| #  | ARTICLE                                                                                                                                                                                                                                   | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Pentraxin 3 in Cardiovascular Disease. <i>Frontiers in Immunology</i> , 2019, 10, 823.                                                                                                                                                    | 2.2 | 100       |
| 2  | Postresuscitation Treatment With Argon Improves Early Neurological Recovery in a Porcine Model of Cardiac Arrest. <i>Shock</i> , 2014, 41, 72-78.                                                                                         | 1.0 | 49        |
| 3  | Prospective study on microangiopathy in type 2 diabetic foot ulcer. <i>Diabetologia</i> , 2016, 59, 1542-1548.                                                                                                                            | 2.9 | 39        |
| 4  | Propranolol for familial cerebral cavernous malformation (Treat_CCM): study protocol for a randomized controlled pilot trial. <i>Trials</i> , 2020, 21, 401.                                                                              | 0.7 | 37        |
| 5  | Endothelial damage in septic shock patients as evidenced by circulating syndecan-1, sphingosine-1-phosphate and soluble VE-cadherin: a substudy of ALBIOS. <i>Critical Care</i> , 2021, 25, 113.                                          | 2.5 | 36        |
| 6  | LUCAS Versus Manual Chest Compression During Ambulance Transport: A Hemodynamic Study in a Porcine Model of Cardiac Arrest. <i>Journal of the American Heart Association</i> , 2019, 8, e011189.                                          | 1.6 | 35        |
| 7  | PCSK9 is associated with mortality in patients with septic shock: data from the ALBIOS study. <i>Journal of Internal Medicine</i> , 2021, 289, 179-192.                                                                                   | 2.7 | 27        |
| 8  | Duration of Untreated Cardiac Arrest and Clinical Relevance of Animal Experiments: The Relationship Between the "No-Flow" Duration and the Severity of Post-Cardiac Arrest Syndrome in a Porcine Model. <i>Shock</i> , 2018, 49, 205-212. | 1.0 | 23        |
| 9  | Ibuprofen plus isosorbide dinitrate treatment in the mdx mice ameliorates dystrophic heart structure. <i>Pharmacological Research</i> , 2013, 73, 35-43.                                                                                  | 3.1 | 22        |
| 10 | The role of resistin and myeloperoxidase in severe sepsis and septic shock: Results from the ALBIOS trial. <i>European Journal of Clinical Investigation</i> , 2020, 50, e13333.                                                          | 1.7 | 17        |
| 11 | Circulating biomarkers and cardiac function over 3 years after chemotherapy with anthracyclines: the ICOS trial. <i>ESC Heart Failure</i> , 2020, 7, 1452-1466.                                                                           | 1.4 | 16        |
| 12 | Ventilation With Argon Improves Survival With Good Neurological Recovery After Prolonged Untreated Cardiac Arrest in Pigs. <i>Journal of the American Heart Association</i> , 2020, 9, e016494.                                           | 1.6 | 15        |
| 13 | Effect of mild hypercapnia on outcome and histological injury in a porcine post cardiac arrest model. <i>Resuscitation</i> , 2019, 135, 110-117.                                                                                          | 1.3 | 14        |
| 14 | High- and low-affinity PEGylated hemoglobin-based oxygen carriers: Differential oxidative stress in a Guinea pig transfusion model. <i>Free Radical Biology and Medicine</i> , 2018, 124, 299-310.                                        | 1.3 | 13        |
| 15 | Relation between plasma ceramides and cardiovascular death in chronic heart failure: A subset analysis of the GISSI-HF trial. <i>ESC Heart Failure</i> , 2020, 7, 3288-3297.                                                              | 1.4 | 12        |
| 16 | Total NT-proBNP, a novel biomarker related to recurrent atrial fibrillation. <i>BMC Cardiovascular Disorders</i> , 2021, 21, 553.                                                                                                         | 0.7 | 12        |
| 17 | Monocrotaline-induced pulmonary arterial hypertension: Time-course of injury and comparative evaluation of macitentan and Y-27632, a Rho kinase inhibitor. <i>European Journal of Pharmacology</i> , 2019, 865, 172777.                   | 1.7 | 11        |
| 18 | Multicentre longitudinal study of fluid and neuroimaging Biomarkers of Axonal injury after traumatic brain injury: the BIO-AX-TBI study protocol. <i>BMJ Open</i> , 2020, 10, e042093.                                                    | 0.8 | 11        |

| #  | ARTICLE                                                                                                                                                                                                                                                                                                                         | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Ranolazine ameliorates postresuscitation electrical instability and myocardial dysfunction and improves survival with good neurologic recovery in a rat model of cardiac arrest. <i>Heart Rhythm</i> , 2014, 11, 1641-1647.                                                                                                     | 0.3 | 9         |
| 20 | LIPCAR Is Increased in Chronic Symptomatic HF Patients. A Sub-Study of the GISSI-HF Trial. <i>Clinical Chemistry</i> , 2021, 67, 1721-1731.                                                                                                                                                                                     | 1.5 | 9         |
| 21 | IGFBP7 and GDF-15, but not P1NP, are associated with cardiac alterations and 10-year outcome in an elderly community-based study. <i>BMC Cardiovascular Disorders</i> , 2021, 21, 328.                                                                                                                                          | 0.7 | 9         |
| 22 | Prognostic Value of a Combination of Circulating Biomarkers in Critically Ill Patients with Traumatic Brain Injury: Results from the European CREATIVE Study. <i>Journal of Neurotrauma</i> , 2021, 38, 2667-2676.                                                                                                              | 1.7 | 7         |
| 23 | Prospective Evaluation of Clinico-Pathological Predictors of Postoperative Atrial Fibrillation. Circulation: Arrhythmia and Electrophysiology, 2020, 13, e008382.                                                                                                                                                               | 2.1 | 6         |
| 24 | Esmolol during cardiopulmonary resuscitation reduces neurological injury in a porcine model of cardiac arrest. <i>Scientific Reports</i> , 2021, 11, 10635.                                                                                                                                                                     | 1.6 | 6         |
| 25 | Pentraxin-3, Troponin T, N-Terminal Pro-B-Type Natriuretic Peptide in Septic Patients. <i>Shock</i> , 2020, 54, 675-680.                                                                                                                                                                                                        | 1.0 | 5         |
| 26 | Trabectedin and Lurbinectedin Extend Survival of Mice Bearing C26 Colon Adenocarcinoma, without Affecting Tumor Growth or Cachexia. <i>Cancers</i> , 2020, 12, 2312.                                                                                                                                                            | 1.7 | 5         |
| 27 | Coffee, Atrial Fibrillation, and Circulating Ceramides in Patients with Chronic Heart Failure. <i>Journal of Agricultural and Food Chemistry</i> , 2021, 69, 11236-11245.                                                                                                                                                       | 2.4 | 5         |
| 28 | Albumin Oxidation Status in Sepsis Patients Treated With Albumin or Crystalloids. <i>Frontiers in Physiology</i> , 2021, 12, 682877.                                                                                                                                                                                            | 1.3 | 4         |
| 29 | Effects of Dipeptidyl Peptidase-4 Inhibitor Linagliptin on Left Ventricular Dysfunction in Patients with Type 2 Diabetes and Concentric Left Ventricular Geometry (the DYDA 2a, c Trial). Rationale, Design, and Baseline Characteristics of the Study Population. <i>Cardiovascular Drugs and Therapy</i> , 2019, 33, 547-555. | 1.3 | 3         |
| 30 | Searching for Preclinical Models of Acute Decompensated Heart Failure: a Concise Narrative Overview and a Novel Swine Model. <i>Cardiovascular Drugs and Therapy</i> , 2022, 36, 727-738.                                                                                                                                       | 1.3 | 2         |
| 31 | Brain Kynurenine Pathway and Functional Outcome of Rats Resuscitated From Cardiac Arrest. <i>Journal of the American Heart Association</i> , 2021, 10, e021071.                                                                                                                                                                 | 1.6 | 2         |
| 32 | Primary pulmonary arterial hypertension: Protocol to assess comprehensively in the rat the response to pharmacologic treatments. <i>MethodsX</i> , 2020, 7, 100771.                                                                                                                                                             | 0.7 | 1         |
| 33 | Ventilation with the noble gas argon in an in vivo model of idiopathic pulmonary arterial hypertension in rats. <i>Medical Gas Research</i> , 2021, 11, 124.                                                                                                                                                                    | 1.2 | 1         |
| 34 | Research update for articles published in EJCI in 2015. <i>European Journal of Clinical Investigation</i> , 2017, 47, 775-788.                                                                                                                                                                                                  | 1.7 | 0         |
