

# Quan Zhao

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/3895076/quan-zhao-publications-by-citations.pdf>

**Version:** 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

14

#	Paper	IF	Citations
14	A parametric finite element method for solid-state dewetting problems with anisotropic surface energies. <i>Journal of Computational Physics</i> , <b>2017</b> , 330, 380-400	4.1	23
13	Solid-state dewetting and island morphologies in strongly anisotropic materials. <i>Scripta Materialia</i> , <b>2016</b> , 115, 123-127	5.6	21
12	Application of Onsageris variational principle to the dynamics of a solid toroidal island on a substrate. <i>Acta Materialia</i> , <b>2019</b> , 163, 154-160	8.4	11
11	A Parametric Finite Element Method for Solid-State Dewetting Problems in Three Dimensions. <i>SIAM Journal of Scientific Computing</i> , <b>2020</b> , 42, B327-B352	2.6	10
10	Sharp-interface approach for simulating solid-state dewetting in two dimensions: A Cahn-Hoffman vector formulation. <i>Physica D: Nonlinear Phenomena</i> , <b>2019</b> , 390, 69-83	3.3	9
9	A sharp-interface model and its numerical approximation for solid-state dewetting with axisymmetric geometry. <i>Journal of Computational and Applied Mathematics</i> , <b>2019</b> , 361, 144-156	2.4	8
8	Sharp-Interface Model for Simulating Solid-State Dewetting in Three Dimensions. <i>SIAM Journal on Applied Mathematics</i> , <b>2020</b> , 80, 1654-1677	1.8	8
7	Triple junction drag effects during topological changes in the evolution of polycrystalline microstructures. <i>Acta Materialia</i> , <b>2017</b> , 128, 345-350	8.4	6
6	An energy-stable parametric finite element method for simulating solid-state dewetting. <i>IMA Journal of Numerical Analysis</i> , <b>2021</b> , 41, 2026-2055	1.8	6
5	An energy-stable finite element method for the simulation of moving contact lines in two-phase flows. <i>Journal of Computational Physics</i> , <b>2020</b> , 417, 109582	4.1	4
4	A Structure-Preserving Parametric Finite Element Method for Surface Diffusion. <i>SIAM Journal on Numerical Analysis</i> , <b>2021</b> , 59, 2775-2799	2.4	4
3	A finite element method for electrowetting on dielectric. <i>Journal of Computational Physics</i> , <b>2021</b> , 429, 109998	4.1	2
2	Volume-preserving parametric finite element methods for axisymmetric geometric evolution equations. <i>Journal of Computational Physics</i> , <b>2022</b> , 460, 111180	4.1	2
1	A thermodynamically consistent model and its conservative numerical approximation for moving contact lines with soluble surfactants. <i>Computer Methods in Applied Mechanics and Engineering</i> , <b>2021</b> , 385, 114033	5.7	1
