FLENI TSIDIAKOU

#	Article	IF	CITATIONS
1	Cocoa husks fed to lactating dairy ewes affect milk fatty acid profile and oxidative status of blood and milk. Small Ruminant Research, 2022, 207, 106599.	1.2	4
2	Effect of a Carotenoid Extract from Citrus reticulata By-Products on the Immune-Oxidative Status of Broilers. Antioxidants, 2022, 11, 144.	5.1	9
3	The Food for Feed Concept: Redefining the Use of Hotel Food Residues in Broiler Diets. Sustainability, 2022, 14, 3659.	3.2	4
4	Effects of spent coffee grounds on production traits, haematological parameters, and antioxidant activity of blood and milk in dairy goats. Animal, 2022, 16, 100501.	3.3	6
5	Long-term administration of a commercial supplement enriched with bioactive compounds does not affect feed intake, health status, and growth performances in beef cattle. Archives Animal Breeding, 2022, 65, 135-144.	1.4	1
6	Redefining the future of catering waste application in animal diets– A review on the minimization of potential hazards in catering waste prior to application in animal diets. Animal Feed Science and Technology, 2022, 289, 115334.	2.2	9
7	Μeat Quality Traits as Affected by the Dietary Inclusion of Food Waste in Finishing Pigs. Sustainability, 2022, 14, 6593.	3.2	4
8	Influence of dietary sesame meal, vitamin E and selenium supplementation on milk production, composition, and fatty acid profile in dairy goats. Livestock Science, 2021, 244, 104336.	1.6	5
9	Farmers Profile and Characterization of Sheep and Goat Dairy Chain in Northwestern Greece. Sustainability, 2021, 13, 833.	3.2	11
10	Alterations in the Rumen Particle-Associated Microbiota of Goats in Response to Dietary Supplementation Levels of Schizochytrium spp Sustainability, 2021, 13, 607.	3.2	14
11	The food for feed concept. Performance of broilers fed hotel food residues. British Poultry Science, 2021, 62, 452-458.	1.7	8
12	The Impact of Whole Sesame Seeds on the Expression of Key-Genes Involved in the Innate Immunity of Dairy Goats. Animals, 2021, 11, 468.	2.3	3
13	Sesame Meal, Vitamin E and Selenium Influence Goats' Antioxidant Status. Antioxidants, 2021, 10, 392.	5.1	8
14	Effects of dietary pomegranate seed cake supplementation on performance, carcass characteristics and meat quality of growing lambs. Animal Feed Science and Technology, 2021, 273, 114815.	2.2	7
15	The effect of whole sesame seeds on milk chemical composition, fatty acid profile and antioxidant status in goats. Livestock Science, 2021, 245, 104452.	1.6	5
16	Effects of Supplementing Rumen-Protected Methionine and Lysine on Milk Performance and Oxidative Status of Dairy Ewes. Antioxidants, 2021, 10, 654.	5.1	14
17	Plant Feed Additives as Natural Alternatives to the Use of Synthetic Antioxidant Vitamins on Poultry Performances, Health, and Oxidative Status: A Review of the Literature in the Last 20 Years. Antioxidants, 2021, 10, 659.	5.1	39
18	Plant Feed Additives as Natural Alternatives to the Use of Synthetic Antioxidant Vitamins in Livestock Animal Products Yield, Quality, and Oxidative Status: A Review. Antioxidants, 2021, 10, 780.	5.1	21

#	Article	IF	CITATIONS
19	Dose and time response of dietary supplementation with Schizochytrium sp. on the abundances of several microorganisms in the rumen liquid of dairy goats. Livestock Science, 2021, 247, 104489.	1.6	10
20	Plant Feed Additives as Natural Alternatives to the Use of Synthetic Antioxidant Vitamins on Yield, Quality, and Oxidative Status of Poultry Products: A Review of the Literature of the Last 20 Years. Antioxidants, 2021, 10, 757.	5.1	6
21	Effects of Inclusion of Schizochytrium spp. and Forage-to-Concentrate Ratios on Goats' Milk Quality and Oxidative Status. Foods, 2021, 10, 1322.	4.3	10
22	Changes in the Rumen Bacteriome Structure and Enzymatic Activities of Goats in Response to Dietary Supplementation with Schizochytrium spp Microorganisms, 2021, 9, 1528.	3.6	14
23	Impact of the dietary inclusion of dried food residues on the apparent nutrient digestibility and the intestinal microbiota of dogs. Archives of Animal Nutrition, 2021, 75, 311-327.	1.8	6
24	Antioxidant Status of Broiler Chickens Fed Diets Supplemented with Vinification By-Products: A Valorization Approach. Antioxidants, 2021, 10, 1250.	5.1	14
25	Plant Feed Additives as Natural Alternatives to the Use of Synthetic Antioxidant Vitamins on Livestock Mammals' Performances, Health, and Oxidative Status: A Review of the Literature in the Last 20 Years. Antioxidants, 2021, 10, 1461.	5.1	14
26	The Effect of Forage-to-Concentrate Ratio on Schizochytrium sppSupplemented Goats: Modifying Rumen Microbiota. Animals, 2021, 11, 2746.	2.3	5
27	Assessing the Optimum Level of Supplementation with Camelina Seeds in Ewes' Diets to Improve Milk Quality. Foods, 2021, 10, 2076.	4.3	8
28	Schizochytrium sp. Dietary supplementation modify Toll-like receptor 4 (TLR4) transcriptional regulation in monocytes and neutrophils of dairy goats. Cytokine, 2021, 148, 155588.	3.2	8
29	Impact of Mycotoxins on Animals' Oxidative Status. Antioxidants, 2021, 10, 214.	5.1	56
30	Immune-Related Gene Expression Profiling of Broiler Chickens Fed Diets Supplemented with Vinification Byproducts: A Valorization Approach II. Animals, 2021, 11, 3038.	2.3	3
31	Authentication of Greek Protected Designation of Origin cheeses through elemental metabolomics. International Dairy Journal, 2020, 104, 104599.	3.0	24
32	Transcriptomic and metabolomic adaptation of Nannochloropsis gaditana grown under different light regimes. Algal Research, 2020, 45, 101735.	4.6	34
33	The impact of the dietary supplementation level with Schizochytrium sp. on milk chemical composition and fatty acid profile, of both blood plasma and milk of goats. Small Ruminant Research, 2020, 193, 106252.	1.2	24
34	Feeding level regulates the expression of some genes involved with programed cell death and remodeling in goat and sheep mammary tissue. Journal of Dairy Research, 2020, 87, 448-455.	1.4	0
35	Dietary Supplementation of a Live Yeast Product on Dairy Sheep Milk Performance, Oxidative and Immune Status in Peripartum Period. Journal of Fungi (Basel, Switzerland), 2020, 6, 334.	3.5	19
36	The impact of rumen-protected amino acids on the expression of key- genes involved in the innate immunity of dairy sheep. PLoS ONE, 2020, 15, e0233192.	2.5	12

#	Article	IF	CITATIONS
37	Fatty acid profile and physicochemical properties of Greek protected designation of origin cheeses, implications for authentication. European Food Research and Technology, 2020, 246, 1741-1753.	3.3	19
38	Bioactive Compounds in Food Waste: A Review on the Transformation of Food Waste to Animal Feed. Foods, 2020, 9, 291.	4.3	101
39	Supplementation of byâ€products from grape, tomato and myrtle affects antioxidant status of dairy ewes and milk fatty acid profile. Journal of Animal Physiology and Animal Nutrition, 2020, 104, 493-506.	2.2	12
40	Effects of dietary dried olive pulp inclusion on growth performance and meat quality of broiler chickens. Livestock Science, 2019, 221, 115-122.	1.6	23
41	Identification of efficient dairy farms in Greece based on home grown feedstuffs, using the Data Envelopment Analysis method. Livestock Science, 2019, 222, 14-20.	1.6	14
42	Effects of olive pulp addition to broiler diets on performance, selected biochemical parameters and antioxidant enzymes. Journal of the Hellenic Veterinary Medical Society, 2019, 70, 1687.	0.3	13
43	The effect of dietary <i>Chlorella vulgaris</i> inclusion on goat's milk chemical composition, fatty acids profile and enzymes activities related to oxidation. Journal of Animal Physiology and Animal Nutrition, 2018, 102, 142-151.	2.2	22
44	Effect of under―and overfeeding on sheep and goat milk and plasma enzymes activities related to oxidation. Journal of Animal Physiology and Animal Nutrition, 2018, 102, e288-e298.	2.2	27
45	The impact of the dietary supplementation level with schizochytrium sp, on the oxidative capacity of both goats' organism and milk. Livestock Science, 2018, 218, 37-43.	1.6	28
46	The effects of dietary supplementation with rumenâ€protected amino acids on the expression of several genes involved in the immune system of dairy sheep. Journal of Animal Physiology and Animal Nutrition, 2018, 102, 1437-1449.	2.2	17
47	Effects of dietary orange peel essential oil supplementation on milk yield and composition, and blood and milk antioxidant status of dairy ewes. Animal Feed Science and Technology, 2018, 245, 20-31.	2.2	24
48	The effect of dietary <i><scp>C</scp>hlorella vulgaris</i> supplementation on microâ€organism community, enzyme activities and fatty acid profile in the rumen liquid of goats. Journal of Animal Physiology and Animal Nutrition, 2017, 101, 275-283.	2.2	26
49	The effect of dietary supplementation with rumenâ€protected methionine alone or in combination with rumenâ€protected choline and betaine on sheep milk and antioxidant capacity. Journal of Animal Physiology and Animal Nutrition, 2017, 101, 1004-1013.	2.2	26
50	Effect of soya bean and fish oil inclusion in diets on milk and plasma enzymes from sheep and goat related to oxidation. Journal of Animal Physiology and Animal Nutrition, 2017, 101, 733-742.	2.2	12
51	The effect of dietary Chlorella pyrenoidosa inclusion on goats milk chemical composition, fatty acids profile and enzymes activities related to oxidation. Livestock Science, 2017, 197, 106-111.	1.6	18
52	Evaluation of different types of calcined magnesites as feed supplement in small ruminant. Small Ruminant Research, 2017, 149, 188-195.	1.2	3
53	The response of goats to different starch/NDF ratios of concentrates on the milk chemical composition, fatty acid profile, casein fractions and rennet clotting properties. Small Ruminant Research, 2017, 156, 82-88.	1.2	6
54	Effects of dietary pomegranate pulp silage supplementation on milk yield and composition, milk fatty acid profile and blood plasma antioxidant status of lactating dairy cows. Animal Feed Science and Technology, 2017, 234, 228-236.	2.2	19

#	Article	IF	CITATIONS
55	Life cycle assessment of animal origin products. Advances in Animal Biosciences, 2016, 7, 191-195.	1.0	5
56	The role of bentonite binders in single or concomitant mycotoxin contamination of chicken diets. British Poultry Science, 2016, 57, 551-558.	1.7	29
57	Chia (Salvia Hispanica) Fodder Yield and Quality as Affected by Sowing Rates and Organic Fertilization. Communications in Soil Science and Plant Analysis, 2016, , .	1.4	5
58	The effect of longâ€ŧerm under―and overfeeding on the expression of six major milk proteins' genes in the mammary tissue of goats. Journal of Animal Physiology and Animal Nutrition, 2016, 100, 422-430.	2.2	6
59	The effect of long term under- and over-feeding on the expression of six major milk protein genes in the mammary tissue of sheep. Journal of Dairy Research, 2015, 82, 257-264.	1.4	9
60	Effects of soyabean meal―or wheyâ€based diets on lipid metabolism in weaned piglets. Journal of Animal Physiology and Animal Nutrition, 2015, 99, 92-99.	2.2	3
61	The effect of long term under- and over-feeding on the expression of genes related to lipid metabolism in mammary tissue of sheep. Journal of Dairy Research, 2015, 82, 107-112.	1.4	8
62	The effect of long term under- and over-feeding on the expression of genes related to lipid metabolism in the mammary tissue of goats. Livestock Science, 2015, 173, 32-37.	1.6	2
63	Changes in essential oil content and composition of <i>Origanum vulgare</i> spp. <i>hirtum</i> during storage as a whole plant or after grinding and mixing with a concentrate ruminant diet. Journal of Essential Oil Research, 2015, 27, 264-270.	2.7	3
64	The effect of long term under- and over-feeding on the expression of genes related to glucose metabolism in mammary tissue of sheep. Journal of Dairy Research, 2015, 82, 228-235.	1.4	9
65	PLANT SPECIES MIXTURES FOR FORAGE PRODUCTION FOR RUMINANT FEEDING UNDER MEDITERRANEAN CONDITIONS. Experimental Agriculture, 2014, 50, 426-437.	0.9	3
66	Bentonite binders in the presence of mycotoxins: Results of in vitro preliminary tests and an in vivo broiler trial. Applied Clay Science, 2014, 99, 48-53.	5.2	32
67	Determination of mycotoxins in feedstuffs and ruminant׳s milk using an easy and simple LC–MS/MS multiresidue method. Talanta, 2014, 130, 8-19.	5.5	45
68	The effect of fish and soybean oil inclusion in goat diet on their milk and plasma fatty acid profile. Livestock Science, 2013, 155, 236-243.	1.6	26
69	Differences in urokinase plasminogen activator (u-PA) and its receptor (u-PAR) genes expression in subcutaneous adipose tissue between sheep and goats. Livestock Science, 2013, 157, 345-350.	1.6	0
70	Changes in milk and plasma fatty acid profile in response to fish and soybean oil supplementation in dairy sheep. Journal of Dairy Research, 2013, 80, 205-213.	1.4	16
71	The effect of long term under- and over-feeding of sheep on milk and plasma fatty acid profiles and on insulin and leptin concentrations. Journal of Dairy Research, 2012, 79, 192-200.	1.4	11
72	The effect of long term under- and over-feeding on milk and plasma fatty acids profile and on insulin and leptin concentrations of goats. International Dairy Journal, 2012, 24, 87-92.	3.0	19

#	Article	IF	CITATIONS
73	Differences in mean retention time of sheep and goats under controlled feeding practices. Small Ruminant Research, 2011, 95, 48-53.	1.2	15
74	Differences in mRNA lipogenic gene expression in the subcutaneous adipose tissue of sheep and goats under the same dietary treatments. Small Ruminant Research, 2011, 99, 110-115.	1.2	9
75	The effect of feeding systems on the characteristics of products from small ruminants. Small Ruminant Research, 2011, 101, 140-149.	1.2	107
76	Differences in sheep and goats milk fatty acid profile between conventional and organic farming systems. Journal of Dairy Research, 2010, 77, 343-349.	1.4	42
77	Pesticides residues in milks and feedstuff of farm animals drawn from Greece. Chemosphere, 2010, 80, 504-512.	8.2	53
78	Sheep and goats differences in CLA and fatty acids milk fat content in relation with mRNA stearoyl-CoA desaturase and lipogenic genes expression in their mammary gland. Journal of Dairy Research, 2009, 76, 392-401.	1.4	27
79	The interaction between breed and diet on CLA and fatty acids content of milk fat of four sheep breeds kept indoors or at grass. Small Ruminant Research, 2008, 74, 179-187.	1.2	34
80	Comparative study between sheep and goats on rumenic acid and vaccenic acid in milk fat under the same dietary treatments. Livestock Science, 2008, 119, 87-94.	1.6	32
81	The effect of dietary inclusion of olive tree leaves and grape marc on the content of conjugated linoleic acid and vaccenic acid in the milk of dairy sheep and goats. Journal of Dairy Research, 2008, 75, 270-278.	1.4	53
82	Concentration of conjugated linoleic acid in grazing sheep and goat milk fat. Livestock Science, 2006, 103, 74-84.	1.6	88
83	The effect of breed, stage of lactation and parity on sheep milk fat CLA content under the same feeding practices. Livestock Science, 2006, 105, 162-167.	1.6	38
