SEDCIO DADDA

| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Chronic Exposure to Beta-Blockers Attenuates Inflammation and Mucin Content in a Murine Asthma<br>Model. American Journal of Respiratory Cell and Molecular Biology, 2008, 38, 256-262.   | 2.9 | 128       |
| 2  | The safety and effects of the beta-blocker, nadolol, in mild asthma: An open-label pilot study.<br>Pulmonary Pharmacology and Therapeutics, 2008, 21, 134-141.  | 2.6 | 121       |
| 3  | l² <sub>2</sub> -Adrenoceptor signaling is required for the development of an asthma phenotype in a<br>murine model. Proceedings of the National Academy of Sciences of the United States of America, 2009,<br>106, 2435-2440.                                      | 7.1 | 104       |
| 4  | Changes in β2-adrenoceptor and other signaling proteins produced by chronic administration of<br>â€ <sup>~</sup> β-blockers' in a murine asthma model. Pulmonary Pharmacology and Therapeutics, 2008, 21, 115-124.  | 2.6 | 68        |
| 5  | l̂² <sub>2</sub> -Adrenoceptor signaling in airway epithelial cells promotes eosinophilic inflammation,<br>mucous metaplasia, and airway contractility. Proceedings of the National Academy of Sciences of the<br>United States of America, 2017, 114, E9163-E9171. | 7.1 | 41        |
| 6  | Inverse agonism: from curiosity to accepted dogma, but is it clinically relevant?. Current Opinion in Pharmacology, 2007, 7, 146-150.   | 3.5 | 40        |
| 7  | Getting to the heart of asthma: Can "β blockers―be useful to treat asthma?. , 2007, 115, 360-374.   |     | 36        |
| 8  | Cardiotonic Steroids Stabilize Regulator of G Protein Signaling 2 Protein Levels. Molecular<br>Pharmacology, 2012, 82, 500-509.   | 2.3 | 23        |
| 9  | Digoxin-Mediated Upregulation of RGS2 Protein Protects against Cardiac Injury. Journal of Pharmacology and Experimental Therapeutics, 2016, 357, 311-319.   | 2.5 | 20        |
| 10 | Similarities and differences in the autonomic control of airway and urinary bladder smooth muscle.<br>Naunyn-Schmiedeberg's Archives of Pharmacology, 2008, 378, 217-224.   | 3.0 | 18        |
| 11 | Phosphodiesterase 4 Inhibitors Attenuate the Asthma Phenotype Produced by<br>β <sub>2</sub> -Adrenoceptor Agonists in Phenylethanolamine N-Methyltransferase–Knockout Mice.<br>American Journal of Respiratory Cell and Molecular Biology, 2016, 55, 234-242.       | 2.9 | 18        |
| 12 | Gαi2 signaling: friend or foe in cardiac injury and heart failure?. Naunyn-Schmiedeberg's Archives of<br>Pharmacology, 2012, 385, 443-453.  | 3.0 | 15        |
| 13 | Conditional disruption of interactions between Gαi2 and regulator of G protein signaling (RGS)<br>proteins protects the heart from ischemic injury. BMC Pharmacology & Toxicology, 2014, 15, 29.  | 2.4 | 9         |
| 14 | Serum Protein Profile in Women With Pregnancy Morbidity Associated With Antiphospholipid<br>Syndrome. Journal of Human Reproductive Sciences, 2017, 10, 10-17.  | 0.9 | 6         |
| 15 | Differences in asthma study models and the effectiveness of β <sub>2</sub> â€adrenoceptor ligands:<br>response to Lipworth <i>et al.</i> . British Journal of Pharmacology, 2016, 173, 250-251.   | 5.4 | 1         |
| 16 | A novel excisional wound pain model for evaluation of analgesics in rats. Korean Journal of Pain, 2021, 34, 165-175.  | 2.2 | 1         |
| 17 | Generation of $\hat{Gl_{\pm}}$ i2 G184S conditional mutant mice to study regulator of G protein signaling (RGS) proteins. FASEB Journal, 2012, 26, 1114.10.   | 0.5 | 0         |
