|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | The association of gender and persistent opioid use following an acute pain event: A retrospective population based study of renal colic. <i>PLoS ONE</i> , 2021, 16, e0256582.                                                                                                                                                                                                  | 2.5 | 2         |
| 2  | Ambulatory percutaneous nephrolithotomy is safe and effective in patients with extended selection criteria. <i>Canadian Urological Association Journal</i> , 2021, 16, .                                                                                                                                                                                                         | 0.6 | 4         |
| 3  | Persistent Opioid Use Among Patients with Urolithiasis: A Population based Study. <i>European Urology Focus</i> , 2020, 6, 745-751.                                                                                                                                                                                                                                              | 3.1 | 16        |
| 4  | Risk Factors for Upstaging, Recurrence, and Mortality in Clinical T1-2 Renal Cell Carcinoma Patients Upstaged to pT3a Disease: An International Analysis Utilizing the 8th Edition of the Tumor-Node-Metastasis Staging Criteria. <i>Urology</i> , 2020, 138, 60-68.                                                                                                             | 1.0 | 20        |
| 5  | Reply to Vikas Mishra's Letter to the Editor, re: Gregory W. Hosier, Thomas McGregor, Darren Beiko, et al. Persistent Opioid Use Among Patients with Urolithiasis: A Population based Study. <i>Eur Urol Focus</i> . In press. <a href="https://doi.org/10.1016/j.euf.2019.08.011">https://doi.org/10.1016/j.euf.2019.08.011</a> . <i>European Urology Focus</i> , 2020, 7, 897. | 3.1 | 0         |
| 6  | Canadian Update on Surgical Procedures (CUSP) Urology Group consensus for intraoperative hemostasis during minimally invasive partial nephrectomy. <i>Canadian Urological Association Journal</i> , 2020, 14, E387-E393.                                                                                                                                                         | 0.6 | 2         |
| 7  | Crowdfunding in urology: Canadian perspective. <i>Canadian Urological Association Journal</i> , 2020, 15, E139-E143.                                                                                                                                                                                                                                                             | 0.6 | 5         |
| 8  | Analgesic prescribing habits and patterns of Canadian chief urology residents: A national survey. <i>Canadian Urological Association Journal</i> , 2020, 14, 199-203.                                                                                                                                                                                                            | 0.6 | 1         |
| 9  | Increased risk of new persistent opioid use in pediatric and young adult patients with kidney stones. <i>Canadian Urological Association Journal</i> , 2020, 14, 237-244.                                                                                                                                                                                                        | 0.6 | 10        |
| 10 | Kidney paired donation and the unique challenges of kidney shipment in Canada. <i>Canadian Journal of Surgery</i> , 2018, 61, 139-140.                                                                                                                                                                                                                                           | 1.2 | 2         |
| 11 | The transplant urologist's toolbox: Back-table ureteroscopy. <i>Canadian Urological Association Journal</i> , 2017, 11, 254.                                                                                                                                                                                                                                                     | 0.6 | 0         |
| 12 | Hilar control during laparoscopic donor nephrectomy: Practice patterns in Canada. <i>Canadian Urological Association Journal</i> , 2017, 11, 321-4.                                                                                                                                                                                                                              | 0.6 | 8         |
| 13 | CanMEDS scholars: A national survey on urology residents' attitudes towards research during training. <i>Canadian Urological Association Journal</i> , 2017, 12, E191-6.                                                                                                                                                                                                         | 0.6 | 17        |
| 14 | Vascular control during laparoscopic kidney donation. <i>Canadian Journal of Surgery</i> , 2017, 60, 150-151.                                                                                                                                                                                                                                                                    | 1.2 | 7         |
| 15 | Back-to-back comparison of mini-open vs. laparoscopic technique for living kidney donation. <i>Canadian Urological Association Journal</i> , 2016, 10, 253.                                                                                                                                                                                                                      | 0.6 | 15        |
| 16 | Expanding living kidney donor criteria with ex-vivo surgery for renal anomalies. <i>Canadian Urological Association Journal</i> , 2016, 10, 301.                                                                                                                                                                                                                                 | 0.6 | 7         |
| 17 | Retained Urethral Catheter Secondary to Placement in Proximal Ureter. <i>Case Reports in Urology</i> , 2016, 2016, 1-3.                                                                                                                                                                                                                                                          | 0.3 | 7         |
| 18 | Ureteric re-implant for the strictured renal allograft: How I do it. <i>Canadian Journal of Urology</i> , 2016, 23, 8296-300.                                                                                                                                                                                                                                                    | 0.0 | 3         |

| #  | ARTICLE                                                                                                                                                                                                                 | IF  | CITATIONS |
