#	ARTICLE	IF	CITATIONS
1	Long-term effects of muscle-derived stem cell therapy on the regeneration of the urethra of female rats. <i>International Urogynecology Journal</i> , 2022, 33, 965-975.	1.4	1
2	Age and/or postmenopausal status as risk factors for pelvic organ prolapse development: systematic review with meta-analysis. <i>International Urogynecology Journal</i> , 2022, 33, 15-29.	1.4	17
3	Pelvic floor muscle function differs between supine and standing positions in women with stress urinary incontinence: an experimental crossover study. <i>Journal of Physiotherapy</i> , 2022, 68, 51-60.	1.7	3
4	Mouse Knockout Models for Pelvic Organ Prolapse: a Systematic Review. <i>International Urogynecology Journal</i> , 2022, 33, 1765-1788.	1.4	7
5	Predictors for long-term adherence to vaginal pessary in pelvic organ prolapse: a prospective study. <i>International Urogynecology Journal</i> , 2022, 33, 3237-3246.	1.4	3
6	International Urogynecological Consultation (IUC): pathophysiology of pelvic organ prolapse (POP). <i>International Urogynecology Journal</i> , 2022, 33, 1699-1710.	1.4	16
7	The rs2165241 polymorphism of the <i>Loxl1</i> gene in postmenopausal women with pelvic organ prolapse. <i>Climacteric</i> , 2022, 25, 407-412.	2.4	2
8	Telehealth in the rehabilitation of female pelvic floor dysfunction: a systematic literature review. <i>International Urogynecology Journal</i> , 2021, 32, 249-259.	1.4	37
9	Vaginal Sacrospinous Ligament Fixation Using Tissue Anchoring System Versus a Traditional Technique for Women With Apical Vaginal Prolapse: A Randomized Controlled Trial. <i>Female Pelvic Medicine and Reconstructive Surgery</i> , 2021, 27, e215-e222.	1.1	2
10	Animal models for pelvic organ prolapse: systematic review. <i>International Urogynecology Journal</i> , 2021, 32, 1331-1344.	1.4	14
11	Electrotherapy for urethral modulation: Are extracellular matrix molecules and growth factors potential targets?. <i>Neurourology and Urodynamics</i> , 2021, 40, 968-977.	1.5	1
12	Effects of voluntary pre-contraction of the pelvic floor muscles (the Knack) on female stress urinary incontinence—a study protocol for a RCT. <i>Trials</i> , 2021, 22, 484.	1.6	2
13	Is there a correlation between a 20-min pad-test and subjective urine leakage amount?. <i>International Urogynecology Journal</i> , 2021, 32, 2857-2862.	1.4	1
14	Pelvic floor muscle training for female stress urinary incontinence: a randomised control trial comparing home and outpatient training. <i>International Urogynecology Journal</i> , 2020, 31, 989-998.	1.4	24
15	The molecular effects of electrical stimulation on the muscle components of the urethra of female rats after trauma by vaginal distention. <i>Neurourology and Urodynamics</i> , 2020, 39, 576-585.	1.5	1
16	Collagen I and collagen III polymorphisms in women with pelvic organ prolapse. <i>Neurourology and Urodynamics</i> , 2020, 39, 1977-1984.	1.5	7
17	Ability to contract the pelvic floor muscles and association with muscle function in incontinent women. <i>International Urogynecology Journal</i> , 2020, 31, 2337-2344.	1.4	6
18	The role of vaginal palpation in motor learning of the pelvic floor muscles for women with stress urinary incontinence: study protocol for a randomized controlled trial. <i>Trials</i> , 2020, 21, 693.	1.6	1

#	ARTICLE	IF	CITATIONS
19	Content and functionality features of voiding diary applications for mobile devices in Brazil: a descriptive analysis. <i>International Urogynecology Journal</i> , 2020, 31, 2573-2581.	1.4	9
20	Total Versus Subtotal Hysterectomy: Systematic Review and Meta-analysis of Intraoperative Outcomes and Postoperative Short-term Events. <i>Clinical Therapeutics</i> , 2019, 41, 768-789.	2.5	15
21	Pelvic floor symptoms 5 to 14 years after total versus subtotal hysterectomy for benign conditions: a systematic review and meta-analysis. <i>International Urogynecology Journal</i> , 2019, 30, 181-191.	1.4	10
22	Molecular and histomorphological evaluation of female rats' urethral tissues after an innovative trauma model of prolonged vaginal distention: immediate, short-term and long-term effects. <i>International Urogynecology Journal</i> , 2019, 30, 465-476.	1.4	7
23	Collagen XVIII and LOXL-4 polymorphisms in women with and without advanced pelvic organ prolapse. <i>International Urogynecology Journal</i> , 2018, 29, 893-898.	1.4	7
24	Molecular and immunohistochemical analysis of the urethra of female rats after induced trauma and intravenous therapy with muscle derived stem cells. <i>Neurourology and Urodynamics</i> , 2018, 37, 2151-2159.	1.5	6
25	Randomized controlled trial comparing single-incision mini-sling and transobturator midurethral sling for the treatment of stress urinary incontinence: 3-year follow-up results. <i>Neurourology and Urodynamics</i> , 2018, 37, 2184-2190.	1.5	12
26	Outpatient biofeedback in addition to home pelvic floor muscle training for stress urinary incontinence: a randomized controlled trial. <i>Neurourology and Urodynamics</i> , 2017, 36, 2034-2043.	1.5	17
27	Hysteropreservation versus hysterectomy in the surgical treatment of uterine prolapse: systematic review and meta-analyses. <i>International Urogynecology Journal</i> , 2017, 28, 1763-1763.	1.4	4
28	Hysteropreservation versus hysterectomy in the surgical treatment of uterine prolapse: systematic review and meta-analysis. <i>International Urogynecology Journal</i> , 2017, 28, 1617-1630.	1.4	28
29	Registering a clinical trial. <i>International Urogynecology Journal</i> , 2017, 28, 803-804.	1.4	3
30	Two-year results of native tissue versus vaginal mesh repair in the treatment of anterior prolapse according to different success criteria: A randomized controlled trial. <i>Neurourology and Urodynamics</i> , 2016, 35, 509-514.	1.5	24
31	Modified Laparoscopic Uterosacral Ligament Suspension in Patients with Gynecologic Tumors and Advanced Uterovaginal Prolapse. <i>Journal of Gynecologic Surgery</i> , 2016, 32, 24-28.	0.1	1
32	Female urinary incontinence: effective treatment strategies. <i>Climacteric</i> , 2015, 18, 135-141.	2.4	17
33	Comparing operations for POP: the importance of standardization of surgical technique. <i>International Urogynecology Journal</i> , 2014, 25, 151-152.	1.4	2
34	Randomized controlled trial comparing TVT-O and TVT-S for the treatment of stress urinary incontinence: 2-year results. <i>International Urogynecology Journal</i> , 2014, 25, 1343-1348.	1.4	29
35	Neural control of lower urinary tract and targets for pharmacological therapy. <i>International Urogynecology Journal</i> , 2014, 25, 1453-1462.	1.4	8
36	The use of transvaginal synthetic mesh for anterior vaginal wall prolapse repair: a randomized controlled trial. <i>International Urogynecology Journal</i> , 2013, 24, 1899-1907.	1.4	29

#	ARTICLE	IF	CITATIONS
37	Single-incision sling compared with transobturator sling for treating stress urinary incontinence: a randomized controlled trial. <i>International Urogynecology Journal</i> , 2013, 24, 1459-1465.	1.4	26
38	Genes responsible for vaginal extracellular matrix metabolism are modulated by women's reproductive cycle and menopause. <i>International Braz J Urol: Official Journal of the Brazilian Society of Urology</i> , 2013, 39, 257-267.	1.5	37
39	Genetics of pelvic organ prolapse: reply. <i>International Urogynecology Journal</i> , 2012, 23, 511-512.	1.4	0
40	Expression of genes encoding smooth muscle contractile proteins in vaginal tissue of women with and without pelvic organ prolapse. <i>Neurourology and Urodynamics</i> , 2012, 31, 109-114.	1.5	14
41	Expression of Bone Morphogenetic Protein-1 in vaginal tissue of women with severe pelvic organ prolapse. <i>American Journal of Obstetrics and Gynecology</i> , 2011, 204, 544.e1-544.e8.	1.3	19
42	Genetics of pelvic organ prolapse: crossing the bridge between bench and bedside in urogynecologic research. <i>International Urogynecology Journal</i> , 2011, 22, 1211-1219.	1.4	25
43	Vaginal delivery and pelvic floor dysfunction: current evidence and implications for future research. <i>International Urogynecology Journal</i> , 2010, 21, 1025-1030.	1.4	43
44	LOX family enzymes expression in vaginal tissue of premenopausal women with severe pelvic organ prolapse. <i>International Urogynecology Journal</i> , 2010, 21, 1397-1404.	1.4	40
45	Influence of ovarian hormones deprivation on gene expression in the lower urinary tract of rats. <i>International Braz J Urol: Official Journal of the Brazilian Society of Urology</i> , 2007, 33, 544-553.	1.5	7
46	Effect of tibolone on cytochrome c oxidase I, beta-2-microglobulin and vascular endothelial growth factor gene expression in the lower urinary tract of castrated rats. <i>Clinical and Experimental Obstetrics and Gynecology</i> , 2006, 33, 233-7.	0.2	4
47	Compara�o entre as terminologias padronizadas por Baden e Walker e pela ICS para o prolapso p�lvico feminino. <i>Revista Brasileira De Ginecologia E Obstetricia</i> , 2004, 26, 441-447.	0.8	1
