

Rebecca M Sappington

List of Publications by Citations

Source: <https://exaly.com/author-pdf/3897610/rebecca-m-sappington-publications-by-citations.pdf>
Version: 2024-04-10

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

36 papers	1,836 citations	20 h-index	39 g-index
39 ext. papers	2,128 ext. citations	5.1 avg, IF	4.72 L-index

#	Paper	IF	Citations
36	Distal axonopathy with structural persistence in glaucomatous neurodegeneration. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2010 , 107, 5196-201	11.5	257
35	The microbead occlusion model: a paradigm for induced ocular hypertension in rats and mice 2010 , 51, 207-16		253
34	Induced autoimmunity to heat shock proteins elicits glaucomatous loss of retinal ganglion cell neurons via activated T-cell-derived fas-ligand. <i>Journal of Neuroscience</i> , 2008 , 28, 12085-96	6.6	159
33	TRPV1: contribution to retinal ganglion cell apoptosis and increased intracellular Ca ²⁺ with exposure to hydrostatic pressure 2009 , 50, 717-28		144
32	Optic neuropathy due to microbead-induced elevated intraocular pressure in the mouse 2011 , 52, 36-44		126
31	Interleukin-6 protects retinal ganglion cells from pressure-induced death. <i>Investigative Ophthalmology and Visual Science</i> , 2006 , 47, 2932-42		123
30	Quantitative correlation of optic nerve pathology with ocular pressure and corneal thickness in the DBA/2 mouse model of glaucoma. <i>Investigative Ophthalmology and Visual Science</i> , 2006 , 47, 986-96		106
29	Contribution of TRPV1 to microglia-derived IL-6 and NFkappaB translocation with elevated hydrostatic pressure 2008 , 49, 3004-17		103
28	Retina-on-a-chip: a microfluidic platform for point access signaling studies. <i>Biomedical Microdevices</i> , 2015 , 17, 114	3.7	45
27	Activation of transient receptor potential vanilloid-1 (TRPV1) influences how retinal ganglion cell neurons respond to pressure-related stress. <i>Channels</i> , 2015 , 9, 102-13	3	43
26	Short-term increases in transient receptor potential vanilloid-1 mediate stress-induced enhancement of neuronal excitation. <i>Journal of Neuroscience</i> , 2014 , 34, 15369-81	6.6	42
25	Pressure-induced regulation of IL-6 in retinal glial cells: involvement of the ubiquitin/proteasome pathway and NFkappaB. <i>Investigative Ophthalmology and Visual Science</i> , 2006 , 47, 3860-9		38
24	Astrocyte Reactivity: A Biomarker for Retinal Ganglion Cell Health in Retinal Neurodegeneration. <i>Journal of Clinical & Cellular Immunology</i> , 2014 , 5,	2.7	37
23	Morphometric changes in the rat optic nerve following short-term intermittent elevations in intraocular pressure 2010 , 51, 6431-40		37
22	The challenge of regenerative therapies for the optic nerve in glaucoma. <i>Experimental Eye Research</i> , 2017 , 157, 28-33	3.7	35
21	Interleukin-6 Deficiency Attenuates Retinal Ganglion Cell Axonopathy and Glaucoma-Related Vision Loss. <i>Frontiers in Neuroscience</i> , 2017 , 11, 318	5.1	31
20	Optic nerve degeneration in a murine model of juvenile ceroid lipofuscinosis. <i>Investigative Ophthalmology and Visual Science</i> , 2003 , 44, 3725-31		30

19	The nitric oxide-guanylate cyclase pathway and glaucoma. <i>Nitric Oxide - Biology and Chemistry</i> , 2018 , 77, 75-87	5	29
18	Virus-mediated EpoR76E Therapy Slows Optic Nerve Axonopathy in Experimental Glaucoma. <i>Molecular Therapy</i> , 2016 , 24, 230-239	11.7	24
17	The Microbead Occlusion Model of Ocular Hypertension in Mice. <i>Methods in Molecular Biology</i> , 2018 , 1695, 23-39	1.4	22
16	Spatial regulation of interleukin-6 signaling in response to neurodegenerative stressors in the retina. <i>American Journal of Neurodegenerative Disease</i> , 2012 , 1, 168-79	2.5	17
15	Morphological identification of ganglion cells expressing the alpha subunit of type II calmodulin-dependent protein kinase in the macaque retina. <i>Journal of Comparative Neurology</i> , 2005 , 481, 194-209	3.4	16
14	The relationship between the Young's modulus and dry etching rate of polydimethylsiloxane (PDMS). <i>Biomedical Microdevices</i> , 2019 , 21, 26	3.7	15
13	Impact of Graphene on the Efficacy of Neuron Culture Substrates. <i>Advanced Healthcare Materials</i> , 2018 , 7, e1701290	10.1	15
12	Interleukin-6: A Constitutive Modulator of Glycoprotein 130, Neuroinflammatory and Cell Survival Signaling in Retina. <i>Journal of Clinical & Cellular Immunology</i> , 2016 , 7,	2.7	12
11	Probing electrical signals in the retina via graphene-integrated microfluidic platforms. <i>Nanoscale</i> , 2016 , 8, 19043-19049	7.7	12
10	Stressor-dependent Alterations in Glycoprotein 130: Implications for Glial Cell Reactivity, Cytokine Signaling and Ganglion Cell Health in Glaucoma. <i>Journal of Clinical & Experimental Ophthalmology</i> , 2013 , 4,	0	12
9	Oral Delivery of a Synthetic Sterol Reduces Axonopathy and Inflammation in a Rodent Model of Glaucoma. <i>Frontiers in Neuroscience</i> , 2017 , 11, 45	5.1	10
8	Pressure-Induced Alterations in PEDF and PEDF-R Expression: Implications for Neuroprotective Signaling in Glaucoma. <i>Journal of Clinical & Experimental Ophthalmology</i> , 2015 , 6,	0	10
7	Constitutive and Stress-induced Expression of CCL5 Machinery in Rodent Retina. <i>Journal of Clinical & Cellular Immunology</i> , 2017 , 8,	2.7	8
6	Impairment of Membrane Repolarization Accompanies Axon Transport Deficits in Glaucoma. <i>Frontiers in Neuroscience</i> , 2019 , 13, 1139	5.1	8
5	Increased bioavailability of cyclic guanylate monophosphate prevents retinal ganglion cell degeneration. <i>Neurobiology of Disease</i> , 2019 , 121, 65-75	7.5	6
4	Ccl5 Mediates Proper Wiring of Feedforward and Lateral Inhibition Pathways in the Inner Retina. <i>Frontiers in Neuroscience</i> , 2018 , 12, 702	5.1	6
3	Pressure-dependent modulation of inward-rectifying K channels: implications for cation homeostasis and K dynamics in glaucoma. <i>American Journal of Physiology - Cell Physiology</i> , 2019 , 317, C375-C389	5.4	2
2	Phenotypes of primary retinal macroglia: Implications for purification and culture conditions. <i>Experimental Eye Research</i> , 2019 , 182, 85-92	3.7	2

- 1 Interleukin-6 promotes microtubule stability in axons via Stat3 protein-protein interactions.
Science, **2021**, 24, 103141
