

Grkan Yildirim

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3873673/gurkan-yildirim-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

45
papers

#	Paper	IF	Citations
45	Properties of geopolymer sourced from construction and demolition waste: A review. <i>Journal of Building Engineering</i> , 2022 , 104104	5.2	15
44	Shear behaviour of reinforced construction and demolition waste-based geopolymer concrete beams. <i>Journal of Building Engineering</i> , 2022 , 47, 103861	5.2	1
43	Role of inclusion size distribution of titanium dioxide on the nitrogen oxides reduction capability and microstructural characteristics of cementitious systems. <i>Construction and Building Materials</i> , 2022 , 318, 125992	6.7	0
42	Rheological properties and compressive strength of construction and demolition waste-based geopolymer mortars for 3D-Printing. <i>Construction and Building Materials</i> , 2022 , 328, 127114	6.7	2
41	Development of alkali-activated binders from recycled mixed masonry-originated waste. <i>Journal of Building Engineering</i> , 2021 , 33, 101690	5.2	10
40	Influence of mixing methods on the NOx reduction capability and electrical properties of photocatalytic cementitious systems. <i>Cement and Concrete Composites</i> , 2021 , 115, 103840	8.6	4
39	Autogenous Self-healing Assessment of 1-Year-Old Cementitious Composites. <i>RILEM Bookseries</i> , 2021 , 39-48	0.5	
38	Construction and demolition waste-based geopolymers suited for use in 3-dimensional additive manufacturing. <i>Cement and Concrete Composites</i> , 2021 , 121, 104088	8.6	13
37	Experimental investigations on the structural behaviour of reinforced geopolymer beams produced from recycled construction materials. <i>Journal of Building Engineering</i> , 2021 , 41, 102776	5.2	3
36	The effect of chemical- versus microbial-induced calcium carbonate mineralization on the enhancement of fine recycled concrete aggregate: A comparative study. <i>Journal of Building Engineering</i> , 2021 , 103316	5.2	1
35	Self-monitoring of flexural fatigue damage in large-scale steel-reinforced cementitious composite beams. <i>Cement and Concrete Composites</i> , 2021 , 123, 104183	8.6	2
34	Demountable connections of reinforced concrete structures: Review and future developments. <i>Structures</i> , 2021 , 34, 3028-3039	3.4	2
33	Determination of Autogenous Self-healing Capability of Cementitious Composites Through Non-destructive Testing. <i>RILEM Bookseries</i> , 2021 , 25-38	0.5	
32	Multifunctional smart nanoconcretes 2020 , 419-445		
31	Self-sensing capability of Engineered Cementitious Composites: Effects of aging and loading conditions. <i>Construction and Building Materials</i> , 2020 , 231, 117132	6.7	47
30	Performance of engineered cementitious composites under drop-weight impact: Effect of different mixture parameters. <i>Structural Concrete</i> , 2020 , 21, 1051-1070	2.6	10
29	Nano-tailored multi-functional cementitious composites. <i>Composites Part B: Engineering</i> , 2020 , 182, 107670		41

28	Effects of Mixture Design Parameters on the Mechanical Behavior of High-Performance Fiber-Reinforced Concretes. <i>Journal of Materials in Civil Engineering</i> , 2020 , 32, 04020368	3	4
27	Impact behaviour of nanomodified deflection-hardening fibre-reinforced concretes. <i>Magazine of Concrete Research</i> , 2020 , 72, 865-887	2	15
26	Development of gravitational search algorithm model for predicting packing density of cementitious pastes. <i>Journal of Building Engineering</i> , 2020 , 27, 100946	5.2	6
25	Impact resistance of deflection-hardening fiber reinforced concretes with different mixture parameters. <i>Structural Concrete</i> , 2019 , 20, 1036-1050	2.6	25
24	Dimensional stability of deflection-hardening hybrid fiber reinforced concretes with coarse aggregate: Suppressing restrained shrinkage cracking. <i>Structural Concrete</i> , 2019 , 20, 836-850	2.6	24
23	Self-healing performance of aged cementitious composites. <i>Cement and Concrete Composites</i> , 2018 , 87, 172-186	8.6	81
22	Self-Sensing Behavior Under Monotonic and Cyclic Loadings of ECC Containing Electrically Conductive Carbon-Based Materials. <i>Lecture Notes in Civil Engineering</i> , 2018 , 566-576	0.3	1
21	Piezoresistive behavior of CF- and CNT-based reinforced concrete beams subjected to static flexural loading: Shear failure investigation. <i>Construction and Building Materials</i> , 2018 , 168, 266-279	6.7	70
20	Assessment of self-sensing capability of Engineered Cementitious Composites within the elastic and plastic ranges of cyclic flexural loading. <i>Construction and Building Materials</i> , 2017 , 145, 1-10	6.7	72
19	Comparison of shear behaviour of engineered cementitious composite and normal concrete beams with different shear span lengths. <i>Magazine of Concrete Research</i> , 2016 , 68, 217-228	2	24
18	Electrical percolation threshold of cementitious composites possessing self-sensing functionality incorporating different carbon-based materials. <i>Smart Materials and Structures</i> , 2016 , 25, 105005	3.4	91
17	Effect of mixing methods on the electrical properties of cementitious composites incorporating different carbon-based materials. <i>Construction and Building Materials</i> , 2016 , 104, 160-168	6.7	113
16	Influence of Cyclic Frost Deterioration on Water Sorptivity of Microcracked Cementitious Composites. <i>Journal of Materials in Civil Engineering</i> , 2016 , 28, 04015159	3	28
15	Deflection-hardening hybrid fiber reinforced concrete: The effect of aggregate content. <i>Construction and Building Materials</i> , 2016 , 125, 41-52	6.7	46
14	Nano-modification to improve the ductility of cementitious composites. <i>Cement and Concrete Research</i> , 2015 , 76, 170-179	10.3	73
13	Tests of high-performance fiber-reinforced concrete beams with different shear span-to-depth ratios and main longitudinal reinforcement. <i>Journal of Reinforced Plastics and Composites</i> , 2015 , 34, 1491-1505	2.9	14
12	Influence of cracking and healing on the gas permeability of cementitious composites. <i>Construction and Building Materials</i> , 2015 , 85, 217-226	6.7	49
11	Influence of Hydrated Lime Addition on the Self-Healing Capability of High-Volume Fly Ash Incorporated Cementitious Composites. <i>Journal of Materials in Civil Engineering</i> , 2015 , 27, 04014187	3	56

10	Assessing the self-healing capability of cementitious composites under increasing sustained loading. <i>Advances in Cement Research</i> , 2015 , 27, 581-592	1.8	17
9	Estimating the self-healing capability of cementitious composites through non-destructive electrical-based monitoring. <i>NDT and E International</i> , 2015 , 76, 26-37	4.1	44
8	A review of intrinsic self-healing capability of engineered cementitious composites: Recovery of transport and mechanical properties. <i>Construction and Building Materials</i> , 2015 , 101, 10-21	6.7	88
7	High-early-strength ductile cementitious composites with characteristics of low early-age shrinkage for repair of infrastructures. <i>Materials and Structures/Materiaux Et Constructions</i> , 2015 , 48, 1389-1403	3.4	37
6	Assessing the self-healing capability of cementitious composites under increasing sustained loading. <i>Advances in Cement Research</i> , 2015 , 27, 581-592	1.8	28
5	Effect of Self-Healing on the Different Transport Properties of Cementitious Composites. <i>Journal of Advanced Concrete Technology</i> , 2015 , 13, 112-123	2.3	44
4	Effect of Corrosion on Shear Behavior of Reinforced Engineered Cementitious Composite Beams. <i>ACI Structural Journal</i> , 2015 , 112,	1.7	33
3	Self-healing ability of cementitious composites: effect of addition of pre-soaked expanded perlite. <i>Magazine of Concrete Research</i> , 2014 , 66, 409-419	2	31
2	Investigation of the Bond between Concrete Substrate and ECC Overlays. <i>Journal of Materials in Civil Engineering</i> , 2014 , 26, 167-174	3	38
1	Self-healing capability of cementitious composites incorporating different supplementary cementitious materials. <i>Cement and Concrete Composites</i> , 2013 , 35, 89-101	8.6	194
