citing authors

#	ARTICLE	IF	CITATIONS
1	Comparative mitogenomic analyses unveil conserved and variable mitogenomic features and phylogeny of Chedrinae fish. <i>Zoological Research</i> , 2022, 43, 30-32.	2.1	3
2	Two duplicated <i>gsdf</i> homeologs cooperatively regulate male differentiation by inhibiting <i>cyp19a1a</i> transcription in a hexaploid fish. <i>PLoS Genetics</i> , 2022, 18, e1010288.	3.5	5
3	Comparative genome anatomy reveals evolutionary insights into a unique amphitriploid fish. <i>Nature Ecology and Evolution</i> , 2022, 6, 1354-1366.	7.8	29
4	Regain of sex determination system and sexual reproduction ability in a synthetic octoploid male fish. <i>Science China Life Sciences</i> , 2021, 64, 77-87.	4.9	36
5	Comparative mitogenome analyses uncover mitogenome features and phylogenetic implications of the subfamily Cobitinae. <i>BMC Genomics</i> , 2021, 22, 50.	2.8	11
6	Upregulation of the PPAR signaling pathway and accumulation of lipids are related to the morphological and structural transformation of the dragon-eye goldfish eye. <i>Science China Life Sciences</i> , 2021, 64, 1031-1049.	4.9	27
7	Functional Divergence of Multiple Duplicated <i>Foxl2</i> Homeologs and Alleles in a Recurrent Polyploid Fish. <i>Molecular Biology and Evolution</i> , 2021, 38, 1995-2013.	8.9	44
8	Genotypic Males Play an Important Role in the Creation of Genetic Diversity in Gynogenetic Gibel Carp. <i>Frontiers in Genetics</i> , 2021, 12, 691923.	2.3	9
9	Divergent Antiviral Mechanisms of Two Viperin Homeologs in a Recurrent Polyploid Fish. <i>Frontiers in Immunology</i> , 2021, 12, 702971.	4.8	11
10	Genomic anatomy of male-specific microchromosomes in a gynogenetic fish. <i>PLoS Genetics</i> , 2021, 17, e1009760.	3.5	17
11	Two Duplicated <i>Ptpn6</i> Homeologs Cooperatively and Negatively Regulate RLR-Mediated IFN Response in Hexaploid Gibel Carp. <i>Frontiers in Immunology</i> , 2021, 12, 780667.	4.8	4
12	Stable Genome Incorporation of Sperm-derived DNA Fragments in Gynogenetic Clone of Gibel Carp. <i>Marine Biotechnology</i> , 2020, 22, 54-66.	2.4	29
13	Dynamic and Differential Expression of Duplicated <i>Cxcr4/Cxcl12</i> Genes Facilitates Antiviral Response in Hexaploid Gibel Carp. <i>Frontiers in Immunology</i> , 2020, 11, 2176.	4.8	12
14	Differential expression of innate and adaptive immune genes in the survivors of three gibel carp gynogenetic clones after herpesvirus challenge. <i>BMC Genomics</i> , 2019, 20, 432.	2.8	27
15	Protective effect of <i>Clostridium butyricum</i> against <i>Carassius auratus</i> herpesvirus in gibel carp. <i>Aquaculture International</i> , 2019, 27, 905-914.	2.2	18
16	Unusual AT-skew of <i>Sinorhodeus microlepis</i> mitogenome provides new insights into mitogenome features and phylogenetic implications of bitterling fishes. <i>International Journal of Biological Macromolecules</i> , 2019, 129, 339-350.	7.5	17
17	Origin and transition of sex determination mechanisms in a gynogenetic hexaploid fish. <i>Heredity</i> , 2018, 121, 64-74.	2.6	51
18	Differential expression and functional diversification of diverse immunoglobulin domain-containing protein (DICP) family in three gynogenetic clones of gibel carp. <i>Developmental and Comparative Immunology</i> , 2018, 84, 396-407.	2.3	21

#	ARTICLE	IF	CITATIONS
19	Oocyte-specific maternal Slbp2 is required for replication-dependent histone storage and early nuclear cleavage in zebrafish oogenesis and embryogenesis. <i>Rna</i> , 2018, 24, 1738-1748.	3.5	16
20	Distinct sperm nucleus behaviors between genotypic and temperature-dependent sex determination males are associated with replication and expression-related pathways in a gynogenetic fish. <i>BMC Genomics</i> , 2018, 19, 437.	2.8	23
21	Whole Genome Incorporation and Epigenetic Stability in a Newly Synthetic Allopolyploid of Gynogenetic Gibel Carp. <i>Genome Biology and Evolution</i> , 2018, 10, 2394-2407.	2.5	14
22	A novel male-specific SET domain-containing gene setdm identified from extra microchromosomes of gibel carp males. <i>Science Bulletin</i> , 2017, 62, 528-536.	9.0	19
23	Wider geographic distribution and higher diversity of hexaploids than tetraploids in <i>Carassius</i> species complex reveal recurrent polyploidy effects on adaptive evolution. <i>Scientific Reports</i> , 2017, 7, 5395.	3.3	37
24	Extra Microchromosomes Play Male Determination Role in Polyploid Gibel Carp. <i>Genetics</i> , 2016, 203, 1415-1424.	2.9	55
25	Complete depletion of primordial germ cells in an All-female fish leads to Sex-biased gene expression alteration and sterile All-male occurrence. <i>BMC Genomics</i> , 2015, 16, 971.	2.8	44
26	Molecular characterization and expression of an oocyte-specific histone stem-loop binding protein in <i>Carassius gibelio</i> . <i>Comparative Biochemistry and Physiology - B Biochemistry and Molecular Biology</i> , 2015, 190, 46-53.	1.6	4
27	Type-IV Antifreeze Proteins are Essential for Epiboly and Convergence in Gastrulation of Zebrafish Embryos. <i>International Journal of Biological Sciences</i> , 2014, 10, 715-732.	6.4	25
28	Expression characterization of testicular DMRT1 in both Sertoli cells and spermatogenic cells of polyploid gibel carp. <i>Gene</i> , 2014, 548, 119-125.	2.2	36
29	Evolutionary history of two divergent Dmrt1 genes reveals two rounds of polyploidy origins in gibel carp. <i>Molecular Phylogenetics and Evolution</i> , 2014, 78, 96-104.	2.7	69
30	High male incidence and evolutionary implications of triploid form in northeast Asia <i>Carassius auratus</i> complex. <i>Molecular Phylogenetics and Evolution</i> , 2013, 66, 350-359.	2.7	46
