

Saori Fujii

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3593348/saori-fujii-publications-by-year.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

30
papers

572
citations

#	Paper	IF	Citations
30	Prolonged impacts of past agriculture and ungulate overabundance on soil fungal communities in restored forests. <i>Environmental DNA</i> , 2021 , 3, 930-939	7.6	
29	Soil fauna community assembled in the abandoned nests of Japanese wood mice. <i>Journal of the Acarological Society of Japan</i> , 2021 , 30, 1-4	0.3	
28	Radiocarbon signature reveals that most springtails depend on carbon from living plants. <i>Biology Letters</i> , 2021 , 17, 20210353	3.6	2
27	Living Litter: Dynamic Trait Spectra Predict Fauna Composition. <i>Trends in Ecology and Evolution</i> , 2020 , 35, 886-896	10.9	11
26	A meta-analysis on decomposition quantifies afterlife effects of plant diversity as a global change driver. <i>Nature Communications</i> , 2020 , 11, 4547	17.4	11
25	Combining tree species and decay stages to increase invertebrate diversity in dead wood. <i>Forest Ecology and Management</i> , 2019 , 441, 80-88	3.9	13
24	Taxi drivers: the role of animals in transporting mycorrhizal fungi. <i>Mycorrhiza</i> , 2019 , 29, 413-434	3.9	32
23	Leachate from fine root litter is more acidic than leaf litter leachate: A 2.5-year laboratory incubation. <i>Science of the Total Environment</i> , 2018 , 645, 179-191	10.2	9
22	Tree leaf and root traits mediate soil faunal contribution to litter decomposition across an elevational gradient. <i>Functional Ecology</i> , 2018 , 32, 840-852	5.6	34
21	Succession of soil microarthropod communities during the aboveground and belowground litter decomposition processes. <i>Soil Biology and Biochemistry</i> , 2017 , 110, 95-102	7.5	17
20	Disentangling relationships between plant diversity and decomposition processes under forest restoration. <i>Journal of Applied Ecology</i> , 2017 , 54, 80-90	5.8	47
19	A stronger coordination of litter decomposability between leaves and fine roots for woody species in a warmer region. <i>Trees - Structure and Function</i> , 2016 , 30, 395-404	2.6	9
18	Low multifunctional redundancy of soil fungal diversity at multiple scales. <i>Ecology Letters</i> , 2016 , 19, 249- 59		75
17	Plant species control and soil faunal involvement in the processes of above- and below-ground litter decomposition. <i>Oikos</i> , 2016 , 125, 883-892	4	10
16	Differential utilization of root-derived carbon among collembolan species. <i>Pedobiologia</i> , 2016 , 59, 225- 227		13
15	Ungulates decelerate litter decomposition by altering litter quality above and below ground. <i>European Journal of Forest Research</i> , 2016 , 135, 849-856	2.7	6
14	Functional redundancy of multiple forest taxa along an elevational gradient: predicting the consequences of non-random species loss. <i>Journal of Biogeography</i> , 2015 , 42, 1383-1396	4.1	21

13	Null model approaches to evaluating the relative role of different assembly processes in shaping ecological communities. <i>Oecologia</i> , 2015 , 178, 261-73	2.9	31
12	Estimation of ozone concentrations above forests using atmospheric observations at urban air pollution monitoring stations. <i>J Agricultural Meteorology</i> , 2015 , 71, 202-210	1.1	9
11	Tree species effects on microbial respiration from decomposing leaf and fine root litter. <i>Soil Biology and Biochemistry</i> , 2015 , 88, 39-47	7.5	21
10	Concordance and discordance between taxonomic and functional homogenization: responses of soil mite assemblages to forest conversion. <i>Oecologia</i> , 2015 , 179, 527-35	2.9	13
9	Biotic homogenization and differentiation of soil faunal communities in the production forest landscape: taxonomic and functional perspectives. <i>Oecologia</i> , 2015 , 177, 533-44	2.9	40
8	Effects of rhizospheres on the community composition of Collembola in a temperate forest. <i>Applied Soil Ecology</i> , 2014 , 83, 109-115	5	10
7	Effect of habitat structural complexity on collembolan communities. <i>Ecological Research</i> , 2014 , 29, 81-90	1.9	6
6	Relationships among distribution of fine roots, soil DOC concentration and Collembola. <i>Plant Root</i> , 2013 , 7, 21-27	0.8	1
5	Succession of collembolan communities during decomposition of leaf and root litter: Effects of litter type and position. <i>Soil Biology and Biochemistry</i> , 2012 , 54, 77-85	7.5	27
4	Evaluation of the bottom-up force of accumulated organic matter on microarthropods in a temperate forest floor. <i>European Journal of Soil Biology</i> , 2011 , 47, 409-413	2.9	7
3	Dominant effects of litter substrate quality on the difference between leaf and root decomposition process above- and belowground. <i>Soil Biology and Biochemistry</i> , 2010 , 42, 2224-2230	7.5	57
2	A new method for placing and lifting root meshes for estimating fine root production in forest ecosystems. <i>Plant Root</i> , 2009 , 3, 26-31	0.8	22
1	Fine root biomass and morphology of <i>Pinus densiflora</i> under competitive stress by <i>Chamaecyparis obtusa</i> . <i>Journal of Forest Research</i> , 2008 , 13, 185-189	1.4	18
