|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Meditating for the Planet: Effects of a Mindfulness-Based Intervention on Sustainable Consumption Behaviors. <i>Environment and Behavior</i> , 2020, 52, 1012-1042.                                                                                                                        | 4.7  | 37        |
| 2  | On the porosity of subject and object in "mindfulness" scientific study: challenges to "scientific" construction, operationalization and measurement of mindfulness. <i>Current Opinion in Psychology</i> , 2019, 28, 102-107.                                                             | 4.9  | 47        |
| 3  | Mindfulness and sustainability: correlation or causation?. <i>Current Opinion in Psychology</i> , 2019, 28, 23-27.                                                                                                                                                                         | 4.9  | 68        |
| 4  | Drug-eluting stents versus bare-metal stents in saphenous vein grafts: a double-blind, randomised trial. <i>Lancet, The</i> , 2018, 391, 1997-2007.                                                                                                                                        | 13.7 | 70        |
| 5  | Contrast-induced nephropathy in patients undergoing endovascular peripheral vascular intervention: Incidence, risk factors, and outcomes as observed in the Blue Cross Blue Shield of Michigan Cardiovascular Consortium. <i>Journal of Interventional Cardiology</i> , 2017, 30, 274-280. | 1.2  | 42        |
| 6  | Mindfulness and sustainable consumption: A systematic literature review of research approaches and findings. <i>Journal of Cleaner Production</i> , 2017, 162, 544-558.                                                                                                                    | 9.3  | 165       |
| 7  | Mindfulness-Based Intervention Does Not Influence Cardiac Autonomic Control or the Pattern of Physical Activity in Fibromyalgia During Daily Life. <i>Clinical Journal of Pain</i> , 2017, 33, 385-394.                                                                                    | 1.9  | 18        |
| 8  | A mindfulness-based program for improving quality of life among hematopoietic stem cell transplantation survivors: feasibility and preliminary findings. <i>Supportive Care in Cancer</i> , 2015, 23, 1105-1112.                                                                           | 2.2  | 24        |
| 9  | Mindfulness, by any other name: trials and tribulations of "sati" in western psychology and science. <i>Contemporary Buddhism</i> , 2011, 12, 219-239.                                                                                                                                     | 0.1  | 438       |
| 10 | Loving-kindness and compassion meditation: Potential for psychological interventions. <i>Clinical Psychology Review</i> , 2011, 31, 1126-1132.                                                                                                                                             | 11.4 | 653       |
| 11 | Mindfulness for Psychologists: Paying Kind Attention to the Perceptible. <i>Mindfulness</i> , 2010, 1, 87-97.                                                                                                                                                                              | 2.8  | 101       |
| 12 | Swiss Cancer League communication skills training programme for oncology nurses: an evaluation. <i>Journal of Advanced Nursing</i> , 2010, 66, 2266-2277.                                                                                                                                  | 3.3  | 42        |
| 13 | Physical activity and respiratory behavior in daily life of patients with panic disorder and healthy controls. <i>International Journal of Psychophysiology</i> , 2010, 78, 42-49.                                                                                                         | 1.0  | 28        |
| 14 | Instability of physical anxiety symptoms in daily life of patients with panic disorder and patients with posttraumatic stress disorder. <i>Journal of Anxiety Disorders</i> , 2010, 24, 792-798.                                                                                           | 3.2  | 40        |
| 15 | Emotions beyond the laboratory: Theoretical fundamentals, study design, and analytic strategies for advanced ambulatory assessment. <i>Biological Psychology</i> , 2010, 84, 552-569.                                                                                                      | 2.2  | 244       |
| 16 | Accuracy of ventilatory measurement employing ambulatory inductive plethysmography during tasks of everyday life. <i>Biological Psychology</i> , 2010, 84, 121-128.                                                                                                                        | 2.2  | 37        |
| 17 | Respiratory Pathophysiology of Panic Disorder: An Ambulatory Monitoring Study. <i>Psychosomatic Medicine</i> , 2009, 71, 869-876.                                                                                                                                                          | 2.0  | 35        |
| 18 | Receiving the Diagnosis of Lung Cancer: Patient Recall of Information and Satisfaction With Physician Communication. <i>Journal of Clinical Oncology</i> , 2008, 26, 297-302.                                                                                                              | 1.6  | 95        |

| #  | ARTICLE                                                                                                                                                                                                                                         | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Acupuncture in Migraine. <i>Clinical Journal of Pain</i> , 2008, 24, 106-115.                                                                                                                                                                   | 1.9 | 84        |
| 20 | Patterns of Objective Physical Functioning and Perception of Mood and Fatigue in Posttreatment Breast Cancer Patients and Healthy Controls: An Ambulatory Psychophysiological Investigation. <i>Psychosomatic Medicine</i> , 2008, 70, 819-828. | 2.0 | 28        |
| 21 | Impact of laughter on air trapping in severe chronic obstructive lung disease. <i>International Journal of COPD</i> , 2008, Volume 3, 185-192.                                                                                                  | 2.3 | 34        |
| 22 | Mindfulness Training as an Intervention for Fibromyalgia: Evidence of Postintervention and 3-Year Follow-Up Benefits in Well-Being. <i>Psychotherapy and Psychosomatics</i> , 2007, 76, 226-233.                                                | 8.8 | 395       |
| 23 | Autonomic and Respiratory Characteristics of Posttraumatic Stress Disorder and Panic Disorder. <i>Psychosomatic Medicine</i> , 2007, 69, 935-943.                                                                                               | 2.0 | 210       |
| 24 | Psychophysiological ambulatory assessment of affective dysregulation in borderline personality disorder. <i>Psychiatry Research</i> , 2007, 150, 265-275.                                                                                       | 3.3 | 163       |
| 25 | Toward understanding respiratory sinus arrhythmia: Relations to cardiac vagal tone, evolution and biobehavioral functions. <i>Biological Psychology</i> , 2007, 74, 263-285.                                                                    | 2.2 | 912       |
| 26 | Whither vagal tone. <i>Biological Psychology</i> , 2007, 74, 295-300.                                                                                                                                                                           | 2.2 | 136       |
| 27 | Associations among Salivary Cortisol, Melatonin, Catecholamines, Sleep Quality and Stress in Women with Breast Cancer and Healthy Controls. <i>Journal of Behavioral Medicine</i> , 2007, 30, 45-58.                                            | 2.1 | 75        |
| 28 | Effects of lifestyle modification on the progression of coronary atherosclerosis, autonomic function, and angina—The role of GNB3 C825T polymorphism. <i>American Heart Journal</i> , 2006, 151, 870-877.                                       | 2.7 | 23        |
| 29 | Continuous electronic data capture of physiology, behavior and experience in real life: towards ecological momentary assessment of emotion. <i>Interacting With Computers</i> , 2006, 18, 171-186.                                              | 1.5 | 62        |
| 30 | Reliability of respiratory tidal volume estimation by means of ambulatory inductive plethysmography. <i>Biomedical Sciences Instrumentation</i> , 2006, 42, 193-8.                                                                              | 0.2 | 11        |
| 31 | Distinguishing emotional from physical activation in ambulatory psychophysiological monitoring. <i>Biomedical Sciences Instrumentation</i> , 2006, 42, 458-63.                                                                                  | 0.2 | 27        |
| 32 | Psychological and Quality-of-Life Outcomes from a Comprehensive Stress Reduction and Lifestyle Program in Patients with Coronary Artery Disease: Results of a Randomized Trial. <i>Psychotherapy and Psychosomatics</i> , 2005, 74, 344-352.    | 8.8 | 83        |
| 33 | Mindfulness-based stress reduction and health benefits. <i>Journal of Psychosomatic Research</i> , 2004, 57, 35-43.                                                                                                                             | 2.6 | 3,316     |
| 34 | Improving estimation of cardiac vagal tone during spontaneous breathing using a paced breathing calibration. <i>Biomedical Sciences Instrumentation</i> , 2004, 40, 317-24.                                                                     | 0.2 | 42        |
| 35 | The LifeShirt: a multi-function ambulatory system monitoring health, disease, and medical intervention in the real world. <i>Studies in Health Technology and Informatics</i> , 2004, 108, 133-41.                                              | 0.3 | 42        |
| 36 | Gender Differences in Psychophysiological Responses to Speech Stress Among Older Social Phobics. <i>Psychosomatic Medicine</i> , 2001, 63, 765-777.                                                                                             | 2.0 | 94        |

| #  | ARTICLE                                                                                                                                                                                                                                | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Association of depressive symptoms with reduced baroreflex cardiac control in coronary artery disease. <i>American Heart Journal</i> , 1999, 137, 453-457.                                                                             | 2.7 | 124       |
| 38 | Anxiety Reduces Baroreflex Cardiac Control in Older Adults With Major Depression. <i>Psychosomatic Medicine</i> , 1999, 61, 334-340.                                                                                                   | 2.0 | 78        |
| 39 | Anxiety and Vagal Control of Heart Rate. <i>Psychosomatic Medicine</i> , 1998, 60, 498-502.                                                                                                                                            | 2.0 | 167       |
| 40 | Blood Pressure Responses to Mental Stress in Emotionally Defensive Patients With Stable Coronary Artery Disease. <i>American Journal of Cardiology</i> , 1997, 80, 343-346.                                                            | 1.6 | 12        |
| 41 | Incremental Bias in Finapres Estimation of Baseline Blood Pressure Levels Over Time. <i>Hypertension</i> , 1997, 29, 1039-1043.                                                                                                        | 2.7 | 26        |
| 42 | Cardiac vagal control and dynamic responses to psychological stress among patients with coronary artery disease. <i>American Journal of Cardiology</i> , 1996, 78, 1424-1427.                                                          | 1.6 | 26        |
| 43 | Noninvasive Assessment of Baroreflex Control in Borderline Hypertension. <i>Hypertension</i> , 1996, 28, 238-243.                                                                                                                      | 2.7 | 105       |
| 44 | Respiratory and cardiac rhythms as windows to central and autonomic biobehavioral regulation: Selection of window frames, keeping the panes clean and viewing the neural topography. <i>Biological Psychology</i> , 1992, 34, 131-161. | 2.2 | 82        |
