citing authors

#	ARTICLE	IF	CITATIONS
1	Spatiotemporal evolutionary analysis of rainfall erosivity during 1901–2017 in Beijing, China. <i>Environmental Science and Pollution Research</i> , 2022, 29, 2510-2522.	2.7	4
2	Quantification of impacts between 1.5 and 4°C of global warming on flooding risks in six countries. <i>Climatic Change</i> , 2022, 170, 1.	1.7	18
3	Adaptation and application of the large LAERTES-EU regional climate model ensemble for modeling hydrological extremes: a pilot study for the Rhine basin. <i>Natural Hazards and Earth System Sciences</i> , 2022, 22, 677-692.	1.5	5
4	Assessing the economic impacts of future fluvial flooding in six countries under climate change and socio-economic development. <i>Climatic Change</i> , 2021, 166, 1.	1.7	11
5	Statistical downscaling to project extreme hourly precipitation over the United Kingdom. <i>International Journal of Climatology</i> , 2020, 40, 1805-1823.	1.5	13
6	"We can't do it on our own!" Integrating stakeholder and scientific knowledge of future flood risk to inform climate change adaptation planning in a coastal region. <i>Environmental Science and Policy</i> , 2020, 103, 50-57.	2.4	41
7	An integrated 1D–2D hydraulic modelling approach to assess the sensitivity of a coastal region to compound flooding hazard under climate change. <i>Natural Hazards</i> , 2019, 98, 915-937.	1.6	69
8	Impacts of climate change on TN load and its control in a River Basin with complex pollution sources. <i>Science of the Total Environment</i> , 2018, 615, 1155-1163.	3.9	34
9	Assessment of the Spatial and Temporal Variations of Water Quality for Agricultural Lands with Crop Rotation in China by Using a HYPE Model. <i>International Journal of Environmental Research and Public Health</i> , 2016, 13, 336.	1.2	16
10	Modelling the impacts of agricultural management practices on river water quality in Eastern England. <i>Journal of Environmental Management</i> , 2016, 180, 147-163.	3.8	69
11	Spatiotemporal patterns and source attribution of nitrogen load in a river basin with complex pollution sources. <i>Water Research</i> , 2016, 94, 187-199.	5.3	95
12	Comparison of daily and sub-daily SWAT models for daily streamflow simulation in the Upper Huai River Basin of China. <i>Stochastic Environmental Research and Risk Assessment</i> , 2016, 30, 959-972.	1.9	45
13	Analysis of the spatio-temporal patterns of dry and wet conditions in the Huai River Basin using the standardized precipitation index. <i>Atmospheric Research</i> , 2015, 166, 120-128.	1.8	78
14	Evaluation of ECMWF medium-range ensemble forecasts of precipitation for river basins. <i>Quarterly Journal of the Royal Meteorological Society</i> , 2014, 140, 1615-1628.	1.0	30
15	Modelling climate impact on floods with ensemble climate projections. <i>Quarterly Journal of the Royal Meteorological Society</i> , 2013, 139, 282-297.	1.0	92
16	Assessment of a 1-hour gridded precipitation dataset to drive a hydrological model: a case study of the summer 2007 floods in the Upper Severn, UK. <i>Hydrology Research</i> , 2013, 44, 89-105.	1.1	28
17	Conditioning model output statistics of regional climate model precipitation on circulation patterns. <i>Nonlinear Processes in Geophysics</i> , 2012, 19, 623-633.	0.6	61
18	A review of regionalisation for continuous streamflow simulation. <i>Hydrology and Earth System Sciences</i> , 2011, 15, 3539-3553.	1.9	162

#	ARTICLE	IF	CITATIONS
19	A catchment classification scheme using local variance reduction method. Journal of Hydrology, 2011, 411, 140-154.	2.3	22
20	Tracking the uncertainty in flood alerts driven by grand ensemble weather predictions. Meteorological Applications, 2009, 16, 91-101.	0.9	109
21	Comparison of conceptual model performance using different representations of spatial variability. Journal of Hydrology, 2008, 356, 106-118.	2.3	104
