| #  | ARTICLE                                                                                                                                                                   | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Faster R-CNN Implementation Method for Multi-Fruit Detection Using Tensorflow Platform. , 2018, , .                                                                       |     | 24        |
| 2  | A hybrid recommendation system for E-commerce based on product description and user profile. , 2017, , .                                                                  |     | 17        |
| 3  | LSTM With Adam Optimization-Powered High Accuracy Preeclampsia Classification. , 2019, , .                                                                                |     | 15        |
| 4  | Ant colony algorithm for feature selection on microarray datasets. , 2016, , .                                                                                            |     | 14        |
| 5  | Recommendation system for property search using content based filtering method. , 2018, , .                                                                               |     | 10        |
| 6  | Arrhythmia Classification Using Long Short-Term Memory with Adaptive Learning Rate. Emitter: International Journal of Engineering Technology, 2018, 6, 75-91.             | 0.7 | 9         |
| 7  | Deep learning algorithm for arrhythmia detection. , 2017, , .                                                                                                             |     | 8         |
| 8  | Feature selection algorithm using information gain based clustering for supporting the treatment process of breast cancer. , 2016, , .                                    |     | 7         |
| 9  | Neural Networks Algorithm to Inquire Previous Preeclampsia Factors in Women with Chronic Hypertension During Pregnancy in Childbirth Process. , 2018, , .                 |     | 7         |
| 10 | The determinant factor of breast cancer on medical oncology using feature selection based clustering. , 2016, , .                                                         |     | 6         |
| 11 | Data Mining Approach for Breast Cancer Patient Recovery. Emitter: International Journal of Engineering Technology, 2017, 5, 36-71.                                        | 0.7 | 6         |
| 12 | Dimensionality Reduction Algorithms on High Dimensional Datasets. Emitter: International Journal of Engineering Technology, 2014, 2, .                                    | 0.7 | 5         |
| 13 | Corn Pests and Diseases Prediction Using Linear Regression and Natural Spline Methods. , 2018, , .                                                                        |     | 4         |
| 14 | Botnet Detection in Network System Through Hybrid Low Variance Filter, Correlation Filter and Supervised Mining Process. , 2018, , .                                      |     | 4         |
| 15 | Feature Selection Algorithm For Intrusion Detection Using Cuckoo Search Algorithm. , 2020, , .                                                                            |     | 4         |
| 16 | Feature selection software development using Artificial Bee Colony on DNA microarray data. , 2017, , .                                                                    |     | 3         |
| 17 | Linked data for air pollution monitoring. , 2017, , .                                                                                                                     |     | 3         |
| 18 | Influence of Logistic Regression Models For Prediction and Analysis of Diabetes Risk Factors. Emitter: International Journal of Engineering Technology, 2018, 6, 151-167. | 0.7 | 3         |

| #  | ARTICLE                                                                                                       | IF | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------|----|-----------|
| 19 | Discovering patterns of NED-breast cancer based on association rules using apriori and FP-growth. , 2017, , . |    | 2         |
| 20 | Big data analysis architecture for multi IDS sensors using memory based processor. , 2017, , .                |    | 2         |
