Version: 2024-02-01

#	Article	IF	CITATIONS
1	Features and uses of high-fidelity medical simulations that lead to effective learning: a BEME systematic review. Medical Teacher, 2005, 27, 10-28.	1.8	2,861
2	A critical review of simulation-based medical education research: 2003–2009. Medical Education, 2010, 44, 50-63.	2.1	1,278
3	Does Simulation-Based Medical Education With Deliberate Practice Yield Better Results Than Traditional Clinical Education? A Meta-Analytic Comparative Review of the Evidence. Academic Medicine, 2011, 86, 706-711.	1.6	1,273
4	Simulation in healthcare education: A best evidence practical guide. AMEE Guide No. 82. Medical Teacher, 2013, 35, e1511-e1530.	1.8	738
5	Simulation Technology for Health Care Professional Skills Training and Assessment. JAMA - Journal of the American Medical Association, 1999, 282, 861.	7.4	724
6	A critical review of simulation-based mastery learning with translational outcomes. Medical Education, 2014, 48, 375-385.	2.1	430
7	Simulation Technology for Skills Training and Competency Assessment in Medical Education. Journal of General Internal Medicine, 2008, 23, 46-49.	2.6	342
8	Effect of practice on standardised learning outcomes in simulation-based medical education. Medical Education, 2006, 40, 792-797.	2.1	275
9	Simulation in Health Care Education. Perspectives in Biology and Medicine, 2008, 51, 31-46.	0.5	178
10	Medical Education Featuring Mastery Learning With Deliberate Practice Can Lead to Better Health for Individuals and Populations. Academic Medicine, 2011, 86, e8-e9.	1.6	150
11	Simulation and new learning technologies. Medical Teacher, 2001, 23, 16-23.	1.8	136
12	The Scope of Simulation-based Healthcare Education. Simulation in Healthcare, 2006, 1, 203-208.	1.2	121
13	Effectiveness of a Cardiology Review Course for Internal Medicine Residents Using Simulation Technology and Deliberate Practice. Teaching and Learning in Medicine, 2002, 14, 223-228.	2.1	115
14	Setting a Research Agenda for Simulation-Based Healthcare Education. Simulation in Healthcare, 2011, 6, 155-167.	1.2	109
15	Effective Use of Simulations for the Teaching and Acquisition of Veterinary Professional and Clinical Skills. Journal of Veterinary Medical Education, 2005, 32, 461-467.	0.6	107
16	Translational Educational Research. Chest, 2012, 142, 1097-1103.	0.8	77
17	Revisiting â€~A critical review of simulation-based medical education research: 2003-2009'. Medical Education, 2016, 50, 986-991.	2.1	77
18	It Is Time to Consider Cultural Differences in Debriefing. Simulation in Healthcare, 2013, 8, 166-170.	1.2	72

2

#	Article	IF	CITATIONS
19	Learning objects in medical education. Medical Teacher, 2006, 28, 599-605.	1.8	71
20	The First Research Consensus Summit of the Society for Simulation In Healthcare. Simulation in Healthcare, 2011, 6, S1-S9.	1.2	58
21	Effectiveness of a computer-based system to teach bedside cardiology. Academic Medicine, 1999, 74, S93-5.	1.6	57
22	Stroke training of prehospital providers: an example of simulation-enhanced blended learning and evaluation. Medical Teacher, 2005, 27, 114-121.	1.8	51
23	Best evidence on high-fidelity simulation: what clinical teachers need to know. Clinical Teacher, 2007, 4, 73-77.	0.8	50
24	Incorporating Simulation Technology in a Canadian Internal Medicine Specialty Examination: A Descriptive Report. Academic Medicine, 2005, 80, 554-556.	1.6	49
25	Clinical skills training - practice makes perfect. Medical Education, 2002, 36, 210-211.	2.1	45
26	A blended approach to invasive bedside procedural instruction. Medical Teacher, 2011, 33, 116-123.	1.8	44
27	Association of cardiopulmonary resuscitation psychomotor skills with knowledge and selfâ€efficacy in nursing students. International Journal of Nursing Practice, 2014, 20, 674-679.	1.7	41
28	Addressing the Shortage of Geriatricians. Academic Medicine, 2015, 90, 1236-1240.	1.6	38
29	Epidemiology of SARS-CoV-2 antibodies among firefighters/paramedics of a US fire department: a cross-sectional study. Occupational and Environmental Medicine, 2020, 77, 857-861.	2.8	38
30	Assessing cardiac physical examination skills using simulation technology and real patients: a comparison study. Medical Education, 2008, 42, 628-636.	2.1	36
31	Long-term intended and unintended experiences after Advanced Life Support training. Resuscitation, 2013, 84, 373-377.	3.0	32
32	Patient Safety Training Simulations Based on Competency Criteria of the Accreditation Council for Graduate Medical Education. Mount Sinai Journal of Medicine, 2011, 78, 842-853.	1.9	31
33	Effects of an integrated simulation-based resuscitation skills training with clinical practicum on mastery learning and self-efficacy in nursing students. Collegian, 2016, 23, 53-59.	1.3	27
34	Skill Improvement During Emergency Response to Terrorism Training. Prehospital Emergency Care, 2006, 10, 507-514.	1.8	25
35	Development and Psychometric Evaluation of the Resuscitation Self-efficacy Scale for Nurses. Journal of Korean Academy of Nursing, 2012, 42, 1079.	1.2	25
36	Development, Implementation andOutcomes of a Training Program for Responders to Acts of Terrorism. Prehospital Emergency Care, 2006, 10, 239-246.	1.8	22

#	Article	IF	CITATIONS
37	Filling the Void: Defining Invasive Bedside Procedural Competency for Internal Medicine Residents. Journal of Graduate Medical Education, 2013, 5, 605-612.	1.3	22
38	An Equivalence Trial Comparing Instructor-Regulated With Directed Self-Regulated Mastery Learning of Advanced Cardiac Life Support Skills. Simulation in Healthcare, 2015, 10, 202-209.	1.2	19
39	The attitudes of graduate healthcare students toward older adults, personal aging, health care reform, and interprofessional collaboration. Journal of Interprofessional Care, 2014, 28, 40-44.	1.7	18
40	The effects of neurologic assessment E-learning in nurses. Nurse Education Today, 2017, 57, 60-64.	3.3	16
41	Divergence in student and educator conceptual structures during auscultation training. Medical Education, 2013, 47, 198-209.	2.1	15
42	Nursing students' perceptions of simulation design features and learning outcomes: The mediating effect of psychological safety. Collegian, 2021, 28, 184-189.	1.3	15
43	Factors associated with medical students speaking-up about medical errors: A cross-sectional study. Medical Teacher, 2022, 44, 38-44.	1.8	15
44	Ward Nurses' Resuscitation of Critical Patients. Evaluation and the Health Professions, 2014, 37, 335-348.	1.9	14
45	Bedside cardiology skills training for the osteopathic internist using simulation technology. Journal of the American Osteopathic Association, The, 2003, 103, 603-7.	1.7	13
46	Development of a Reliable Multimedia, Computer-Based Measure of Clinical Skills in Bedside Neurology. Academic Medicine, 2003, 78, S52-S55.	1.6	12
47	Just-in-time learning is effective in helping first responders manage weapons of mass destruction events. Journal of Trauma and Acute Care Surgery, 2015, 79, S152-S156.	2.1	12
48	Long-Term Retention of Musculoskeletal Ultrasound Training During Residency. American Journal of Physical Medicine and Rehabilitation, 2018, 97, 523-530.	1.4	12
49	Assessing the Relationship between Cardiac Physical Examination Technique and Accurate Bedside Diagnosis during an Objective Structured Clinical Examination (OSCE). Academic Medicine, 2007, 82, S26-S29.	1.6	11
50	A Fourth‥ear Medical School Clerkship That Addressed Negative Attitudes Toward Geriatric Medicine. Journal of the American Geriatrics Society, 2010, 58, 746-750.	2.6	11
51	A Survey of Nurses' Perceived Competence and Educational Needs in Performing Resuscitation. Journal of Continuing Education in Nursing, 2013, 44, 230-236.	0.6	11
52	International Collaborative Faculty Development Program on Simulation-Based Healthcare Education: A Report on Its Successes and Challenges. Korean Journal of Medical Education, 2012, 24, 319-327.	1.3	11
53	Development and Validation of a Cardiac Findings Checklist for Use With Simulator-Based Assessments of Cardiac Physical Examination Competence. Simulation in Healthcare, 2009, 4, 17-21.	1.2	10
54	The impact of an international faculty development program on simulation-based healthcare education. Medical Teacher, 2012, 34, 510-510.	1.8	9

SAUL BARRY ISSENBERG

#	Article	IF	CITATIONS
55	SimulationSavior or Satan? A rebuttal. Advances in Health Sciences Education, 2003, 8, 97-103.	3.3	8
56	A Multicenter Study to Provide Evidence of Construct Validity in a Computer-Based Outcome Measure of Neurology Clinical Skills. Academic Medicine, 2005, 80, S71-S74.	1.6	8
57	Effects of peer learning on nursing students' learning outcomes in electrocardiogram education. Nurse Education Today, 2022, 108, 105182.	3.3	8
58	Factors relating to the perceived management of emergency situations: A survey of former Advanced Life Support course participants' clinical experiences. Resuscitation, 2014, 85, 1726-1731.	3.0	7
59	A Multi-Institutional Study Using Simulation to Teach Cardiopulmonary Physical Examination and Diagnosis Skills to Physician Assistant Students. Journal of Physician Assistant Education, 2015, 26, 70-76.	0.5	7
60	Perceived Competence and Training Priorities of Korean Nursing Simulation Instructors. Clinical Simulation in Nursing, 2019, 26, 54-63.	3.0	7
61	Does physical examination competence correlate with bedside diagnostic acumen? An observational study. Medical Teacher, 2007, 29, 199-203.	1.8	6
62	Computers and Evaluation of Clinical Competence. Annals of Internal Medicine, 1999, 130, 244.	3.9	6
63	Correspondence. British Journal of Anaesthesia, 2001, 87, 647-651.	3.4	5
64	Ottawa 2010 Conference – Consensus Statements and Recommendations. Medical Teacher, 2011, 33, 181-182.	1.8	5
65	Five Tips for a Successful Submission on Simulation-Based Medical Education. Journal of Graduate Medical Education, 2014, 6, 623-625.	1.3	5
66	Cost-effectiveness of a quality improvement project, including simulation-based training, on reducing door-to-needle times in stroke thrombolysis. BMJ Quality and Safety, 2022, 31, 569-578.	3.7	5
67	Development of a Competency-Based Neurology Clerkship. Medical Education, 2003, 37, 484-485.	2.1	4
68	Effects of Standardized Patient-Based Training on Surgical Nurses' Competencies for Managing Hand Injuries. Journal of Continuing Education in Nursing, 2020, 51, 189-196.	0.6	3
69	Michael S. Gordon, MD, PhD and the University of Miami Center for Research in Medical Education. Simulation in Healthcare, 2006, 1, 233-237.	1.2	2
70	Estimating the Net Career Income of a Geriatrician and a Nurse Practitioner: Still Want to Be a Doctor?. Southern Medical Journal, 2016, 109, 409-414.	0.7	1
71	Reflections on Career Pathways of Simulation-Focused Experts in the Field. Simulation in Healthcare, 2020, 15, 432-437.	1.2	1
72	Effects of a tiered competence-based simulation educator development program. Nurse Education in Practice, 2022, 59, 103300.	2.6	1

#	Article	IF	CITATIONS
73	Training for acts of terrorism. The University of Miami introduces a new curriculum for EMS personnel emphasizing practical skills & simulation training. Journal of Emergency Medical Services, 2003, 28, 48-55.	0.0	1
74	Multimedia computer-based measures of basic science and clinical skills. Medical Education, 2004, 38, 573-574.	2.1	0
75	Seizing the Window of Opportunity to Enhance Resident Skills in the Inpatient Setting. Journal of Graduate Medical Education, 2019, 11, 258-260.	1.3	0
76	The Fallacy of Teaching and the Illusion of Learning: Improving Articulation of Basic Science in the Medical School Curriculum. Medical Science Educator, 2020, 30, 1735-1736.	1.5	0
77	Ethical imperative of psychological safety in healthcare: in response to the Manifesto for healthcare simulation practice. BMJ Simulation and Technology Enhanced Learning, 2021, 7, bmjstel-2021-000889.	0.7	0
