citing authors

#	ARTICLE	IF	CITATIONS
1	A Cost Minimization Resource Allocation Model for Disaster Relief Operations With an Information Crowdsourcing-Based MCDM Approach. IEEE Transactions on Engineering Management, 2022, 69, 2454-2474.	3.5	11
2	A Mathematical Model for Nonlinear Optimization Which Attempts Membership Functions to Address the Uncertainties. Mathematics, 2022, 10, 1743.	2.2	4
3	A Humanitarian Green Supply Chain Management Considering Minimum Cost and Time. International Journal of Business Analytics, 2021, 8, 63-82.	0.4	2
4	A Multi-Objective Stochastic Solid Transportation Problem with the Supply, Demand, and Conveyance Capacity Following the Weibull Distribution. Mathematics, 2021, 9, 1757.	2.2	6
5	Prediction of Transportation Costs Using Trapezoidal Neutrosophic Fuzzy Analytic Hierarchy Process and Artificial Neural Networks. IEEE Access, 2021, 9, 103497-103512.	4.2	10
6	A carbon emission optimization model with reduction method of type-2 zigzag uncertain variable. Neural Computing and Applications, 2020, 32, 10895-10914.	5.6	4
7	An optimal redistribution plan considering aftermath disruption in disaster management. Soft Computing, 2020, 24, 65-82.	3.6	20
8	Uncertain demand estimation with optimization of time and cost using Facebook disaster map in emergency relief operation. Applied Soft Computing Journal, 2020, 87, 105992.	7.2	31
9	A Fixed Charge Solid Transportation Problem with Possibility and Expected Value Approaches in Hybrid Uncertain Environment. Studies in Computational Intelligence, 2020, , 182-193.	0.9	1
10	Uncertain Demand Allocation with Insufficient Resource in Disaster by Using Facebook Disaster Map Under Limited Fund. Studies in Computational Intelligence, 2020, , 567-578.	0.9	0
11	Generalized Type-2 Intuitionistic Fuzzy Approaches for Allocation and Redistribution of Resources in the Disaster Operation. Studies in Computational Intelligence, 2020, , 327-341.	0.9	2
12	A mathematical model for resource allocation in emergency situations with the co-operation of NGOs under uncertainty. Computers and Industrial Engineering, 2019, 137, 106000.	6.3	22
13	A solid transportation problem in uncertain environment involving type-2 fuzzy variable. Neural Computing and Applications, 2019, 31, 4903-4927.	5.6	10
14	Redistribution for cost minimization in disaster management under uncertainty with trapezoidal neutrosophic number. Computers in Industry, 2019, 109, 226-238.	9.9	23
15	Medical relief shelter location problem with patient severity under a limited relief budget. Computers and Industrial Engineering, 2018, 125, 720-728.	6.3	46
16	Defuzzification and application of trapezoidal type-2 fuzzy variables to green solid transportation problem. Soft Computing, 2018, 22, 2275-2297.	3.6	36
17	The Expected Value Defuzzification Method for Pentagonal Fuzzy Number to Solve a Carbon Cost Integrated Solid Transportation Problem. , 2018, , .		1
18	A Bi-Objective Relief Response Solid Transportation Model: Humanitarian Aid. , 2018, , .		0

#	ARTICLE	IF	CITATIONS
19	A gamma type-2 defuzzification method for solving a solid transportation problem considering carbon emission. Applied Intelligence, 2018, 48, 3995-4022.	5.3	13
20	A Profit Maximizing Solid Transportation Model Under a Rough Interval Approach. IEEE Transactions on Fuzzy Systems, 2017, 25, 485-498.	9.8	39
21	Defuzzification method of type-2 gamma fuzzy variables and its application to transportation problem. , 2017, , .		1
22	Reduction method of zigzag type-2 uncertain variable and its application in two stage STP. , 2017, , .		3
23	Defuzzification of trapezoidal type-2 fuzzy variables and its application to solid transportation problem. Journal of Intelligent and Fuzzy Systems, 2016, 30, 2431-2445.	1.4	15
24	A breakable multi-item multi stage solid transportation problem under budget with Gaussian type-2 fuzzy parameters. Applied Intelligence, 2016, 45, 923-951.	5.3	29
25	Profit Maximization Solid Transportation Problem with Trapezoidal Interval Type-2 Fuzzy Numbers. International Journal of Applied and Computational Mathematics, 2016, 2, 41-56.	1.6	41
26	A SOLID TRANSPORTATION PROBLEM WITH MIXED CONSTRAINT IN DIFFERENT ENVIRONMENT. Journal of Applied Analysis and Computation, 2016, 6, 179-195.	0.5	8
27	A Bi-Objective Solid Transportation Model Under Uncertain Environment. Springer Proceedings in Mathematics and Statistics, 2015, , 261-275.	0.2	3
