## Petri Gudmundsson

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/3766371/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Visually estimated left ventricular ejection fraction by echocardiography is closely correlated with formal quantitative methods. International Journal of Cardiology, 2005, 101, 209-212.	1.7	180
2	Assessing left ventricular systolic function in shock: evaluation of echocardiographic parameters in intensive care. Critical Care, 2011, 15, R200.	5.8	84
3	Visually estimated ejection fraction by two dimensional and triplane echocardiography is closely correlated with quantitative ejection fraction by real-time three dimensional echocardiography. Cardiovascular Ultrasound, 2009, 7, 41.	1.6	69
4	Mitral annular plane systolic excursion (MAPSE) in shock: a valuable echocardiographic parameter in intensive care patients. Cardiovascular Ultrasound, 2013, 11, 16.	1.6	55
5	Prognostication and risk stratification by assessment of left atrioventricular plane displacement in patients with myocardial infarction. International Journal of Cardiology, 2002, 83, 35-41.	1.7	39
6	Myocardial structure and function by echocardiography in relation to glucometabolic status in elderly subjects from 2 population-based cohorts: A cross-sectional study. American Heart Journal, 2010, 159, 414-420.e4.	2.7	37
7	Ex vivo electric power generation in human blood using an enzymatic fuel cell in a vein replica. RSC Advances, 2016, 6, 70215-70220.	3.6	29
8	Erectile dysfunction in healthy subjects predicts reduced coronary flow velocity reserve. International Journal of Cardiology, 2006, 112, 166-170.	1.7	24
9	Left atrioventricular plane displacement predicts cardiac mortality in patients with chronic atrial fibrillation. International Journal of Cardiology, 2003, 91, 1-7.	1.7	20
10	Feasibility of noninvasive transthoracic echocardiography/doppler measurement of coronary flow reserve in left anterior descending coronary artery in patients with acute coronary syndrome: a new technique tested in clinical practice. Journal of the American Society of Echocardiography, 2003, 16, 464-468.	2.8	17
11	Effects of cardiac resynchronization therapy on coronary blood flow: Evaluation by transthoracic Doppler echocardiographyâ~†. European Journal of Heart Failure, 2008, 10, 514-520.	7.1	17
12	Three-dimensional echocardiography using single-heartbeat modality decreases variability in measuring left ventricular volumes and function in comparison to four-beat technique in atrial fibrillation. Cardiovascular Ultrasound, 2010, 8, 45.	1.6	17
13	Real-time perfusion adenosine stress echocardiography in the coronary care unit: a feasible bedside tool for predicting coronary artery stenosis in patients with acute coronary syndrome. European Journal of Echocardiography, 2005, 6, 31-40.	2.3	13
14	High-sensitive cardiac Troponin T is superior to echocardiography in predicting 1-year mortality in patients with SIRS and shock in intensive care. BMC Anesthesiology, 2012, 12, 25.	1.8	13
15	Segmentation of B-mode cardiac ultrasound data by Bayesian Probability Maps. Medical Image Analysis, 2014, 18, 1184-1199.	11.6	13
16	Coronary flow velocity reserve reduction is comparable in patients with erectile dysfunction and in patients with impaired fasting glucose or well-regulated diabetes mellitus. European Journal of Cardiovascular Prevention and Rehabilitation, 2007, 14, 258-264.	2.8	10
17	A genetic variant of the atrial natriuretic peptide gene is associated with left ventricular hypertrophy in a non-diabetic population – the Malmö preventive project study. BMC Medical Genetics, 2013, 14, 64.	2.1	9
18	Echocardiographic assessment of left atrioventricular plane displacement as a complement to left ventricular regional wall motion evaluation in the detection of myocardial dysfunction. International Journal of Cardiovascular Imaging, 2002, 18, 181-186.	0.6	8

Petri Gudmundsson

#	Article	IF	CITATIONS
19	Real-time perfusion adenosine stress echocardiography versus myocardial perfusion adenosine scintigraphy for the detection of myocardial ischaemia in patients with stable coronary artery disease. Clinical Physiology and Functional Imaging, 2006, 26, 32-38.	1.2	7
20	Flow-volume loops derived from three-dimensional echocardiography: a novel approach to the assessment of left ventricular hemodynamics. Cardiovascular Ultrasound, 2008, 6, 13.	1.6	4
21	Quantitative detection of myocardial ischaemia by stress echocardiography; a comparison with SPECT. Cardiovascular Ultrasound, 2009, 7, 28.	1.6	4
22	Myocardial performance index in female athletes. Cardiovascular Ultrasound, 2017, 15, 20.	1.6	4
23	Learning echocardiography- what are the challenges and what may favour learning? A qualitative study. BMC Medical Education, 2019, 19, 212.	2.4	4
24	Evaluation of Cardiac Ultrasound Data by Bayesian Probability Maps. Lecture Notes in Computer Science, 2009, , 1073-1084.	1.3	4
25	Correlation of the M-mode atrioventricular plane early diastolic downward slope and systolic parameters. International Journal of Cardiovascular Imaging, 2004, 20, 101-106.	1.5	3
26	Head to head comparisons of two modalities of perfusion adenosine stress echocardiography with simultaneous SPECT. Cardiovascular Ultrasound, 2009, 7, 19.	1.6	3
27	Translation and validation of the Swedish version of the IPECC-SET 9 item version. Journal of Interprofessional Care, 2022, 36, 900-907.	1.7	3
28	Convex spatio-temporal segmentation of the endocardium in ultrasound data using distribution and shape priors. , 2011, , .		1
