#	ARTICLE	IF	CITATIONS
1	Key Factors Relevant for Healthcare Decisions of Patients with Type 1 and Type 2 Diabetes in Secondary Care According to Healthcare Professionals. Patient Preference and Adherence, 2022, Volume 16, 809-819.	1.8	2
2	Shared decision making in primary care: Process evaluation of the intervention in the OPTIMAL study, a cluster randomised trial. Primary Care Diabetes, 2022, 16, 375-380.	1.8	2
3	Association of weight loss and weight loss maintenance following diabetes diagnosis by screening and incidence of cardiovascular disease and all-cause mortality: An observational analysis of the ADDITION-Europe trial. Diabetes, Obesity and Metabolism, 2021, 23, 730-741.	4.4	6
4	Insulin Therapy in Type 2 Diabetes Is Associated With Barriers to Activity and Worse Health Status: A Cross-Sectional Study in Primary Care. Frontiers in Endocrinology, 2021, 12, 573235.	3.5	2
5	Communicating personalised statin therapy-effects as 10-year CVD-risk or CVD-free life-expectancy: does it improve decisional conflict? Three-armed, blinded, randomised controlled trial. BMJ Open, 2021, 11, e041673.	1.9	6
6	Population-based screen-detected type 2 diabetes mellitus is associated with less need for insulin therapy after 10 years. BMJ Open Diabetes Research and Care, 2020, 8, e000949.	2.8	4
7	Clinical Considerations When Initiating and Titrating Insulin Degludec/Liraglutide (IDegLira) in People with Type 2 Diabetes. Drugs, 2020, 80, 147-165.	10.9	13
8	Person-centered diabetes care and patient activation in people with type 2 diabetes. BMJ Open Diabetes Research and Care, 2020, 8, e001926.	2.8	21
9	Patient activation in individuals with type 2 diabetes mellitus: associated factors and the role of insulin. Patient Preference and Adherence, 2019, Volume 13, 73-81.	1.8	23
10	Association between person and disease related factors and the planned diabetes care in people who receive person-centered type 2 diabetes care: An implementation study. PLoS ONE, 2019, 14, e0219702.	2.5	4
11	Subjective cognitive decline, brain imaging biomarkers, and cognitive functioning in patients with a history of vascular disease: the SMART-Medea study. Neurobiology of Aging, 2019, 84, 33-40.	3.1	17
12	<p>De-Intensification Of Blood Glucose Lowering Medication In People Identified As Being Over-Treated: A Mixed Methods Study</p>. Patient Preference and Adherence, 2019, Volume 13, 1775-1783.	1.8	9
13	Development of a research agenda for general practice based on knowledge gaps identified in Dutch guidelines and input from 48 stakeholders. European Journal of General Practice, 2019, 25, 19-24.	2.0	11
14	The effectiveness of an emotion-focused educational programme in reducing diabetes distress in adults with type 2 diabetes mellitus at 12-month follow-up: a cluster randomized controlled trial. Therapeutic Advances in Endocrinology and Metabolism, 2019, 10, 204201881985376.	3.2	3
15	People with type 2 diabetes and screen-detected cognitive impairment use acute health care services more often: observations from the COG-ID study. Diabetology and Metabolic Syndrome, 2019, 11, 21.	2.7	1
16	Depressive symptoms and quality of life after screening for cognitive impairment in patients with type 2 diabetes: observations from the Cog-ID cohort study. BMJ Open, 2019, 9, e024696.	1.9	8
17	Individualised targets for insulin initiation in type 2 diabetes mellitusâ€”the influence of physician and practice: a cross-sectional study in eight European countries. BMJ Open, 2019, 9, e032040.	1.9	3
18	Effectiveness of diabetes self-management education and support via a smartphone application in insulin-treated patients with type 2 diabetes: results of a randomized controlled trial (TRIGGER study). BMJ Open Diabetes Research and Care, 2019, 7, e000981.	2.8	18

#	ARTICLE	IF	CITATIONS
19	Long-term effects of intensive multifactorial therapy in individuals with screen-detected type 2 diabetes in primary care: 10-year follow-up of the ADDITION-Europe cluster-randomised trial. <i>Lancet Diabetes and Endocrinology</i> , 2019, 7, 925-937.	11.4	39
20	A simple to implement and low-cost supervised walking programme in highly motivated individuals with or at risk for type 2 diabetes: An observational study with a pre-post design. <i>Preventive Medicine Reports</i> , 2019, 13, 30-36.	1.8	5
21	Implementation of a Structured Diabetes Consultation Model to Facilitate a Person-Centered Approach: Results From a Nationwide Dutch Study. <i>Diabetes Care</i> , 2018, 41, 688-695.	8.6	24
22	Person-centred type 2 diabetes care: time for a paradigm shift. <i>Lancet Diabetes and Endocrinology</i> , 2018, 6, 264-266.	11.4	27
23	Antimicrobial resistance in women with urinary tract infection in primary care: No relation with type 2 diabetes mellitus. <i>Primary Care Diabetes</i> , 2018, 12, 80-86.	1.8	11
24	Cluster randomised trial on the effectiveness of a computerised prompt to refer (back) patients with type 2 diabetes. <i>PLoS ONE</i> , 2018, 13, e0207653.	2.5	1
25	Effectiveness of diabetes self-management education via a smartphone application in insulin treated type 2 diabetes patients – design of a randomised controlled trial (the TRIGGER study). <i>BMC Endocrine Disorders</i> , 2018, 18, 74.	2.2	19
26	The associations between diabetes distress and self-efficacy, medication adherence, self-care activities and disease control depend on the way diabetes distress is measured: Comparing the DDS-17, DDS-2 and the PAID-5. <i>Diabetes Research and Clinical Practice</i> , 2018, 142, 74-84.	2.8	22
27	Diabetes care providers' opinions and working methods after four years of experience with a diabetes patient web portal; a survey among health care providers in general practices and an outpatient clinic. <i>BMC Family Practice</i> , 2018, 19, 94.	2.9	9
28	Applicability of diagnostic constructs for cognitive impairment in patients with type 2 diabetes mellitus. <i>Diabetes Research and Clinical Practice</i> , 2018, 142, 92-99.	2.8	7
29	Risk Factors for Recurrent Cardiovascular Events Before Age 65 Years or Within 2.5 Years of a Recent First Cardiovascular Event. <i>American Journal of Cardiology</i> , 2017, 120, 167-173.	1.6	2
30	Relation of Epicardial Adipose Tissue Radiodensity to Coronary Artery Calcium on Cardiac Computed Tomography in Patients at High Risk for Cardiovascular Disease. <i>American Journal of Cardiology</i> , 2017, 119, 1359-1365.	1.6	37
31	Oral Hypoglycemic Agents Added to Insulin Monotherapy for Type 2 Diabetes. <i>JAMA - Journal of the American Medical Association</i> , 2017, 318, 1489.	7.4	2
32	What determines treatment satisfaction of patients with type 2 diabetes on insulin therapy? An observational study in eight European countries. <i>BMJ Open</i> , 2017, 7, e016180.	1.9	28
33	Self-knowledge of HbA1c in people with Type 2 Diabetes Mellitus and its association with glycaemic control. <i>Primary Care Diabetes</i> , 2017, 11, 414-420.	1.8	21
34	Pro: leefstijl bespreken behoort tot kern huisartsgeneeskunde. <i>Huisarts En Wetenschap</i> , 2017, 60, 176-176.	0.0	0
35	Effectiveness of shared goal setting and decision making to achieve treatment targets in type 2 diabetes patients: A cluster-randomized trial (OPTIMAL). <i>Health Expectations</i> , 2017, 20, 1172-1180.	2.6	19
36	The effectiveness of a value-based EMOTION-cognition-Focused educational programme to reduce diabetes-related distress in Malay adults with Type 2 diabetes (VEMOFIT): study protocol for a cluster randomised controlled trial. <i>BMC Endocrine Disorders</i> , 2017, 17, 22.	2.2	8

#	ARTICLE	IF	CITATIONS
37	Is there evidence of potential overtreatment of glycaemia in elderly people with type 2 diabetes? Data from the GUIDANCE study. <i>Acta Diabetologica</i> , 2017, 54, 209-214.	2.5	38
38	Personalised treatment targets in type 2 diabetes patients: The Dutch approach. <i>Primary Care Diabetes</i> , 2017, 11, 71-77.	1.8	16
39	Diabetes-Related Distress and Depressive Symptoms Are Not Merely Negative over a 3-Year Period in Malaysian Adults with Type 2 Diabetes Mellitus Receiving Regular Primary Diabetes Care. <i>Frontiers in Psychology</i> , 2017, 8, 1834.	2.1	7
40	Validity and reliability of a Malay version of the brief illness perception questionnaire for patients with type 2 diabetes mellitus. <i>BMC Medical Research Methodology</i> , 2017, 17, 118.	3.1	23
41	How to choose the most appropriate cognitive test to evaluate cognitive complaints in primary care. <i>BMC Family Practice</i> , 2017, 18, 101.	2.9	22
42	Internet-based Self-Management Support for Patients With Well-Controlled Type 2 Diabetes: A Real-Life Study. <i>JMIR Research Protocols</i> , 2017, 6, e47.	1.0	3
43	Patient-centeredness and quality management in Dutch diabetes care organizations after a 1-year intervention. <i>Patient Preference and Adherence</i> , 2016, Volume 10, 1957-1966.	1.8	3
44	LEADER 7: cardiovascular risk profiles of US and European participants in the LEADER diabetes trial differ. <i>Diabetology and Metabolic Syndrome</i> , 2016, 8, 37.	2.7	9
45	Diabetes self-management education after pre-selection of patients: design of a randomised controlled trial. <i>Diabetology and Metabolic Syndrome</i> , 2016, 8, 82.	2.7	3
46	Differences in clinical characteristics between patients with and without type 2 diabetes hospitalized with a first myocardial infarction. <i>Journal of Diabetes and Its Complications</i> , 2016, 30, 830-833.	2.3	4
47	Impact of UKPDS risk estimation added to a first subjective risk estimation on management of coronary disease risk in type 2 diabetes – An observational study. <i>Primary Care Diabetes</i> , 2016, 10, 27-35.	1.8	2
48	Metabolomic biomarkers for personalised glucose lowering drugs treatment in type 2 diabetes. <i>Metabolomics</i> , 2016, 12, 27.	3.0	30
49	Health status of older patients with type 2 diabetes and screen-detected heart failure is significantly lower than those without. <i>International Journal of Cardiology</i> , 2016, 211, 79-83.	1.7	0
50	Diabetes-Related Distress, Depression and Distress-Depression among Adults with Type 2 Diabetes Mellitus in Malaysia. <i>PLoS ONE</i> , 2016, 11, e0152095.	2.5	72
51	A randomised trial of the effect and cost-effectiveness of early intensive multifactorial therapy on 5-year cardiovascular outcomes in individuals with screen-detected type 2 diabetes: the Anglo-Danish-Dutch Study of Intensive Treatment in People with Screen-Detected Diabetes in Primary Care (ADDITION-Europe) study. <i>Health Technology Assessment</i> , 2016, 20, 1-86.	2.8	12
52	Comparison of perceptions of obesity among adults with central obesity with and without additional cardiometabolic risk factors and among those who were formally obese, 3 years after screening for central obesity. <i>BMC Public Health</i> , 2015, 15, 1214.	2.9	10
53	Effect of six years intensified multifactorial treatment on levels of hsCRP and adiponectin in patients with screen detected type 2 diabetes: The ADDITION-Netherlands randomized trial. <i>Diabetes/Metabolism Research and Reviews</i> , 2015, 31, 758-766.	4.0	3
54	Association between quality management and performance indicators in Dutch diabetes care groups: a cross-sectional study. <i>BMJ Open</i> , 2015, 5, e007456-e007456.	1.9	8

#	ARTICLE	IF	CITATIONS
55	Illness perceptions and self-care behaviours in the first years of living with type 2 diabetes; does the presence of complications matter?. <i>Psychology and Health</i> , 2015, 30, 1274-1287.	2.2	49
56	Early Detection and Treatment of Type 2 Diabetes Reduce Cardiovascular Morbidity and Mortality: A Simulation of the Results of the Anglo-Danish-Dutch Study of Intensive Treatment in People With Screen-Detected Diabetes in Primary Care (ADDITION-Europe). <i>Diabetes Care</i> , 2015, 38, 1449-1455.	8.6	214
57	Cognitive function in patients with diabetes mellitus: guidance for daily care. <i>Lancet Neurology</i> , The, 2015, 14, 329-340.	10.2	264
58	Shared decision making in type 2 diabetes with a support decision tool that takes into account clinical factors, the intensity of treatment and patient preferences: design of a cluster randomised (OPTIMAL) trial. <i>BMC Family Practice</i> , 2015, 16, 27.	2.9	18
59	Undiagnosed cognitive impairment, health status and depressive symptoms in patients with type 2 diabetes. <i>Journal of Diabetes and Its Complications</i> , 2015, 29, 1217-1222.	2.3	16
60	A training course for experts in diabetology in primary care. <i>Primary Care Diabetes</i> , 2015, 9, 68-70.	1.8	2
61	Effective Nurse Communication With Type 2 Diabetes Patients. <i>Western Journal of Nursing Research</i> , 2015, 37, 1100-1131.	1.4	28
62	Cobalamin status and its relation with depression, cognition and neuropathy in patients with type 2 diabetes mellitus using metformin. <i>Acta Diabetologica</i> , 2015, 52, 383-393.	2.5	34
63	Influence of duration and dose of metformin on cobalamin deficiency in type 2 diabetes patients using metformin. <i>Acta Diabetologica</i> , 2015, 52, 47-53.	2.5	62
64	Patients'™ Experiences with and Attitudes towards a Diabetes Patient Web Portal. <i>PLoS ONE</i> , 2015, 10, e0129403.	2.5	31
65	Cognitive Impairment in Diabetes: Rationale and Design Protocol of the Cog-ID Study. <i>JMIR Research Protocols</i> , 2015, 4, e69.	1.0	10
66	Change in cardiovascular risk factors following early diagnosis of type 2 diabetes: a cohort analysis of a cluster-randomised trial. <i>British Journal of General Practice</i> , 2014, 64, e208-e216.	1.4	11
67	Effect of Early Multifactorial Therapy Compared With Routine Care on Microvascular Outcomes at 5 Years in People With Screen-Detected Diabetes: A Randomized Controlled Trial. <i>Diabetes Care</i> , 2014, 37, 2015-2023.	8.6	56
68	Repeat prescriptions of guideline-based secondary prevention medication in patients with type 2 diabetes and previous myocardial infarction in Dutch primary care. <i>Family Practice</i> , 2014, 31, 688-693.	1.9	15
69	What follow-up care and self-management support do patients with type 2 diabetes want after their first acute coronary event? A qualitative study. <i>Primary Care Diabetes</i> , 2014, 8, 195-206.	1.8	6
70	Diabetes-specific quality of life but not health status is independently associated with glycaemic control among patients with type 2 diabetes: A cross-sectional analysis of the ADDITION-Europe trial cohort. <i>Diabetes Research and Clinical Practice</i> , 2014, 104, 281-287.	2.8	45
71	Cognitive disorders in diabetic patients. <i>Handbook of Clinical Neurology</i> / Edited By P J Vinken and G W Bruyn, 2014, 126, 145-166.	1.8	18
72	Peer support to decrease diabetes-related distress in patients with type 2 diabetes mellitus: design of a randomised controlled trial. <i>BMC Endocrine Disorders</i> , 2014, 14, 21.	2.2	24

#	ARTICLE	IF	CITATIONS
73	Insulin degludec – The impact of a new basal insulin on care in type 2 diabetes. <i>Primary Care Diabetes</i> , 2014, 8, 119-125.	1.8	1
74	What effect does diabetes have on the family – do you know?. <i>Lancet Diabetes and Endocrinology</i> , the, 2014, 2, 191-192.	11.4	3
75	Reasons and Barriers for Using a Patient Portal: Survey Among Patients With Diabetes Mellitus. <i>Journal of Medical Internet Research</i> , 2014, 16, e263.	4.3	90
76	Effect of early intensive multifactorial therapy compared with routine care on self-reported health status, general well-being, diabetes-specific quality of life and treatment satisfaction in screen-detected type 2 diabetes mellitus patients (ADDITION-Europe): a cluster-randomised trial. <i>Diabetologia</i> , 2013, 56, 2367-2377.	6.3	18
77	Six-monthly diabetes monitoring of well-controlled patients: Experiences of primary care providers. <i>Primary Care Diabetes</i> , 2013, 7, 187-191.	1.8	5
78	Physical Activity in Patients with Metabolic Syndrome: At Screening and Three Years Thereafter. <i>Metabolic Syndrome and Related Disorders</i> , 2013, 11, 163-168.	1.3	8
79	Mild depressive symptoms do not influence cognitive functioning in patients with type 2 diabetes. <i>Psychoneuroendocrinology</i> , 2013, 38, 376-386.	2.7	15
80	The –Test Your Memory– test performs better than the MMSE in a population without known cognitive dysfunction. <i>Journal of the Neurological Sciences</i> , 2013, 328, 92-97.	0.6	26
81	Computerized Decision Support Systems in Primary Care for Type 2 Diabetes Patients Only Improve Patients' Outcomes when Combined with Feedback on Performance and Case Management: A Systematic Review. <i>Diabetes Technology and Therapeutics</i> , 2013, 15, 180-192.	4.4	62
82	Quality of Care of People With Type 2 Diabetes in Eight European Countries. <i>Diabetes Care</i> , 2013, 36, 2628-2638.	8.6	215
83	Differences Between Diabetes Patients Who Are Interested or Not in the Use of a Patient Web Portal. <i>Diabetes Technology and Therapeutics</i> , 2013, 15, 556-563.	4.4	32
84	Predictors of Incident Heart Failure Hospitalizations Among Patients With Impaired Glucose Tolerance. <i>Circulation: Heart Failure</i> , 2013, 6, 203-210.	3.9	26
85	Screening for diabetes: what do the results of the ADDITION trial mean for clinical practice?. <i>Diabetes Management</i> , 2013, 3, 367-378.	0.5	5
86	PS8 - 40. The effect of three- versus six-monthly monitoring on cardiometabolic control in well-controlled type 2 diabetes patients: a pragmatic randomised controlled equivalence trial in primary care (EFFIMODI study). <i>Nederlands Tijdschrift Voor Diabetologie</i> , 2012, 10, 125-126.	0.0	0
87	ADDITION-Europe and the case for diabetes screening – Authors' reply. <i>Lancet, The</i> , 2012, 379, 313-314.	13.7	2
88	Frequency of Monitoring Diabetes in Primary Care: What Do Well-Controlled Patients Prefer?. <i>Canadian Journal of Diabetes</i> , 2012, 36, 187-192.	0.8	3
89	Both cardiovascular and non-cardiovascular comorbidity are related to health status in well-controlled type 2 diabetes patients: a cross-sectional analysis. <i>Cardiovascular Diabetology</i> , 2012, 11, 121.	6.8	34
90	Intensive multifactorial treatment and cognitive functioning in screen-detected type 2 diabetes – The ADDITION-Netherlands study: A cluster-randomized trial. <i>Journal of the Neurological Sciences</i> , 2012, 314, 71-77.	0.6	53

#	ARTICLE	IF	CITATIONS
91	Diabetes, hyperglycaemia, and acute ischaemic stroke. <i>Lancet Neurology</i> , The, 2012, 11, 261-271.	10.2	377
92	Management of infections in type 2 diabetes from the patient's perspective: A qualitative approach. <i>Primary Care Diabetes</i> , 2011, 5, 33-37.	1.8	1
93	Lower postprandial glucose responses at baseline and after 4 weeks use of a diabetes-specific formula in diabetes type 2 patients. <i>Diabetes Research and Clinical Practice</i> , 2011, 93, 421-429.	2.8	19
94	Effect of early intensive multifactorial therapy on 5-year cardiovascular outcomes in individuals with type 2 diabetes detected by screening (ADDITION-Europe): a cluster-randomised trial. <i>Lancet</i> , The, 2011, 378, 156-167.	13.7	406
95	Opinions of patients with type 2 diabetes about responsibility, setting targets and willingness to take medication. A cross-sectional survey. <i>Patient Education and Counseling</i> , 2011, 84, 56-61.	2.2	18
96	PS6 - 35. The association between health status and comorbidity in rather wellcontrolled type 2 diabetes patients in primary care. <i>Nederlands Tijdschrift Voor Diabetologie</i> , 2011, 9, 115-115.	0.0	0
97	Cost-Effectiveness of the Diabetes Care Protocol, a Multifaceted Computerized Decision Support Diabetes Management Intervention That Reduces Cardiovascular Risk. <i>Diabetes Care</i> , 2010, 33, 258-263.	8.6	30
98	Effect of Valsartan on the Incidence of Diabetes and Cardiovascular Events. <i>New England Journal of Medicine</i> , 2010, 362, 1477-1490.	27.0	588
99	Risk of recurrent acute lower urinary tract infections and prescription pattern of antibiotics in women with and without diabetes in primary care. <i>Family Practice</i> , 2010, 27, 379-385.	1.9	49
