#	ARTICLE	IF	CITATIONS
1	Efficient static analysis and verification of featured transition systems. Empirical Software Engineering, 2022, 27, .	3.0	7
2	Formal methods: practical applications and foundations. Formal Methods in System Design, 2022, 58, 1-4.	0.9	0
3	Formal methods and tools for industrial critical systems. International Journal on Software Tools for Technology Transfer, 2022, 24, 325-330.	1.7	6
4	Exploring the ERTMS/ETCS full moving block specification: an experience with formal methods. International Journal on Software Tools for Technology Transfer, 2022, 24, 351-370.	1.7	8
5	Contract Automata Library. Science of Computer Programming, 2022, 221, 102841.	1.5	7
6	Formal methods: practical applications and foundations. Formal Methods in System Design, 2021, 58, 1-4.	0.9	0
7	Static analysis and family-based model checking with VMC. , 2021, , .		2
8	Static analysis and family-based model checking of featured transition systems with VMC. , 2021, , .		1
9	Quantitative Security Risk Modeling and Analysis with RisQFLan. Computers and Security, 2021, 109, 102381.	4.0	8
10	Spatial Model Checking for Smart Stations. Lecture Notes in Computer Science, 2021, , 39-47.	1.0	0
11	Featured Team Automata. Lecture Notes in Computer Science, 2021, , 483-502.	1.0	5
12	A Framework for Quantitative Modeling and Analysis of Highly (Re)configurable Systems. IEEE Transactions on Software Engineering, 2020, 46, 321-345.	4.3	31
13	Timed service contract automata. Innovations in Systems and Software Engineering, 2020, 16, 199-214.	1.6	8
14	Controller synthesis of service contracts with variability. Science of Computer Programming, 2020, 187, 102344.	1.5	14
15	Family-Based SPL Model Checking Using Parity Games with Variability. Lecture Notes in Computer Science, 2020, , 245-265.	1.0	7
16	Strategy Synthesis for Autonomous Driving in a Moving Block Railway System with Uppaal Stratego. Lecture Notes in Computer Science, 2020, , 3-21.	1.0	16
17	The 2020 Expert Survey on Formal Methods. Lecture Notes in Computer Science, 2020, , 3-69.	1.0	35
18	30 Years of Simulation-Based Quantitative Analysis Tools: A Comparison Experiment Between MÃ¶bius and Uppaal SMC. Lecture Notes in Computer Science, 2020, , 368-384.	1.0	4

#	ARTICLE	IF	CITATIONS
19	Designing a Demonstrator of Formal Methods for Railways Infrastructure Managers. Lecture Notes in Computer Science, 2020, , 467-485.	1.0	9
20	Comparing formal tools for system design. , 2020, , .		20
21	Variability meets security. , 2020, , .		0
22	Team Automata@Work: On Safe Communication. Lecture Notes in Computer Science, 2020, , 77-85.	1.0	1
23	X-by-Construction. Lecture Notes in Computer Science, 2020, , 211-215.	1.0	2
24	Compositionality of Safe Communication in Systems of Team Automata. Lecture Notes in Computer Science, 2020, , 200-220.	1.0	4
25	Textual Variability Modeling Languages. , 2019, , .		18
26	Quantitative Variability Modeling and Analysis. , 2019, , .		7
27	Static Analysis of Featured Transition Systems. , 2019, , .		11
28	Quantitative variability modelling and analysis. International Journal on Software Tools for Technology Transfer, 2019, 21, 607-612.	1.7	2
29	Survey on Formal Methods and Tools in Railways: The ASTRail Approach. Lecture Notes in Computer Science, 2019, , 226-241.	1.0	21
30	On the expressiveness of modal transition systems with variability constraints. Science of Computer Programming, 2019, 169, 1-17.	1.5	15
31	Modelling and Analysing ERTMS L3 Moving Block Railway Signalling with Simulink and Uppaal SMC. Lecture Notes in Computer Science, 2019, , 1-21.	1.0	22
32	Adopting Formal Methods in an Industrial Setting: The Railways Case. Lecture Notes in Computer Science, 2019, , 762-772.	1.0	24
33	Summary of: On the Expressiveness of Modal Transition Systems with Variability Constraints. Lecture Notes in Computer Science, 2019, , 542-546.	1.0	0
34	From the Archives of the Formal Methods and Tools Lab. Lecture Notes in Computer Science, 2019, , 219-235.	1.0	1
35	States and Events in KandISTI. Lecture Notes in Computer Science, 2019, , 110-128.	1.0	3
36	The Legacy of Stefania Gnesi. Lecture Notes in Computer Science, 2019, , 1-11.	1.0	1

#	ARTICLE	IF	CITATIONS
37	Guest Editorial for the Special Issue on FORmal methods for the quantitative Evaluation of Collective Adaptive SysTems (FORECAST). ACM Transactions on Modeling and Computer Simulation, 2018, 28, 1-4.	0.6	2
38	Modelling and analysis with featured modal contract automata. , 2018, , .		8
39	Statistical Model Checking of a Moving Block Railway Signalling Scenario with Uppaal SMC. Lecture Notes in Computer Science, 2018, , 372-391.	1.0	19
40	Product line models of large cyber-physical systems. , 2018, , .		7
41	Formal methods and automated verification of critical systems. International Journal on Software Tools for Technology Transfer, 2018, 20, 355-358.	1.7	5
42	Formal methods for transport systems. International Journal on Software Tools for Technology Transfer, 2018, 20, 237-241.	1.7	19
43	On the Industrial Uptake of Formal Methods in the Railway Domain. Lecture Notes in Computer Science, 2018, , 20-29.	1.0	38
44	Orchestration Synthesis for Real-Time Service Contracts. Lecture Notes in Computer Science, 2018, , 31-47.	1.0	3
45	Replicated Computations Results (RCR) Report for "Design and Verification of Trusted Collective Adaptive Systems" ACM Transactions on Modeling and Computer Simulation, 2018, 28, 1-3.	0.6	9
46	X-by-Construction. Lecture Notes in Computer Science, 2018, , 359-364.	1.0	6
47	Family-Based Model Checking with mCRL2. Lecture Notes in Computer Science, 2017, , 387-405.	1.0	26
48	Orchestration of Dynamic Service Product Lines with Featured Modal Contract Automata. , 2017, , .		12
49	Communication Requirements for Team Automata. Lecture Notes in Computer Science, 2017, , 256-277.	1.0	10
50	Supervisory Controller Synthesis for Product Lines Using CIF ³ . Lecture Notes in Computer Science, 2016, , 856-873.	1.0	21
51	Statistical Model Checking for Product Lines. Lecture Notes in Computer Science, 2016, , 114-133.	1.0	16
52	Automated verification of programs and Web systems. Journal of Logical and Algebraic Methods in Programming, 2016, 85, 653-654.	0.4	1
53	Correctness-by-Construction and Post-hoc Verification: Friends or Foes?. Lecture Notes in Computer Science, 2016, , 723-729.	1.0	5
54	Modelling and analysing variability in product families: Model checking of modal transition systems with variability constraints. Journal of Logical and Algebraic Methods in Programming, 2016, 85, 287-315.	0.4	69

#	ARTICLE	IF	CITATIONS
55	Conditions for Compatibility of Components. Lecture Notes in Computer Science, 2016, , 784-805.	1.0	7
56	Variability-Based Design of Services for Smart Transportation Systems. Lecture Notes in Computer Science, 2016, , 465-481.	1.0	3
57	Using FMC for family-based analysis of software product lines. , 2015, , .		9
58	Towards Automatic Decision Support for Bike-Sharing System Design. Lecture Notes in Computer Science, 2015, , 266-280.	1.0	12
59	Applying the product lines paradigm to the quantitative analysis of collective adaptive systems. , 2015, , .		5
60	Statistical analysis of probabilistic models of software product lines with quantitative constraints. , 2015, , .		27
61	From EU Projects to a Family of Model Checkers. Lecture Notes in Computer Science, 2015, , 312-328.	1.0	14
62	From Featured Transition Systems to Modal Transition Systems with Variability Constraints. Lecture Notes in Computer Science, 2015, , 344-359.	1.0	8
63	Model Checking Value-Passing Modal Specifications. Lecture Notes in Computer Science, 2015, , 304-319.	1.0	3
64	VMC. , 2014, , .		12
65	Using mCRL2 for the analysis of software product lines. , 2014, , .		23
66	Software product line analysis with mCRL2. , 2014, , .		4
67	Formal Methods and Analyses in Software Product Line Engineering. Lecture Notes in Computer Science, 2014, , 253-256.	1.0	2
68	Challenges in Modelling and Analyzing Quantitative Aspects of Bike-Sharing Systems. Lecture Notes in Computer Science, 2014, , 351-367.	1.0	7
69	Validating reconfigurations of reo circuits in an e-Banking scenario. , 2013, , .		0
70	Combining declarative and procedural views in the specification and analysis of product families. , 2013, , .		23
71	Formal methods and analysis in software product line engineering. , 2013, , .		1
72	Demonstration of a model checker for the analysis of product variability. , 2012, , .		7

#	ARTICLE	IF	CITATIONS
73	VMC: A Tool for Product Variability Analysis. Lecture Notes in Computer Science, 2012, , 450-454.	1.0	30
74	Formal methods and analysis in software product line engineering. , 2012, , .		1
75	Vector team automata. Theoretical Computer Science, 2012, 429, 21-29.	0.5	3
76	Assume-Guarantee Testing of Evolving Software Product Line Architectures. Lecture Notes in Computer Science, 2012, , 91-105.	1.0	1
77	A Compositional Framework to Derive Product Line Behavioural Descriptions. Lecture Notes in Computer Science, 2012, , 146-161.	1.0	11
78	A state/event-based model-checking approach for the analysis of abstract system properties. Science of Computer Programming, 2011, 76, 119-135.	1.5	70
79	Design and validation of variability in product lines. , 2011, , .		9
80	Formal Description of Variability in Product Families. , 2011, , .		69
81	Variability and Rigour in Service Computing Engineering. , 2011, , .		0
82	A Model-Checking Tool for Families of Services. Lecture Notes in Computer Science, 2011, , 44-58.	1.0	18
83	Sensoria Results Applied to the Case Studies. Lecture Notes in Computer Science, 2011, , 655-677.	1.0	2
84	Analysing Robot Movement Using the Sensoria Methods. Lecture Notes in Computer Science, 2011, , 678-697.	1.0	1
85	Guaranteeing Correct Evolution of Software Product Lines: Setting Up the Problem. Lecture Notes in Computer Science, 2011, , 100-105.	1.0	2
86	A Logical Framework to Deal with Variability. Lecture Notes in Computer Science, 2010, , 43-58.	1.0	29
87	Dynamic Software Architecture Development: Towards an Automated Process. , 2009, , .		2
88	A formal approach supporting the comparative predictive assessment of the interruption-tolerance of interactive systems. , 2009, , .		10
89	Associativity of Infinite Synchronized Shuffles and Team Automata. Fundamenta Informaticae, 2009, 91, 437-461.	0.3	1
90	CMC-UMC. , 2009, , .		17

#	ARTICLE	IF	CITATIONS
91	Assisting the design of a groupware system. The Journal of Logic and Algebraic Programming, 2009, 78, 191-232.	1.4	2
92	Resilience of Interaction Techniques to Interrupts: A Formal Model-Based Approach. Lecture Notes in Computer Science, 2009, , 494-509.	1.0	11
93	A Calculus for Team Automata. Electronic Notes in Theoretical Computer Science, 2008, 195, 41-55.	0.9	3
94	Formal verification of an automotive scenario in service-oriented computing. , 2008, , .		21
95	An Action/State-Based Model-Checking Approach for the Analysis of Communication Protocols for Service-Oriented Applications. Lecture Notes in Computer Science, 2008, , 133-148.	1.0	30
96	ON COMPETENCE IN CD GRAMMAR SYSTEMS WITH PARALLEL REWRITING. International Journal of Foundations of Computer Science, 2007, 18, 1425-1439.	0.8	9
97	Web Service Composition Approaches: From Industrial Standards to Formal Methods. , 2007, , .		93
98	Towards Security Analyses of an Identity Federation Protocol for Web Services in Convergent Networks. , 2007, , .		1
99	Infinite unfair shuffles and associativity. Theoretical Computer Science, 2007, 380, 401-410.	0.5	5
100	Formal Modelling and Verification of an Asynchronous Extension of SOAP. , 2006, , .		7
101	Towards Model Checking Stochastic Aspects of the thinkteam User Interface. Lecture Notes in Computer Science, 2006, , 39-50.	1.0	5
102	Model Checking Publish/Subscribe Notification for thinkteamÂ®. Electronic Notes in Theoretical Computer Science, 2005, 133, 275-294.	0.9	9
103	Team Automata for Security. Electronic Notes in Theoretical Computer Science, 2005, 128, 105-119.	0.9	8
104	Synchronized shuffles. Theoretical Computer Science, 2005, 341, 263-275.	0.5	8
105	Modularity for teams of I/O automata. Information Processing Letters, 2005, 95, 487-495.	0.4	7
106	A case study on the automated verification of groupware protocols. , 2005, , .		7
107	Teams of pushdown automata. International Journal of Computer Mathematics, 2004, 81, 141-156.	1.0	1
108	On Competence in CD Grammar Systems. Lecture Notes in Computer Science, 2004, , 76-88.	1.0	8

#	ARTICLE	IF	CITATIONS
109	Teams of Pushdown Automata. Lecture Notes in Computer Science, 2004, , 329-337.	1.0	0
110	Synchronizations in Team Automata for Groupware Systems. Computer Supported Cooperative Work, 2003, 12, 21-69.	1.9	54
111	Team Automata Satisfying Compositionality. Lecture Notes in Computer Science, 2003, , 381-400.	1.0	13
112	Team Automata for Spatial Access Control. , 2001, , 59-77.		6
113	Coherent branching feature bisimulation. Electronic Proceedings in Theoretical Computer Science, EPTCS, 0, 182, 14-30.	0.8	7
114	Quantitative Analysis of Probabilistic Models of Software Product Lines with Statistical Model Checking. Electronic Proceedings in Theoretical Computer Science, EPTCS, 0, 182, 56-70.	0.8	10
115	Towards a Feature mu-Calculus Targeting SPL Verification. Electronic Proceedings in Theoretical Computer Science, EPTCS, 0, 206, 61-75.	0.8	6
116	Product Lines for Service Oriented Applications - PL for SOA. Electronic Proceedings in Theoretical Computer Science, EPTCS, 0, 61, 34-48.	0.8	3
