#	ARTICLE	IF	CITATIONS
1	Xenodiagnosis in four domestic cats naturally infected by <i>Leishmania infantum</i> . <i>Transboundary and Emerging Diseases</i> , 2022, 69, 2182-2190.	3.0	9
2	Human seroprevalence of Toscana virus and Sicilian phlebovirus in the southwest of Portugal. <i>European Journal of Clinical Microbiology and Infectious Diseases</i> , 2022, 41, 137-141.	2.9	4
3	A conceptual model for understanding the zoonotic cutaneous leishmaniasis transmission risk in the Moroccan pre-Saharan area. <i>Parasite Epidemiology and Control</i> , 2022, 17, e00243.	1.8	4
4	<i>Dipylidium caninum</i> in the twenty-first century: epidemiological studies and reported cases in companion animals and humans. <i>Parasites and Vectors</i> , 2022, 15, 131.	2.5	23
5	The current epidemiology of leishmaniasis in Turkey, Azerbaijan and Georgia and implications for disease emergence in European countries. <i>Zoonoses and Public Health</i> , 2022, 69, 395-407.	2.2	8
6	Leishmania exposure in dogs from two endemic countries from New and Old Worlds (Brazil and) <i>Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 5 Vectors</i> , 2022, 15, .	2.5	2
7	<i>Giardia duodenalis</i> infection in dogs from the metropolitan area of Lisbon, Portugal: prevalence, genotyping and associated risk factors. <i>Journal of Parasitic Diseases</i> , 2021, 45, 372-379.	1.0	5
8	Leishmania infection in cats and feline leishmaniosis: An updated review with a proposal of a diagnosis algorithm and prevention guidelines. <i>Current Research in Parasitology and Vector-borne Diseases</i> , 2021, 1, 100035.	1.9	14
9	Preliminary comparative analysis of the resolving power of COX1 and 16S-rDNA as molecular markers for the identification of ticks from Portugal. <i>Veterinary Parasitology: Regional Studies and Reports</i> , 2021, 24, 100551.	0.5	2
10	Efficacy of a spot-on formulation containing moxidectin 2.5%/imidacloprid 10% for the treatment of <i>Cercopithifilaria</i> spp. and <i>Onchocerca lupi</i> microfilariae in naturally infected dogs from Portugal. <i>Parasites and Vectors</i> , 2021, 14, 199.	2.5	8
11	Molecular detection of zoonotic filarioids in <i>Culex</i> spp. from Portugal. <i>Medical and Veterinary Entomology</i> , 2021, 35, 468-477.	1.5	8
12	Leishmaniases in the European Union and Neighboring Countries. <i>Emerging Infectious Diseases</i> , 2021, 27, .	4.3	23
13	<i>Leishmania infantum</i> strains from cats are similar in biological properties to canine and human strains. <i>Veterinary Parasitology</i> , 2021, 298, 109531.	1.8	3
14	Phylogenetic insights on <i>Leishmania</i> detected in cats as revealed by nucleotide sequence analysis of multiple genetic markers. <i>Infection, Genetics and Evolution</i> , 2020, 77, 104069.	2.3	16
15	Parasites and vector-borne diseases disseminated by rehomed dogs. <i>Parasites and Vectors</i> , 2020, 13, 546.	2.5	34
16	Identification of trypanosomatids and blood feeding preferences of phlebotomine sand fly species common in Sicily, Southern Italy. <i>PLoS ONE</i> , 2020, 15, e0229536.	2.5	34
17	Vaccination against canine leishmaniasis in Brazil. <i>International Journal for Parasitology</i> , 2020, 50, 171-176.	3.1	20
18	Experimental Infection of Dogs with Toscana Virus and Sandfly Fever Sicilian Virus to Determine Their Potential as Possible Vertebrate Hosts. <i>Microorganisms</i> , 2020, 8, 596.	3.6	11

#	ARTICLE	IF	CITATIONS
19	Monitoring Leishmania infection and exposure to Phlebotomus perniciosus using minimal and non-invasive canine samples. Parasites and Vectors, 2020, 13, 119.	2.5	13
20	Prevalence and Risk Factor Analysis of Haemoplasmas Infection in Cats from Lahore. Pakistan Journal of Zoology, 2020, 52, .	0.2	0
21	Title is missing!. , 2020, 15, e0229536.		0
22	Title is missing!. , 2020, 15, e0229536.		0
23	Title is missing!. , 2020, 15, e0229536.		0
24	Title is missing!. , 2020, 15, e0229536.		0
25	Antibody Response to Toscana Virus and Sandfly Fever Sicilian Virus in Cats Naturally Exposed to Phlebotomine Sand Fly Bites in Portugal. Microorganisms, 2019, 7, 339.	3.6	6
26	An Unusual Case of Feline Leishmaniosis With Involvement of the Mammary Glands. Topics in Companion Animal Medicine, 2019, 37, 100356.	0.9	12
27	A diverse assemblage of RNA and DNA viruses found in mosquitoes collected in southern Portugal. Virus Research, 2019, 274, 197769.	2.2	4
28	Genetic diversity and phylogenetic relationships between <i>Leishmania infantum</i> from dogs, humans and wildlife in south-east Spain. Zoonoses and Public Health, 2019, 66, 961-973.	2.2	16
29	Detection of Rickettsia conorii israelensis DNA in the Blood of a Cat and a Dog From Southern Portugal. Topics in Companion Animal Medicine, 2019, 36, 12-15.	0.9	5
30	Geographic dispersal and genetic diversity of tick-borne phleboviruses (Phenuiviridae, Phlebovirus) as revealed by the analysis of L segment sequences. Ticks and Tick-borne Diseases, 2019, 10, 942-948.	2.7	10
31	Antibody response to Phlebotomus perniciosus saliva in cats naturally exposed to phlebotomine sand flies is positively associated with Leishmania infection. Parasites and Vectors, 2019, 12, 128.	2.5	7
32	Canine Leishmaniasis Control in the Context of One Health. Emerging Infectious Diseases, 2019, 25, 1-4.	4.3	60
33	Elucidating in vitro and in vivo phenotypic behaviour of L. infantum/L. major natural hybrids. Parasitology, 2019, 146, 580-587.	1.5	4
34	Parasite Biology: The Reservoir Hosts. , 2018, , 79-106.		14
35	Tick-borne bacteria and protozoa detected in ticks collected from domestic animals and wildlife in central and southern Portugal. Ticks and Tick-borne Diseases, 2018, 9, 225-234.	2.7	36
36	Recent advances on Dirofilaria repens in dogs and humans in Europe. Parasites and Vectors, 2018, 11, 663.	2.5	162

#	ARTICLE	IF	CITATIONS
37	Biomarkers Associated With <i>Leishmania infantum</i> Exposure, Infection, and Disease in Dogs. <i>Frontiers in Cellular and Infection Microbiology</i> , 2018, 8, 302.	3.9	59
38	The Role of Reservoirs: Canine Leishmaniasis. , 2018, , 59-83.		4
39	Epidemiological and genetic studies suggest a common <i>Leishmania infantum</i> transmission cycle in wildlife, dogs and humans associated to vector abundance in Southeast Spain. <i>Veterinary Parasitology</i> , 2018, 259, 61-67.	1.8	31
40	A real-time PCR tool for the surveillance of zoonotic <i>Onchocerca lupi</i> in dogs, cats and potential vectors. <i>PLoS Neglected Tropical Diseases</i> , 2018, 12, e0006402.	3.0	20
41	Evaluation of oxfendazole in the treatment of zoonotic <i>Onchocerca lupi</i> infection in dogs. <i>PLoS Neglected Tropical Diseases</i> , 2018, 12, e0006218.	3.0	16
42	Extension of the Avian Host Range of Collyriclosis in Europe. <i>Journal of Wildlife Diseases</i> , 2017, 53, 344-348.	0.8	1
43	Lungworms and gastrointestinal parasites of domestic cats: a European perspective. <i>International Journal for Parasitology</i> , 2017, 47, 517-528.	3.1	113
44	Serological association between <i>Leishmania infantum</i> and sand fly fever Sicilian (but not Toscana) virus in sheltered dogs from southern Portugal. <i>Parasites and Vectors</i> , 2017, 10, 92.	2.5	15
45	Genetic characterization of <i>Rhipicephalus sanguineus</i> (sensu lato) ticks from dogs in Portugal. <i>Parasites and Vectors</i> , 2017, 10, 133.	2.5	30
46	<i>Cercopithifilaria</i> sp. II in <i>Vulpes vulpes</i> : new host affiliation for an enigmatic canine filarioid. <i>Parasitology Research</i> , 2017, 116, 441-443.	1.6	5
47	The recombinant protein r<sc>SP03B</sc> is a valid antigen for screening dog exposure to <i>P</i><sc>hlebotomus perniciosus</sc> across foci of canine leishmaniasis. <i>Medical and Veterinary Entomology</i> , 2017, 31, 88-93.	1.5	38
48	Multiple Phlebovirus (Bunyaviridae) genetic groups detected in <i>Rhipicephalus</i> , <i>Hyalomma</i> and <i>Dermacentor</i> ticks from southern Portugal. <i>Ticks and Tick-borne Diseases</i> , 2017, 8, 45-52.	2.7	23
49	Emergence of <i>Thelazia callipaeda</i> Infection in Dogs and Cats from East-Central Portugal. <i>Transboundary and Emerging Diseases</i> , 2016, 63, 416-421.	3.0	25
50	Can <i>Sergentomyia</i> (Diptera, Psychodidae) play a role in the transmission of mammal-infecting <i>Leishmania</i>?. <i>Parasite</i> , 2016, 23, 55.	2.0	54
51	Detection of <i>Leishmania</i> DNA and blood meal sources in phlebotomine sand flies (Diptera: Psychodidae) in western of Spain: Update on distribution and risk factors associated. <i>Acta Tropica</i> , 2016, 164, 414-424.	2.0	27
52	Molecular detection of tick-borne bacteria and protozoa in cervids and wild boars from Portugal. <i>Parasites and Vectors</i> , 2016, 9, 251.	2.5	36
53	Preliminary report on the prevalence of <i>Angiostrongylus vasorum</i> infection in dogs from Portugal adopting a commercially available test kit for serological analysis. <i>Veterinary Parasitology: Regional Studies and Reports</i> , 2016, 3-4, 57-59.	0.5	2
54	Prevalence of <i>Ostertagia ostertagi</i> lesions in slaughtered dairy cattle from São Miguel Island, Azores, Portugal. <i>Veterinary Parasitology: Regional Studies and Reports</i> , 2016, 3-4, 60-65.	0.5	0

#	ARTICLE	IF	CITATIONS
55	Molecular detection of <i>Leishmania infantum</i> , <i>filariae</i> and <i>Wolbachia</i> spp. in dogs from southern Portugal. <i>Parasites and Vectors</i> , 2016, 9, 170.	2.5	22
56	Parasitic zoonoses associated with dogs and cats: a survey of Portuguese pet owners' awareness and deworming practices. <i>Parasites and Vectors</i> , 2016, 9, 245.	2.5	46
57	Molecular identification of <i>Borrelia</i> genus in questing hard ticks from Portugal: Phylogenetic characterization of two novel Relapsing Fever-like <i>Borrelia</i> sp.. <i>Infection, Genetics and Evolution</i> , 2016, 40, 266-274.	2.3	16
58	First molecular detection of <i>Leishmania tarentolae</i> -like DNA in <i>Sergentomyia minuta</i> in Spain. <i>Parasitology Research</i> , 2016, 115, 1339-1344.	1.6	22
59	Detection of <i>Dirofilaria repens</i> microfilariae in a dog from Portugal. <i>Parasitology Research</i> , 2016, 115, 441-443.	1.6	14
60	Neutralization-based seroprevalence of Toscana virus and sandfly fever Sicilian virus in dogs and cats from Portugal. <i>Journal of General Virology</i> , 2016, 97, 2816-2823.	2.9	31
61	Seasonal Dynamics of Phlebotomine Sand Fly Species Proven Vectors of Mediterranean Leishmaniasis Caused by <i>Leishmania infantum</i> . <i>PLoS Neglected Tropical Diseases</i> , 2016, 10, e0004458.	3.0	152
62	Feline leishmaniosis in Portugal: 3 cases (year 2014). <i>Veterinary Parasitology: Regional Studies and Reports</i> , 2015, 1-2, 65-69.	0.5	15
63	Exposure to <i>Leishmania</i> spp. and sand flies in domestic animals in northwestern Ethiopia. <i>Parasites and Vectors</i> , 2015, 8, 360.	2.5	38
64	<i>Onchocerca lupi</i> Nematode in Cat, Portugal. <i>Emerging Infectious Diseases</i> , 2015, 21, 2252-2254.	4.3	26
65	Spread of <i>Leishmania infantum</i> in Europe with dog travelling. <i>Veterinary Parasitology</i> , 2015, 213, 2-11.	1.8	93
66	Feline leishmaniosis in Portugal – some remarks on disease and infection. <i>Journal of Feline Medicine and Surgery</i> , 2015, 17, 1081-1082.	1.6	1
67	Exploring the utility of phylogenetic analysis of cytochrome oxidase gene subunit I as a complementary tool to classical taxonomical identification of phlebotomine sand fly species (Diptera). <i>Tj ETQq1 1 QZ84314 rjBT /Ov</i>		
68	First case of feline leishmaniosis caused by <i>Leishmania infantum</i> genotype E in a cat with a concurrent nasal squamous cell carcinoma. <i>Journal of Feline Medicine and Surgery Open Reports</i> , 2015, 1, 205511691559396.	0.2	14
69	Rotation of the external genitalia in male Phlebotomine sand flies (Diptera, Psychodidae) in laboratory conditions and in captured specimens in Algarve, Portugal. <i>Acta Tropica</i> , 2015, 150, 1-3.	2.0	1
70	Bacterial and protozoal agents of canine vector-borne diseases in the blood of domestic and stray dogs from southern Portugal. <i>Parasites and Vectors</i> , 2015, 8, 138.	2.5	37
71	Serological investigation of <i>Leishmania infantum</i> , <i>Dirofilaria immitis</i> and <i>Angiostrongylus vasorum</i> in dogs from southern Portugal. <i>Parasites and Vectors</i> , 2015, 8, 152.	2.5	23
72	Molecular detection of <i>Leishmania</i> DNA and identification of blood meals in wild caught phlebotomine sand flies (Diptera: Psychodidae) from southern Portugal. <i>Parasites and Vectors</i> , 2015, 8, 173.	2.5	45

#	ARTICLE	IF	CITATIONS
73	Molecular Identification of <i>Borrelia miyamotoi</i> in <i>Ixodes ricinus</i> from Portugal. Vector-Borne and Zoonotic Diseases, 2015, 15, 515-517.	1.5	23
74	New microsatellite markers for multi-scale genetic studies on <i>Phlebotomus ariasi</i> Tonnoir, vector of <i>Leishmania infantum</i> in the Mediterranean area. Acta Tropica, 2015, 142, 79-85.	2.0	5
75	Prevalence of <i>Dirofilaria immitis</i> antigen and antibodies to <i>Leishmania infantum</i> in cats from southern Portugal. Parasitology International, 2015, 64, 154-156.	1.3	27
76	<i>Theileria</i> infection in domestic ruminants in northern Ethiopia. Veterinary Parasitology, 2014, 200, 31-38.	1.8	58
77	FIRST REPORT OF <i>THELAZIA CALLIPAEDA</i> IN RED FOXES (<i>VULPES VULPES</i>) FROM PORTUGAL. Journal of Zoo and Wildlife Medicine, 2014, 45, 458-460.	0.6	22
78	Transmission Potential of Antimony-Resistant <i>Leishmania</i> Field Isolates. Antimicrobial Agents and Chemotherapy, 2014, 58, 6273-6276.	3.2	19
79	Bacterial and protozoal agents of feline vector-borne diseases in domestic and stray cats from southern Portugal. Parasites and Vectors, 2014, 7, 115.	2.5	87
80	Molecular detection of bacterial and parasitic pathogens in hard ticks from Portugal. Ticks and Tick-borne Diseases, 2014, 5, 409-414.	2.7	51
81	Prevalence and correlates of antibodies to <i>Neospora caninum</i> in dogs in Portugal. Parasite, 2014, 21, 29.	2.0	9
82	Synthesis, structural characterization and leishmanicidal activity evaluation of ferrocenyl N-heterocyclic compounds. Journal of Organometallic Chemistry, 2013, 745-746, 299-311.	1.8	16
83	Nonclassic Metallointercalators with Dipyridophenazine: DNA Interaction Studies and Leishmanicidal Activity. Inorganic Chemistry, 2013, 52, 8881-8894.	4.0	18
84	In vitro drug susceptibility of <i>Leishmania infantum</i> isolated from humans and dogs. Experimental Parasitology, 2013, 135, 36-41.	1.2	35
85	The Role of Reservoirs: Canine Leishmaniasis. , 2013, , 45-64.		5
86	Entomological and ecological studies in a new potential zoonotic leishmaniasis focus in Torres Novas municipality, Central Region, Portugal. Acta Tropica, 2013, 125, 339-348.	2.0	50
87	The first detection of <i>Leishmania major</i> in naturally infected <i>Sergentomyia minuta</i> in Portugal. Memórias Do Instituto Oswaldo Cruz, 2013, 108, 516-518.	1.6	55
88	<i>Leishmania</i> infection and host-blood feeding preferences of phlebotomine sandflies and canine leishmaniasis in an endemic European area, the Algarve Region in Portugal. Memórias Do Instituto Oswaldo Cruz, 2013, 108, 481-487.	1.6	34
89	<i>In vitro</i> and <i>in vivo</i> behaviour of sympatric <i>Leishmania (V.) braziliensis</i> , <i>L. (V.) peruviana</i> and their hybrids. Parasitology, 2012, 139, 191-199.	1.5	32
90	Cytokine and Phenotypic Cell Profiles of <i>Leishmania infantum</i> Infection in the Dog. Journal of Tropical Medicine, 2012, 2012, 1-7.	1.7	50

#	ARTICLE	IF	CITATIONS
91	Risk factors for canine leishmaniasis in an endemic Mediterranean region. <i>Veterinary Parasitology</i> , 2012, 189, 189-196.	1.8	98
92	Antimony resistance and environment: Elusive links to explore during <i>Leishmania</i> life cycle. <i>International Journal for Parasitology: Drugs and Drug Resistance</i> , 2012, 2, 200-203.	3.4	19
93	Experimental Transmission of <i>Leishmania infantum</i> by Two Major Vectors: A Comparison between a Viscerotropic and a Dermotropic Strain. <i>PLoS Neglected Tropical Diseases</i> , 2011, 5, e1181.	3.0	51
94	Can domestic cats be considered reservoir hosts of zoonotic leishmaniasis?. <i>Trends in Parasitology</i> , 2011, 27, 341-344.	3.3	67
95	Feline <i>Leishmania</i> infection in a canine leishmaniasis endemic region, Portugal. <i>Veterinary Parasitology</i> , 2010, 174, 336-340.	1.8	83
96	Experimental canine leishmaniasis: Clinical, parasitological and serological follow-up. <i>Acta Tropica</i> , 2010, 116, 193-199.	2.0	46
97	Diagnosis of canine leishmaniasis: Conventional and molecular techniques using different tissues. <i>Veterinary Journal</i> , 2009, 179, 142-144.	1.7	75
98	Molecular detection of <i>Leishmania infantum</i> in naturally infected <i>Phlebotomus perniciosus</i> from Algarve region, Portugal. <i>Journal of Vector Borne Diseases</i> , 2009, 46, 268-72.	0.4	17
99	Methods for diagnosis of canine leishmaniasis and immune response to infection. <i>Veterinary Parasitology</i> , 2008, 158, 274-287.	1.8	175
100	Importance of Cats in Zoonotic Leishmaniasis in Portugal. <i>Vector-Borne and Zoonotic Diseases</i> , 2008, 8, 555-560.	1.5	76
101	Infectivity of five different types of macrophages by <i>Leishmania infantum</i> . <i>Acta Tropica</i> , 2007, 103, 150-155.	2.0	46
102	Studies in a co-infection murine model of <i>Plasmodium chabaudi chabaudi</i> and <i>Leishmania infantum</i> : interferon- γ and interleukin-4 mRNA expression. <i>Memorias Do Instituto Oswaldo Cruz</i> , 2005, 100, 889-892.	1.6	10
