#	Article	IF	CITATIONS
1	Two routes to actorhood: lexicalized potency to act and identification of the actor role. Frontiers in Psychology, 2015, 6, 1.	2.1	1,451
2	The extended argument dependency model: A neurocognitive approach to sentence comprehension across languages Psychological Review, 2006, 113, 787-821.	3.8	353
3	An alternative perspective on "semantic P600―effects in language comprehension. Brain Research Reviews, 2008, 59, 55-73.	9.0	350
4	Who did what to whom? The neural basis of argument hierarchies during language comprehension. Neurolmage, 2005, 26, 221-233.	4.2	271
5	Neurobiological roots of language in primate audition: common computational properties. Trends in Cognitive Sciences, 2015, 19, 142-150.	7.8	225
6	Reconciling time, space and function: A new dorsal–ventral stream model of sentence comprehension. Brain and Language, 2013, 125, 60-76.	1.6	218
7	The Role of Prominence Information in the Realâ€Time Comprehension of Transitive Constructions: A Crossâ€Linguistic Approach. Language and Linguistics Compass, 2009, 3, 19-58.	2.3	168
8	The P600-as-P3 hypothesis revisited: Single-trial analyses reveal that the late EEG positivity following linguistically deviant material is reaction time aligned. Brain and Language, 2014, 137, 29-39.	1.6	157
9	Multi-dimensional contributions to garden path strength: Dissociating phrase structure from case marking. Journal of Memory and Language, 2004, 51, 495-522.	2.1	136
10	To Predict or Not to Predict: Influences of Task and Strategy on the Processing of Semantic Relations. Journal of Cognitive Neuroscience, 2007, 19, 1259-1274.	2.3	130
11	Toward a reliable, automated method of individual alpha frequency (IAF) quantification. Psychophysiology, 2018, 55, e13064.	2.4	123
12	Toward a Neurobiologically Plausible Model of Language-Related, Negative Event-Related Potentials. Frontiers in Psychology, 2019, 10, 298.	2.1	120
13	Think globally: Cross-linguistic variation in electrophysiological activity during sentence comprehension. Brain and Language, 2011, 117, 133-152.	1.6	114
14	The emergence of the unmarked: A new perspective on the language-specific function of Broca's area. Human Brain Mapping, 2005, 26, 178-190.	3.6	101
15	The status of subject–object reanalyses in the language comprehension architecture. Journal of Memory and Language, 2008, 59, 54-96.	2.1	101
16	Grammar overrides frequency: evidence from the online processing of flexible word order. Cognition, 2002, 85, B21-B30.	2.2	97
17	Fractionating language comprehension via frequency characteristics of the human EEG. NeuroReport, 2004, 15, 409-412.	1.2	96
18	Subjective Impressions Do Not Mirror Online Reading Effort: Concurrent EEG-Eyetracking Evidence from the Reading of Books and Digital Media. PLoS ONE, 2013, 8, e56178.	2.5	93

#	Article	IF	CITATIONS
19	On incremental interpretation: degrees of meaning accessed during sentence comprehension. Lingua, 2004, 114, 1213-1234.	1.0	91
20	Unmarked transitivity. Studies in Language Companion Series, 2008, , 413-434.	0.4	89
21	The neural mechanisms of word order processing revisited: Electrophysiological evidence from Japanese. Brain and Language, 2008, 107, 133-157.	1.6	82
22	Eliciting thematic reanalysis effects: The role of syntax-independent information during parsing. Language and Cognitive Processes, 2003, 18, 269-298.	2.2	77
23	The processing of German word stress: evidence for the prosodic hierarchy. Phonology, 2008, 25, 1-36.	0.3	77
24	Setting the Frame: The Human Brain Activates a Basic Low-Frequency Network for Language Processing. Cerebral Cortex, 2010, 20, 1286-1292.	2.9	70
25	On the universality of language comprehension strategies: Evidence from Turkish. Cognition, 2008, 106, 484-500.	2.2	67
26	The role of the posterior superior temporal sulcus in the processing of unmarked transitivity. NeuroImage, 2007, 35, 343-352.	4.2	66
27	The Neurophysiology of Language Processing Shapes the Evolution of Grammar: Evidence from Case Marking. PLoS ONE, 2015, 10, e0132819.	2.5	65
28	Linguistic prominence and Broca's area: The influence of animacy as a linearization principle. Neurolmage, 2006, 32, 1395-1402.	4.2	64
29	The role of animacy in the real time comprehension of Mandarin Chinese: Evidence from auditory event-related brain potentials. Brain and Language, 2008, 105, 112-133.	1.6	63
30	Parafoveal versus foveal N400s dissociate spreading activation from contextual fit. NeuroReport, 2009, 20, 1613-1618.	1.2	62
31	The N400 as a correlate of interpretively relevant linguistic rules: Evidence from Hindi. Neuropsychologia, 2009, 47, 3012-3022.	1.6	60
32	Contextual information modulates initial processes of syntactic integration: The role of inter- versus intrasentential predictions Journal of Experimental Psychology: Learning Memory and Cognition, 2003, 29, 871-882.	0.9	58
33	The neurophysiological basis of word order variations in German. Brain and Language, 2003, 86, 116-128.	1.6	57
34	Neuroimaging studies of sentence and discourse comprehension. , 2007, , 406-424.		54
35	Electrophysiology Reveals the Neural Dynamics of Naturalistic Auditory Language Processing: Event-Related Potentials Reflect Continuous Model Updates. ENeuro, 2017, 4, ENEURO.0311-16.2017.	1.9	54
36	The P600 as a correlate of ventral attention network reorientation. Cortex, 2015, 66, A3-A20.	2.4	53

#	Article	IF	CITATIONS
37	Word order and Broca's region: Evidence for a supra-syntactic perspective. Brain and Language, 2009, 111, 125-139.	1.6	52
38	Exploring the nature of the †subject'-preference: Evidence from the online comprehension of simple sentences in Mandarin Chinese. Language and Cognitive Processes, 2009, 24, 1180-1226.	2.2	51
39	Lexical prediction via forward models: N400 evidence from German Sign Language. Neuropsychologia, 2013, 51, 2224-2237.	1.6	47
40	Ungrammaticality detection and garden path strength: A commentary on Meng and Bader"s (2000) evidence for serial parsing. Language and Cognitive Processes, 2003, 18, 299-311.	2.2	45
41	Luigi piace a Laura?. Language Faculty and Beyond, 2014, , 83-118.	0.1	45
42	Conflicts in language processing: A new perspective on the N400–P600 distinction. Neuropsychologia, 2011, 49, 574-579.	1.6	41
43	The importance of linguistic typology for the neurobiology of language. Linguistic Typology, 2016, 20, 615-621.	1.2	37
44	Context-sensitive neural responses to conflict resolution: Electrophysiological evidence from subject–object ambiguities in language comprehension. Brain Research, 2006, 1098, 139-152.	2.2	32
45	Resting-state aperiodic neural dynamics predict individual differences in visuomotor performance and learning. Human Movement Science, 2021, 78, 102829.	1.4	28
46	Towards a Computational Model of Actor-Based Language Comprehension. Neuroinformatics, 2014, 12, 143-179.	2.8	26
47	Predicting "When―in Discourse Engages the Human Dorsal Auditory Stream: An fMRI Study Using Naturalistic Stories. Journal of Neuroscience, 2016, 36, 12180-12191.	3.6	25
48	Meaningful physical changes mediate lexical–semantic integration: Top-down and form-based bottom-up information sources interact in the N400. Neuropsychologia, 2011, 49, 3573-3582.	1.6	24
49	Neural mechanisms of sentence comprehension based on predictive processes and decision certainty: Electrophysiological evidence from non-canonical linearizations in a flexible word order language. Brain Research, 2016, 1633, 149-166.	2.2	24
50	Prominence vs. aboutness in sequencing: A functional distinction within the left inferior frontal gyrus. Brain and Language, 2012, 120, 96-107.	1.6	23
51	Sleep-Dependent Memory Consolidation and Incremental Sentence Comprehension: Computational Dependencies during Language Learning as Revealed by Neuronal Oscillations. Frontiers in Human Neuroscience, 2018, 12, 18.	2.0	22
52	When case meets agreement: event-related potential effects for morphology-based conflict resolution in human language comprehension. NeuroReport, 2005, 16, 875-878.	1.2	21
53	Semantic composition engenders an N400: evidence from Chinese compounds. NeuroReport, 2008, 19, 695-699.	1.2	21
54	Processing of false belief passages during natural story comprehension: An <scp>fMRI</scp> study. Human Brain Mapping, 2015, 36, 4231-4246.	3.6	21

#	Article	IF	CITATIONS
55	Comprehension demands modulate re-reading, but not first-pass reading behavior. Quarterly Journal of Experimental Psychology, 2018, 71, 198-210.	1.1	21
56	Age-Related Changes in Predictive Capacity Versus Internal Model Adaptability: Electrophysiological Evidence that Individual Differences Outweigh Effects of Age. Frontiers in Aging Neuroscience, 2015, 7, 217.	3.4	20
57	Minimality as vacuous distinctness: Evidence from cross-linguistic sentence comprehension. Lingua, 2009, 119, 1541-1559.	1.0	18
58	From story comprehension to the neurobiology of language. Language, Cognition and Neuroscience, 2019, 34, 405-410.	1.2	18
59	The wolf in sheep's clothing: Against a new judgement-driven imperialism. Theoretical Linguistics, 2007, 33, .	0.2	17
60	EEG and behavioral correlates of attentional processing while walking and navigating naturalistic environments. Scientific Reports, 2021, 11, 22325.	3.3	17
61	Animacy-based predictions in language comprehension are robust: Contextual cues modulate but do not nullify them. Brain Research, 2015, 1608, 108-137.	2.2	16
62	Individual Differences in Peripheral Hearing and Cognition Reveal Sentence Processing Differences in Healthy Older Adults. Frontiers in Neuroscience, 2020, 14, 573513.	2.8	15
63	The exceptional nature of the first person in natural story processing and the transfer of egocentricity. Language, Cognition and Neuroscience, 2019, 34, 411-427.	1.2	14
64	Cross-linguistic variation in the neurophysiological response to semantic processing: Evidence from anomalies at the borderline of awareness. Neuropsychologia, 2014, 56, 147-166.	1.6	13
65	Focused-attention meditation increases cognitive control during motor sequence performance: Evidence from the N2 cortical evoked potential. Behavioural Brain Research, 2020, 384, 112536.	2.2	13
66	Neural signatures of syntactic variation in speech planning. PLoS Biology, 2021, 19, e3001038.	5.6	13
67	Yes, You Can? A Speaker's Potency to Act upon His Words Orchestrates Early Neural Responses to Message-Level Meaning. PLoS ONE, 2013, 8, e69173.	2.5	12
68	The Role of Animacy in Online Argument Interpretation in Mandarin Chinese. Studies in Theoretical Psycholinguistics, 2012, , 91-119.	0.3	11
69	Processing flexible form-to-meaning mappings: Evidence for enriched composition as opposed to indeterminacy. Language and Cognitive Processes, 2013, 28, 1244-1274.	2.2	10
70	The Timecourse of Sentence Processing in the Brain. , 2016, , 607-620.		10
71	Prominence Facilitates Ambiguity Resolution: On the Interaction Between Referentiality, Thematic Roles and Word Order in Syntactic Reanalysis. Studies in Theoretical Psycholinguistics, 2012, , 239-271.	0.3	10
72	Response to Skeide and Friederici: the myth of the uniquely human â€~direct' dorsal pathway. Trends in Cognitive Sciences, 2015, 19, 484-485.	7.8	9

#	Article	IF	CITATIONS
73	Language Processing as a Precursor to Language Change: Evidence From Icelandic. Frontiers in Psychology, 2019, 10, 3013.	2.1	9
74	Sentence understanding depends on contextual use of semantic and real world knowledge. NeuroImage, 2016, 136, 10-25.	4.2	8
75	Action and Language Mechanisms in the Brain: Data, Models and Neuroinformatics. Neuroinformatics, 2014, 12, 209-225.	2.8	7
76	Where Is the Beat? The Neural Correlates of Lexical Stress and Rhythmical Well-formedness in Auditory Story Comprehension. Journal of Cognitive Neuroscience, 2017, 29, 1119-1131.	2.3	7
77	Preface: The neurobiology of syntax. Brain and Language, 2012, 120, 79-82.	1.6	5
78	Linguistic Sequence Processing and the Prefrontal Cortex. The Open Medical Imaging Journal, 2012, 6, 47-61.	0.8	5
79	Computational primitives in syntax and possible brain correlates. , 0, , 257-282.		4
80	The Argument Dependency Model. , 2016, , 357-369.		4
81	A modality-independent, neurobiological grounding for the combinatory capacity of the language-ready brain. Physics of Life Reviews, 2016, 16, 55-57.	2.8	4
82	Domain-general neural correlates of dependency formation: Using complex tones to simulate language. Cortex, 2017, 93, 50-67.	2.4	4
83	Case Syncretism, Animacy, and Word Order in Continental West Germanic: Neurolinguistic Evidence from a Comparative Study on Standard German, Zurich German, and Fering (North Frisian). Journal of Germanic Linguistics, 2020, 32, 217-310.	0.1	4
84	The interaction of predictive processing and similarity-based retrieval interference: an ERP study. Language, Cognition and Neuroscience, 2022, 37, 883-901.	1.2	4
85	Cross-linguistic differences in case marking shape neural power dynamics and gaze behavior during sentence planning. Brain and Language, 2022, 230, 105127.	1.6	4
86	Mini Pinyin: A modified miniature language for studying language learning and incremental sentence processing. Behavior Research Methods, 2020, 53, 1218-1239.	4.0	3
87	Semantic reversal anomalies under the microscope: Task and modality influences on languageâ€associated eventâ€related potentials. European Journal of Neuroscience, 2020, 52, 3803-3827.	2.6	3
88	Why a "word order difference" is not always a "word order" difference: a reply to Weyerts, Penke, Münte, Heinze, and Clahsen. Journal of Psycholinguistic Research, 2002, 31, 437-445.	1.3	2
89	Implementation is crucial but must be neurobiologically grounded. Physics of Life Reviews, 2014, 11, 365-366.	2.8	2
90	"And yet it moves―or why grammar overrides frequency: a reply to Kempen and Harbusch. Cognition, 2003, 90, 211-213.	2.2	1

#	Article	IF	CITATIONS
91	Commentary on Sanborn and Chater: Posterior Modes Are Attractor Basins. Trends in Cognitive Sciences, 2017, 21, 491-492.	7.8	1
92	Decomposing Gradience: Quantitative versus Qualitative Distinctions. , 2006, , 124-142.		1
93	Thematic role assignment in non-default verb classes: A cross-linguistic comparison of English and German. Glossa, 0, , .	0.5	1
94	Scrambled Wackernagel! Neural responses to noncanonical pronoun serializations in German. , 2019, , 209-250.		0
