#	ARTICLE	IF	CITATIONS
1	Spatiotemporal Analysis of Droughts Over Different Climate Regions Using Hybrid Clustering Method. <i>Water Resources Management</i> , 2022, 36, 473-488.	3.9	8
2	Uncertainty Assessment of the Integrated Hybrid Data Processing Techniques for Short to Long Term Drought Forecasting in Different Climate Regions. <i>Water Resources Management</i> , 2022, 36, 273-296.	3.9	6
3	Application of Z-numbers to teleconnection modeling between monthly precipitation and large scale sea surface temperature. <i>Hydrology Research</i> , 2022, 53, 1-13.	2.7	11
4	Partitioning strategy for investigating the prediction capability of bed load transport under varied hydraulic conditions: Application of robust GWO-kernel-based ELM approach. <i>Flow Measurement and Instrumentation</i> , 2022, 84, 102136.	2.0	6
5	The effect of triangular prismatic elements on the hydraulic performance of stepped spillways in the skimming flow regime: an experimental study and numerical modeling. <i>Journal of Hydroinformatics</i> , 2022, 24, 243-258.	2.4	0
6	Analysis of spatiotemporal variations of drought and its correlations with remote sensing-based indices via wavelet analysis and clustering methods. <i>Hydrology Research</i> , 2022, 53, 175-192.	2.7	9
7	The potential of integrated hybrid data processing techniques for successive-station streamflow prediction. <i>Soft Computing</i> , 2022, 26, 5563-5576.	3.6	1
8	The potential of ensemble WT-EEMD-kernel extreme learning machine techniques for prediction suspended sediment concentration in successive points of a river. <i>Journal of Hydroinformatics</i> , 2021, 23, 655-670.	2.4	8
9	Suspended sediment load prediction in consecutive stations of river based on ensemble pre-post-processing kernel based approaches. <i>Water Science and Technology: Water Supply</i> , 2021, 21, 3370-3386.	2.1	6
10	A comparative study of wavelet and empirical mode decomposition-based GPR models for river discharge relationship modeling at consecutive hydrometric stations. <i>Water Science and Technology: Water Supply</i> , 2021, 21, 3080-3098.	2.1	12
11	Towards design of compound channels with minimum overall cost through grey wolf optimization algorithm. <i>Journal of Hydroinformatics</i> , 2021, 23, 985-999.	2.4	10
12	Hydraulic Performance of PK Weirs Based on Experimental Study and Kernel-based Modeling. <i>Water Resources Management</i> , 2021, 35, 3571-3592.	3.9	17
13	Insights into the prediction capability of roughness coefficient in current ripple bedforms under varied hydraulic conditions. <i>Journal of Hydroinformatics</i> , 2021, 23, 1182-1196.	2.4	5
14	The potential of integrated hybrid pre-post-processing techniques for short- to long-term drought forecasting. <i>Journal of Hydroinformatics</i> , 2021, 23, 117-135.	2.4	8
15	Exploring the multiscale changeability of precipitation using the entropy concept and self-organizing maps. <i>Journal of Water and Climate Change</i> , 2020, 11, 655-676.	2.9	8
16	Particle swarm optimization-based LS-SVM for hydraulic performance of stepped spillway. <i>ISH Journal of Hydraulic Engineering</i> , 2020, 26, 273-282.	2.1	8
17	Evaluation of the parameters affecting the roughness coefficient of sewer pipes with rigid and loose boundary conditions via kernel based approaches. <i>International Journal of Sediment Research</i> , 2020, 35, 171-179.	3.5	12
18	Prediction of sediment transport rates in gravel-bed rivers using Gaussian process regression. <i>Journal of Hydroinformatics</i> , 2020, 22, 249-262.	2.4	33

#	ARTICLE	IF	CITATIONS
19	Experimental investigation of bentonite impact on self-healing of clay soils. <i>Arabian Journal of Geosciences</i> , 2020, 13, 1.	1.3	1
20	Prediction of form roughness coefficient in alluvial channels using efficient hybrid approaches. <i>Soft Computing</i> , 2020, 24, 18531-18543.	3.6	6
21	Influence of surface roughness of dune bedforms on flow and turbulence characteristics. <i>International Journal of Sediment Research</i> , 2020, 35, 666-678.	3.5	5
22	Modeling total resistance and form resistance of movable bed channels via experimental data and a kernel-based approach. <i>Journal of Hydroinformatics</i> , 2020, 22, 528-540.	2.4	13
23	Investigating impact of converging training walls of the ogee spillways on hydraulic performance. <i>Paddy and Water Environment</i> , 2020, 18, 355-366.	1.8	4
24	Determination of influential parameters for prediction of total sediment loads in mountain rivers using kernel-based approaches. <i>Journal of Mountain Science</i> , 2020, 17, 480-491.	2.0	13
25	Prediction Characteristics of Free and Submerged Hydraulic Jumps on Horizontal and Sloping Beds using SVM Method. <i>KSCE Journal of Civil Engineering</i> , 2019, 23, 4696-4709.	1.9	9
26	Using multi-temporal analysis to classify monthly precipitation based on maximal overlap discrete wavelet transform. <i>Journal of Hydroinformatics</i> , 2019, 21, 541-557.	2.4	5
27	Experimental study and artificial intelligence-based modeling of discharge coefficient of converging ogee spillways. <i>ISH Journal of Hydraulic Engineering</i> , 2019, , 1-8.	2.1	3
28	Influential parameters on submerged discharge capacity of converging ogee spillways based on experimental study and machine learning-based modeling. <i>Journal of Hydroinformatics</i> , 2019, 21, 474-492.	2.4	4
29	Scenario-based prediction of short-term river stageâ€“discharge process using wavelet-EEMD-based relevance vector machine. <i>Journal of Hydroinformatics</i> , 2019, 21, 56-76.	2.4	22
30	Evaluation of the impact of channel geometry and rough elements arrangement in hydraulic jump energy dissipation via SVM. <i>Journal of Hydroinformatics</i> , 2019, 21, 92-103.	2.4	17
31	Linear and non-linear approaches to predict the Darcy-Weisbach friction factor of overland flow using the extreme learning machine approach. <i>International Journal of Sediment Research</i> , 2018, 33, 415-432.	3.5	14
32	Entropy-based analysis and regionalization of annual precipitation variation in Iran during 1960â€“2010 using ensemble empirical mode decomposition. <i>Journal of Hydroinformatics</i> , 2018, 20, 468-485.	2.4	21
33	A multiscale time-space approach to analyze and categorize the precipitation fluctuation based on the wavelet transform and information theory concept. <i>Hydrology Research</i> , 2018, 49, 724-743.	2.7	24
34	Modeling open channel flow resistance with dune bedform via heuristic and nonlinear approaches. <i>Journal of Hydroinformatics</i> , 2018, 20, 356-375.	2.4	12
35	Exploring the effects of climatic variables on monthly precipitation variation using a continuous wavelet-based multiscale entropy approach. <i>Environmental Research</i> , 2018, 165, 176-192.	7.5	42
36	Determining discharge coefficient of labyrinth and arced labyrinth weirs using support vector machine. <i>Hydrology Research</i> , 2018, 49, 924-938.	2.7	41

#	ARTICLE	IF	CITATIONS
37	Investigating effect of socio-economic and climatic variables in urban water consumption prediction via Gaussian process regression approach. <i>Water Science and Technology: Water Supply</i> , 2018, 18, 84-93.	2.1	6
38	Identifying complexity of annual precipitation variation in Iran during 1960â€“2010 based on information theory and discrete wavelet transform. <i>Stochastic Environmental Research and Risk Assessment</i> , 2018, 32, 1205-1223.	4.0	16
39	Improving capability of conceptual modeling of watershed rainfallâ€“runoff using hybrid wavelet-extreme learning machine approach. <i>Journal of Hydroinformatics</i> , 2018, 20, 69-87.	2.4	25
40	Prediction of overland flow resistance and its components based on flow characteristics using support vector machine. <i>Water Science and Technology: Water Supply</i> , 2018, 18, 1234-1251.	2.1	1
41	Estimating discharge coefficient of stepped spillways under nappe and skimming flow regime using data driven approaches. <i>Flow Measurement and Instrumentation</i> , 2018, 59, 79-87.	2.0	27
42	Explicit prediction of expanding channels hydraulic jump characteristics using gene expression programming approach. <i>Hydrology Research</i> , 2018, 49, 815-830.	2.7	11
43	A multiscale spatio-temporal framework to regionalize annual precipitation using k-means and self-organizing map technique. <i>Journal of Mountain Science</i> , 2018, 15, 1481-1497.	2.0	13
44	Modeling discharge coefficient of normal and inverted orientation labyrinth weirs using machine learning techniques. <i>ISH Journal of Hydraulic Engineering</i> , 2017, 23, 331-340.	2.1	18
45	Estimation of hydraulic jump characteristics of channels with sudden diverging side walls via SVM. <i>Water Science and Technology</i> , 2017, 76, 1614-1628.	2.5	10
46	Estimation of bedload discharge in sewer pipes with different boundary conditions using an evolutionary algorithm. <i>International Journal of Sediment Research</i> , 2017, 32, 564-574.	3.5	19
47	A cost model with several hydraulic constraints for optimizing in practice a trapezoidal cross section. <i>Journal of Hydroinformatics</i> , 2017, 19, 456-468.	2.4	5
48	Prediction of non-cohesive sediment transport in circular channels in deposition and limit of deposition states using SVM. <i>Water Science and Technology: Water Supply</i> , 2017, 17, 537-551.	2.1	18
49	Predicting characteristics of dune bedforms using PSO-LSSVM. <i>International Journal of Sediment Research</i> , 2017, 32, 515-526.	3.5	20
50	Modeling local pier scour with bed effect implications: heuristic vs. empirical strategies. <i>ISH Journal of Hydraulic Engineering</i> , 2017, 23, 13-22.	2.1	6
51	Neural networks- and neuro-fuzzy-based determination of influential parameters on energy dissipation over stepped spillways under nappe flow regime. <i>ISH Journal of Hydraulic Engineering</i> , 2017, 23, 57-62.	2.1	17
52	Modeling scour depth downstream of grade-control structures using data driven and empirical approaches. <i>Journal of Hydroinformatics</i> , 2016, 18, 946-960.	2.4	12
53	Predicting trapezoidal and rectangular side weirs discharge coefficient using machine learning methods. <i>ISH Journal of Hydraulic Engineering</i> , 2016, 22, 254-261.	2.1	18
54	Local vs. cross station simulation of suspended sediment load in successive hydrometric stations: heuristic modeling approach. <i>Journal of Mountain Science</i> , 2016, 13, 1773-1788.	2.0	4

#	ARTICLE	IF	CITATIONS
55	Forecasting Daily Seepage Discharge of an Earth Dam Using Wavelet-Mutual Information-Gaussian Process Regression Approaches. <i>Geotechnical and Geological Engineering</i> , 2016, 34, 1313-1326.	1.7	36
56	Evaluation of a Two-Stage SVM and Spatial Statistics Methods for Modeling Monthly River Suspended Sediment Load. <i>Water Resources Management</i> , 2016, 30, 393-407.	3.9	52
57	Evaluation of GA-SVR method for modeling bed load transport in gravel-bed rivers. <i>Journal of Hydrology</i> , 2015, 527, 1142-1152.	5.4	52
58	Modeling river total bed material load discharge using artificial intelligence approaches (based on) <i>Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50</i>	5.4	48
59	Modeling energy dissipation over stepped spillways using machine learning approaches. <i>Journal of Hydrology</i> , 2014, 508, 254-265.	5.4	63
60	Evaluation of genetic programming-based models for simulating friction factor in alluvial channels. <i>Journal of Hydrology</i> , 2014, 517, 1154-1161.	5.4	32
61	Studying of flow model and bed load transport in a coarse bed river: case study - Aland River, Iran. <i>Journal of Hydroinformatics</i> , 2011, 13, 850-866.	2.4	7
62	Uncertainty analyses regarding evaluating effective parameters on the hydraulic jump characteristics of different shape channels. <i>Water Science and Technology: Water Supply</i> , 0, , .	2.1	1
63	Drought Vulnerability Assessment Based on a Multi-criteria Integrated Approach and Application of Satellite-based Datasets. <i>Water Resources Management</i> , 0, , .	3.9	2
