

Elena Labarta

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3855552/elena-labarta-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

41
papers

1,698
citations

#	Paper	IF	Citations
41	Identifying and optimizing human endometrial gene expression signatures for endometrial dating. <i>Human Reproduction</i> , 2021 ,	5.7	3
40	What Do We Know about Classical and Non-Classical Progesterone Receptors in the Human Female Reproductive Tract? A Review. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	3
39	New concepts and difficulties with progesterone supplementation in the luteal phase. <i>Current Opinion in Obstetrics and Gynecology</i> , 2021 , 33, 196-201	2.4	1
38	Elevated serum progesterone does not impact euploidy rates in PGT-A patients. <i>Journal of Assisted Reproduction and Genetics</i> , 2021 , 38, 1819-1826	3.4	0
37	Serum Progesterone Profile Across the Mid and Late Luteal Phase in Artificial Cycles Is Associated With Pregnancy Outcome. <i>Frontiers in Endocrinology</i> , 2021 , 12, 665717	5.7	3
36	Impact of low serum progesterone levels on the day of embryo transfer on pregnancy outcome: a prospective cohort study in artificial cycles with vaginal progesterone. <i>Human Reproduction</i> , 2021 , 36, 683-692	5.7	23
35	Mitochondrial enrichment in infertile patients: a review of different mitochondrial replacement therapies. <i>Therapeutic Advances in Reproductive Health</i> , 2021 , 15, 26334941211023544	1.8	5
34	Serum luteal phase progesterone in women undergoing frozen embryo transfer in assisted conception: a systematic review and meta-analysis. <i>Fertility and Sterility</i> , 2021 , 116, 1534-1556	4.8	3
33	Analysis of serum and endometrial progesterone in determining endometrial receptivity. <i>Human Reproduction</i> , 2021 , 36, 2861-2870	5.7	2
32	Individualized luteal phase support normalizes live birth rate in women with low progesterone levels on the day of embryo transfer in artificial endometrial preparation cycles. <i>Fertility and Sterility</i> , 2021 ,	4.8	3
31	Does Coenzyme Q10 Supplementation Improve Human Oocyte Quality?. <i>International Journal of Molecular Sciences</i> , 2021 , 22,	6.3	1
30	A 5-year multicentre randomized controlled trial comparing personalized, frozen and fresh blastocyst transfer in IVF. <i>Reproductive BioMedicine Online</i> , 2020 , 41, 402-415	4	49
29	Relationship between serum progesterone (P) levels and pregnancy outcome: lessons from artificial cycles when using vaginal natural micronized progesterone. <i>Journal of Assisted Reproduction and Genetics</i> , 2020 , 37, 2047-2048	3.4	4
28	Progesterone use in assisted reproductive technology. <i>Best Practice and Research in Clinical Obstetrics and Gynaecology</i> , 2020 , 69, 74-84	4.6	6
27	Serum progesterone levels on day of embryo transfer in frozen embryo transfer cycles-the truth lies in the detail. <i>Journal of Assisted Reproduction and Genetics</i> , 2020 , 37, 2045-2046	3.4	3
26	Clinical Application of Antioxidants to Improve Human Oocyte Mitochondrial Function: A Review. <i>Antioxidants</i> , 2020 , 9,	7.1	20
25	Mitochondria as a tool for oocyte rejuvenation. <i>Fertility and Sterility</i> , 2019 , 111, 219-226	4.8	42

24	Autologous mitochondrial transfer as a complementary technique to intracytoplasmic sperm injection to improve embryo quality in patients undergoing in vitro fertilization-a randomized pilot study. <i>Fertility and Sterility</i> , 2019 , 111, 86-96	4.8	44
23	Premature progesterone elevation: targets and rescue strategies. <i>Fertility and Sterility</i> , 2018 , 109, 577-583	4.8	29
22	Conventional versus minimal ovarian stimulation: an intra-patient comparison of ovarian response in poor-responder women according to Bologna Criteria. <i>Reproductive BioMedicine Online</i> , 2018 , 37, 434-441	4.4	9
21	Low serum progesterone on the day of embryo transfer is associated with a diminished ongoing pregnancy rate in oocyte donation cycles after artificial endometrial preparation: a prospective study. <i>Human Reproduction</i> , 2017 , 32, 2437-2442	5.7	88
20	Does cumulative live birth plateau beyond a certain ovarian response?. <i>Fertility and Sterility</i> , 2017 , 108, 943	4.8	6
19	A Higher Ovarian Response after Stimulation for IVF Is Related to a Higher Number of Euploid Embryos. <i>BioMed Research International</i> , 2017 , 2017, 5637923	3	20
18	Regimen of ovarian stimulation affects oocyte and therefore embryo quality. <i>Fertility and Sterility</i> , 2016 , 105, 560-570	4.8	52
17	Day-3 embryo metabolomics in the spent culture media is altered in obese women undergoing in vitro fertilization. <i>Fertility and Sterility</i> , 2015 , 103, 1407-15.e1	4.8	31
16	Genetics of primary ovarian insufficiency: a review. <i>Journal of Assisted Reproduction and Genetics</i> , 2014 , 31, 1573-85	3.4	58
15	Impact of ovarian stimulation with gonadotrophins on embryo aneuploidy. <i>Human Reproduction Update</i> , 2014 , 20, 964	15.8	5
14	The follicular hormonal profile in low-responder patients undergoing unstimulated cycles: Is it hypoandrogenic?. <i>Human Reproduction</i> , 2013 , 28, 224-9	5.7	24
13	Preimplantation genetic screening using fluorescence in situ hybridization in patients with repetitive implantation failure and advanced maternal age: two randomized trials. <i>Fertility and Sterility</i> , 2013 , 99, 1400-7	4.8	121
12	Moderate ovarian stimulation does not increase the incidence of human embryo chromosomal abnormalities in in vitro fertilization cycles. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2012 , 97, E1987-94	5.6	54
11	Hormonal and molecular characterization of follicular fluid, cumulus cells and oocytes from pre-ovulatory follicles in stimulated and unstimulated cycles. <i>Human Reproduction</i> , 2012 , 27, 1596-605	5.7	36
10	Endometrial receptivity is affected in women with high circulating progesterone levels at the end of the follicular phase: a functional genomics analysis. <i>Human Reproduction</i> , 2011 , 26, 1813-25	5.7	229
9	Impact of luteinizing hormone administration on gonadotropin-releasing hormone antagonist cycles: an age-adjusted analysis. <i>Fertility and Sterility</i> , 2011 , 95, 1031-6	4.8	91
8	Endometrial gene expression in the window of implantation is altered in obese women especially in association with polycystic ovary syndrome. <i>Fertility and Sterility</i> , 2011 , 95, 2335-41, 2341.e1-8	4.8	101
7	SELECTED ORAL COMMUNICATION SESSION, SESSION 18: OVARIAN STIMULATION, Monday 4 July 2011 15:15 - 16:30. <i>Human Reproduction</i> , 2011 , 26, i26-i28	5.7	2

6	Reply: Premature progesterone rise and gene expression. <i>Human Reproduction</i> , 2011 , 26, 2914-2914	5.7	
5	Circulating progesterone levels and ongoing pregnancy rates in controlled ovarian stimulation cycles for in vitro fertilization: analysis of over 4000 cycles. <i>Human Reproduction</i> , 2010 , 25, 2092-100	5.7	35 ⁸
4	Prospective cohort study in high responder oocyte donors using two hormonal stimulation protocols: impact on embryo aneuploidy and development. <i>Human Reproduction</i> , 2010 , 25, 2290-7	5.7	57
3	GnRH agonist administration at the time of implantation does not improve pregnancy outcome in intrauterine insemination cycles: a randomized controlled trial. <i>Fertility and Sterility</i> , 2010 , 94, 1065-71	4.8	8
2	Highly purified hMG versus recombinant FSH in ovarian hyperstimulation with GnRH antagonists--a randomized study. <i>Human Reproduction</i> , 2008 , 23, 2346-51	5.7	75
1	Early pregnancy loss in women stimulated with gonadotropin-releasing hormone antagonist protocols according to oral contraceptive pill pretreatment. <i>Fertility and Sterility</i> , 2007 , 87, 1098-101	4.8	19
