#	Paper	IF	Citations
193	Longitudinal associations between infant movement behaviours and development.. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2022 , 19, 10	8.4	1
192	Transforming Obesity Prevention for CHILDren (TOPCHILD) Collaboration: protocol for a systematic review with individual participant data meta-analysis of behavioural interventions for the prevention of early childhood obesity.. <i>BMJ Open</i> , 2022 , 12, e048166	3	4
191	Unpacking the behavioural components and delivery features of early childhood obesity prevention interventions in the TOPCHILD Collaboration: a systematic review and intervention coding protocol.. <i>BMJ Open</i> , 2022 , 12, e048165	3	5
190	Demographic Correlates of Movement Behaviors in Infants: A Longitudinal Study.. <i>Journal of Physical Activity and Health</i> , 2022 , 1-9	2.5	0
189	A scoping review of outcomes commonly reported in obesity prevention interventions aiming to improve obesity-related health behaviors in children to age 5 years.. <i>Obesity Reviews</i> , 2022 , e13427	10.6	0
188	A thematic cluster analysis of parents' online discussions about fussy eating.. <i>Maternal and Child Nutrition</i> , 2022 , e13316	3.4	1
187	Protocol for the Let's Grow randomised controlled trial: examining efficacy, cost-effectiveness and scalability of a m-Health intervention for movement behaviours in toddlers.. <i>BMJ Open</i> , 2022 , 12, e057521	3.1	0
186	Examining the sustainability of effects of early childhood obesity prevention interventions: Follow-up of the EPOCH individual participant data prospective meta-analysis.. <i>Pediatric Obesity</i> , 2022 , e12919	4.6	0
185	Determinants of rapid infant weight gain: A pooled analysis of seven cohorts.. <i>Pediatric Obesity</i> , 2022 , e12928	4.6	0
184	Protocol for an Effectiveness-Implementation Hybrid Trial to Evaluate Scale up of an Evidence-Based Intervention Addressing Lifestyle Behaviours From the Start of Life: INFANT.. <i>Frontiers in Endocrinology</i> , 2021 , 12, 717468	5.7	1
183	Quantifying the overall impact of an early childhood multi-behavioural lifestyle intervention. <i>Pediatric Obesity</i> , 2021 , e12861	4.6	0
182	Nighttime sleep duration trajectories were associated with body mass index trajectories in early childhood. <i>Pediatric Obesity</i> , 2021 , 16, e12766	4.6	1
181	Volume and accumulation patterns of physical activity and sedentary time: longitudinal changes and tracking from early to late childhood. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2021 , 18, 39	8.4	2
180	A systematic review of economic evaluations of web-based or telephone-delivered interventions for preventing overweight and obesity and/or improving obesity-related behaviors. <i>Obesity Reviews</i> , 2021 , 22, e13227	10.6	2
179	Association Between Longitudinal Trajectories of Lifestyle Pattern and BMI in Early Childhood. <i>Obesity</i> , 2021 , 29, 879-887	8	1
178	The reliability and validity of a physical activity and sedentary behaviour home audit tool for children aged 2-5 years. <i>Journal of Science and Medicine in Sport</i> , 2021 , 24, 1143-1148	4.4	1
177	Maternal knowledge explains screen time differences 2 and 3.5 years post-intervention in INFANT. <i>European Journal of Pediatrics</i> , 2021 , 180, 3391-3398	4.1	0

176	How to Change Young Children's Physical Activity and Sedentary Behavior: Mechanisms of Behavior Change in the INFANT Cluster Randomized Controlled Trial. <i>Children</i> , 2021 , 8,	2.8	1
175	A comparison of children's diet and movement behaviour patterns derived from three unsupervised multivariate methods. <i>PLoS ONE</i> , 2021 , 16, e0255203	3.7	2
174	Breastfeeding and emerging motherhood identity: An interpretative phenomenological analysis of first time Chinese Australian mothers' breastfeeding experiences. <i>Women and Birth</i> , 2021 , 34, e292-e301	3.3	8
173	Is replacing sedentary time with bouts of physical activity associated with inflammatory biomarkers in children?. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2021 , 31, 733-741	4.6	2
172	Reallocating sedentary time with total physical activity and physical activity bouts in children: Associations with cardiometabolic biomarkers. <i>Journal of Sports Sciences</i> , 2021 , 39, 332-340	3.6	1
171	Variation in outcomes of the Melbourne Infant, Feeding, Activity and Nutrition Trial (INFANT) according to maternal education and age 2 and 3½ years post-intervention. <i>Public Health Nutrition</i> , 2021 , 24, 1460-1468	3.3	1
170	The skeletal maturity of Australian children aged 10-13 years in 2016. <i>Annals of Human Biology</i> , 2021 , 48, 150-152	1.7	
169	Protocol for the development of Core Outcome Sets for Early intervention trials to Prevent Obesity in Children (COS-EPOCH). <i>BMJ Open</i> , 2021 , 11, e048104	3	2
168	Physical activity and adiposity in preschool children: The Barwon Infant Study. <i>Pediatric Obesity</i> , 2021 , e12853	4.6	0
167	What Factors Help Young Children Develop Positive Perceptions of Their Motor Skills?. <i>International Journal of Environmental Research and Public Health</i> , 2021 , 18,	4.6	1
166	Cost comparison of five Australasian obesity prevention interventions for children aged from birth to two years. <i>Pediatric Obesity</i> , 2020 , 15, e12684	4.6	4
165	Lifestyle Patterns Begin in Early Childhood, Persist and Are Socioeconomically Patterned, Confirming the Importance of Early Life Interventions. <i>Nutrients</i> , 2020 , 12,	6.7	20
164	Prospective associations with physiological, psychosocial and educational outcomes of meeting Australian 24-Hour Movement Guidelines for the Early Years. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2020 , 17, 36	8.4	14
163	Interventions commenced by early infancy to prevent childhood obesity-The EPOCH Collaboration: An individual participant data prospective meta-analysis of four randomized controlled trials. <i>Pediatric Obesity</i> , 2020 , 15, e12618	4.6	32
162	Family history of non-communicable diseases and associations with weight and movement behaviours in Australian school-aged children: a prospective study. <i>BMJ Open</i> , 2020 , 10, e038789	3	1
161	Family history of non-communicable diseases and associations with weight and movement behaviours in Australian school-aged children: a prospective study. <i>BMJ Open</i> , 2020 , 10, e038789	3	
160	Comparing the features of parks that children usually visit with those that are closest to home: A brief report. <i>Urban Forestry and Urban Greening</i> , 2020 , 48, 126560	5.4	6
159	Changing Behavior Using Ecological Models 2020 , 237-250		11

158	Long-term outcomes (2 and 3.5 years post-intervention) of the INFANT early childhood intervention to improve health behaviors and reduce obesity: cluster randomised controlled trial follow-up. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2020 , 17, 95	8.4	14
157	Patterns and predictors of exclusive breastfeeding in Chinese Australian mothers: a cross sectional study. <i>International Breastfeeding Journal</i> , 2020 , 15, 61	3.8	1
156	Protocol for economic evaluation alongside the SHINE (Supporting Healthy Image, Nutrition and Exercise) cluster randomised controlled trial. <i>BMJ Open</i> , 2020 , 10, e038050	3	2
155	The Need for an Evidence-Based Program in Sweden to Support Parents to Create Healthy Lifestyle Behaviors from the Start of Life-Parental Perceptions. <i>Nutrients</i> , 2020 , 12,	6.7	2
154	A systematic review of lifestyle patterns and their association with adiposity in children aged 5-12 years. <i>Obesity Reviews</i> , 2020 , 21, e13029	10.6	15
153	Relative effects of postnatal rapid growth and maternal factors on early childhood growth trajectories. <i>Paediatric and Perinatal Epidemiology</i> , 2019 , 33, 172-180	2.7	7
152	Examining the Features of Parks That Children Visit During Three Stages of Childhood. <i>International Journal of Environmental Research and Public Health</i> , 2019 , 16,	4.6	14
151	Changes in volume and bouts of physical activity and sedentary time across early childhood: a longitudinal study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019 , 16, 42	8.4	11
150	Process evaluation of a classroom active break (ACTI-BREAK) program for improving academic-related and physical activity outcomes for students in years 3 and 4. <i>BMC Public Health</i> , 2019 , 19, 633	4.1	10
149	Key Messages in an Early Childhood Obesity Prevention Intervention: Are They Recalled and Do They Impact Children's Behaviour?. <i>International Journal of Environmental Research and Public Health</i> , 2019 , 16,	4.6	5
148	Objectively Measured Environmental Correlates of Toddlers' Physical Activity and Sedentary Behavior. <i>Pediatric Exercise Science</i> , 2019 , 31, 480-487	2	6
147	Paternal self-efficacy for promoting children's obesity protective diets and associations with children's dietary intakes. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019 , 16, 53	8.4	7
146	Joint physical-activity/screen-time trajectories during early childhood: socio-demographic predictors and consequences on health-related quality-of-life and socio-emotional outcomes. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019 , 16, 55	8.4	16
145	Lessons on early childhood obesity prevention interventions from the Victorian Infant Program. <i>Public Health Research and Practice</i> , 2019 , 29,	5.1	4
144	Differences Between Mothers and Fathers of Young Children in Their Use of the Internet to Support Healthy Family Lifestyle Behaviors: Cross-Sectional Study. <i>Journal of Medical Internet Research</i> , 2019 , 21, e11454	7.6	16
143	Sitting and Screen Time Outside School Hours: Correlates in 6- to 8-Year-Old Children. <i>Journal of Physical Activity and Health</i> , 2019 , 16, 752-764	2.5	0
142	Not All Play Equipment Is Created Equal: Associations Between Equipment at Home and Children's Physical Activity. <i>Journal of Physical Activity and Health</i> , 2019 , 16, 945-951	2.5	1
141	The influence of the maternal peer group (partner, friends, mothers' group, family) on mothers' attitudes to obesity-related behaviours of their children. <i>BMC Pediatrics</i> , 2019 , 19, 357	2.6	2

140	Modifiable factors which predict children's gross motor competence: a prospective cohort study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2019 , 16, 129	8.4	16
139	Associations between organised sport participation and classroom behaviour outcomes among primary school-aged children. <i>PLoS ONE</i> , 2019 , 14, e0209354	3.7	6
138	Preschool children's physical activity and cardiovascular disease risk: A systematic review. <i>Journal of Science and Medicine in Sport</i> , 2019 , 22, 568-573	4.4	5
137	Brief tools to measure obesity-related behaviours in children under 5 years of age: A systematic review. <i>Obesity Reviews</i> , 2019 , 20, 432-447	10.6	7
136	Physical activity and sedentary behavior across three time-points and associations with social skills in early childhood. <i>BMC Public Health</i> , 2019 , 19, 27	4.1	25
135	A pilot primary school active break program (ACTI-BREAK): Effects on academic and physical activity outcomes for students in Years 3 and 4. <i>Journal of Science and Medicine in Sport</i> , 2019 , 22, 438-443	4.4	17
134	Interventions to increase physical activity in children 0-5 years old: a systematic review, meta-analysis and realist synthesis. <i>Obesity Reviews</i> , 2019 , 20, 75-87	10.6	28
133	Role of parental and environmental characteristics in toddlers' physical activity and screen time: Bayesian analysis of structural equation models. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2018 , 15, 17	8.4	28
132	Interventions to reduce sedentary behaviour in 0-5-year-olds: a systematic review and meta-analysis of randomised controlled trials. <i>British Journal of Sports Medicine</i> , 2018 , 52, 314-321	10.3	23
131	A pilot intervention to reduce postpartum weight retention and central adiposity in first-time mothers: results from the mums OnLINE (Online, Lifestyle, Nutrition & Exercise) study. <i>Journal of Human Nutrition and Dietetics</i> , 2018 , 31, 314-328	3.1	11
130	The views of first time mothers completing an intervention to reduce postpartum weight retention: A qualitative evaluation of the mums OnLINE study. <i>Midwifery</i> , 2018 , 56, 23-28	2.8	7
129	Differences in infant feeding practices between Chinese-born and Australian-born mothers living in Australia: a cross-sectional study. <i>BMC Pediatrics</i> , 2018 , 18, 209	2.6	10
128	Validity of hip-worn inertial measurement unit compared to jump mat for jump height measurement in adolescents. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2018 , 28, 2183-2188	4.6	3
127	MatCH (Mothers and their Children's Health) Profile: offspring of the 1973-78 cohort of the Australian Longitudinal Study on Women's Health. <i>Longitudinal and Life Course Studies</i> , 2018 , 9, 351-375	1	14
126	Feasibility and Efficacy of a Parent-Focused, Text Message-Delivered Intervention to Reduce Sedentary Behavior in 2- to 4-Year-Old Children (Mini Movers): Pilot Randomized Controlled Trial. <i>JMIR MHealth and UHealth</i> , 2018 , 6, e39	5.5	18
125	Results from Australia's 2018 Report Card on Physical Activity for Children and Youth. <i>Journal of Physical Activity and Health</i> , 2018 , 15, S315-S317	2.5	23
124	Associations between maternal concern about child's weight and related behaviours and maternal weight-related parenting practices: a cross-sectional study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2018 , 15, 104	8.4	17
123	A mobile technology intervention to reduce sedentary behaviour in 2- to 4-year-old children (Mini Movers): study protocol for a randomised controlled trial. <i>Trials</i> , 2017 , 18, 97	2.8	6

122	Does Preschool Physical Activity and Electronic Media Use Predict Later Social and Emotional Skills at 6 to 8 Years? A Cohort Study. <i>Journal of Physical Activity and Health</i> , 2017 , 14, 308-316	2.5	22
121	Psychometric Properties of a Parental Questionnaire for Assessing Correlates of Toddlers' Physical Activity and Sedentary Behavior. <i>Measurement in Physical Education and Exercise Science</i> , 2017 , 21, 190-200	1.8	15
120	Setting them up for lifetime activity: Play competence perceptions and physical activity in young children. <i>Journal of Science and Medicine in Sport</i> , 2017 , 20, 856-860	4.4	11
119	Associations between the physical activity levels of fathers and their children at 20 months, 3.5 and five years of age. <i>BMC Public Health</i> , 2017 , 17, 628	4.1	4
118	Meeting new Canadian 24-Hour Movement Guidelines for the Early Years and associations with adiposity among toddlers living in Edmonton, Canada. <i>BMC Public Health</i> , 2017 , 17, 840	4.1	42
117	Proportion of infants meeting the Australian 24-hour Movement Guidelines for the Early Years: data from the Melbourne InFANT Program. <i>BMC Public Health</i> , 2017 , 17, 856	4.1	24
116	A collaborative approach to adopting/adapting guidelines - The Australian 24-Hour Movement Guidelines for the early years (Birth to 5 years): an integration of physical activity, sedentary behavior, and sleep. <i>BMC Public Health</i> , 2017 , 17, 869	4.1	202
115	Effect of classroom-based physical activity interventions on academic and physical activity outcomes: a systematic review and meta-analysis. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017 , 14, 114	8.4	231
114	Describing objectively measured physical activity levels, patterns, and correlates in a cross sectional sample of infants and toddlers from South Africa. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017 , 14, 176	8.4	20
113	A primary school active break programme (ACTI-BREAK): study protocol for a pilot cluster randomised controlled trial. <i>Trials</i> , 2017 , 18, 433	2.8	15
112	Facilitator and Participant Use of Facebook in a Community-Based Intervention for Parents: The InFANT Extend Program. <i>Childhood Obesity</i> , 2017 , 13, 443-454	2.5	11
111	Do the correlates of screen time and sedentary time differ in preschool children?. <i>BMC Public Health</i> , 2017 , 17, 285	4.1	39
110	Maternal-child co-participation in physical activity-related behaviours: prevalence and cross-sectional associations with mothers and children's objectively assessed physical activity levels. <i>BMC Public Health</i> , 2017 , 17, 506	4.1	16
109	Maternal correlates of young children's physical activity across periods of the day. <i>Journal of Science and Medicine in Sport</i> , 2017 , 20, 178-183	4.4	17
108	Fathers' perspectives on the diets and physical activity behaviours of their young children. <i>PLoS ONE</i> , 2017 , 12, e0179210	3.7	21
107	The infant feeding practices of Chinese immigrant mothers in Australia: A qualitative exploration. <i>Appetite</i> , 2016 , 105, 375-84	4.5	31
106	Cross-sectional and Longitudinal Associations Between Parents' and Preschoolers' Physical Activity and Television Viewing: The HAPPY Study. <i>Journal of Physical Activity and Health</i> , 2016 , 13, 269-74	2.5	29
105	Mothers' perceptions of the influences on their child feeding practices - A qualitative study. <i>Appetite</i> , 2016 , 105, 596-603	4.5	21

104	Results From Australia's 2016 Report Card on Physical Activity for Children and Youth. <i>Journal of Physical Activity and Health</i> , 2016 , 13, S87-S94	2.5	20
103	The Chinese-born immigrant infant feeding and growth hypothesis. <i>BMC Public Health</i> , 2016 , 16, 1071	4.1	5
102	Dietary associations of fathers and their children between the ages of 20 months and 5 years. <i>Public Health Nutrition</i> , 2016 , 19, 2033-9	3.3	16
101	Maternal dietary intake and physical activity habits during the postpartum period: associations with clinician advice in a sample of Australian first time mothers. <i>BMC Pregnancy and Childbirth</i> , 2016 , 16, 27	3.2	29
100	The extended Infant Feeding, Activity and Nutrition Trial (InFANT Extend) Program: a cluster-randomized controlled trial of an early intervention to prevent childhood obesity. <i>BMC Public Health</i> , 2016 , 16, 166	4.1	37
99	Longitudinal levels and bouts of objectively measured sedentary time among young Australian children in the HAPPY study. <i>Journal of Science and Medicine in Sport</i> , 2016 , 19, 232-236	4.4	19
98	Mothers' perceptions of Melbourne InFANT Program: informing future practice. <i>Health Promotion International</i> , 2016 , 31, 614-22	3	8
97	Objectively measured sedentary behaviour and health and development in children and adolescents: systematic review and meta-analysis. <i>Obesity Reviews</i> , 2016 , 17, 330-44	10.6	185
96	Practicalities and Research Considerations for Conducting Childhood Obesity Prevention Interventions with Families. <i>Children</i> , 2016 , 3,	2.8	13
95	Informing Active Play and Screen Time Behaviour Change Interventions for Low Socioeconomic Position Mothers of Young Children: What Do Mothers Want?. <i>BioMed Research International</i> , 2016 , 2016, 2139782	3	7
94	Translating an early childhood obesity prevention program for local community implementation: a case study of the Melbourne InFANT Program. <i>BMC Public Health</i> , 2016 , 16, 748	4.1	11
93	Preschool and childcare center characteristics associated with children's physical activity during care hours: an observational study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2016 , 13, 117	8.4	29
92	Associations between physical activity, television viewing and postnatal depressive symptoms amongst healthy primiparous mothers. <i>Mental Health and Physical Activity</i> , 2016 , 10, 62-67	5	4
91	More active pre-school children have better motor competence at school starting age: an observational cohort study. <i>BMC Public Health</i> , 2016 , 16, 1068	4.1	48
90	Physical environments, policies and practices for physical activity and screen-based sedentary behaviour among preschoolers within child care centres in Melbourne, Australia and Kingston, Canada. <i>Child: Care, Health and Development</i> , 2015 , 41, 132-8	2.8	11
89	A Review of the Relationship Between Socioeconomic Position and the Early-Life Predictors of Obesity. <i>Current Obesity Reports</i> , 2015 , 4, 350-62	8.4	71
88	Prevalence of sedentary behavior in children under 2years: A systematic review. <i>Preventive Medicine</i> , 2015 , 78, 105-14	4.3	45
87	Prevalence and stability of active play, restricted movement and television viewing in infants. <i>Early Child Development and Care</i> , 2015 , 185, 883-894	0.9	25

86	Tracking of maternal self-efficacy for limiting young children's television viewing and associations with children's television viewing time: a longitudinal analysis over 15-months. <i>BMC Public Health</i> , 2015 , 15, 517	4.1	12
85	Associations between dietary intakes of first-time fathers and their 20-month-old children are moderated by fathers' BMI, education and age. <i>British Journal of Nutrition</i> , 2015 , 114, 988-94	3.6	20
84	Associations of Parental Rules and Socioeconomic Position With Preschool Children's Sedentary Behaviour and Screen Time. <i>Journal of Physical Activity and Health</i> , 2015 , 12, 515-21	2.5	26
83	Parental Influences on Preschoolers' TV Viewing Time: Mediation Analyses on Australian and Belgian Data. <i>Journal of Physical Activity and Health</i> , 2015 , 12, 1272-9	2.5	8
82	Association between maternal education and diet of children at 9 months is partially explained by mothers' diet. <i>Maternal and Child Nutrition</i> , 2015 , 11, 936-47	3.4	25
81	Early childhood physical activity, sedentary behaviors and psychosocial well-being: a systematic review. <i>Preventive Medicine</i> , 2014 , 62, 182-92	4.3	82
80	The effect of an early childhood obesity intervention on father's obesity risk behaviors: the Melbourne InFANT Program. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2014 , 11, 18	8.4	16
79	Results from Australia's 2014 Report Card on Physical Activity for Children and Youth. <i>Journal of Physical Activity and Health</i> , 2014 , 11 Suppl 1, S21-5	2.5	27
78	Mediators of improved child diet quality following a health promotion intervention: the Melbourne InFANT Program. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2014 , 11, 137	8.4	43
77	What helps children to move more at school recess and lunchtime? Mid-intervention results from Transform-Us! cluster-randomised controlled trial. <i>British Journal of Sports Medicine</i> , 2014 , 48, 271-7	10.3	70
76	Variation in outcomes of the Melbourne Infant, Feeding, Activity and Nutrition Trial (InFANT) Program according to maternal education and age. <i>Preventive Medicine</i> , 2014 , 58, 58-63	4.3	39
75	Examination of mid-intervention mediating effects on objectively assessed sedentary time among children in the Transform-Us! cluster-randomized controlled trial. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2013 , 10, 62	8.4	68
74	Early childhood predictors of toddlers' physical activity: longitudinal findings from the Melbourne InFANT Program. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2013 , 10, 123	8.4	34
73	The Melbourne Infant Feeding, Activity and Nutrition Trial (InFANT) Program follow-up. <i>Contemporary Clinical Trials</i> , 2013 , 34, 145-51	2.3	38
72	Systematic review of lifestyle interventions to limit postpartum weight retention: implications for future opportunities to prevent maternal overweight and obesity following childbirth. <i>Obesity Reviews</i> , 2013 , 14, 792-805	10.6	109
71	A health promotion intervention can affect diet quality in early childhood. <i>Journal of Nutrition</i> , 2013 , 143, 1672-8	4.1	31
70	A parent-focused intervention to reduce infant obesity risk behaviors: a randomized trial. <i>Pediatrics</i> , 2013 , 131, 652-60	7.4	194
69	Breastfeeding mothers consume more vegetables and a greater variety of fruits and vegetables than non-breastfeeding peers: The influence of socioeconomic position. <i>Nutrition and Dietetics</i> , 2012 , 69, 84-90	2.5	8

68	Socioeconomic variation in diet and activity-related behaviours of Australian children and adolescents aged 2-16 years. <i>Pediatric Obesity</i> , 2012 , 7, 329-42	4.6	56
67	The HAPPY study: development and reliability of a parent survey to assess correlates of preschool children's physical activity. <i>Journal of Science and Medicine in Sport</i> , 2012 , 15, 407-17	4.4	52
66	A parent focused child obesity prevention intervention improves some mother obesity risk behaviors: the Melbourne inFANT program. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012 , 9, 100	8.4	33
65	Children's physical activity and screen time: qualitative comparison of views of parents of infants and preschool children. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012 , 9, 152	8.4	70
64	How does perceived risk mediate associations between perceived safety and parental restriction of adolescents' physical activity in their neighborhood?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012 , 9, 57	8.4	16
63	Correlates of preschool children's physical activity. <i>American Journal of Preventive Medicine</i> , 2012 , 43, 159-67	6.1	78
62	Use of electronic games by young children and fundamental movement skills?. <i>Perceptual and Motor Skills</i> , 2012 , 114, 1023-34	2.2	43
61	A bi-directional relationship between obesity and health-related quality of life: evidence from the longitudinal AusDiab study. <i>International Journal of Obesity</i> , 2012 , 36, 295-303	5.5	74
