

# Edith L Taleisnik

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/3822827/edith-l-taleisnik-publications-by-citations.pdf>

**Version:** 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

36  
papers

#	Paper	IF	Citations
36	Reactive oxygen species in the elongation zone of maize leaves are necessary for leaf extension. <i>Plant Physiology</i> , <b>2002</b> , 129, 1627-32	6.6	209
35	Salt tolerant tomato plants show increased levels of jasmonic acid. <i>Plant Growth Regulation</i> , <b>2003</b> , 41, 149-158	3.2	151
34	Drought Induces Distinct Growth Response, Protection, and Recovery Mechanisms in the Maize Leaf Growth Zone. <i>Plant Physiology</i> , <b>2015</b> , 169, 1382-96	6.6	116
33	Oxidative stress indicators as selection tools for salt tolerance. <i>Plant Breeding</i> , <b>2000</b> , 119, 341-345	2.4	56
32	Water Retention Capacity in Root Segments Differing in the Degree of Exodermis Development. <i>Annals of Botany</i> , <b>1999</b> , 83, 19-27	4.1	46
31	Decreased reactive oxygen species concentration in the elongation zone contributes to the reduction in maize leaf growth under salinity. <i>Journal of Experimental Botany</i> , <b>2004</b> , 55, 1383-90	7	44
30	Ion balance in tomato cultivars differing in salt tolerance. I. Sodium and potassium accumulation and fluxes under moderate salinity. <i>Physiologia Plantarum</i> , <b>1994</b> , 92, 528-534	4.6	44
29	Leaf expansion in grasses under salt stress. <i>Journal of Plant Physiology</i> , <b>2009</b> , 166, 1123-40	3.6	42
28	Salt Glands in the Poaceae Family and Their Relationship to Salinity Tolerance. <i>Botanical Review, The</i> , <b>2015</b> , 81, 162-178	3.8	41
27	Effects of salinity on germination and seedling growth of <i>Prosopis flexuosa</i> (D.C.). <i>Forest Ecology and Management</i> , <b>1994</b> , 63, 347-357	3.9	39
26	Salinity-induced decrease in NADPH oxidase activity in the maize leaf blade elongation zone. <i>Journal of Plant Physiology</i> , <b>2007</b> , 164, 223-30	3.6	34
25	Why are <i>Chloris gayana</i> leaves shorter in salt-affected plants? Analyses in the elongation zone. <i>Journal of Experimental Botany</i> , <b>2006</b> , 57, 3945-52	7	30
24	Changes in water relation parameters under osmotic and salt stresses in maize and sorghum. <i>Physiologia Plantarum</i> , <b>1993</b> , 89, 381-387	4.6	26
23	Reductions in maize root-tip elongation by salt and osmotic stress do not correlate with apoplastic O <sub>2</sub> <sup>-</sup> levels. <i>Annals of Botany</i> , <b>2008</b> , 102, 551-9	4.1	25
22	Salinity effects on growth and carbon balance in <i>Lycopersicon esculentum</i> and <i>L. pennellii</i> . <i>Physiologia Plantarum</i> , <b>1987</b> , 71, 213-218	4.6	25
21	Salt Glands in <i>Pappophorum</i> (Poaceae). <i>Annals of Botany</i> , <b>1988</b> , 62, 383-388	4.1	24
20	Carbon Metabolism Alterations in Sunflower Plants Infected with the Sunflower Chlorotic Mottle Virus. <i>Journal of Phytopathology</i> , <b>2003</b> , 151, 267-273	1.8	23

19	Tomato root peroxidase isoenzymes: kinetic studies of the coniferyl alcohol peroxidase activity, immunological properties and role in response to salt stress. <i>Journal of Plant Physiology</i> , <b>2001</b> , 158, 1007-1013	2.6	22
18	Sunflower Chlorotic Mottle Virus in Compatible Interactions with Sunflower: ROS Generation and Antioxidant Response. <i>European Journal of Plant Pathology</i> , <b>2005</b> , 113, 223-232	2.1	21
17	Changes in water relation parameters under osmotic and salt stresses in maize and sorghum. <i>Physiologia Plantarum</i> , <b>1993</b> , 89, 381-387	4.6	20
16	Are Sunflower chlorotic mottle virus infection symptoms modulated by early increases in leaf sugar concentration?. <i>Journal of Plant Physiology</i> , <b>2010</b> , 167, 1137-44	3.6	18
15	Tipburn in salt-affected lettuce ( <i>Lactuca sativa</i> L.) plants results from local oxidative stress. <i>Journal of Plant Physiology</i> , <b>2012</b> , 169, 285-93	3.6	12
14	Determination of reactive oxygen species in salt-stressed plant tissues. <i>Methods in Molecular Biology</i> , <b>2012</b> , 913, 225-36	1.4	10
13	Elongation growth in leaf blades of <i>Chloris gayana</i> under saline conditions. <i>Journal of Plant Physiology</i> , <b>2003</b> , 160, 517-22	3.6	10
12	Early responses to Fe-deficiency distinguish <i>Sorghum bicolor</i> genotypes with contrasting alkalinity tolerance. <i>Environmental and Experimental Botany</i> , <b>2018</b> , 155, 165-176	5.9	10
11	Genetic variability for responses to short- and long-term salt stress in vegetative sunflower plants. <i>Journal of Plant Nutrition and Soil Science</i> , <b>2012</b> , 175, 882-890	2.3	7
10	Sodium Accumulation in <i>Pappophorum</i> I. Uptake, Transport and Recirculation. <i>Annals of Botany</i> , <b>1989</b> , 63, 221-228	4.1	6
9	Field hydroponics assessment of salt tolerance in <i>Cenchrus ciliaris</i> (L.): growth, yield, and maternal effect. <i>Crop and Pasture Science</i> , <b>2013</b> , 64, 631	2.2	5
8	Tissue printing for peroxidases associated with lignification. <i>Biotechnic and Histochemistry</i> , <b>1996</b> , 71, 258-62	1.8	3
7	Differential response of <i>Trichloris</i> ecotypes from different habitats to drought and salt stress. <i>Theoretical and Experimental Plant Physiology</i> , <b>2020</b> , 32, 213-229	2.4	3
6	Effect of watertable depth and salinity on growth dynamics of Rhodes grass ( <i>Chloris gayana</i> ). <i>Crop and Pasture Science</i> , <b>2016</b> , 67, 881	2.2	3
5	Effects of Amiloride on Sodium Accumulation in Intact <i>Lycopersicon esculentum</i> Plants. <i>Journal of Plant Physiology</i> , <b>1991</b> , 138, 634-639	3.6	1
4	Salt tolerance in Argentine wheatgrass is related to shoot sodium exclusion. <i>Crop Science</i> , <b>2020</b> , 60, 2437-2451	0	0
3	Plant Tolerance Mechanisms to Soil Salinity Contribute to the Expansion of Agriculture and Livestock Production in Argentina <b>2021</b> , 381-397		0
2	Tilting the scale towards Plant Science in Argentina. <i>Theoretical and Experimental Plant Physiology</i> , <b>2015</b> , 27, 1-5	2.4	

- 1 Soil Salinization and Sodification as Conditioners of Vegetation and Crops: Physiological Aspects of Plant Response to These Conditions. *Springer Earth System Sciences*, **2021**, 43-54 0.3
