#	ARTICLE	IF	CITATIONS
1	Brief Report: The Effectiveness of Hugging a Huggable Device Before Having a Conversation with an Unfamiliar Person for Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2022, 52, 3294-3303.	1.7	5
2	Emotional and behavioral problems in Japanese preschool children with motor coordination difficulties: the role of autistic traits. <i>European Child and Adolescent Psychiatry</i> , 2021, , 1.	2.8	2
3	Future perspectives of robot psychiatry: can communication robots assist psychiatric evaluation in the COVID-19 pandemic era?. <i>Current Opinion in Psychiatry</i> , 2021, 34, 277-286.	3.1	10
4	Shorter P1m Response in Children with Autism Spectrum Disorder without Intellectual Disabilities. <i>International Journal of Molecular Sciences</i> , 2021, 22, 2611.	1.8	7
5	Use of a tele-operated robot to increase sociability in individuals with autism spectrum disorder who display Hikikomori. <i>Asian Journal of Psychiatry</i> , 2021, 57, 102588.	0.9	5
6	A huggable device can reduce the stress of calling an unfamiliar person on the phone for individuals with ASD. <i>PLoS ONE</i> , 2021, 16, e0254675.	1.1	3
7	Attention-deficit/hyperactivity disorder symptoms and sleep problems in preschool children: the role of autistic traits. <i>Sleep Medicine</i> , 2021, 83, 214-221.	0.8	1
8	Effects of familiarity on child brain networks when listening to a storybook reading: A magneto-encephalographic study. <i>NeuroImage</i> , 2021, 241, 118389.	2.1	5
9	Group-Based Online Job Interview Training Program Using Virtual Robot for Individuals With Autism Spectrum Disorders. <i>Frontiers in Psychiatry</i> , 2021, 12, 704564.	1.3	3
10	Brief Report: Odour Awareness in Young Children with Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2020, 50, 1809-1815.	1.7	9
11	Specific aspects of operating an unfamiliar touchscreen for individuals with autism spectrum disorders. <i>Psychiatry and Clinical Neurosciences</i> , 2020, 74, 157-158.	1.0	0
12	Feasibility of autism-focused public speech training using a simple virtual audience for autism spectrum disorder. <i>Psychiatry and Clinical Neurosciences</i> , 2020, 74, 124-131.	1.0	10
13	Optimal robot for intervention for individuals with autism spectrum disorders. <i>Psychiatry and Clinical Neurosciences</i> , 2020, 74, 581-586.	1.0	44
14	Prefrontal Responses to Odors in Individuals With Autism Spectrum Disorders: Functional NIRS Measurement Combined With a Fragrance Pulse Ejection System. <i>Frontiers in Human Neuroscience</i> , 2020, 14, 523456.	1.0	11
15	The maturation of the P1m component in response to voice from infancy to 3 years of age: A longitudinal study in young children. <i>Brain and Behavior</i> , 2020, 10, e01706.	1.0	3
16	Brain responses to human voice processing predict child development and intelligence. <i>Human Brain Mapping</i> , 2020, 41, 2292-2301.	1.9	9
17	Enhancing Communication Skills of Individuals With Autism Spectrum Disorders While Maintaining Social Distancing Using Two Tele-Operated Robots. <i>Frontiers in Psychiatry</i> , 2020, 11, 598688.	1.3	10
18	How the Realism of Robot Is Needed for Individuals With Autism Spectrum Disorders in an Interview Setting. <i>Frontiers in Psychiatry</i> , 2019, 10, 486.	1.3	4

#	ARTICLE	IF	CITATIONS
19	Relaxing Gaze Aversion of Adolescents With Autism Spectrum Disorder in Consecutive Conversations With Human and Android Robot—A Preliminary Study. <i>Frontiers in Psychiatry</i> , 2019, 10, 370.	1.3	21
20	Role-Play-Based Guidance for Job Interviews Using an Android Robot for Individuals With Autism Spectrum Disorders. <i>Frontiers in Psychiatry</i> , 2019, 10, 239.	1.3	19
21	Atypical body movements during night in young children with autism spectrum disorder: a pilot study. <i>Scientific Reports</i> , 2019, 9, 6999.	1.6	5
22	Brief Report: Olfactory Adaptation in Children with Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2019, 49, 3462-3469.	1.7	6
23	Comedic experience with two robots aided a child with autism spectrum disorder to realize the importance of nonverbal communication. <i>Psychiatry and Clinical Neurosciences</i> , 2019, 73, 423-423.	1.0	7
24	Job interview training targeting nonverbal communication using an android robot for individuals with autism spectrum disorder. <i>Autism</i> , 2019, 23, 1586-1595.	2.4	42
25	Individuals With Autism Spectrum Disorder Show Altered Event-Related Potentials in the Late Stages of Olfactory Processing. <i>Chemical Senses</i> , 2019, 45, 37-44.	1.1	2
26	Brief Report: Evaluating the Utility of Varied Technological Agents to Elicit Social Attention from Children with Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2019, 49, 1700-1708.	1.7	34
27	Communication Support via a Tele-Operated Robot for Easier Talking: Case/Laboratory Study of Individuals with/Without Autism Spectrum Disorder. <i>International Journal of Social Robotics</i> , 2019, 11, 171-184.	3.1	24
28	Brief Report: A Novel System to Evaluate Autism Spectrum Disorders Using Two Humanoid Robots. <i>Journal of Autism and Developmental Disorders</i> , 2019, 49, 1709-1716.	1.7	16
29	Multiple Sensory Hypersensitivity. <i>Journal of Otolaryngology of Japan</i> , 2019, 123, 236-242.	0.1	0
30	Relationship Between Odor Identification and Visual Distractors in Children with Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2018, 48, 2590-2592.	1.7	7
31	Impressions of Humanness for Android Robot may Represent an Endophenotype for Autism Spectrum Disorders. <i>Journal of Autism and Developmental Disorders</i> , 2018, 48, 632-634.	1.7	16
32	Changes in maternal feelings for children with autism spectrum disorder after childbirth: The impact of knowledge about the disorder. <i>PLoS ONE</i> , 2018, 13, e0201862.	1.1	7
33	The impact of robotic intervention on joint attention in children with autism spectrum disorders. <i>Molecular Autism</i> , 2018, 9, 46.	2.6	54
34	Can Robotic Systems Promote Self-Disclosure in Adolescents with Autism Spectrum Disorder? A Pilot Study. <i>Frontiers in Psychiatry</i> , 2018, 9, 36.	1.3	37
35	Altered Gamma Oscillations during Motor Control in Children with Autism Spectrum Disorder. <i>Journal of Neuroscience</i> , 2018, 38, 7878-7886.	1.7	34
36	Developmental Trajectory of Infant Brain Signal Variability: A Longitudinal Pilot Study. <i>Frontiers in Neuroscience</i> , 2018, 12, 566.	1.4	18

#	ARTICLE	IF	CITATIONS
37	Approaches for Assessing Olfaction in Children with Autism Spectrum Disorder. <i>Methods in Molecular Biology</i> , 2018, 1820, 221-228.	0.4	6
38	Tele-Operating an Android Robot to Promote the Understanding of Facial Expressions and to Increase Facial Expressivity in Individuals With Autism Spectrum Disorder. <i>American Journal of Psychiatry</i> , 2017, 174, 904-905.	4.0	15
39	Altered human voice processing in the frontal cortex and a developmental language delay in 3- to 5-year-old children with autism spectrum disorder. <i>Scientific Reports</i> , 2017, 7, 17116.	1.6	20
40	Android Robot-Mediated Mock Job Interview Sessions for Young Adults with Autism Spectrum Disorder: A Pilot Study. <i>Frontiers in Psychiatry</i> , 2017, 8, 169.	1.3	47
41	An Intervention for Children with Social Anxiety and Autism Spectrum Disorders Using an Android Robot. <i>Lecture Notes in Computer Science</i> , 2017, , 470-477.	1.0	2
42	A pilot study for robot appearance preferences among high-functioning individuals with autism spectrum disorder: Implications for therapeutic use. <i>PLoS ONE</i> , 2017, 12, e0186581.	1.1	36
43	Positive Bias of Gaze-Following to Android Robot in Adolescents with Autism Spectrum Disorders. <i>Lecture Notes in Computer Science</i> , 2017, , 447-453.	1.0	1
44	Decision making processes based on social conventional rules in early adolescents with and without autism spectrum disorders. <i>Scientific Reports</i> , 2016, 6, 37875.	1.6	13
45	Advantages of indirect conversation via a desktop humanoid robot: Case study on daily life guidance for adolescents with autism spectrum disorders. , 2016, , .		17
46	Olfactory trait in individuals with autism spectrum disorders. <i>Higher Brain Function Research</i> , 2016, 36, 214-218.	0.0	0
47	Assessment of olfactory detection thresholds in children with autism spectrum disorders using a pulse ejection system. <i>Molecular Autism</i> , 2016, 7, 6.	2.6	27
48	Ventral striatum dysfunction in children and adolescents with reactive attachment disorder: functional MRI study. <i>BJPsych Open</i> , 2015, 1, 121-128.	0.3	48
49	Effectiveness of oral tipepidine administration for children with attention deficit/hyperactivity disorder: A 4-week, open-label clinical study. <i>Psychiatry and Clinical Neurosciences</i> , 2015, 69, 658-659.	1.0	5
50	Effect of the Nature of Subsequent Environment on Oxytocin and Cortisol Secretion in Maltreated Children. <i>Frontiers in Psychiatry</i> , 2015, 6, 173.	1.3	17
51	Sex differences in cognitive and symptom profiles in children with high functioning autism spectrum disorders. <i>Research in Autism Spectrum Disorders</i> , 2015, 13-14, 1-7.	0.8	37
52	Risperidone-Associated Urinary Incontinence in Patients With Autistic Disorder With Mental Retardation. <i>Journal of Clinical Psychopharmacology</i> , 2014, 34, 624-626.	0.7	11
53	Comparison of the clinical features of suicide attempters by jumping from a height and those by self-stabbing in Japan. <i>Journal of Affective Disorders</i> , 2013, 150, 695-698.	2.0	7
54	Lower subjective quality of life and the development of social anxiety symptoms after the discharge of elderly patients with remitted schizophrenia: a 5-year longitudinal study. <i>Comprehensive Psychiatry</i> , 2012, 53, 946-951.	1.5	21

#	ARTICLE	IF	CITATIONS
55	Treatment of delirium with ramelteon: initial experience in three patients. <i>General Hospital Psychiatry</i> , 2011, 33, 407-409.	1.2	30
56	Differences in the Optimal Motion of Android Robots for the Ease of Communications Among Individuals With Autism Spectrum Disorders. <i>Frontiers in Psychiatry</i> , 0, 13, .	1.3	5
57	Android Robot Promotes Disclosure of Negative Narratives by Individuals With Autism Spectrum Disorders. <i>Frontiers in Psychiatry</i> , 0, 13, .	1.3	5
