#	ARTICLE	IF	CITATIONS
1	The AMPA receptor antagonist perampanel suppresses epileptic activity in human focal cortical dysplasia. <i>Epilepsia Open</i> , 2021, , .	1.3	4
2	Human brain slices for epilepsy research: Pitfalls, solutions and future challenges. <i>Journal of Neuroscience Methods</i> , 2016, 260, 221-232.	1.3	50
3	A Low Mortality, High Morbidity Reduced Intensity Status Epilepticus (RISE) Model of Epilepsy and Epileptogenesis in the Rat. <i>PLoS ONE</i> , 2016, 11, e0147265.	1.1	23
4	Embracing change. , 2016, , 7-7.		0
5	Differential Effects of D-Cycloserine and ACBC at NMDA Receptors in the Rat Entorhinal Cortex Are Related to Efficacy at the Co-Agonist Binding Site. <i>PLoS ONE</i> , 2015, 10, e0133548.	1.1	10
6	Cortical oscillatory dynamics and benzodiazepine-site modulation of tonic inhibition in fast spiking interneurons. <i>Neuropharmacology</i> , 2015, 95, 192-205.	2.0	24
7	Astroglial d-serine is the endogenous co-agonist at the presynaptic NMDA receptor in rat entorhinal cortex. <i>Neuropharmacology</i> , 2014, 83, 118-127.	2.0	8
8	Ethosuximide modifies network excitability in the rat entorhinal cortex via an increase in GABA release. <i>Neuropharmacology</i> , 2012, 62, 807-814.	2.0	11
9	Pre- and post-synaptic functions of kainate receptors at glutamate and GABA synapses in the rat entorhinal cortex. <i>Hippocampus</i> , 2012, 22, 555-576.	0.9	14
10	On the role of the baseline firing rate in determining the responsiveness of cingulate cortical neurons to iontophoretically applied substance P and acetylcholine. <i>Journal of Pharmacy and Pharmacology</i> , 2011, 36, 623-625.	1.2	9
11	Diverse antiepileptic drugs increase the ratio of background synaptic inhibition to excitation and decrease neuronal excitability in neurones of the rat entorhinal cortex in vitro. <i>Neuroscience</i> , 2010, 167, 456-474.	1.1	24
12	The pilocarpine model of temporal lobe epilepsy. <i>Journal of Neuroscience Methods</i> , 2008, 172, 143-157.	1.3	834
13	Mobility of NMDA autoreceptors but not postsynaptic receptors at glutamate synapses in the rat entorhinal cortex. <i>Journal of Physiology</i> , 2008, 586, 4905-4924.	1.3	18
14	The Role of NMDA Receptor Subtypes in Short-Term Plasticity in the Rat Entorhinal Cortex. <i>Neural Plasticity</i> , 2008, 2008, 1-13.	1.0	15
15	Neuronal Plasticity in the Entorhinal Cortex. <i>Neural Plasticity</i> , 2008, 2008, 1-2.	1.0	5
16	Simultaneous estimation of global background synaptic inhibition and excitation from membrane potential fluctuations in layer III neurons of the rat entorhinal cortex in vitro. <i>Neuroscience</i> , 2007, 147, 884-892.	1.1	11
17	Differential control of two forms of glutamate release by group III metabotropic glutamate receptors at rat entorhinal synapses. <i>Neuroscience</i> , 2007, 148, 7-21.	1.1	14
18	Felbamate but not phenytoin or gabapentin reduces glutamate release by blocking presynaptic NMDA receptors in the entorhinal cortex. <i>Epilepsy Research</i> , 2007, 77, 157-164.	0.8	18

#	ARTICLE	IF	CITATIONS
19	Depression of Glutamate and GABA Release by Presynaptic GABA _B Receptors in the Entorhinal Cortex in Normal and Chronically Epileptic Rats. <i>NeuroSignals</i> , 2006, 15, 202-215.	0.5	31
20	Tonic Facilitation of Glutamate Release by Presynaptic NR2B-Containing NMDA Receptors Is Increased in the Entorhinal Cortex of Chronically Epileptic Rats. <i>Journal of Neuroscience</i> , 2006, 26, 406-410.	1.7	98
21	Neuronal metabolism governs cortical network response state. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2006, 103, 5597-5601.	3.3	165
22	SYMPOSIUM REPORT. Background synaptic activity in rat entorhinal cortical neurones: differential control of transmitter release by presynaptic receptors. <i>Journal of Physiology</i> , 2005, 562, 107-120.	1.3	28
23	Fundamental differences in spontaneous synaptic inhibition between deep and superficial layers of the rat entorhinal cortex. <i>Hippocampus</i> , 2005, 15, 232-245.	0.9	31
24	Dual effects of gabapentin and pregabalin on glutamate release at rat entorhinal synapses in vitro. <i>European Journal of Neuroscience</i> , 2004, 20, 1566-1576.	1.2	129
25	Lamina-specific differences in GABAB autoreceptor-mediated regulation of spontaneous GABA release in rat entorhinal cortex. <i>Neuropharmacology</i> , 2004, 46, 31-42.	2.0	18
26	Neurokinin-1 receptors in the rat nucleus tractus solitarius: pre- and postsynaptic modulation of glutamate and GABA release. <i>Neuroscience</i> , 2004, 127, 467-479.	1.1	41
27	Valproate modifies spontaneous excitation and inhibition at cortical synapses in vitro. <i>Neuropharmacology</i> , 2003, 45, 907-917.	2.0	46
28	Activation of neurokinin-1 receptors promotes GABA release at synapses in the rat entorhinal cortex. <i>Neuroscience</i> , 2002, 115, 575-586.	1.1	33
29	Neurokinin-receptor-mediated depolarization of cortical neurons elicits an increase in glutamate release at excitatory synapses. <i>European Journal of Neuroscience</i> , 2002, 16, 1896-1906.	1.2	40
30	Activation of presynaptic group III metabotropic glutamate receptors depresses spontaneous inhibition in layer V of the rat entorhinal cortex. <i>Neuroscience</i> , 2001, 105, 71-78.	1.1	17
31	Differential Actions of PKA and PKC in the Regulation of Glutamate Release by Group III mGluRs in the Entorhinal Cortex. <i>Journal of Neurophysiology</i> , 2001, 85, 571-579.	0.9	38
32	NR2B-Containing NMDA Autoreceptors at Synapses on Entorhinal Cortical Neurons. <i>Journal of Neurophysiology</i> , 2001, 86, 1644-1651.	0.9	124
33	Activation of Presynaptic Group III Metabotropic Receptors Enhances Glutamate Release in Rat Entorhinal Cortex. <i>Journal of Neurophysiology</i> , 2000, 83, 2519-2525.	0.9	39
34	Laminar differences in recurrent excitatory transmission in the rat entorhinal cortex in vitro. <i>Neuroscience</i> , 2000, 99, 413-422.	1.1	139
35	The anticonvulsant, lamotrigine decreases spontaneous glutamate release but increases spontaneous GABA release in the rat entorhinal cortex in vitro. <i>Neuropharmacology</i> , 2000, 39, 2139-2146.	2.0	154
36	Tachykinins may modify spontaneous epileptiform activity in the rat entorhinal cortex in vitro by activating GABAergic inhibition. <i>Neuroscience</i> , 1998, 83, 1047-1062.	1.1	27

#	ARTICLE	IF	CITATIONS
37	Electrophysiological characterisation of tachykinin receptors in the rat nucleus of the solitary tract and dorsal motor nucleus of the vagus in vitro. <i>British Journal of Pharmacology</i> , 1997, 122, 1151-1159.	2.7	41
38	Tonic facilitation of glutamate release by presynaptic N-methyl-d-aspartate autoreceptors in the entorhinal cortex. <i>Neuroscience</i> , 1996, 75, 339-344.	1.1	241
39	A comparison of spontaneous EPSCs in layer II and layer IV-V neurons of the rat entorhinal cortex in vitro. <i>Journal of Neurophysiology</i> , 1996, 76, 1089-1100.	0.9	51
40	The direct perforant path input to CA1: Excitatory or inhibitory?. <i>Hippocampus</i> , 1995, 5, 101-103.	0.9	33
41	Frequency-dependent alterations in synaptic transmission in entorhinal-hippocampal pathways. <i>Hippocampus</i> , 1995, 5, 125-128.	0.9	23
42	Synaptic and intrinsic properties of neurons of origin of the perforant path in layer II of the rat entorhinal cortex in vitro. <i>Hippocampus</i> , 1994, 4, 335-353.	0.9	91
43	Interactions of Dopamine with Glutamate- and GABA-mediated Synaptic Transmission in the Rat Entorhinal Cortex In Vitro. <i>European Journal of Neuroscience</i> , 1993, 5, 760-767.	1.2	74
44	Entorhinal-hippocampal connections: a speculative view of their function. <i>Trends in Neurosciences</i> , 1993, 16, 58-64.	4.2	243
45	Basket-like interneurons in layer II of the entorhinal cortex exhibit a powerful NMDA-mediated synaptic excitation. <i>Neuroscience Letters</i> , 1993, 149, 35-39.	1.0	163
46	A reevaluation of excitatory amino acid-mediated synaptic transmission in rat dentate gyrus. <i>Journal of Neurophysiology</i> , 1990, 64, 119-132.	0.9	84
47	Synchronous discharges in the rat entorhinal cortex in vitro: Site of initiation and the role of excitatory amino acid receptors. <i>Neuroscience</i> , 1990, 34, 657-670.	1.1	105
48	Activation of receptors contributes to the EPSP at perforant path synapses in the rat dentate gyrus in vitro. <i>Neuroscience Letters</i> , 1989, 97, 323-328.	1.0	51
49	Spontaneous activity mediated by NMDA receptors in immature rat entorhinal cortex in vitro. <i>Neuroscience Letters</i> , 1989, 104, 93-98.	1.0	24
50	Epileptiform events induced by GABA-antagonists in entorhinal cortical cells in vitro are partly mediated by N-methyl-d-aspartate receptors. <i>Brain Research</i> , 1988, 457, 113-121.	1.1	63
51	Verapamil blocks the afterhyperpolarization but not the spike frequency accommodation of rat CA1 pyramidal cells in vitro. <i>Brain Research</i> , 1988, 462, 367-371.	1.1	16
52	Complex synaptic responses of entorhinal cortical cells in the rat to subicular stimulation in vitro: demonstration of an NMDA receptor-mediated component. <i>Neuroscience Letters</i> , 1987, 81, 209-214.	1.0	50
53	Epileptiform activity induced by lowering extracellular [Mg ²⁺] in combined hippocampal-entorhinal cortex slices: Modulation by receptors for norepinephrine and N-methyl-d-aspartate. <i>Epilepsy Research</i> , 1987, 1, 53-62.	0.8	247
54	Abolition of the orthodromically evoked IPSP of CA1 pyramidal cells before the EPSP during washout of calcium from hippocampal slices. <i>Experimental Brain Research</i> , 1987, 65, 676-80.	0.7	52

#	ARTICLE	IF	CITATIONS
55	Glutamate-induced activation of rat locus coeruleus increases CA1 pyramidal cell excitability. <i>Neuroscience Letters</i> , 1986, 65, 11-16.	1.0	19
56	Epileptiform activity in combined slices of the hippocampus, subiculum and entorhinal cortex during perfusion with low magnesium medium. <i>Neuroscience Letters</i> , 1986, 69, 156-161.	1.0	334
57	Does pipelicolic acid interact with the central GABA-ergic system?. <i>Journal of Neural Transmission</i> , 1986, 67, 175-189.	1.4	25
58	The specific protective effect of diazepam and valproate against isoniazid-induced seizures is not correlated with increased GABA levels. <i>Journal of Neural Transmission</i> , 1985, 63, 169-189.	1.4	24
59	Reduced activity of locus coeruleus neurons in hypertensive rats. <i>Neuroscience Letters</i> , 1985, 61, 25-29.	1.0	35
60	The sensitivity of hippocampal pyramidal neurons to serotonin in vitro: Effect of prolonged treatment with clorgyline or clomipramine. <i>Journal of Neural Transmission</i> , 1984, 60, 265-271.	1.4	21
61	An increase in sensitivity of rat cingulate cortical neurones to substance P occurs following withdrawal of chronic administration of antidepressant drugs. <i>British Journal of Pharmacology</i> , 1984, 81, 659-664.	2.7	25
62	Activation of the noradrenergic projection from locus coeruleus reduces the excitatory responses of anterior cingulate cortical neurones to substance P. <i>Neuroscience</i> , 1984, 13, 819-825.	1.1	27
63	Multiple changes in the sensitivity of cingulate cortical neurones to putative neurotransmitters in ageing rats: Substance P, acetylcholine and noradrenaline. <i>Neuroscience Letters</i> , 1984, 50, 31-36.	1.0	35
64	Monoaminergic modulation of the sensitivity of neurones in the cingulate cortex to iontophoretically applied substance P. <i>Brain Research</i> , 1984, 311, 297-305.	1.1	31
65	Trace Amine-Peptide Interactions.II. Phenylethylamine and Enkephalin, P-Tyramine and Enkephalin. , 1984, , 327-331.		1
66	Changes in Levels of Dopamine and Tyramine in the Rat Caudate Nucleus Following Alterations of Impulse Flow in the Nigrostriatal Pathway. <i>Journal of Neurochemistry</i> , 1983, 40, 396-401.	2.1	21
67	The locus coeruleus: actions of psychoactive drugs. <i>Experientia</i> , 1983, 39, 242-249.	1.2	80
68	Trace biogenic amines: a possible functional role in the CNS. <i>Trends in Pharmacological Sciences</i> , 1983, 4, 426-429.	4.0	25
69	Altered sensitivity of forebrain neurones to iontophoretically applied noradrenaline in aging rats. <i>Neurobiology of Aging</i> , 1983, 4, 97-99.	1.5	37
70	Dopamine agonist-induced restoration of drinking in response to hypertonic saline in adipsic dopamine denervated rats. <i>Brain Research Bulletin</i> , 1982, 8, 375-379.	1.4	19
71	A structure-activity profile of substance P and some of its fragments on supraspinal neurones in the rat. <i>Neuroscience Letters</i> , 1982, 33, 67-71.	1.0	26
72	Tryptamine modifies cortical neurone responses evoked by stimulation of nucleus raphe medianus. <i>Brain Research Bulletin</i> , 1982, 8, 435-437.	1.4	19

#	ARTICLE	IF	CITATIONS
73	Excitatory effects of ACTH on noradrenergic neurons of the locus coeruleus in the rat. <i>Brain Research</i> , 1982, 251, 177-179.	1.1	40
74	Responses of cortical neurones to stimulation of the nucleus raphae medianus: A pharmacological analysis of the role of indoleamines. <i>Neuropharmacology</i> , 1982, 21, 511-520.	2.0	78
75	Further studies on the role of indoleamines in the responses of cortical neurones to stimulation of nucleus raphe medianus: Effects of indoleamine precursor loading. <i>Neuropharmacology</i> , 1982, 21, 1273-1277.	2.0	19
76	A comparison of the responses of cortical neurones to iontophoretically applied tryptamine and 5-hydroxytryptamine in the rat. <i>Neuropharmacology</i> , 1982, 21, 209-214.	2.0	46
77	In vivo PHARMACOLOGICAL STUDIES ON THE INTERACTIONS BETWEEN TRYPTAMINE AND 5-HYDROXYTRYPTAMINE. <i>British Journal of Pharmacology</i> , 1981, 73, 485-493.	2.7	40
78	Specific enhancement of neuronal responses to catecholamine by p-tyramine. <i>Journal of Neuroscience Research</i> , 1981, 6, 49-61.	1.3	21
79	The Effect of Mesencephalic Lesions on Tyramine and Dopamine in the Caudate Nucleus of the Rat. <i>Journal of Neurochemistry</i> , 1981, 36, 1898-1903.	2.1	36
80	Enhancement of 5-Hydroxytryptamine-induced behavioral effects following chronic administration of antidepressant drugs. <i>Psychopharmacology</i> , 1980, 69, 307-311.	1.5	38
81	Interactions between p-tyramine, m-tyramine, or Î²-phenylethylamine and dopamine on single neurones in the cortex and caudate nucleus of the rat. <i>Canadian Journal of Physiology and Pharmacology</i> , 1980, 58, 222-227.	0.7	89
82	Long-term administration of atropine, imipramine, and viloxazine alters responsiveness of rat cortical neurones to acetylcholine. <i>Canadian Journal of Physiology and Pharmacology</i> , 1980, 58, 531-535.	0.7	15
83	Tryptamine and 5-hydroxytryptamine: Actions and interactions on cortical neurones in the rat. <i>Life Sciences</i> , 1980, 27, 1849-1856.	2.0	68
84	POTENTIATION OF RESPONSES TO MONOAMINES BY ANTIDEPRESSANTS AFTER DESTRUCTION OF MONOAMINE AFFERENTS. <i>British Journal of Pharmacology</i> , 1979, 65, 501-510.	2.7	16
