#	ARTICLE	IF	CITATIONS
1	Poor effectiveness of antenatal detection of fetal growth restriction and consequences for obstetric management and neonatal outcomes: a French national study. BJOG: an International Journal of Obstetrics and Gynaecology, 2015, 122, 518-527.	1.1	127
2	Fetal and neonatal outcomes of preterm infants born before 32 weeks of gestation according to antenatal vs postnatal assessments of restricted growth. American Journal of Obstetrics and Gynecology, 2017, 216, 516.e1-516.e10.	0.7	34
3	Antenatal detection of fetal growth restriction and risk of stillbirth: population-based case-control study. Ultrasound in Obstetrics and Gynecology, 2020, 55, 613-620.	0.9	33
4	Does the Presence of Risk Factors for Fetal Growth Restriction Increase the Probability of Antenatal Detection? A French National Study. Paediatric and Perinatal Epidemiology, 2016, 30, 46-55.	0.8	25
5	Gestational age at diagnosis of early-onset fetal growth restriction and impact on management and survival: a population-based cohort study. BJOG: an International Journal of Obstetrics and Gynaecology, 2017, 124, 1899-1906.	1.1	25
6	Comparison of the Hadlock and INTERGROWTH formulas for calculating estimated fetal weight in a preterm population in France. American Journal of Obstetrics and Gynecology, 2018, 219, 476.e1-476.e12.	0.7	20
7	Vitamin D and pregnancy outcomes: Overall results of the FEPED study. Journal of Gynecology Obstetrics and Human Reproduction, 2020, 49, 101883.	0.6	16
8	Comparison of the performance of estimated fetal weight charts for the detection of small and large-for-gestational age newborns with adverse outcomes: a French population-based study. BJOG: an International Journal of Obstetrics and Gynaecology, 2022, 129, 938-948.	1.1	14
9	First Trimester Maternal Vitamin D Status and Risks of Preterm Birth and Small-For-Gestational Age. Nutrients, 2019, 11, 3042.	1.7	11
10	Maternal and neonatal outcomes associated with induction of labor after one previous cesarean delivery: A French retrospective study. PLoS ONE, 2020, 15, e0237132.	1.1	11
11	Indications leading to termination of pregnancy between 22+0 and 31+6 weeks of gestational age in France: A population-based cohort study. European Journal of Obstetrics, Gynecology and Reproductive Biology, 2019, 233, 12-18.	0.5	9
12	Should prenatal chromosomal microarray analysis be offered for isolated fetal growth restriction? A French multicenter study. American Journal of Obstetrics and Gynecology, 2021, 225, 676.e1-676.e15.	0.7	9
13	Unisex vs sex-specific estimated fetal weight charts for fetal growth monitoring: a population-based study. American Journal of Obstetrics & Gynecology MFM, 2022, 4, 100527.	1.3	6
14	Clarification of INTERGROWTH-21st newborn birthweight standards. Lancet, The, 2018, 391, 1995-1996.	6.3	5
15	Reply: Evidence to support offering chromosomal microarray analysis for isolated fetal growth restriction. American Journal of Obstetrics and Gynecology, 2021, 225, 696-697.	0.7	3
16	World Health Organization fetal growth charts applied in a French birth cohort. Journal of Gynecology Obstetrics and Human Reproduction, 2022, 51, 102308.	0.6	3
17	Testing the assumptions of customized intrauterine growth charts using national birth studies. Acta Obstetrica Et Gynecologica Scandinavica, 2022, 101, 405-416.	1.3	1
