. <i>Hypertension</i> , 2017, 69, 806-812.	2.7	161
115	Seasonal association between ambient ozone and mortality in Zhengzhou, China. <i>International Journal of Biometeorology</i> , 2017, 61, 1003-1010.	3.0	32
116	Climate variation drives dengue dynamics. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017, 114, 113-118.	7.1	159
117	Using daily excessive concentration hours to explore the short-term mortality effects of ambient PM 2.5 in Hong Kong. <i>Environmental Pollution</i> , 2017, 229, 896-901.	7.5	39
118	Exposure to air pollution and tobacco smoking and their combined effects on depression in six low- and middle-income countries. <i>British Journal of Psychiatry</i> , 2017, 211, 157-162.	2.8	59
119	Air Pollution and Mortality in China. <i>Advances in Experimental Medicine and Biology</i> , 2017, 1017, 103-121.	1.6	26
120	Hourly peak PM <sub>2.5</sub> concentration associated with increased cardiovascular mortality in Guangzhou, China. <i>Journal of Exposure Science and Environmental Epidemiology</i> , 2017, 27, 333-338.	3.9	48
121	The construction and validity analysis of AQHI based on mortality risk: A case study in Guangzhou, China. <i>Environmental Pollution</i> , 2017, 220, 487-494.	7.5	44
122	Mortality benefits of vigorous air quality improvement interventions during the periods of APEC Blue and Parade Blue in Beijing, China. <i>Environmental Pollution</i> , 2017, 220, 222-227.	7.5	47
123	The Association of Domestic Incense Burning with Hypertension and Blood Pressure in Guangdong, China. <i>International Journal of Environmental Research and Public Health</i> , 2017, 14, 788.	2.6	7
124	Perceptions of Health Co-Benefits in Relation to Greenhouse Gas Emission Reductions: A Survey among Urban Residents in Three Chinese Cities. <i>International Journal of Environmental Research and Public Health</i> , 2017, 14, 298.	2.6	5
125	Individual and Interactive Effects of Socio-Ecological Factors on Dengue Fever at Fine Spatial Scale: A Geographical Detector-Based Analysis. <i>International Journal of Environmental Research and Public Health</i> , 2017, 14, 795.	2.6	36
126	Community Involvement in Dengue Outbreak Control: An Integrated Rigorous Intervention Strategy. <i>PLoS Neglected Tropical Diseases</i> , 2016, 10, e0004919.	3.0	35

#	ARTICLE	IF	CITATIONS
127	Tempo-Spatial Variations of Ambient Ozone-Mortality Associations in the USA: Results from the NMMAPS Data. International Journal of Environmental Research and Public Health, 2016, 13, 851.	2.6	13
128	The impact of cold spells on mortality and effect modification by cold spell characteristics. Scientific Reports, 2016, 6, 38380.	3.3	68
129	The washout effects of rainfall on atmospheric particulate pollution in two Chinese cities. Environmental Pollution, 2016, 215, 195-202.	7.5	110
130	Quantifying short-term and long-term health benefits of attaining ambient fine particulate pollution standards in Guangzhou, China. Atmospheric Environment, 2016, 137, 38-44.	4.1	57
