Stuart Wg Derbyshire

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/3720100/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Reconsidering fetal pain. Journal of Medical Ethics, 2020, 46, 3-6.	1.8	38
2	Welfare of aquatic animals: where things are, where they are going, and what it means for research, aquaculture, recreational angling, and commercial fishing. ICES Journal of Marine Science, 2019, 76, 82-92.	2.5	70
3	Stepwise increasing sequential offsets cannot be used to deliver high thermal intensities with little or no perception of pain. Journal of Neurophysiology, 2019, 122, 729-736.	1.8	0
4	Suggestions to Reduce Clinical Fibromyalgia Pain and Experimentally Induced Pain Produce Parallel Effects on Perceived Pain but Divergent Functional MRI–Based Brain Activity. Psychosomatic Medicine, 2017, 79, 189-200.	2.0	11
5	â€~Imagined guilt'vsâ€~recollected guilt': implications for fMRI. Social Cognitive and Affective Neuroscience, 2016, 11, 703-711.	3.0	18
6	The Use of Neuroimaging to Advance the Understanding of Chronic Pain. Psychosomatic Medicine, 2014, 76, 402-403.	2.0	7
7	A role for suggestion in differences in brain responses after placebo conditioning in high and low hypnotizable subjects. Pain, 2013, 154, 1487-1488.	4.2	1
8	Intrinsic variability in the human response to pain is assembled from multiple, dynamic brain processes. Neurolmage, 2013, 75, 68-78.	4.2	50
9	What Does It Mean to Call Chronic Pain a Brain Disease?. Journal of Pain, 2013, 14, 317-322.	1.4	33
10	Reply to Commentaries. Journal of Pain, 2013, 14, 336-337.	1.4	0
11	Fetal analgesia: where are we now?. Future Neurology, 2012, 7, 367-369.	0.5	0
12	Biases in children's and adults' moral judgments. Journal of Experimental Child Psychology, 2012, 113, 186-193.	1.4	21
13	Can Neural Imaging Explain Pain?. Psychiatric Clinics of North America, 2011, 34, 595-604.	1.3	4
14	Pain sensation evoked by observing injury in others. Pain, 2010, 148, 268-274.	4.2	106
15	The painful consequences of neonatal nociceptive input. Pain, 2010, 150, 220-221.	4.2	7
16	The necessity of animal models in pain research. Pain, 2010, 151, 12-17.	4.2	218
17	Foetal pain?. Best Practice and Research in Clinical Obstetrics and Gynaecology, 2010, 24, 647-655.	2.8	10
18	Fibromyalgia pain and its modulation by hypnotic and nonâ€hypnotic suggestion: An fMRI analysis. European Journal of Pain, 2009, 13, 542-550.	2.8	120

#	Article	IF	CITATIONS
19	Cold Pressor Pain Reduces Phobic Fear But Fear Does Not Reduce Pain. Journal of Pain, 2009, 10, 1058-1064.	1.4	10
20	The Ethical Dilemma of Ethical Committees. Sociology Compass, 2008, 2, 1506-1522.	2.5	5
21	Abnormal heat and pain perception in remitted heroin dependence months after detoxification from methadone-maintenance. Drug and Alcohol Dependence, 2008, 95, 237-244.	3.2	24
22	Fetal Pain: Do We Know Enough to Do the Right Thing?. Reproductive Health Matters, 2008, 16, 117-126.	1.2	23
23	Animal and Human Pain. ATLA Alternatives To Laboratory Animals, 2008, 36, 491-492.	1.0	0
24	Heightened Functional Neural Activation to Psychological Stress Covaries With Exaggerated Blood Pressure Reactivity. Hypertension, 2007, 49, 134-140.	2.7	90
25	Modeling Pain Circuits: How Imaging May Modify Perception. Neuroimaging Clinics of North America, 2007, 17, 485-493.	1.0	9
26	Modifying pain perception: is it better to be hypnotizable or feel that you are hypnotized?. Contemporary Hypnosis, 2007, 24, 143-153.	0.7	10
27	Climate change and health. Lancet, The, 2006, 367, 1976.	13.7	1
28	Attention to pain localization and unpleasantness discriminates the functions of the medial and lateral pain systems. European Journal of Neuroscience, 2005, 21, 3133-3142.	2.6	284
29	BRAIN CONTROL OF NORMAL AND OVERACTIVE BLADDER. Journal of Urology, 2005, 174, 1862-1867.	0.4	254
30	Cerebral activation during hypnotically induced and imagined pain. NeuroImage, 2004, 23, 392-401.	4.2	309
31	Structural and functional dichotomy of human midcingulate cortex. European Journal of Neuroscience, 2003, 18, 3134-3144.	2.6	418
32	Sex-related differences in IBS patients: central processing of visceral stimuli. Gastroenterology, 2003, 124, 1738-1747.	1.3	264
33	Caudal cingulate cortex involvement in pain processing: an inter-individual laser evoked potential source localisation study using realistic head models. Pain, 2003, 102, 265-271.	4.2	82
34	Brain Responses To Visceral and Somatic Stimuli in Patients With Irritable Bowel Syndrome With and Without Fibromyalgia. American Journal of Gastroenterology, 2003, 98, 1354-1361.	0.4	106
35	A systematic review of neuroimaging data during visceral stimulation. American Journal of Gastroenterology, 2003, 98, 12-20.	0.4	186
36	Visceral Afferent Pathways and Functional Brain Imaging. Scientific World Journal, The, 2003, 3, 1065-1080.	2.1	40

STUART WG DERBYSHIRE

#	Article	IF	CITATIONS
37	Gender differences in patterns of cerebral activation during equal experience of painful laser stimulation. Journal of Pain, 2002, 3, 401-411.	1.4	88
38	Cerebral Activation in Patients With Irritable Bowel Syndrome and Control Subjects During Rectosigmoid Stimulation. Psychosomatic Medicine, 2001, 63, 365-375.	2.0	291
39	Exploring the pain "neuromatrix― Current Review of Pain, 2000, 4, 467-477.	0.7	148
40	Cerebral activation in irritable bowel syndrome. Gastroenterology, 2000, 119, 1418-1419.	1.3	16
41	Cerebral responses to pain in patients suffering acute post-dental extraction pain measured by positron emission tomography (PET). European Journal of Pain, 1999, 3, 103-113.	2.8	45
42	The IASP definition captures the essence of pain experience. Pain Forum, 1999, 8, 106-109.	1.1	16
43	The ECAT ART Scanner for Positron Emission Tomography 2. Research and Clinical Applications. Molecular Imaging and Biology, 1999, 2, 17-30.	0.3	9
44	Cerebral response to pain in two depressed patients. Depression and Anxiety, 1998, 7, 87-88.	4.1	6
45	Pain and Stroop interference tasks activate separate processing modules in anterior cingulate cortex. Experimental Brain Research, 1998, 118, 52-60.	1.5	199
46	Cerebral responses to a continual tonic pain stimulus measured using positron emission tomography. Pain, 1998, 76, 127-135.	4.2	163
47	Pain processing during three levels of noxious stimulation produces differential patterns of central activity. Pain, 1997, 73, 431-445.	4.2	547
48	Sources of variation in assessing male and female responses to pain. New Ideas in Psychology, 1997, 15, 83-95.	1.9	16
49	Comment on Editorial by Anand and Craig. Pain, 1996, 67, 210-211.	4.2	19
50	Pain Processing in Four Regions of Human Cingulate Cortex Localized with Coâ€registered PET and MR Imaging. European Journal of Neuroscience, 1996, 8, 1461-1473.	2.6	366
