

Melissa A Linden

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/3904849/melissa-a-linden-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

34
papers

610
citations

#	Paper	IF	Citations
34	Sex differences in changes of protein synthesis with rapamycin treatment are minimized when metformin is added to rapamycin. <i>GeroScience</i> , 2021 , 43, 809-828	8.9	6
33	Physiologic Responses to Dietary Sulfur Amino Acid Restriction in Mice Are Influenced by Atf4 Status and Biological Sex. <i>Journal of Nutrition</i> , 2021 , 151, 785-799	4.1	8
32	Brain Protein Synthesis Rates in the UM-HET3 Mouse Following Treatment With Rapamycin or Rapamycin With Metformin. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2020 , 75, 40-49	6.4	10
31	Differential Effects of Rapamycin and Metformin in Combination With Rapamycin on Mechanisms of Proteostasis in Cultured Skeletal Myotubes. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2020 , 75, 32-39	6.4	9
30	The combination of exercise training and sodium-glucose cotransporter-2 inhibition improves glucose tolerance and exercise capacity in a rodent model of type 2 diabetes. <i>Metabolism: Clinical and Experimental</i> , 2019 , 97, 68-80	12.7	3
29	Metformin inhibits mitochondrial adaptations to aerobic exercise training in older adults. <i>Aging Cell</i> , 2019 , 18, e12880	9.9	74
28	Combined Exercise Training and Sodium-glucose Cotransporter 2 Inhibition Improves Glycemic Control and Exercise Tolerance When Compared to Pharmacotherapy Alone in a Model of Type 2 Diabetes. <i>FASEB Journal</i> , 2018 , 32, 853.3	0.9	
27	Fibroblast growth factor 21 increases hepatic oxidative capacity but not physical activity or energy expenditure in hepatic peroxisome proliferator-activated receptor α coactivator-1 β deficient mice. <i>Experimental Physiology</i> , 2018 , 103, 408-418	2.4	7
26	Exercise improves femoral whole-bone and tissue-level biomechanical properties in hyperphagic OLETF rats. <i>Applied Physiology, Nutrition and Metabolism</i> , 2017 , 42, 884-892	3	2
25	Endurance training lowers ribosome density despite increasing ribosome biogenesis markers in rodent skeletal muscle. <i>BMC Research Notes</i> , 2017 , 10, 399	2.3	3
24	Obesity and type 2 diabetes, not a diet high in fat, sucrose, and cholesterol, negatively impacts bone outcomes in the hyperphagic Otsuka Long Evans Tokushima Fatty rat. <i>Bone</i> , 2017 , 105, 200-211	4.7	7
23	Exercise initiated after the onset of insulin resistance improves trabecular microarchitecture and cortical bone biomechanics of the tibia in hyperphagic Otsuka Long Evans Tokushima Fatty rats. <i>Bone</i> , 2017 , 103, 188-199	4.7	12
22	A return to ad libitum feeding following caloric restriction promotes hepatic steatosis in hyperphagic OLETF rats. <i>American Journal of Physiology - Renal Physiology</i> , 2016 , 311, G387-95	5.1	7
21	Aerobic exercise training in the treatment of non-alcoholic fatty liver disease related fibrosis. <i>Journal of Physiology</i> , 2016 , 594, 5271-84	3.9	31
20	Fibroblast growth factor 21 and exercise-induced hepatic mitochondrial adaptations. <i>American Journal of Physiology - Renal Physiology</i> , 2016 , 310, G832-43	5.1	15
19	Combining metformin therapy with caloric restriction for the management of type 2 diabetes and nonalcoholic fatty liver disease in obese rats. <i>Applied Physiology, Nutrition and Metabolism</i> , 2015 , 40, 1038-47	3	27
18	Treating NAFLD in OLETF rats with vigorous-intensity interval exercise training. <i>Medicine and Science in Sports and Exercise</i> , 2015 , 47, 556-67	1.2	50

17	The effects of high fat diet and moderate exercise on TGF β and collagen deposition in mouse skeletal muscle. <i>Cytokine</i> , 2015 , 73, 23-9	4	29
16	Endurance exercise training programs intestinal lipid metabolism in a rat model of obesity and type 2 diabetes. <i>Physiological Reports</i> , 2015 , 3, e12232	2.6	11
15	eNOS Deficiency Increases Susceptibility to Western Diet Induced Hepatic Mitochondrial Dysfunction. <i>FASEB Journal</i> , 2015 , 29, 1004.3	0.9	
14	Type 2 Diabetes Alters Nitric Oxide Signaling in the Rat Aorta. <i>FASEB Journal</i> , 2015 , 29, 793.4	0.9	
13	Combining metformin and aerobic exercise training in the treatment of type 2 diabetes and NAFLD in OLETF rats. <i>American Journal of Physiology - Endocrinology and Metabolism</i> , 2014 , 306, E300-10	6	53
12	Moderate exercise training provides modest protection against adipose tissue inflammatory gene expression in response to high-fat feeding. <i>Physiological Reports</i> , 2014 , 2, e12071	2.6	38
11	Impact of various exercise modalities on hepatic mitochondrial function. <i>Medicine and Science in Sports and Exercise</i> , 2014 , 46, 1089-97	1.2	31
10	Improved efficacy of metformin therapy when combined with caloric restriction in the treatment of type 2 diabetes and NAFLD in OLETF rats (LB743). <i>FASEB Journal</i> , 2014 , 28, LB743	0.9	
9	Hepatic steatosis development with four weeks of physical inactivity in previously active, hyperphagic OLETF rats. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2013 , 304, R763-71	3.2	17
8	Weight-loss-associated changes in bone mineral density and bone turnover after partial weight regain with or without aerobic exercise in obese women. <i>European Journal of Clinical Nutrition</i> , 2012 , 66, 606-12	5.2	31
7	Vascular dysfunction and physical activity in multiple sclerosis. <i>Medicine and Science in Sports and Exercise</i> , 2012 , 44, 238-43	1.2	46
6	Exercise and weight loss improve exercise capacity independent of cardiac function in metabolic syndrome. <i>Angiology</i> , 2010 , 61, 192-7	2.1	10
5	Exercise and the metabolic syndrome with weight regain. <i>Journal of Applied Physiology</i> , 2010 , 109, 3-10	3.7	41
4	The effects of resistance training on metabolic health with weight regain. <i>Journal of Clinical Hypertension</i> , 2010 , 12, 64-72	2.3	7
3	Correlation of Normal Diastolic Cardiac Function With VO in the Metabolic Syndrome. <i>Preventive Cardiology</i> , 2009 , 12, 163-8		3
2	Predicting postprandial lipemia in healthy adults and in at-risk individuals with components of the cardiometabolic syndrome. <i>Journal of Clinical Hypertension</i> , 2009 , 11, 663-71	2.3	9
1	Interaction of exercise training and n-3 fatty acid supplementation on postprandial lipemia. <i>Applied Physiology, Nutrition and Metabolism</i> , 2007 , 32, 473-80	3	12
