#	ARTICLE	IF	CITATIONS
1	Maca's world scenario: a bibliometric analysis. <i>Biomass Conversion and Biorefinery</i> , 2023, 13, 3329-3347.	4.6	9
2	Purple corn (<i>Zea mays</i> L.) pericarp hydroalcoholic extracts obtained by conventional processes at atmospheric pressure and by processes at high pressure. <i>Brazilian Journal of Chemical Engineering</i> , 2020, 37, 237-248.	1.3	6
3	Fractionation of ethanolic and hydroalcoholic extracts of green propolis using supercritical carbon dioxide as an anti-solvent to obtain artemillin rich-extract. <i>Journal of Supercritical Fluids</i> , 2018, 138, 167-173.	3.2	12
4	Brazilian green propolis extracts obtained by conventional processes and by processes at high pressure with supercritical carbon dioxide, ethanol and water. <i>Journal of Supercritical Fluids</i> , 2017, 130, 189-197.	3.2	22
5	Influence of ethanol, water, and their mixtures as co-solvents of the supercritical carbon dioxide in the extraction of phenolics from purple corn cob (<i>Zea mays</i> L.). <i>Journal of Supercritical Fluids</i> , 2016, 118, 11-18.	3.2	50
6	Optimization of the extraction of phenolic compounds from purple corn cob (<i>Zea mays</i> L.) by sequential extraction using supercritical carbon dioxide, ethanol and water as solvents. <i>Journal of Supercritical Fluids</i> , 2016, 116, 10-19.	3.2	26
7	Extraction of bioactive compounds from cob and pericarp of purple corn (<i>Zea mays</i> L.) by sequential extraction in fixed bed extractor using supercritical CO ₂ , ethanol, and water as solvents. <i>Journal of Supercritical Fluids</i> , 2016, 107, 250-259.	3.2	40
