#	Article	IF	CITATIONS
1	Increased bone turnover in late postmenopausal women is a major determinant of osteoporosis. Journal of Bone and Mineral Research, 1996, 11, 337-349.	2.8	841
2	Biochemical Markers of Bone Turnover, Endogenous Hormones and the Risk of Fractures in Postmenopausal Women: The OFELY Study. Journal of Bone and Mineral Research, 2000, 15, 1526-1536.	2.8	616
3	A Meta-Analysis of Trabecular Bone Score in Fracture Risk Prediction and Its Relationship to FRAX. Journal of Bone and Mineral Research, 2016, 31, 940-948.	2.8	508
4	Finite Element Analysis Based on In Vivo HR-pQCT Images of the Distal Radius Is Associated With Wrist Fracture in Postmenopausal Women. Journal of Bone and Mineral Research, 2008, 23, 392-399.	2.8	414
5	Alterations of Cortical and Trabecular Architecture Are Associated With Fractures in Postmenopausal Women, Partially Independent of Decreased BMD Measured by DXA: The OFELY Study. Journal of Bone and Mineral Research, 2007, 22, 425-433.	2.8	397
6	Identification of Osteopenic Women at High Risk of Fracture: The OFELY Study. Journal of Bone and Mineral Research, 2005, 20, 1813-1819.	2.8	323
7	Independent predictors of all osteoporosis-related fractures in healthy postmenopausal women: The OFELY Study. Bone, 2003, 32, 78-85.	2.9	265
8	Apparent Pre- and Postmenopausal Bone Loss Evaluated by DXA at Different Skeletal Sites in Women: The OFELY Cohort. Journal of Bone and Mineral Research, 1997, 12, 683-690.	2.8	261
9	Cortical and trabecular bone microarchitecture as an independent predictor of incident fracture risk in older women and men in the Bone Microarchitecture International Consortium (BoMIC): a prospective study. Lancet Diabetes and Endocrinology,the, 2019, 7, 34-43.	11.4	244
10	Markers of Bone Turnover Predict Postmenopausal Forearm Bone Loss Over 4 Years: The OFELY Study. Journal of Bone and Mineral Research, 1999, 14, 1614-1621.	2.8	223
11	Bone remodelling in humans is load-driven but not lazy. Nature Communications, 2014, 5, 4855.	12.8	212
12	Trabecular bone score improves fracture risk prediction in non-osteoporotic women: the OFELY study. Osteoporosis International, 2013, 24, 77-85.	3.1	205
13	Bone Fragility: Failure of Periosteal Apposition to Compensate for Increased Endocortical Resorption in Postmenopausal Women. Journal of Bone and Mineral Research, 2006, 21, 1856-1863.	2.8	199
14	Low serum IGF-1 and occurrence of osteoporotic fractures in postmenopausal women. Lancet, The, 2000, 355, 898-899.	13.7	185
15	Associations of vitamin D status with bone mineral density, bone turnover, bone loss and fracture risk in healthy postmenopausal women. The OFELY study. Bone, 2007, 40, 716-722.	2.9	170
16	Vitamin D receptor gene polymorphisms do not predict bone turnover and bone mass in healthy premenopausal women. Journal of Bone and Mineral Research, 1995, 10, 1283-1288.	2.8	164
17	Finite element analysis performed on radius and tibia HR-pQCT images and fragility fractures at all sites in postmenopausal women. Bone, 2010, 46, 1030-1037.	2.9	153
18	Vitamin D receptor gene polymorphisms are not related to bone turnover, rate of bone loss, and bone mass in postmenopausal women: The OFELY study. Journal of Bone and Mineral Research, 1996, 11, 827-834.	2.8	142

#	Article	IF	CITATIONS
19	Ultrasound measurements on os calcis: Precision and age-related changes in a normal female population. Osteoporosis International, 1993, 3, 249-254.	3.1	138
20	The impact of osteoporosis on quality-of-life: the OFELY cohort. Bone, 2002, 31, 32-36.	2.9	123
21	Severity of Vertebral Fractures Is Associated With Alterations of Cortical Architecture in Postmenopausal Women. Journal of Bone and Mineral Research, 2009, 24, 737-743.	2.8	122
22	Association of serum sclerostin with bone mineral density, bone turnover, steroid and parathyroid hormones, and fracture risk in postmenopausal women: the OFELY study. Osteoporosis International, 2013, 24, 489-494.	3.1	120
23	Type I Collagen Racemization and Isomerization and the Risk of Fracture in Postmenopausal Women: The OFELY Prospective Study. Journal of Bone and Mineral Research, 2002, 17, 826-833.	2.8	118
24	Bone Microarchitecture Assessed by HRâ€pQCT as Predictor of Fracture Risk in Postmenopausal Women: The OFELY Study. Journal of Bone and Mineral Research, 2017, 32, 1243-1251.	2.8	111
25	Decreased bone turnover in oral contraceptive users. Bone, 1995, 16, 499-503.	2.9	105
26	In Obese Postmenopausal Women, Bone Microarchitecture and Strength Are Not Commensurate to Greater Body Weight: The Os des Femmes de Lyon (OFELY) Study. Journal of Bone and Mineral Research, 2013, 28, 1679-1687.	2.8	92
27	The FRAX tool in French women: How well does it describe the real incidence of fracture in the OFELY cohort. Journal of Bone and Mineral Research, 2010, 25, 2101-2107.	2.8	91
28	Early impairment of trabecular microarchitecture assessed with HR-pQCT in patients with stage II-IV chronic kidney disease. Journal of Bone and Mineral Research, 2010, 25, 849-857.	2.8	87
29	Rate of Forearm Bone Loss Is Associated With an Increased Risk of Fracture Independently of Bone Mass in Postmenopausal Women: The OFELY Study. Journal of Bone and Mineral Research, 2005, 20, 1929-1935.	2.8	75
30	Association between spine disc degeneration and type II collagen degradation in postmenopausal women: The OFELY study. Arthritis and Rheumatism, 2004, 50, 3137-3144.	6.7	74
31	Vitamin D Receptor Gene Polymorphisms Are Associated with the Risk of Fractures in Postmenopausal Women, Independently of Bone Mineral Density. Journal of Clinical Endocrinology and Metabolism, 2005, 90, 4829-4835.	3.6	72
32	Microarchitecture and Peripheral BMD are Impaired in Postmenopausal White Women With Fracture Independently of Total Hip <i>T</i> -Score: An International Multicenter Study. Journal of Bone and Mineral Research, 2016, 31, 1158-1166.	2.8	69
33	Serum Periostin Is Associated With Fracture Risk in Postmenopausal Women: A 7-Year Prospective Analysis of the OFELY Study. Journal of Clinical Endocrinology and Metabolism, 2014, 99, 2533-2539.	3.6	64
34	Long-Term Variability of Markers of Bone Turnover in Postmenopausal Women and Implications for Their Clinical Use: The OFELY Study. Journal of Bone and Mineral Research, 2003, 18, 1789-1794.	2.8	61
35	Age-related changes in bone strength from HR-pQCT derived microarchitectural parameters with an emphasis on the role of cortical porosity. Bone, 2016, 83, 233-240.	2.9	57
36	Lipocalin-2 counteracts metabolic dysregulation in obesity and diabetes. Journal of Experimental Medicine, 2020, 217, .	8.5	54

#	Article	IF	CITATIONS
37	Disc Space Narrowing Is Associated With an Increased Vertebral Fracture Risk in Postmenopausal Women: The OFELY Study. Journal of Bone and Mineral Research, 2004, 19, 1994-1999.	2.8	51
38	Effect of withdrawal of hormone replacement therapy on bone mass and bone turnover: the OFELY study. Bone, 2003, 33, 159-166.	2.9	47
39	Diagnostic accuracy of FRAX in predicting the 10-year risk of osteoporotic fractures using the USA treatment thresholds: A systematic review and meta-analysis. Bone, 2017, 99, 20-25.	2.9	47
40	Age-related changes in os calcis ultrasonic indices: A 2-year prospective study. Osteoporosis International, 1995, 5, 478-483.	3.1	44
41	Severity of aortic calcification is positively associated with vertebral fracture in older men—a densitometry study in the STRAMBO cohort. Osteoporosis International, 2013, 24, 1177-1184.	3.1	44
42	Association between a functional interleukin-6 gene polymorphism and peak bone mineral density and postmenopausal bone loss in women: the ofely study. Bone, 2002, 31, 43-50.	2.9	42
43	Homocysteine and fracture risk in postmenopausal women: the OFELY study. Osteoporosis International, 2007, 18, 1329-1336.	3.1	41
44	Serum Sclerostin Increases After Acute Physical Activity. Calcified Tissue International, 2017, 101, 170-173.	3.1	41
45	Urinary levels of pentosidine and the risk of fracture in postmenopausal women: the OFELY study. Osteoporosis International, 2010, 21, 243-250.	3.1	38
46	Association of circulating microRNAs with prevalent and incident knee osteoarthritis in women: the OFELY study. Arthritis Research and Therapy, 2020, 22, 2.	3.5	35
47	Bone microarchitecture is more severely affected in patients on hemodialysis than in those receiving peritoneal dialysis. Kidney International, 2012, 82, 581-588.	5.2	34
48	Deterioration of Cortical and Trabecular Microstructure Identifies Women With Osteopenia or Normal Bone Mineral Density at Imminent and Longâ€Term Risk for Fragility Fracture: A Prospective Study. Journal of Bone and Mineral Research, 2020, 35, 833-844.	2.8	33
49	Update of the fracture risk prediction tool FRAX: a systematic review of potential cohorts and analysis plan. Osteoporosis International, 2022, 33, 2103-2136.	3.1	33
50	Cortical and trabecular architecture are altered in postmenopausal women with fractures. Osteoporosis International, 2009, 20, 1291-1297.	3.1	32
51	Serum periostin is associated with prevalent knee osteoarthritis and disease incidence/progression in women: the OFELY study. Osteoarthritis and Cartilage, 2015, 23, 1736-1742.	1.3	32
52	Disc space narrowing as a new risk factor for vertebral fracture: The OFELY study. Arthritis and Rheumatism, 2006, 54, 1262-1269.	6.7	31
53	Radiologic assessment of ageâ€related knee joint space changes in women: A 4â€year longitudinal study. Arthritis and Rheumatism, 2009, 61, 336-343.	6.7	28
54	Muscle mass is associated with incident fracture in postmenopausal women: The OFELY study. Bone, 2017, 94, 108-113.	2.9	27

#	Article	lF	CITATIONS
55	Influence of blinding sequence of radiographs on the reproducibility and sensitivity to change of joint space width measurement in knee osteoarthritis. Arthritis Care and Research, 2010, 62, 1699-1705.	3.4	25
56	Bone Microarchitecture Phenotypes Identified in Older Adults Are Associated With Different Levels of Osteoporotic Fracture Risk. Journal of Bone and Mineral Research, 2020, 37, 428-439.	2.8	24
57	Local topological analysis at the distal radius by HR-pQCT: Application to in vivo bone microarchitecture and fracture assessment in the OFELY study. Bone, 2012, 51, 362-368.	2.9	21
58	Lack of Association Between Select Circulating miRNAs and Bone Mass, Turnover, and Fractures: Data From the OFELY Cohort. Journal of Bone and Mineral Research, 2019, 34, 1074-1085.	2.8	21
59	Age determines longitudinal changes in body composition better than menopausal and bone status: The OFELY study. Journal of Bone and Mineral Research, 2012, 27, 628-636.	2.8	19
60	Impaired trabecular and cortical microarchitecture in daughters of women with osteoporotic fracture: the MODAM study. Osteoporosis International, 2013, 24, 1881-1889.	3.1	17
61	Teenagers and young adults with nephropathic cystinosis display significant bone disease and cortical impairment. Pediatric Nephrology, 2018, 33, 1165-1172.	1.7	16
62	Comparison of morphometric assessment of prevalent vertebral deformities in women using different reference data. Bone, 2000, 27, 841-846.	2.9	14
63	A Signature of Circulating <scp>miRNAs</scp> Associated With Fibrous Dysplasia of Bone: the <scp>mirDys</scp> Study. Journal of Bone and Mineral Research, 2020, 35, 1881-1892.	2.8	10
64	The cartilage degradation marker, urinary CTX-II, is associated with the risk of incident total joint replacement in postmenopausal women. A 18 year evaluation of the OFELY prospective cohort. Osteoarthritis and Cartilage, 2020, 28, 468-474.	1.3	10
65	Cross-sectional and longitudinal assessment of pre- and postmenopausal bone loss with a portable forearm X-ray device: The Ofely study. Bone, 2000, 26, 131-135.	2.9	9
66	How to Predict Fragility Fracture Beyond 10 Years? The OFELY Study. Journal of Clinical Endocrinology and Metabolism, 2014, 99, 4690-4697.	3.6	9
67	The bone strain index predicts fragility fractures. The OFELY study. Bone, 2022, 157, 116348.	2.9	9
68	Overview of osteo-articular involvement in systemic sclerosis: Specific risk factors, clinico-sonographic evaluation, and comparison with healthy women from the French OFELY cohort. Best Practice and Research in Clinical Rheumatology, 2018, 32, 591-604.	3.3	8
69	Cost-effectiveness of treatment of women aged 70Âyears and older with both osteopenia and microstructural deterioration. Bone, 2021, 142, 115682.	2.9	6
70	Similar prevalence of vertebral fractures despite different approaches to define reference data. Bone, 2003, 32, 441-448.	2.9	5
71	Family resemblance of bone turnover rate in mothers and daughters—the MODAM study. Osteoporosis International, 2015, 26, 921-930.	3.1	3
72	Is the relationship between fat mass and hand osteoarthritis confounded by age?. Osteoarthritis and Cartilage, 2015, 23, A82.	1.3	3

#	Article	IF	CITATIONS
73	Hand osteoarthritis is associated with increased type II collagen degradation in women: the OFELY study. Osteoarthritis and Cartilage, 2013, 21, S71-S72.	1.3	Ο
74	Serum sclerostin is not associated with knee osteoarthritis prevalence and progression of kellgren-lawrence score in women: the ofely study. Osteoarthritis and Cartilage, 2014, 22, S68.	1.3	0
75	Hand osteoarthritis is associated with a better bone microarchitecture in postmenopausal women: the ofely study. Osteoarthritis and Cartilage, 2019, 27, S222-S223.	1.3	0
76	AB0008â€Cross-talk between bone turnover and cardiovascular disease. association of micrornas expression, fracture and abdominal aortic calcifications. , 2018, , .		0
