#	ARTICLE	IF	CITATIONS
1	Sensitive Response of Atmospheric Oxidative Capacity to the Uncertainty in the Emissions of Nitric Oxide (NO) From Soils in Amazonia. <i>Geophysical Research Letters</i> , 2024, 51, .	4.0	0
2	Pyrocumulonimbus affect average stratospheric aerosol composition. <i>Science</i> , 2023, 379, 815-820.	20.9	10
3	Neutral Tropical African CO ₂ Exchange Estimated From Aircraft and Satellite Observations. <i>Global Biogeochemical Cycles</i> , 2023, 37, .	4.8	1
4	Earlier snowmelt may lead to late season declines in plant productivity and carbon sequestration in Arctic tundra ecosystems. <i>Scientific Reports</i> , 2022, 12, 3986.	3.4	22
5	A multi-city urban atmospheric greenhouse gas measurement data synthesis. <i>Scientific Data</i> , 2022, 9, .	5.4	8
6	An optimal estimation-based retrieval of upper atmospheric oxygen airglow and temperature from SCIAMACHY limb observations. <i>Atmospheric Measurement Techniques</i> , 2022, 15, 3721-3745.	3.1	1
7	The Global Budget of Atmospheric Methanol: New Constraints on Secondary, Oceanic, and Terrestrial Sources. <i>Journal of Geophysical Research D: Atmospheres</i> , 2021, 126, e2020JD033439.	3.3	43
8	Spectral calibration of the MethaneAIR instrument. <i>Atmospheric Measurement Techniques</i> , 2021, 14, 3737-3753.	3.1	12
9	Satellite-based survey of extreme methane emissions in the Permian basin. <i>Science Advances</i> , 2021, 7, .	10.9	78
10	Atmospheric mercury sources in a coastal-urban environment: a case study in Boston, Massachusetts, USA. <i>Environmental Sciences: Processes and Impacts</i> , 2021, 23, 1914-1929.	3.4	2
11	Majority of US urban natural gas emissions unaccounted for in inventories. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2021, 118, .	7.6	39
12	Large contribution of biomass burning emissions to ozone throughout the global remote troposphere. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2021, 118, .	7.6	58
13	The FLUXNET2015 dataset and the ONEFlux processing pipeline for eddy covariance data. <i>Scientific Data</i> , 2020, 7, 225.	5.4	720
14	Global Atmospheric Budget of Acetone: Air-Sea Exchange and the Contribution to Hydroxyl Radicals. <i>Journal of Geophysical Research D: Atmospheres</i> , 2020, 125, e2020JD032553.	3.3	20
15	Carbon budget of the Harvard Forest Long-Term Ecological Research site: pattern, process, and response to global change. <i>Ecological Monographs</i> , 2020, 90, e01423.	5.4	75
16	Increasing contribution of peatlands to boreal evapotranspiration in a warming climate. <i>Nature Climate Change</i> , 2020, 10, 555-560.	14.3	114
17	Evidence for an Oceanic Source of Methyl Ethyl Ketone to the Atmosphere. <i>Geophysical Research Letters</i> , 2020, 47, e2019GL086045.	4.0	8
18	Global atmospheric CO ₂ inverse models converging on neutral tropical land exchange, but disagreeing on fossil fuel and atmospheric growth rate. <i>Biogeosciences</i> , 2019, 16, 117-134.	3.4	81

#	ARTICLE	IF	CITATIONS
19	Listening to the Forest: An Artificial Neural Network-Based Model of Carbon Uptake at Harvard Forest. <i>Journal of Geophysical Research G: Biogeosciences</i> , 2019, 124, 461-478.	3.0	4
20	Using Lidar Technology To Assess Urban Air Pollution and Improve Estimates of Greenhouse Gas Emissions in Boston. <i>Environmental Science & Technology</i> , 2019, 53, 8957-8966.	10.5	7
21	Atmospheric Acetaldehyde: Importance of Air-Sea Exchange and a Missing Source in the Remote Troposphere. <i>Geophysical Research Letters</i> , 2019, 46, 5601-5613.	4.0	42
22	Chemical evidence of inter-hemispheric air mass intrusion into the Northern Hemisphere mid-latitudes. <i>Scientific Reports</i> , 2018, 8, 4669.	3.4	12
23	Reevaluating the Use of O ₂ Å ¹ g Band in Spaceborne Remote Sensing of Greenhouse Gases. <i>Geophysical Research Letters</i> , 2018, 45, 5779-5787.	4.0	19
24	Effects of Oblique Wave Normal Angle and Noncircular Polarization of Electromagnetic Ion Cyclotron Waves on the Pitch Angle Scattering of Relativistic Electrons. <i>Journal of Geophysical Research: Space Physics</i> , 2018, 123, 4556-4573.	2.4	14
25	Anthropogenic and biogenic CO ₂ fluxes in the Boston urban region. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018, 115, 7491-7496.	7.6	116
26	Carbon dioxide sources from Alaska driven by increasing early winter respiration from Arctic tundra. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017, 114, 5361-5366.	7.6	160
27	Ecosystem fluxes of hydrogen in a mid-latitude forest driven by soil microorganisms and plants. <i>Global Change Biology</i> , 2017, 23, 906-919.	9.7	15
28	A multiyear estimate of methane fluxes in Alaska from CARVE atmospheric observations. <i>Global Biogeochemical Cycles</i> , 2016, 30, 1441-1453.	4.8	38
29	Seasonality of temperate forest photosynthesis and daytime respiration. <i>Nature</i> , 2016, 534, 680-683.	36.2	206
30	Detecting regional patterns of changing CO ₂ flux in Alaska. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 7733-7738.	7.6	35
31	A large increase in U.S. methane emissions over the past decade inferred from satellite data and surface observations. <i>Geophysical Research Letters</i> , 2016, 43, 2218-2224.	4.0	121
32	The terrestrial biosphere as a net source of greenhouse gases to the atmosphere. <i>Nature</i> , 2016, 531, 225-228.	36.2	427
33	Cold season emissions dominate the Arctic tundra methane budget. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 40-45.	7.6	291
34	Seasonal fluxes of carbonyl sulfide in a midlatitude forest. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 14162-14167.	7.6	72
35	Methane emissions from natural gas infrastructure and use in the urban region of Boston, Massachusetts. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 1941-1946.	7.6	232
36	Global methane and nitrous oxide emissions from terrestrial ecosystems due to multiple environmental changes. <i>Ecosystem Health and Sustainability</i> , 2015, 1, 1-20.	3.4	192

#	ARTICLE	IF	CITATIONS
37	North American terrestrial CO ₂ uptake largely offset by CH ₄ and N ₂ O emissions: toward a full accounting of the greenhouse gas budget. <i>Climatic Change</i> , 2015, 129, 413-426.	3.7	112
38	Evaluation of the airborne quantum cascade laser spectrometer (QCLS) measurements of the carbon and greenhouse gas suite "CO ₂ , CH ₄ , N ₂ O, and CO" during the CalNex and HIPPO campaigns. <i>Atmospheric Measurement Techniques</i> , 2014, 7, 1509-1526.	3.1	76
39	Global emissions of refrigerants HCFC-22 and HFC-134a: Unforeseen seasonal contributions. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 17379-17384.	7.6	68
40	Methane emissions from Alaska in 2012 from CARVE airborne observations. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 16694-16699.	7.6	58
41	Observational evidence for interhemispheric hydroxyl-radical parity. <i>Nature</i> , 2014, 513, 219-223.	36.2	127
42	Comparison of upper tropospheric carbon monoxide from MOPITT, ACE-FTS, and HIPPO-QCLS. <i>Journal of Geophysical Research D: Atmospheres</i> , 2014, 119, 14,144.	3.3	10
43	Carbonyl sulfide in the planetary boundary layer: Coastal and continental influences. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 8001-8009.	3.3	20
44	Validation of MOPITT Version 5 thermal-infrared, near-infrared, and multispectral carbon monoxide profile retrievals for 2000-2011. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 6710-6725.	3.3	125
45	Atmospheric CH ₄ in the first decade of the 21st century: Inverse modeling analysis using SCIAMACHY satellite retrievals and NOAA surface measurements. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 7350-7369.	3.3	229
46	Soil respiration in a northeastern US temperate forest: a 22-year synthesis. <i>Ecosphere</i> , 2013, 4, 1-28.	2.2	86
47	Nitrous oxide (N ₂ O) emissions from California based on 2010 CalNex airborne measurements. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 2809-2820.	3.3	25
48	Quantifying sources of methane using light alkanes in the Los Angeles basin, California. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 4974-4990.	3.3	170
49	Contemporary and projected biogenic fluxes of methane and nitrous oxide in North American terrestrial ecosystems. <i>Frontiers in Ecology and the Environment</i> , 2012, 10, 528-536.	2.9	41
50	How climate and vegetation type influence evapotranspiration and water use efficiency in Canadian forest, peatland and grassland ecosystems. <i>Agricultural and Forest Meteorology</i> , 2012, 153, 14-30.	4.8	238
51	Mass fluxes and isofluxes of methane (CH ₄) at a New Hampshire fen measured by a continuous wave quantum cascade laser spectrometer. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	28
52	Airborne observations of methane emissions from rice cultivation in the Sacramento Valley of California. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	50
53	Atmospheric observations of Arctic Ocean methane emissions up to 82° north. <i>Nature Geoscience</i> , 2012, 5, 318-321.	11.9	127
54	Attributing uncertainties in simulated biospheric carbon fluxes to different error sources. <i>Global Biogeochemical Cycles</i> , 2011, 25, n/a-n/a.	4.8	43

#	ARTICLE	IF	CITATIONS
55	Tropospheric distribution and variability of N ₂ O: Evidence for strong tropical emissions. <i>Geophysical Research Letters</i> , 2011, 38, .	4.0	78
56	Simultaneous measurements of atmospheric HONO and NO ₂ via absorption spectroscopy using tunable mid-infrared continuous-wave quantum cascade lasers. <i>Applied Physics B: Lasers and Optics</i> , 2011, 102, 417-423.	2.1	57
57	HIAPER Pole-to-Pole Observations (HIPPO): fine-grained, global-scale measurements of climatically important atmospheric gases and aerosols. <i>Philosophical Transactions Series A, Mathematical, Physical, and Engineering Sciences</i> , 2011, 369, 2073-2086.	3.5	357
58	Coupled weather research and forecasting "stochastic time-inverted lagrangian transport (WRF-STILT) model. <i>Meteorology and Atmospheric Physics</i> , 2010, 107, 51-64.	2.0	160
59	Atmospheric constraints on 2004 emissions of methane and nitrous oxide in North America from atmospheric measurements and a receptor-oriented modeling framework. <i>Journal of Integrative Environmental Sciences</i> , 2010, 7, 125-133.	2.6	20
60	Interannual, seasonal, and diel variation in soil respiration relative to ecosystem respiration at a wetland to upland slope at Harvard Forest. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	59
61	Latitudinal patterns of magnitude and interannual variability in net ecosystem exchange regulated by biological and environmental variables. <i>Global Change Biology</i> , 2009, 15, 2905-2920.	9.7	98
62	Modeling the carbon balance of Amazonian rain forests: resolving ecological controls on net ecosystem productivity. <i>Ecological Monographs</i> , 2009, 79, 445-463.	5.4	34
63	Mechanistic scaling of ecosystem function and dynamics in space and time: Ecosystem Demography model version 2. <i>Journal of Geophysical Research</i> , 2009, 114, .	3.3	405
64	Modeling analysis of primary controls on net ecosystem productivity of seven boreal and temperate coniferous forests across a continental transect. <i>Global Change Biology</i> , 2008, 14, 1765-1784.	9.7	33
65	A satellite-based biosphere parameterization for net ecosystem CO ₂ exchange: Vegetation Photosynthesis and Respiration Model (VPRM). <i>Global Biogeochemical Cycles</i> , 2008, 22, .	4.8	262
66	Emissions of CH ₄ and N ₂ O over the United States and Canada based on a receptor-oriented modeling framework and COBRA-NA atmospheric observations. <i>Geophysical Research Letters</i> , 2008, 35, .	4.0	133
67	Precision requirements for space-based data. <i>Journal of Geophysical Research</i> , 2007, 112, .	3.3	330
68	"Designing Lagrangian experiments to measure regional-scale trace gas fluxes" <i>Journal of Geophysical Research</i> , 2007, 112, .	3.3	13
69	Seasonal controls on the exchange of carbon and water in an Amazonian rain forest. <i>Journal of Geophysical Research</i> , 2007, 112, .	3.3	206
70	The effects of biomass burning aerosols and clouds on the CO ₂ flux in Amazonia. <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2007, 59, 338-349.	1.6	122
71	Comparison of carbon dioxide fluxes over three boreal black spruce forests in Canada. <i>Global Change Biology</i> , 2007, 13, 89-107.	9.7	200
72	Anthropogenic emissions of nonmethane hydrocarbons in the northeastern United States: Measured seasonal variations from 1992-1996 and 1999-2001. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	29

#	ARTICLE	IF	CITATIONS
73	Continuing global significance of emissions of Montreal Protocol "restricted halocarbons in the United States and Canada. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	41
74	Uncertainties in, and interpretation of, carbon flux estimates using the eddy covariance technique. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	190
75	On the use of MODIS EVI to assess gross primary productivity of North American ecosystems. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	275
76	What have we learned from intensive atmospheric sampling field programmes of CO ₂ ?. <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2006, 58, 331-343.	1.6	31
77	Estimating regional carbon exchange in New England and Quebec by combining atmospheric, ground-based and satellite data. <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2006, 58, 344-358.	1.6	70
78	Site-level evaluation of satellite-based global terrestrial gross primary production and net primary production monitoring. <i>Global Change Biology</i> , 2005, 11, 666-684.	9.7	288
79	Climatic variability and vegetation vulnerability in Amazonia. <i>Geophysical Research Letters</i> , 2005, 32, .	4.0	100
80	Radon fluxes in tropical forest ecosystems of Brazilian Amazonia: night-time CO ₂ net ecosystem exchange derived from radon and eddy covariance methods. <i>Global Change Biology</i> , 2004, 10, 618-629.	9.7	53
81	Estimating photosynthetic ¹³ C discrimination in terrestrial CO ₂ exchange from canopy to regional scales. <i>Global Biogeochemical Cycles</i> , 2004, 18, n/a-n/a.	4.8	39
82	Fluxes of nitrogen oxides over a temperate deciduous forest. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	73
83	An empirical analysis of the spatial variability of atmospheric CO ₂ : Implications for inverse analyses and space-borne sensors. <i>Geophysical Research Letters</i> , 2004, 31, .	4.0	27
84	Measuring fluxes of trace gases at regional scales by Lagrangian observations: Application to the CO ₂ Budget and Rectification Airborne (COBRA) study. <i>Journal of Geophysical Research</i> , 2004, 109, .	3.3	75
85	A cross-biome comparison of daily light use efficiency for gross primary production. <i>Global Change Biology</i> , 2003, 9, 383-395.	9.7	300
86	Toward constraining regional-scale fluxes of CO ₂ with atmospheric observations over a continent: 1. Observed spatial variability from airborne platforms. <i>Journal of Geophysical Research</i> , 2003, 108, n/a-n/a.	3.3	175
87	A near-field tool for simulating the upstream influence of atmospheric observations: The Stochastic Time-Inverted Lagrangian Transport (STILT) model. <i>Journal of Geophysical Research</i> , 2003, 108, ACH 2-1-ACH 2-17.	3.3	442
88	Toward constraining regional-scale fluxes of CO ₂ with atmospheric observations over a continent: 2. Analysis of COBRA data using a receptor-oriented framework. <i>Journal of Geophysical Research</i> , 2003, 108, n/a-n/a.	3.3	197
89	Title is missing!. <i>Plant and Soil</i> , 2002, 242, 15-32.	3.7	40
90	A High-Precision Fast-Response Airborne CO ₂ Analyzer for In Situ Sampling from the Surface to the Middle Stratosphere. <i>Journal of Atmospheric and Oceanic Technology</i> , 2002, 19, 1532-1543.	1.1	70

#	ARTICLE	IF	CITATIONS
91	Severe chemical ozone loss inside the Arctic Polar Vortex during winter 1999-2000 Inferred from in situ airborne measurements. <i>Geophysical Research Letters</i> , 2001, 28, 2197-2200.	4.0	57
92	Factors Controlling Long- and Short-Term Sequestration of Atmospheric CO ₂ in a Mid-latitude Forest. <i>Science</i> , 2001, 294, 1688-1691.	20.9	525
93	The CO ₂ budget and rectification airborne study: Strategies for measuring rectifiers and regional fluxes. <i>Geophysical Monograph Series</i> , 2000, , 311-324.	0.0	25
94	Atmospheric Chemistry and Global Change. <i>Eos</i> , 1999, 80, 468.	0.1	4
95	Sensitivity of Boreal Forest Carbon Balance to Soil Thaw. <i>Science</i> , 1998, 279, 214-217.	20.9	711
96	Modelling the soil-plant-atmosphere continuum in a <i>Quercus-Acer</i> stand at Harvard Forest: the regulation of stomatal conductance by light, nitrogen and soil/plant hydraulic properties. <i>Plant, Cell and Environment</i> , 1996, 19, 911-927.	6.0	514
97	Measurements of carbon sequestration by long-term eddy covariance: methods and a critical evaluation of accuracy. <i>Global Change Biology</i> , 1996, 2, 169-182.	9.7	1,258
98	Environmental controls on the photosynthesis and respiration of a boreal lichen woodland: a growing season of whole-ecosystem exchange measurements by eddy correlation. <i>Oecologia</i> , 1995, 102, 443-452.	2.1	112
99	Measurements of stratospheric carbon dioxide and water vapor at northern midlatitudes: Implications for troposphere-to-stratosphere transport. <i>Geophysical Research Letters</i> , 1995, 22, 2737-2740.	4.0	45
100	Effects of atmospheric transport on column abundances of nitrogen and chlorine compounds in the Arctic stratosphere. <i>Geophysical Research Letters</i> , 1990, 17, 533-536.	4.0	9
101	Loss of ozone in the Arctic vortex for the winter of 1989. <i>Geophysical Research Letters</i> , 1990, 17, 561-564.	4.0	66
102	Denitrification in the Antarctic stratosphere. <i>Nature</i> , 1989, 339, 525-527.	36.2	82
103	Influence of polar stratospheric clouds on the depletion of Antarctic ozone. <i>Geophysical Research Letters</i> , 1988, 15, 871-874.	4.0	35
104	A Chemical Survey of the Mississippi Estuary. <i>Estuaries and Coasts</i> , 1987, 10, 1.	1.6	27
105	Antarctic O ₃ : Chemical mechanisms for the spring decrease. <i>Geophysical Research Letters</i> , 1986, 13, 1296-1299.	4.0	127
