#	ARTICLE	IF	CITATIONS
1	Estrogen receptor signaling in prostate cancer: Implications for carcinogenesis and tumor progression. <i>Prostate</i> , 2018, 78, 2-10.	1.2	124
2	Significance of prostate cancer missed on needle biopsy tools for retrieving missed cancer. <i>Prostate</i> , 2016, 76, 369-375.	1.2	9
3	Intraductal carcinoma of the prostate: Precursor or aggressive phenotype of prostate cancer?. <i>Prostate</i> , 2013, 73, 442-448.	1.2	29
4	Factors Implicated in Radiation Therapy Failure and Radiosensitization of Prostate Cancer. <i>Prostate Cancer</i> , 2012, 2012, 1-12.	0.4	38
5	From pathogenesis to prevention of castration resistant prostate cancer. <i>Prostate</i> , 2010, 70, 100-112.	1.2	68
6	The Evolving Role of Oestrogens and Their Receptors in the Development and Progression of Prostate Cancer. <i>European Urology</i> , 2009, 55, 533-542.	0.9	153
7	A Proposal on the Identification, Histologic Reporting, and Implications of Intraductal Prostatic Carcinoma. <i>Archives of Pathology and Laboratory Medicine</i> , 2007, 131, 1103-1109.	1.2	118
8	Differential expression of the estrogen receptor beta (ER?) in human prostate tissue, premalignant changes, and in primary, metastatic, and recurrent prostatic adenocarcinoma. <i>Prostate</i> , 2003, 54, 79-87.	1.2	197
9	Apoptosis resistance of neuroendocrine phenotypes in prostatic adenocarcinoma. <i>Prostate</i> , 2002, 53, 118-123.	1.2	74
10	Morphogenesis of Prostate Cancer. <i>European Urology</i> , 2001, 39, 5-7.	0.9	17
11	Progesterone receptor expression in human prostate cancer: Correlation with tumor progression. <i>Prostate</i> , 2001, 48, 285-291.	1.2	77
12	Estrogen receptor gene expression and its relation to the estrogen-inducible HSP27 heat shock protein in hormone refractory prostate cancer. <i>Prostate</i> , 2000, 45, 36-41.	1.2	33
13	Novel amplification unit at chromosome 3q25-q27 in human prostate cancer. <i>Prostate</i> , 2000, 45, 207-215.	1.2	83
14	Estrogen receptor gene expression and its relation to the estrogen-inducible HSP27 heat shock protein in hormone refractory prostate cancer. , 2000, 45, 36.		1
15	Comparative genomic hybridization reveals DNA copy number gains to frequently occur in human prostate cancer. , 1999, 39, 79-86.		76
16	Estrogen Receptor Expression in Prostate Cancer and Premalignant Prostatic Lesions. <i>American Journal of Pathology</i> , 1999, 155, 641-647.	1.9	198
17	Neuroendocrine cells in benign and malignant prostate tissue: Morphogenesis, proliferation, and androgen receptor status. <i>Prostate</i> , 1998, 36, 18-22.	1.2	142
18	Relation between Bcl-2, cell proliferation, and the androgen receptor status in prostate tissue and precursors of prostate cancer. , 1998, 34, 251-258.		52

#	ARTICLE	IF	CITATIONS
19	In situ hybridization analysis of genes coding collagen IV α 1 chain, laminin γ 1 chain, and s-laminin in prostate tissue and prostate cancer: Increased basement membrane gene expression in high-grade and metastatic lesions. , 1998, 36, 143-150.		22
20	Differentiation pathways and histogenetic aspects of normal and abnormal prostatic growth: A stem cell model. , 1996, 28, 98-106.		346
21	Differential expression of 5 α -reductase isoenzymes in the human prostate and prostatic carcinomas. , 1996, 29, 261-267.		98
22	Workgroup 1: Origins of prostate cancer. , 1996, 78, 362-365.		46
23	Differentiation pathways and histogenetic aspects of normal and abnormal prostatic growth: A stem cell model. , 1996, 28, 98.		10
24	Differential expression of the ps2 protein in the human prostate and prostate cancer: Association with premalignant changes and neuroendocrine differentiation. Human Pathology, 1995, 26, 824-828.	1.1	60
25	The proliferative function of basal cells in the normal and hyperplastic human prostate. Prostate, 1994, 24, 114-118.	1.2	231
26	Relation of endocrine-paracrine cells to cell proliferation in normal, hyperplastic, and neoplastic human prostate. Prostate, 1991, 19, 91-98.	1.2	184
