#	ARTICLE	IF	CITATIONS
1	Toward a comprehensive evaluation of the impact of electronic aids to daily living: evaluation of consumer satisfaction. <i>Disability and Rehabilitation</i> , 2002, 24, 115-125.	0.9	61
2	The Impact of Adaptive Seating Devices on the Lives of Young Children With Cerebral Palsy and Their Families. <i>Archives of Physical Medicine and Rehabilitation</i> , 2009, 90, 27-33.	0.5	47
3	Impact of Electronic Aids to Daily Living on the Lives of Persons With Cervical Spinal Cord Injuries. <i>Assistive Technology</i> , 2005, 17, 89-97.	1.2	44
4	Effect of Adaptive Seating Devices on the Activity Performance of Children With Cerebral Palsy. <i>Archives of Physical Medicine and Rehabilitation</i> , 2009, 90, 1389-1395.	0.5	41
5	An overview of systematic reviews of adaptive seating interventions for children with cerebral palsy: where do we go from here?. <i>Disability and Rehabilitation: Assistive Technology</i> , 2012, 7, 104-111.	1.3	31
6	Measuring Participation for Children and Youth With Power Mobility Needs: A Systematic Review of Potential Health Measurement Tools. <i>Archives of Physical Medicine and Rehabilitation</i> , 2016, 97, 462-477.e40.	0.5	26
7	Family Impact of Assistive Technology Scale: Development of a Measurement Scale for Parents of Children with Complex Communication Needs. <i>AAC: Augmentative and Alternative Communication</i> , 2012, 28, 171-180.	0.8	25
8	Application of quality function deployment in rehabilitation engineering. <i>IEEE Transactions on Rehabilitation Engineering: A Publication of the IEEE Engineering in Medicine and Biology Society</i> , 1994, 2, 158-164.	1.4	23
9	Electronic aids to daily living and quality of life for persons with tetraplegia. <i>Disability and Rehabilitation: Assistive Technology</i> , 2011, 6, 260-267.	1.3	23
10	Development of the new Family Impact of Assistive Technology Scale. <i>International Journal of Rehabilitation Research</i> , 2006, 29, 195-200.	0.7	20
11	Reliability of the Family Impact of Assistive Technology Scale for Families of Young Children With Cerebral Palsy. <i>Archives of Physical Medicine and Rehabilitation</i> , 2007, 88, 1436-1440.	0.5	19
12	Functional Outcomes Associated With Adaptive Seating Interventions in Children and Youth With Wheeled Mobility Needs. <i>Archives of Physical Medicine and Rehabilitation</i> , 2014, 95, 825-831.	0.5	15
13	Important elements of measuring participation for children who need or use power mobility: a modified Delphi survey. <i>Developmental Medicine and Child Neurology</i> , 2015, 57, 556-563.	1.1	14
14	Randomised controlled trial comparing two school furniture configurations in the printing performance of young children with cerebral palsy. <i>Australian Occupational Therapy Journal</i> , 2010, 57, 239-245.	0.6	12
15	Lessons learned from studying the functional impact of adaptive seating interventions for children with cerebral palsy. <i>Developmental Medicine and Child Neurology</i> , 2016, 58, 78-82.	1.1	10
16	Towards Advancing Knowledge Translation of AAC Outcomes Research for Children and Youth with Complex Communication Needs. <i>AAC: Augmentative and Alternative Communication</i> , 2015, 31, 137-147.	0.8	9
17	Responsiveness of a parent-reported outcome measure to evaluate AAC interventions for children and youth with complex communication needs. <i>AAC: Augmentative and Alternative Communication</i> , 2018, 34, 348-358.	0.8	8
18	Community-Based Performance of a Pelvic Stabilization Device for Children With Spasticity. <i>Assistive Technology</i> , 2005, 17, 37-46.	1.2	7

#	ARTICLE	IF	CITATIONS
19	Evaluation of a parent-report diary of the home use of assistive devices by young children with cerebral palsy. <i>Disability and Rehabilitation: Assistive Technology</i> , 2009, 4, 189-197.	1.3	7
20	Measurement of the product attitudes of youth during the selection of assistive technology devices. <i>Disability and Rehabilitation: Assistive Technology</i> , 2013, 8, 21-29.	1.3	6
21	Construct validity of the family impact of assistive technology scale for augmentative and alternative communication. <i>AAC: Augmentative and Alternative Communication</i> , 2018, 34, 335-347.	0.8	6
22	Ethics in Pharmacologic Research in the Child with a Disability. <i>Paediatric Drugs</i> , 2015, 17, 61-68.	1.3	5
23	Exploring suitable participation tools for children who need or use power mobility: A modified Delphi survey. <i>Developmental Neurorehabilitation</i> , 2016, 19, 365-379.	0.5	5
24	Exploring the functional impact of adaptive seating on the lives of individual children and their families: a collective case study. <i>Disability and Rehabilitation: Assistive Technology</i> , 2017, 12, 450-456.	1.3	5
25	Virtual community centre for power wheelchair training: Experience of children and clinicians. <i>Disability and Rehabilitation: Assistive Technology</i> , 2019, 14, 46-55.	1.3	5
26	The Turkish version of the Family Impact of Assistive Technology Scale: A validity and reliability study. <i>Scandinavian Journal of Occupational Therapy</i> , 2012, 19, 515-520.	1.1	4
27	Rater reliability of the adapted scoring criteria of the Minnesota Handwriting Assessment for children with cerebral palsy. <i>Australian Occupational Therapy Journal</i> , 2009, 56, 403-408.	0.6	3
28	Injury risk compensation in children with disabilities: could assistive technology devices have a dark side?. <i>Disability and Rehabilitation: Assistive Technology</i> , 2010, 5, 199-208.	1.3	3
29	Development of a new virtual environment for a power wheelchair simulator: A user-centered approach. , 2013, , .		3
30	PAeDS-MoRe: A framework for the development and review of research assent protocols involving children and adolescents. <i>Research Ethics</i> , 2015, 11, 15-38.	0.8	3
31	Measurement of Assistive Technology Outcomes Associated with Computer-Based Writing Interventions for Children and Youth with Disabilities. <i>Technologies</i> , 2017, 5, 19.	3.0	3
32	Toward greater involvement of youth with complex communication needs in the selection of augmentative and alternative communication devices. <i>Disability and Rehabilitation: Assistive Technology</i> , 2020, 15, 92-100.	1.3	3
33	Translation and preliminary validation of the Italian version of the Family Impact of Assistive Technology Scale for Augmentative and Alternative communication (FIATS-AAC.it). <i>Technology and Disability</i> , 2020, 32, 129-135.	0.3	3
34	Evaluation of the multidimensional effects of adaptive seating interventions for young children with non-ambulatory cerebral palsy. <i>Disability and Rehabilitation: Assistive Technology</i> , 2021, 16, 780-788.	1.3	3
35	Toward Development of Effective Custom Child Restraint Systems in Motor Vehicles. <i>Assistive Technology</i> , 2007, 19, 239-248.	1.2	2
36	Functional impact of augmentative and alternative communication scale: development of an outcome measure for educators of students with complex communication needs. <i>Disability and Rehabilitation: Assistive Technology</i> , 2020, , 1-12.	1.3	2
