citing authors

| #  | ARTICLE   | IF   | CITATIONS |
|----|---|------|-----------|
| 1  | Broadly cross-reactive antibodies dominate the human B cell response against 2009 pandemic H1N1 influenza virus infection. <i>Journal of Experimental Medicine</i> , 2011, 208, 181-193.  | 8.5  | 775       |
| 2  | Pandemic H1N1 influenza vaccine induces a recall response in humans that favors broadly cross-reactive memory B cells. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2012, 109, 9047-9052.         | 7.1  | 371       |
| 3  | Immune history profoundly affects broadly protective B cell responses to influenza. <i>Science Translational Medicine</i> , 2015, 7, 316ra192.  | 12.4 | 353       |
| 4  | Mosaic nanoparticle display of diverse influenza virus hemagglutinins elicits broad B cell responses. <i>Nature Immunology</i> , 2019, 20, 362-372.   | 14.5 | 211       |
| 5  | Potential antigenic explanation for atypical H1N1 infections among middle-aged adults during the 2013-2014 influenza season. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 15798-15803. | 7.1  | 203       |
| 6  | Low CD21 expression defines a population of recent germinal center graduates primed for plasma cell differentiation. <i>Science Immunology</i> , 2017, 2, .   | 11.9 | 203       |
| 7  | Induction of broadly cross-reactive antibody responses to the influenza HA stem region following H5N1 vaccination in humans. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 13133-13138. | 7.1  | 197       |
| 8  | Follicular CD8 T cells accumulate in HIV infection and can kill infected cells in vitro via bispecific antibodies. <i>Science Translational Medicine</i> , 2017, 9, .   | 12.4 | 135       |
| 9  | <i>Staphylococcus aureus</i> infection induces protein A-mediated immune evasion in humans. <i>Journal of Experimental Medicine</i> , 2014, 211, 2331-2339.   | 8.5  | 125       |
| 10 | Influenza Virus Vaccination Elicits Poorly Adapted B Cell Responses in Elderly Individuals. <i>Cell Host and Microbe</i> , 2019, 25, 357-366.e6.  | 11.0 | 124       |
| 11 | Preexisting human antibodies neutralize recently emerged H7N9 influenza strains. <i>Journal of Clinical Investigation</i> , 2015, 125, 1255-1268.   | 8.2  | 115       |
| 12 | High Preexisting Serological Antibody Levels Correlate with Diversification of the Influenza Vaccine Response. <i>Journal of Virology</i> , 2015, 89, 3308-3317.  | 3.4  | 112       |
| 13 | Activation Dynamics and Immunoglobulin Evolution of Pre-existing and Newly Generated Human Memory B cell Responses to Influenza Hemagglutinin. <i>Immunity</i> , 2019, 51, 398-410.e5.  | 14.3 | 107       |
| 14 | Design of Nanoparticulate Group 2 Influenza Virus Hemagglutinin Stem Antigens That Activate Unmutated Ancestor B Cell Receptors of Broadly Neutralizing Antibody Lineages. <i>MBio</i> , 2019, 10, .  | 4.1  | 88        |
| 15 | Preferential induction of cross-group influenza A hemagglutinin stem-specific memory B cells after H7N9 immunization in humans. <i>Science Immunology</i> , 2017, 2, .  | 11.9 | 84        |
| 16 | Safety and immunogenicity of a ferritin nanoparticle H2 influenza vaccine in healthy adults: a phase 1 trial. <i>Nature Medicine</i> , 2022, 28, 383-391.   | 30.7 | 65        |
| 17 | <i>Plasmodium falciparum</i> -specific IgM B cells dominate in children, expand with malaria, and produce functional IgM. <i>Journal of Experimental Medicine</i> , 2021, 218, .  | 8.5  | 44        |
| 18 | Accumulation of follicular CD8+ T cells in pathogenic SIV infection. <i>Journal of Clinical Investigation</i> , 2018, 128, 2089-2103.   | 8.2  | 43        |

| #  | ARTICLE  | IF   | CITATIONS |
|----|--|------|-----------|
| 19 | A comprehensive influenza reporter virus panel for high-throughput deep profiling of neutralizing antibodies. <i>Nature Communications</i> , 2021, 12, 1722.                 | 12.8 | 41        |
| 20 | Prolonged evolution of the memory B cell response induced by a replicating adenovirus-influenza H5 vaccine. <i>Science Immunology</i> , 2019, 4, .                           | 11.9 | 40        |
| 21 | Glycan repositioning of influenza hemagglutinin stem facilitates the elicitation of protective cross-group antibody responses. <i>Nature Communications</i> , 2020, 11, 791. | 12.8 | 36        |
| 22 | Is It Possible to Develop a “Universal” Influenza Virus Vaccine?. <i>Cold Spring Harbor Perspectives in Biology</i> , 2018, 10, a029413.                                     | 5.5  | 34        |
| 23 | Intranasal Live Influenza Vaccine Priming Elicits Localized B Cell Responses in Mediastinal Lymph Nodes. <i>Journal of Virology</i> , 2018, 92, .                            | 3.4  | 30        |
| 24 | Shaping a universally broad antibody response to influenza amidst a variable immunoglobulin landscape. <i>Current Opinion in Immunology</i> , 2018, 53, 96-101.              | 5.5  | 25        |
| 25 | An avian influenza H7 DNA priming vaccine is safe and immunogenic in a randomized phase I clinical trial. <i>Npj Vaccines</i> , 2017, 2, 15.                                 | 6.0  | 24        |
| 26 | Global analysis of B cell selection using an immunoglobulin light chain-mediated model of autoreactivity. <i>Journal of Experimental Medicine</i> , 2013, 210, 125-142.      | 8.5  | 22        |
| 27 | Convergent Evolution in Breadth of Two VH6-1-Encoded Influenza Antibody Clonotypes from a Single Donor. <i>Cell Host and Microbe</i> , 2020, 28, 434-444.e4.                 | 11.0 | 16        |
| 28 | A single residue in influenza virus H2 hemagglutinin enhances the breadth of the B cell response elicited by H2 vaccination. <i>Nature Medicine</i> , 2022, 28, 373-382.     | 30.7 | 16        |
| 29 | Hemagglutinin head-specific responses dominate over stem-specific responses following prime boost with mismatched vaccines. <i>JCI Insight</i> , 2019, 4, .                  | 5.0  | 15        |
| 30 | T-bet+ Memory B Cells Stay in Place. <i>Immunity</i> , 2020, 52, 726-728.  | 14.3 | 1         |
| 31 | Structure of an influenza group 2-neutralizing antibody targeting the hemagglutinin stem supersite. <i>Structure</i> , 2022, , .   | 3.3  | 1         |
