Version: 2024-02-01

45 papers	2,721 citations	331670 21 h-index	243625 44 g-index
45 all docs	45 docs citations	45 times ranked	2819 citing authors

#	Article	IF	Citations
1	Advancing multispecies fishery management in China: Lessons from international experience. Aquaculture and Fisheries, 2023, 8, 351-362.	2.2	7
2	Estimating time-variation in confounded processes in population dynamics modeling: A case study for snow crab in the eastern Bering Sea. Fisheries Research, 2022, 251, 106298.	1.7	4
3	A framework for assessing harvest strategy choice when considering multiple interacting fisheries and a changing environment: The example of eastern Bering Sea crab stocks. Fisheries Research, 2022, 252, 106338.	1.7	8
4	Climate change and the future productivity and distribution of crab in the Bering Sea. ICES Journal of Marine Science, 2021, 78, 502-515.	2.5	17
5	Identifying management actions that promote sustainable fisheries. Nature Sustainability, 2021, 4, 440-449.	23.7	56
6	Range edges of North American marine species are tracking temperature over decades. Global Change Biology, 2021, 27, 3145-3156.	9.5	38
7	Models of marine protected areas must explicitly address spatial dynamics. Proceedings of the National Academy of Sciences of the United States of America, 2021, 118, .	7.1	6
8	Drivers of recruitment dynamics in Japanese major fisheries resources: Effects of environmental conditions and spawner abundance. Fisheries Research, 2020, 221, 105353.	1.7	16
9	A novel spatiotemporal stock assessment framework to better address fineâ€scale species distributions: Development and simulation testing. Fish and Fisheries, 2020, 21, 350-367.	5.3	26
10	Integrated Modeling to Evaluate Climate Change Impacts on Coupled Social-Ecological Systems in Alaska. Frontiers in Marine Science, 2020, 6, .	2.5	59
11	Life history changes and fisheries assessment performance: a case study for small yellow croaker. ICES Journal of Marine Science, 2020, 77, 645-654.	2.5	11
12	Effective fisheries management instrumental in improving fish stock status. Proceedings of the National Academy of Sciences of the United States of America, 2020, 117, 2218-2224.	7.1	434
13	Marine seafood production via intense exploitation and cultivation in China: Costs, benefits, and risks. PLoS ONE, 2020, 15, e0227106.	2.5	23
14	Historical dynamics of the demersal fish community in the East and South China Seas. Marine and Freshwater Research, 2020, 71, 1073.	1.3	2
15	Comment on â€œImpacts of historical warming on marine fisheries productionâ€. Science, 2019, 365, .	12.6	8
16	Overcoming long Bayesian run times in integrated fisheries stock assessments. ICES Journal of Marine Science, 2019, 76, 1477-1488.	2.5	14
17	Global forage fish recruitment dynamics: A comparison of methods, time-variation, and reverse causality. Fisheries Research, 2019, 214, 56-64.	1.7	35
18	Effects of environmental change and exploitation on marine communities around the Zhoushan archipelago: A functional group perspective. Estuarine, Coastal and Shelf Science, 2019, 217, 185-195.	2.1	6

#	Article	IF	Citations
19	Adaptive comanagement to achieve climateâ€ready fisheries. Conservation Letters, 2018, 11, e12452.	5.7	42
20	Corrigendum to â€œWhen does fishing forage species affect their predators?â€•[Fish. Res. 191 (2017) 211â€“221]. Fisheries Research, 2018, 206, 309.	1.7	1
21	Reducing retrospective patterns in stock assessment and impacts on management performance. ICES Journal of Marine Science, 2018, 75, 596-609.	2.5	33
22	When does fishing forage species affect their predators?. Fisheries Research, 2017, 191, 211-221.	1.7	112
23	Global fishery dynamics are poorly predicted by classical models. Fish and Fisheries, 2017, 18, 1085-1095.	5.3	13
24	Describing ecosystem contexts with singleâ€species models: a theoretical synthesis for fisheries. Fish and Fisheries, 2017, 18, 264-284.	5.3	11
25	High fishery catches through trophic cascades in China. Proceedings of the National Academy of Sciences of the United States of America, 2017, 114, 717-721.	7.1	116
26	Joint dynamic species distribution models: a tool for community ordination and spatioâ€temporal monitoring. Global Ecology and Biogeography, 2016, 25, 1144-1158.	5.8	148
27	Challenges to Reintroduction of a Captive Population of Topeka Shiner (Notropis topeka) into Former Habitats in Kansas. Transactions of the Kansas Academy of Science, 2016, 119, 83-92.	0.1	11
28	An Evaluation of Harvest Control Methods for Fishery Management. Reviews in Fisheries Science and Aquaculture, 2016, 24, 244-263.	9.1	21
29	Is spawning stock biomass a robust proxy for reproductive potential?. Fish and Fisheries, 2016, 17, 596-616.	5.3	42
30	Climate change and non-stationary population processes in fisheries management. ICES Journal of Marine Science, 2016, 73, 1297-1305.	2.5	96
31	Global fishery prospects under contrasting management regimes. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, 5125-5129.	7.1	485
32	An integrated stock assessment for red spiny lobster (Panulirus penicillatus) from the Galapagos Marine Reserve. Fisheries Research, 2016, 177, 82-94.	1.7	14
33	Changing fisheries productivity and food security. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, E1773-4.	7.1	7
34	The importance of length and age composition data in statistical age-structured models for marine species. ICES Journal of Marine Science, 2015, 72, 31-43.	2.5	49
35	Looking in the rear-view mirror: bias and retrospective patterns in integrated, age-structured stock assessment models. ICES Journal of Marine Science, 2015, 72, 99-110.	2.5	103
36	Environment drives forage fish productivity. Proceedings of the National Academy of Sciences of the United States of America, 2015, 112, E3314-E3315.	7.1	22

#	Article	IF	Citations
37	Can an aggregate assessment reflect the dynamics of a spatially structured stock? Snow crab in the eastern Bering Sea as a case study. Fisheries Research, 2015, 164, 135-142.	1.7	14
38	Time-varying natural mortality in fisheries stock assessment models: identifying a default approach. ICES Journal of Marine Science, 2015, 72, 137-150.	2.5	81
39	Examining common assumptions about recruitment: a metaâ€analysis of recruitment dynamics for worldwide marine fisheries. Fish and Fisheries, 2015, 16, 633-648.	5.3	218
40	Fisheries management under climate and environmental uncertainty: control rules and performance simulation. ICES Journal of Marine Science, 2014, 71, 2208-2220.	2.5	177
41	An evaluation of stockâ€“recruitment proxies and environmental change points for implementing the US Sustainable Fisheries Act. Fisheries Research, 2014, 157, 28-40.	1.7	18
42	Regime shifts and recruitment dynamics of snow crab, Chionoecetes opilio, in the eastern Bering Sea. Fisheries Oceanography, 2013, 22, 345-354.	1.7	31
43	Fisheries management for regime-based ecosystems: a management strategy evaluation for the snow crab fishery in the eastern Bering Sea. ICES Journal of Marine Science, 2013, 70, 955-967.	2.5	62
44	Production is a poor metric for identifying regime-like behavior in marine stocks. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, E1436.	7.1	7
45	Identifying research priorities for management under uncertainty: The estimation ability of the stock assessment method used for eastern Bering Sea snow crab (Chionoecetes opilio). Fisheries Research, 2012, 134-136, 82-94.	1.7	17
