MILLIAM C MALKED

#	Article	IF	CITATIONS
1	Motor impairment after severe traumatic brain injury: A longitudinal multicenter study. Journal of Rehabilitation Research and Development, 2007, 44, 975-982.	1.6	184
2	Occupational Categories and Return to Work After Traumatic Brain Injury: A Multicenter Study. Archives of Physical Medicine and Rehabilitation, 2006, 87, 1576-1582.	0.9	146
3	Incidence and risk factors of posttraumatic seizures following traumatic brain injury: A Traumatic Brain Injury Model Systems Study. Epilepsia, 2016, 57, 1968-1977.	5.1	96
4	Exosomal neurofilament light. Neurology, 2020, 94, e2412-e2423.	1.1	83
5	Predicting Long-Term Global Outcome after Traumatic Brain Injury: Development of a Practical Prognostic Tool Using the Traumatic Brain Injury Model Systems National Database. Journal of Neurotrauma, 2018, 35, 1587-1595.	3.4	75
6	Higher exosomal phosphorylated tau and total tau among veterans with combat-related repetitive chronic mild traumatic brain injury. Brain Injury, 2018, 32, 1276-1284.	1.2	75
7	Structured Interview for Mild Traumatic Brain Injury after Military Blast: Inter-Rater Agreement and Development of Diagnostic Algorithm. Journal of Neurotrauma, 2015, 32, 464-473.	3.4	66
8	Prediction of headache severity (density and functional impact) after traumatic brain injury: A longitudinal multicenter study. Cephalalgia, 2013, 33, 998-1008.	3.9	49
9	Longitudinal Interactions of Pain and Posttraumatic Stress Disorder Symptoms in U.S. Military Service Members Following Blast Exposure. Journal of Pain, 2014, 15, 1023-1032.	1.4	35
10	Prognostic models for predicting posttraumatic seizures during acute hospitalization, and at 1 and 2 years following traumatic brain injury. Epilepsia, 2016, 57, 1503-1514.	5.1	33
11	Exosomal MicroRNAs in Military Personnel with Mild Traumatic Brain Injury: Preliminary Results from the Chronic Effects of Neurotrauma Consortium Biomarker Discovery Project. Journal of Neurotrauma, 2020, 37, 2482-2492.	3.4	31
12	Post-traumatic epilepsy associations with mental health outcomes in the first two years after moderate to severe TBI: A TBI Model Systems analysis. Epilepsy and Behavior, 2017, 73, 240-246.	1.7	27
13	Chronic Effects of Neurotrauma Consortium (CENC) multicentre study interim analysis: Differences between participants with positive versus negative mild TBI histories. Brain Injury, 2018, 32, 1079-1089.	1.2	26
14	Distinction in EEG slow oscillations between chronic mild traumatic brain injury and PTSD. International Journal of Psychophysiology, 2016, 106, 21-29.	1.0	23
15	Symptom Trajectories After Military Blast Exposure and the Influence of Mild Traumatic Brain Injury. Journal of Head Trauma Rehabilitation, 2017, 32, E16-E26.	1.7	23
16	Identification of Transient Altered Consciousness Induced by Military-Related Blast Exposure and Its Relation to Postconcussion Symptoms. Journal of Head Trauma Rehabilitation, 2013, 28, 68-76.	1.7	22
17	Global Outcome and Late Seizures After Penetrating Versus Closed Traumatic Brain Injury. Journal of Head Trauma Rehabilitation, 2015, 30, 231-240.	1.7	22
18	Predictive utility of an adapted Marshall head CT classification scheme after traumatic brain injury. Brain Injury, 2019, 33, 610-617.	1.2	21

WILLIAM C WALKER

#	Article	IF	CITATIONS
19	Using Decision Tree Methodology to Predict Employment After Moderate to Severe Traumatic Brain Injury. Journal of Head Trauma Rehabilitation, 2019, 34, E64-E74.	1.7	19
20	Social Competence Treatment After Traumatic Brain Injury: A Multicenter, Randomized Controlled Trial of Interactive Group Treatment Versus Noninteractive Treatment. Archives of Physical Medicine and Rehabilitation, 2018, 99, 2131-2142.	0.9	18
21	Extracellular Vesicle Proteins and MicroRNAs Are Linked to Chronic Post-Traumatic Stress Disorder Symptoms in Service Members and Veterans With Mild Traumatic Brain Injury. Frontiers in Pharmacology, 2021, 12, 745348.	3.5	18
22	A Prospective, Multicenter Study to Assess the Safety and Efficacy of Translingual Neurostimulation Plus Physical Therapy for the Treatment of a Chronic Balance Deficit Due to Mildâ€ŧoâ€Moderate Traumatic Brain Injury. Neuromodulation, 2020, , .	0.8	17
23	Diagnostic accuracy of Posttraumatic Stress Disorder Checklist in blast-exposed military personnel. Journal of Rehabilitation Research and Development, 2014, 51, 1203-1216.	1.6	15
24	Understanding the impact of mild traumatic brain injury on veteran service-connected disability: results from Chronic Effects of Neurotrauma Consortium. Brain Injury, 2018, 32, 1178-1187.	1.2	14
25	Is balance performance reduced after mild traumatic brain injury?: Interim analysis from chronic effects of neurotrauma consortium (CENC) multi-centre study. Brain Injury, 2018, 32, 1156-1168.	1.2	14
26	Health Services Utilization, Health Care Costs, and Diagnoses by Mild Traumatic Brain Injury Exposure: A Chronic Effects of Neurotrauma Consortium Study. Archives of Physical Medicine and Rehabilitation, 2020, 101, 1720-1730.	0.9	13
27	Functional brain connectivity and cortical thickness in relation to chronic pain in post-911 veterans and service members with mTBI. Brain Injury, 2018, 32, 1235-1243.	1.2	12
28	Laboratory impulsivity and depression in blast-exposed military personnel with post-concussion syndrome. Psychiatry Research, 2016, 246, 321-325.	3.3	10
29	Relationship of medical comorbidities to psychological health at 2 and 5 years following traumatic brain injury (TBI) Rehabilitation Psychology, 2021, 66, 107-117.	1.3	10
30	Obstructive Sleep Apnea Risk Is Associated with Cognitive Impairment after Controlling for Mild Traumatic Brain Injury History: A Chronic Effects of Neurotrauma Consortium Study. Journal of Neurotrauma, 2020, 37, 2517-2527.	3.4	8
31	Randomized trial of rTMS in traumatic brain injury: improved subjective neurobehavioral symptoms and increases in EEG delta activity. Brain Injury, 2022, 36, 683-692.	1.2	8
32	Rapid-Response Impulsivity Predicts Depression and Posttraumatic Stress Disorder Symptomatology at 1-Year Follow-Up in Blast-Exposed Service Members. Archives of Physical Medicine and Rehabilitation, 2017, 98, 1646-1651.e1.	0.9	6
33	Recruiting for a multicentre DoD and VA longitudinal study: lessons learned. Brain Injury, 2018, 32, 1217-1224.	1.2	6
34	Depression as a Predictor of Long-term Employment Outcomes Among Individuals With Moderate-to-Severe Traumatic Brain Injury. Archives of Physical Medicine and Rehabilitation, 2019, 100, 1837-1843.	0.9	6
35	Remote blast-related mild traumatic brain injury is associated with differential expression of exosomal microRNAs identified in neurodegenerative and immunological processes. Brain Injury, 2022, 36, 652-661.	1.2	4
36	Auditory evoked brain potentials as markers of chronic effects of mild traumatic brain injury in mid-life. Clinical Neurophysiology, 2021, 132, 2979-2988.	1.5	3

WILLIAM C WALKER

#	Article	IF	CITATIONS
37	Demographic, military, and health comorbidity variables by mild TBI and PTSD status in the LIMBIC-CENC cohort. Brain Injury, 2022, 36, 598-606.	1.2	2
38	Relation of Mild Traumatic Brain Injury history to abnormalities on a preliminary Neuroendocrine screen; A multicenter LIMBIC-CENC analysis. Brain Injury, 2022, 36, 607-619.	1.2	2
39	Prevalence and Characteristics of Low Back Pain in a Rural Ghana Primary Care Clinic Population. PM and R, 2020, 12, 251-256.	1.6	1
40	Clinical features of dementia cases ascertained by ICD coding in LIMBIC-CENC multicenter study of mild traumatic brain injury. Brain Injury, 2022, 36, 644-651.	1.2	1
41	Sensory Phenotypes for Balance Dysfunction After Mild Traumatic Brain Injury. Neurology, 2022, 99, .	1.1	1
42	Pain Descriptors Used by Military Personnel Deployed to Iraq and Afghanistan Following Combat-Related Blast Experience. Military Psychology, 2015, 27, 376-383.	1.1	0
43	Response to Foks et al. (doi: 10.1089/neu.2018.5979): Why Our Long-Term Functional Prognosis Tools are a Valuable Contribution to the Traumatic Brain Injury Outcome Literature. Journal of Neurotrauma, 2019, 36, 1384-1385.	3.4	0
44	0632 Early sleep-disordered breathing in moderate-to-severe traumatic brain injury (TBI) is linked with chronic pain status at long-term follow-up: A TBI Model Systems study. Sleep, 2022, 45, A277-A278.	1.1	0
