| #  | Article                                                                                                                                                                                                                                                     | IF   | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Cinacalcet for Secondary Hyperparathyroidism in Patients Receiving Hemodialysis. New England Journal of Medicine, 2004, 350, 1516-1525.                                                                                                                     | 13.9 | 1,023     |
| 2  | Effect of Cinacalcet on Cardiovascular Disease in Patients Undergoing Dialysis. New England Journal of Medicine, 2012, 367, 2482-2494.                                                                                                                      | 13.9 | 805       |
| 3  | Executive summary of the 2017 KDIGO Chronic KidneyÂDisease–Mineral and Bone Disorder (CKD-MBD)<br>Guideline Update: what's changed and why it matters. Kidney International, 2017, 92, 26-36.                                                               | 2.6  | 698       |
| 4  | Extracorporeal albumin dialysis with the molecular adsorbent recirculating system in acute-on-chronic liver failure: The RELIEF trial. Hepatology, 2013, 57, 1153-1162.                                                                                     | 3.6  | 452       |
| 5  | Uremic toxins originating from colonic microbial metabolism. Kidney International, 2009, 76, S12-S19.                                                                                                                                                       | 2.6  | 349       |
| 6  | Free serum concentrations of the protein-bound retention solute p-cresol predict mortality in hemodialysis patients. Kidney International, 2006, 69, 1081-1087.                                                                                             | 2.6  | 340       |
| 7  | Free p-cresol is associated with cardiovascular disease in hemodialysis patients. Kidney International, 2008, 73, 1174-1180.                                                                                                                                | 2.6  | 276       |
| 8  | Natural history of parathyroid function and calcium metabolism after kidney transplantation: a single-centre study. Nephrology Dialysis Transplantation, 2004, 19, 1281-1287.                                                                               | 0.4  | 273       |
| 9  | Role of the Gut Microbiome in Uremia: A Potential Therapeutic Target. American Journal of Kidney Diseases, 2016, 67, 483-498.                                                                                                                               | 2.1  | 271       |
| 10 | p-Cresol and Cardiovascular Risk in Mild-to-Moderate Kidney Disease. Clinical Journal of the American Society of Nephrology: CJASN, 2010, 5, 1182-1189.                                                                                                     | 2.2  | 265       |
| 11 | p-Cresyl sulfate serum concentrations in haemodialysis patients are reduced by the prebiotic oligofructose-enriched inulin. Nephrology Dialysis Transplantation, 2010, 25, 219-224.                                                                         | 0.4  | 260       |
| 12 | Cinacalcet, Fibroblast Growth Factor-23, and Cardiovascular Disease in Hemodialysis. Circulation, 2015, 132, 27-39.                                                                                                                                         | 1.6  | 259       |
| 13 | Diagnosis, Evaluation, Prevention, and Treatment of Chronic Kidney Disease–Mineral and Bone<br>Disorder: Synopsis of the Kidney Disease: Improving Global Outcomes 2017 Clinical Practice Guideline<br>Update. Annals of Internal Medicine, 2018, 168, 422. | 2.0  | 228       |
| 14 | Effect of the molecular adsorbent recirculating system and Prometheus devices on systemic haemodynamics and vasoactive agents in patients with acute-on-chronic alcoholic liver failure. Critical Care, 2006, 10, R108.                                     | 2.5  | 221       |
| 15 | The Uremic Retention Solute p-Cresyl Sulfate and Markers of Endothelial Damage. American Journal of Kidney Diseases, 2009, 54, 891-901.                                                                                                                     | 2.1  | 219       |
| 16 | Mycophenolate mofetil in IgA nephropathy: Results of a 3-year prospective placebo-controlled randomized study. Kidney International, 2004, 65, 1842-1849.                                                                                                   | 2.6  | 206       |
| 17 | The gut-kidney axis: indoxyl sulfate, p-cresyl sulfate and CKD progression. Nephrology Dialysis<br>Transplantation, 2011, 26, 759-761.                                                                                                                      | 0.4  | 203       |
| 18 | Influence of dietary protein supplements on the formation of bacterial metabolites in the colon Gut, 1997, 41, 70-76.                                                                                                                                       | 6.1  | 200       |

| #  | Article                                                                                                                                                                                                                         | IF   | Citations |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 19 | The gut–kidney axis. Pediatric Nephrology, 2017, 32, 2005-2014.                                                                                                                                                                 | 0.9  | 188       |
| 20 | Intrarenal Resistive Index after Renal Transplantation. New England Journal of Medicine, 2013, 369, 1797-1806.                                                                                                                  | 13.9 | 185       |
| 21 | Removal of middle molecules and protein-bound solutes by peritoneal dialysis and relation with uremic symptoms. Kidney International, 2003, 64, 2238-2243.                                                                      | 2.6  | 178       |
| 22 | Gas Chromatographic–Mass Spectrometric Analysis for Measurement of p-Cresol and Its Conjugated Metabolites in Uremic and Normal Serum. Clinical Chemistry, 2005, 51, 1535-1538.                                                 | 1.5  | 172       |
| 23 | Clinical efficacy and toxicity profile of tacrolimus and mycophenolic acid in relation to combined long-term pharmacokinetics in de novo renal allograft recipients. Clinical Pharmacology and Therapeutics, 2004, 75, 434-447. | 2.3  | 157       |
| 24 | Adjuvant Low-Dose Cidofovir Therapy for BK Polyomavirus Interstitial Nephritis in Renal Transplant Recipients. American Journal of Transplantation, 2005, 5, 1997-2004.                                                         | 2.6  | 157       |
| 25 | Removal of the protein-bound solute p-cresol by convective transport: A randomized crossover study. American Journal of Kidney Diseases, 2004, 44, 278-285.                                                                     | 2.1  | 155       |
| 26 | Microbiota-Derived Phenylacetylglutamine Associates with Overall Mortality and Cardiovascular Disease in Patients with CKD. Journal of the American Society of Nephrology: JASN, 2016, 27, 3479-3487.                           | 3.0  | 144       |
| 27 | Tertiary ?Hyperphosphatoninism? Accentuates Hypophosphatemia and Suppresses Calcitriol Levels in Renal Transplant Recipients. American Journal of Transplantation, 2007, 7, 1193-1200.                                          | 2.6  | 143       |
| 28 | Sclerostin: Another Vascular Calcification Inhibitor?. Journal of Clinical Endocrinology and Metabolism, 2013, 98, 3221-3228.                                                                                                   | 1.8  | 143       |
| 29 | Erosive enterocolitis in mycophenolate mofetil-treated renal-transplant recipients with persistent afebrile diarrhea. Transplantation, 2003, 75, 665-672.                                                                       | 0.5  | 142       |
| 30 | p-Cresyl Sulfate and Indoxyl Sulfate in Hemodialysis Patients. Clinical Journal of the American Society of Nephrology: CJASN, 2009, 4, 1932-1938.                                                                               | 2.2  | 142       |
| 31 | Influenza Vaccination Is Efficacious and Safe in Renal Transplant Recipients. American Journal of Transplantation, 2008, 8, 332-337.                                                                                            | 2.6  | 139       |
| 32 | POSTTRANSPLANTATION DIABETES MELLITUS IN FK-506-TREATED RENAL TRANSPLANT RECIPIENTS: ANALYSIS OF INCIDENCE AND RISK FACTORS. Transplantation, 2001, 72, 1655-1661.                                                              | 0.5  | 128       |
| 33 | Recovery of Hyperphosphatoninism and Renal Phosphorus Wasting One Year after Successful Renal<br>Transplantation. Clinical Journal of the American Society of Nephrology: CJASN, 2008, 3, 1829-1836.                            | 2.2  | 124       |
| 34 | The Histology of Kidney Transplant Failure. Transplantation, 2014, 98, 427-435.                                                                                                                                                 | 0.5  | 124       |
| 35 | Impact of parathyroidectomy on renal graft function, blood pressure and serum lipids in kidney transplant recipients: a single centre study. Nephrology Dialysis Transplantation, 2005, 20, 1714-1720.                          | 0.4  | 123       |
| 36 | Parathyroid hormone metabolism and signaling in health and chronic kidney disease. Kidney International, 2016, 90, 1184-1190.                                                                                                   | 2.6  | 123       |

| #  | Article                                                                                                                                                                                                                                                                                     | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Sclerostin and DKK1: new players in renal bone and vascular disease. Kidney International, 2015, 88, 235-240.                                                                                                                                                                               | 2.6 | 118       |
| 38 | Digestibility of Cooked and Raw Egg Protein in Humans as Assessed by Stable Isotope Techniques. Journal of Nutrition, 1998, 128, 1716-1722.                                                                                                                                                 | 1.3 | 116       |
| 39 | High levels of circulating sclerostin are associated with better cardiovascular survival in incident dialysis patients: results from the NECOSAD study. Nephrology Dialysis Transplantation, 2015, 30, 288-293.                                                                             | 0.4 | 111       |
| 40 | Genetic and clinical factors influence the baseline permeability of the peritoneal membrane. Kidney International, 2005, 67, 2477-2487.                                                                                                                                                     | 2.6 | 108       |
| 41 | Evidence for impaired assimilation of protein in chronic renal failure. Kidney International, 2003, 64, 2196-2203.                                                                                                                                                                          | 2.6 | 107       |
| 42 | Protective Effect of Parvalbumin on Excitotoxic Motor Neuron Death. Experimental Neurology, 2002, 174, 150-161.                                                                                                                                                                             | 2.0 | 106       |
| 43 | Effects of a wheat bran extract containing arabinoxylan oligosaccharides on gastrointestinal health parameters in healthy adult human volunteers: a double-blind, randomised, placebo-controlled, cross-over trial. British Journal of Nutrition, 2012, 108, 2229-2242.                     | 1.2 | 106       |
| 44 | The soluble urokinase receptor is not a clinical marker for focal segmental glomerulosclerosis.
