citing authors

#	ARTICLE	IF	CITATIONS
1	Oral Formulation of Angiotensin-(1-7) Promotes Therapeutic Actions in a Model of Eosinophilic and Neutrophilic Asthma. <i>Frontiers in Pharmacology</i> , 2021, 12, 557962.	1.6	3
2	Asthma: role of the angiotensin(1-7)/Mas (MAS1) pathway in pathophysiology and therapy. <i>British Journal of Pharmacology</i> , 2021, 178, 4428-4439.	2.7	7
3	Angiotensin-(1-7)/Mas receptor modulates anti-inflammatory effects of exercise training in a model of chronic allergic lung inflammation. <i>Life Sciences</i> , 2021, 282, 119792.	2.0	1
4	Predictors and reference equations for augmentation index, an arterial stiffness marker, in healthy children and adolescents. <i>Clinics</i> , 2021, 76, e2350.	0.6	12
5	Augmentation index, a predictor of cardiovascular events, is increased in children and adolescents with primary nephrotic syndrome. <i>Pediatric Nephrology</i> , 2020, 35, 815-827.	0.9	12
6	Oral formulation angiotensin-(1-7) therapy attenuates pulmonary and systemic damage in mice with emphysema induced by elastase. <i>Immunobiology</i> , 2020, 225, 151893.	0.8	18
7	Treatment with inhaled formulation of angiotensin-(1-7) reverses inflammation and pulmonary remodeling in a model of chronic asthma. <i>Immunobiology</i> , 2020, 225, 151957.	0.8	14
8	Activation of Ang-(1-7)/Mas Receptor Is a Possible Strategy to Treat Coronavirus (SARS-CoV-2) Infection. <i>Frontiers in Physiology</i> , 2020, 11, 730.	1.3	35
9	Changes in aortic pulse wave components, pulse pressure amplification, and hemodynamic parameters of children and adolescents with type 1 diabetes. <i>Pediatric Diabetes</i> , 2019, 20, 202-209.	1.2	18
10	Lung. , 2019, , 131-152.		4
11	Mas receptor antagonist inhibits the pro-resolutive effects of Angiotensin-(1-7) in an experimental model of asthma. , 2019, , .		0
12	Angiotensin-(1-7) therapy attenuates pulmonary emphysema and sickness behavior induced by elastase in a murine model. , 2019, , .		0
13	Effects of treatment with angiotensin-(1-7) on antigen sensitization of murine experimental model of asthma. , 2019, , .		0
14	Late Breaking Abstract - Oral formulation of angiotensin-(1-7) promotes resolution of eosinophilic and neutrophilic inflammation in an experimental asthma model. , 2019, , .		0
15	Angiotensin-(1-7) Promotes Resolution of Eosinophilic Inflammation in an Experimental Model of Asthma. <i>Frontiers in Immunology</i> , 2018, 9, 58.	2.2	59
16	Inhaled formulation of angiotensin-(1-7) produces lung protective effects in a model of chronic asthma.. , 2018, , .		1
17	Longitudinal study of lung function, exhaled nitric oxide and asthma control level in children and adolescents treated with inhaled beclomethasone. <i>Revista MÃ©dica De Minas Gerais</i> , 2018, 28, .	0.0	0
18	Alamandine reduces eosinophilic inflammation in an experimental model of asthma. , 2018, , .		0

#	ARTICLE	IF	CITATIONS
19	Angiotensin-(1-7) Promotes Resolution of Neutrophilic Inflammation in a Model of Antigen-Induced Arthritis in Mice. <i>Frontiers in Immunology</i> , 2017, 8, 1596.	2.2	36
20	Chronic allergic pulmonary inflammation is aggravated in angiotensin-(1 <sup>7</sup> ) Mas receptor knockout mice. <i>American Journal of Physiology - Lung Cellular and Molecular Physiology</i> , 2016, 311, L1141-L1148.	1.3	29
21	<sc>A</sc>ngiotensin <sup>1-7</sup> attenuates airway remodelling and hyperresponsiveness in a model of chronic allergic lung inflammation. <i>British Journal of Pharmacology</i> , 2015, 172, 2330-2342.	2.7	81
22	Chronic Allergic Pulmonary Inflammation is Aggravated in Angiotensin <sup>1-7</sup> Mas Receptor Knockout Mice. <i>FASEB Journal</i> , 2015, 29, 1027.7.	0.2	0
23	<sc>AVE</sc> 0991, a non <sup>peptide</sup> mimic of angiotensin <sup>1-7</sup> effects, attenuates pulmonary remodelling in a model of chronic asthma. <i>British Journal of Pharmacology</i> , 2013, 170, 835-846.	2.7	71
